[fol. 1268½] Govt. Ex. No. 216

Giant Portland Cement Company

603-610 Pennsylvania Building, 15th and Chestnut Streets, Philadelphia, Pennsylvania

September 8, 1919.

Cement Manufacturers Protective Ass'n, 19 West 44th St., New York City.

Gentlemen: In reporting our figures for the month of August, we neglected to note in connection with shipments for that month, that 3,292 barrels were shipped for the account of the Allentown Portland Cement Company and 1,742 barrels for the Hercules Cement Corporation. We advise you of this in the event of your desiring to make any correction in the figures.

Yours very truly, Giant Portland Cement Company. J. F. Lennig, Secretary.

Endorsed: Received Sep. 9, 1919. Cem't Mfg. Prot. Ass'n.

[fol. 1269] Govt. Ex. No. 217

Giant Portland Cement Company

603-610 Pennsylvania Building, 15th and Chestnut Streets, Philadelphia, Pennsylvania

September 12th, 1919.

Mr. George F. Bayle, Glens Falls Portland Cement Co., Glens Falls, New York.

My Dear Mr. Bayle: I am writing you personally following talk you had with Mr. Conn yesterday in the matter of selling us cement for say October and November delivery, in which you stated you felt you could ship us any part of 30,000 bbls. from say October 1st until November 15th, and I am writing you as stated personally in view of the fact that I am just leaving for a little holiday and want to have things in good shape before I go, and would ask if you will kindly drop us a line stating, that provided you can secure cars for shipment, if you can let us have any part of this cement that we may need and at what price, in our bags. Frankly in turn-
[fol. 1269¼] ing orders over to you all we would ask would be that we can make sales expense of 15¢ per bbl. out of any orders we turn over, and we would like to hear from you as soon as possible so that we can divert a car of new bags to your mill for shipment.

With kind regards, and awaiting your reply, we remain.

Yours very truly, R. E. Griffith, Vice-President. REG/F.

Endorsed: Glens Falls Portland Cement Co. Sep. 15, 1919, Glens Falls, N. Y.

[fol. 1270] GOVT. EX. No. 218

Sept. 15, 1919.

Mr. R. E. Griffith, Vice-Pres. Giant Portland Cement Co., Pennsylvania Bldg., Philadelphia, Pa.

MY DEAR MR. GRIFFITH: This is to acknowledge your favor of the 12th inst.

I do not know that Mr. Conn understood me thoroughly in my talk with him in New York on Thursday. For your information; I stated to him that we had already partially committed ourselves to another Cement Company before we had received any communications from you.

I also told him that whether or not we could ship you any cement would depend entirely on the future car supply, as you of course understand that we must take care of our own customers first.

If a little later on we find that we are in position to accept any business from you, we shall be glad to advise you accordingly, as we certainly would be very glad indeed to dispose of some of the large surplus which we have on hand.

Under the circumstances, I do not think that it would be a good plan for you to ship us any of the bags at the present time, as we will give you ample notice if we find that we can help you out.

As to the price, I have no doubt that we can get together on a price which will be mutually satisfactory.

Yours very truly, —— ——, President. GFB:MLC.

Giant Portland Cement Company

603-610 Pennsylvania Building, 15th and Chestnut Streets, Philadelphia, Pennsylvania

September 24, 1919.

Mr. George F. Bayle, President Glens Falls Portland Cement Co., Glens Falls, N. Y.

DEAR MR. BAYLE: I was sorry not to see you at the meeting in Cleveland, as expected. Your letter of September 19th is perfectly clear and entirely satisfactory to us. Should you have quite a large stock of cement and are willing to sell a small amount to us for delivery in our bags as orders are placed with you, at $1.50 per barrel bulk at your mill, providing you obtain sufficient cars (a) to take care of your own orders and (b) prior orders from another cement company,—we will take the matter up with you at a later date

(when we require shipments from other mills) to ascertain conditions with you at that time.

Yours very truly, —— ——, President.

[fol. 1271½] GOVT. Ex. No. 221

Archibald Cox, Counselor at Law, 233 Broadway

New York, October 21, 1919.

H. S. Gaines, Esq., Vice President Cement Manufacturers Protective Association.

DEAR MR. GAINES: I find the statistical report for September, 1919 suggests a question of some importance to which I beg to direct attention as follows:

The report indicates that quite a lot of cement is being shipped by some companies for other companies, and perhaps that this is being done to an extent which calls for explanation and may lead to misconception.

Like many other activities among competitors, the legality of this depends finally on the conclusion which some one else, namely, a judicial tribunal or office, may reach concerning its purpose and result. It is obviously entirely proper for a company whose manufacturing and selling operations have not exactly matched each other to purchase from, or sell to, another company whose operations are out of balance in the opposite direction. On the other hand it would be improper for competitors to go through the same specific acts as a means of dividing up the business in cement.

Just at present, these statistics, among other things, are material [fol. 1272] from which an effort will be made to shape a conclusion that competition is being suppressed in the cement industry. Ac-

cordingly, it seems to me advisable in this particular matter to be guided by the rule of avoiding anything which can be contorted into suggesting any suppression of competition. At present, it is not, I think, enough that there is in fact nothing of that kind. It is advisable to go further and avoid things that may be misconceived.

The application of that rule produces two requirements:

(1) There should be no transaction of this kind without evidence of its legitimate cause, purpose and result being preserved so as to be available, and

(2) The total number of such transaction should not be such as to produce a possible impression of established practise or general understanding.

In other words, in view of the likelihood of efforts to contort things just at present, it is desirable for the manufacturers to seek to avoid, rather than increase, these transactions, and when they are necessary, as they always have been to some extent, carefully preserve complete evidence as to precisely what each transaction was.

Yours vehy truly, (Signed) Archibald Cox.

October 24, 1919.

Mr. Geo. F. Bayle, President Glens Falls Portland Cement Co., Glens Falls, N. Y.

DEAR SIR: Referring to conversation on phone to-day in the matter of shipments, while I appreciate the fact that you have been trying to help us in every way by shipping cars, yet if you could bill these out on our bills of lading as sent you, it would be appreciated.

Also kindly do not notify any of our customers by postal that shipments are being made from your mill, as this only leads to complication. We are in receipt of several letters from our customers in reference to this, in which one of them frankly states they note that car is being shipped by the Glens Falls Portland Cement Co. [fol. 1273] and refuses to accept same in view of the fact that you have a dealer in the town and they do not want to handle Glens Falls. I know you will understand our reason for writing you as above.

Thanking you for past favors, we remain

Yours very truly, R. E. Griffith, Vice-President. N.

Endorsed: Glens Falls Portland Cement Co., Oct. 27, 1919, Glens Falls, N. Y.

Oct. 27, 1919.

Mr. R. E. Griffith, Vice-Pres. Giant Portland Cement Co., Philadelphia, Pa.

Dear Sir: We have your favor of the 24th inst., and in answer to same would advise that commencing with Saturday, October 25th, we are billing all shipments for your account on your own bills of lading.

We could not do this at an earlier date, as the bills did not reach us until late Friday.

We will also comply with your request not to send postal notices of shipments to your customers in the future.

Trusting that these arrangements will cover your requirements, we are,

Yours truly, Glens Falls Portland Cement Co. —— ——,
2nd Vice-President. GFB.Jr/MLC.

My Dear Fred: Your little note of the 17th inst. duly received, and I cannot tell you how glad I am to note that you have been able

to get away for a little rest and that you enyoyed your stay in the South. This certainly was a good time to have been away, but I am very sorry that we have had such rotten weather for your return, and trust that you will take care of yourself, as I feel frankly, after one has been in the South and become acclimated to the warm weather and then comes North, it is so cold that it is apt to react.

In the matter of coming on to see the working of the Association for the meeting, I cannot tell you how I would appreciate it if you could come on, and you can come absolutely uncommitted as far as membership is concerned. In other words, in your coming on, I will explain to all the members of the Association that you are present at my invitation to look into the activities of the Association and will decide at some future time as to the advisability of your Company joining.

[fol. 1275] Further, I beg to state that this has been done by three other Companies, and since their attending these meetings, they have felt it to their interest for their Companies to join, and therefore hope you can arrange to come on for the 28th, or if you prefer, run over before that time and I will be very glad indeed to have you stay with me over Sunday and then attend the meeting on Monday, the 28th.

With kind regards, and awaiting your reply as to whether you will attend the meeting as my personal guest, I remain,

Sincerely yours, —— ——, President. S.

Dexter Portland Cement Company

Nazareth, Pa., 3-25-16.

Mr. Robert E. Griffith, President Cement Manufacturers Protective Ass., 219 Commercial Trust Building, Philadelphia, Pa.

My Dear Bob: I acknowledge receipt of yours of the 24th inst. My only idea in writing you was that it was not fair for the Nazareth Company to have reports of our contracts and credit reports if they did not reciprocate and it seems to me that they have now been given enough chance to see what the benefits of belonging to the Association will be and we, therefore, until they actively take part, think they should not receive any further reports.

I am glad to note that you expect the Alsen's to come in. I think [fol. 1276] it is worth while to continue working on the Helderberg as we can get Glens Falls the minute the Helderberg comes in. We will always keep on working with Horner and trust that he will eventually come in line.

Very truly yours, Joseph Brobston, Vice-Pres.

Mr. Robert E. Griffith, President Cement Manufacturers Protective Association, 219 Commercial Trust Building, Philadelphia, Pa.

[fol. 1277] DEAR MR. GRIFFITH: Enclosed is a letter from the Tidewater Portland Cement Company which speaks for itself.

I am enclosing a check to the order of the Biltmore for $78.20. Unless the Association has items making up this amount, I think we should have for our records a detailed bill covering the items making up the bill. If you view this matter in the same light as I do will you kindly instruct Mr. Bacon to write the Biltmore for additional information.

Yours very truly, Marion S. Ackerman, Vice-President.

[fol. 1277½] GOVT. EX. No. 228

May 22, 1917.

Mr. W. D. Lober, President Cement Manufacturers Protective Ass'n, Philadelphia, Pa.

DEAR SIR: I have on file letters confirming verbal action taken at the organization meeting of the Cement Manufacturers Protective Association held at the Engineers' Club, Thursday, January 6th, 1916. These letters were addressed to Mr. Joseph Brobston, who was Secretary pro tem, and are from the following companies—Allentown, Alpha, Atlas, Bath, Coplay, Edison, Giant, Lawrence, Lehigh, Nazareth, Penn-Allen, Pennsylvania, Phœnix and Vulcanite. There was no letter from Dexter, but, inasmuch as Mr. Brobston was Secretary of the Association, I suppose that was evidence of their intention of joining.

On page 28 of the minutes of the organization meeting, Mr. Coogan states—"The Glens Falls Portland Cement Company have expressed a desire to become members and are heartily in accord with the spirit of the Association, but on account of the other Hudson Mills not being members, they do not care to file contracts until such time as the other companies in that district do likewise.

At the meeting in Philadelphia, February, 1916, the Cayuga and Knickerbocker Companies were formally elected to membership.

[fol. 1278] In April 1916 the Clinchfield and Virginia Companies were formally elected to membership. Security expressed their desire of being members at the organization meeting held at the Biltmore, New York City, January 4th, 1916. As to the Millen Company—they have reported, I believe, since the Association started. We have no record of their ever formally accepting membership, but by their reporting at the beginning, think it would qualify them as chartered members.

The aforegoing list of companies, therefore, are what you might term full-fledged members.

At the Credit Managers' meeting, February 28th, 1916, Mr. Coogan, who presided at the meeting, stated as follows: "Mr. Corbett of the Alsen's Am. Portland Cement Works and Mr. Kelly of the Helderberg Cement Company are here today, on invitation of the President, to see what we do and how we do it. We hope some of these days we will have both of them as members of the Association." Since that time, I know of no action taken to elect these companies to membership of the Association.

This is all I have found in going through the minutes. If anything more comes up, I will let you know.

Yours very truly, —— ——, Secretary. CWB/W.

[fol. 1278½] Govt. Ex. No. 229

30 Broad Street, New York

February 1, 1918.

Dear Mr. Gaines: What has become of the letter which you and Mr. Cox were to prepare to be sent to members regarding the proper use of Association information.

I had a call yesterday from Mr. Bayle of the Glens Falls Company. I had quite a conversation with him regarding the New York State situation, having in mind your recent conversation with Mr. Corbett. Mr. Bayle tells me that there is no New York State Association of any kind, so far as he knows, and as nearly as I can gather Mr. Corbett's lengthy conversation with you was more in the nature of an excuse rather than a reason for not joining.

I find that Mr. Bayle is not as strong for our Association as he was some time ago. He says that he will stick to his agreement that he will join if Mr. Kelley will, but as he expressed it—"he is not as warm on the subject as previously." His reason for this is that he says he has noticed a very pronounced disposition on the part of salesmen of Cement Companies to use the information which they receive regarding other people's contracts to "crab" with the party [fol. 1279] placing the contract with the Company with which it was placed rather than with their *their* own, and to make things generally unpleasant because the order finally went to someone else. This you will recognize is the same complaint that others have made

and I think is general and must be stopped. Hence my inquiry regarding the letter.

At the earliest convenient opportunity I think it would be well for you to again approach Mr. Kelley on the subject.

Yours very truly, W. A. Holman, Chairman. WAH/MK.

Mr. H. S. Gaines, Vice Pres. Cement Manufacturers Protective Association, 916 Widener Building, Philadelphia, Pa.

[fol. 1279½] Govt. Ex. No. 230

May 4th, 1916.

Mr. Robert E. Griffith, President Cement Protective Association, Commercial Trust Building, Philadelphia.

Dear Mr. Griffith: At the last meeting of the Association, I was called upon to make a decision as to whether our company would resign from the Association or participate in all the functions thereof, including the filing of our contracts.

I have felt in sympathy with the object and efforts of the Association from the very beginning. I think it has accomplished wonders and is likely to accomplish much more as time goes on. For this reason, I had decided to publish our contracts and not resign. I do not believe in being a half way member of anything.

Owing to recent occurrences in our territory, I am obliged to decide that it is best for our company to resign from the Association in order to have a free hand to protect itself from murderous attac*hs*. Therefore, I think it will not be proper for use to file our contracts for the 1st of May as I promised and you can advise Mr. Bacon, the Secretary, not to wait for our reports.

[fol. 1280] I expect to be present at the next meeting of the Association and tender our formal resignation, and at the same time put myself in position to explain to anyone wanting to know more in detail, our reasons for this decision.

Permit me to express the very high appreciation I have for what you have done to make the Association a success. I assure you I drop out with great regret.

Very truly, —— ——, President. LAC-r.

[fol. 1280½] GOVT. EX. No. 231

Cement Manufacturers Protective Association

219-220 Commercial Trust Building, Philadelphia, Penna.

Charles W. Bacon, Secretary

May 6th, 1916.

Mr. Loring A. Cover, President Security Cement and Lime Company, Equitable Bldg., Baltimore, Md.

MY DEAR MR. COVER: Your letter of May 4th is received, and I really cannot find the words to express my regret for the action you contemplate taking at the next meeting of the Association. In view of the fact that I am endeavoring weekly to have the three manufacturers who are out, become members of the Association—and can honestly report progress toward this end—and believe that by the June meeting two of the three will have joined, and also as I feel that the work we are doing is of such vital importance to the industry, I sincerely hope you will reconsider your decision in this matter.

I am therefore, going to ask you if you will not retain your membership in the Association and give us your co-operation, the same as you have in the past—without reporting contracts—as I feel that [fol. 1281] if your resignation was presented at this time I do not feel that there would be any chance of the Tidewater coming in, so I want you to consider it in the light that I am writing, and ask you not to resign.

I had a very nice talk with Mr. Stapleton, and he feels that the Tidewater should become members and he has asked me to have a talk with Mr. Scott in conjunction with him, and I hope the interview will be successful with him, upon my return from Chicago, therefore trust to hear from you that you will retain your membership.

Sincerely yours, R. E. Griffith, President.

[fol. 1281½] GOVT. EX. No. 232

February Twenty-eighth, Nineteen Nineteen.

Mr. W. A. Holman, Asst. to President the Atlas Portland Cement Co., 30 Broad Street, New York.

DEAR MR. HOLMAN: In answer to your letter of February 26th: I have seen a copy of the minutes of the annual meeting of the Mid-West Bureau and agree with you that they are now taking some long steps in the right direction.

It seems that the psychology of Association work is hard for the commercial mind to grasp quickly, and it is going to take time, but

it is very gratifying to me to see all of the cement manufacturers trying so hard to conduct their Association affairs in a manner that is entirely proper from every standpoint. It is all a matter of education and the "lights on the horizon" seem very bright to me.

Yours very truly, —— ——, Vice-President. HSG-G.

[fol. 1282] Govt. Ex. No. 233

January Twenty-seventh, Nineteen Twenty.

Personal

Mr. E. R. Stapleton, c/o Tidewater Portland Cement Co., Baltimore, Md.

My Dear Mr. Stapleton: Beg to acknowledge receipt of your letter of the 24th, enclosing check for $2.86 on the matter of the Griffith luncheon.

It was more than a pleasure to me and to the others to have you with us at this luncheon, and I sincerely believe that if we could see you regularly once a month, you would find that a closer acquaintance with your competitors would iron out a great many misunderstandings, and I have always felt that the only reason you were not a member of the Association was that you did not fully appreciate the fact that we are purely and simply a bureau for the dissemination of historical facts and nothing more.

With kindest personal regards, I beg to remain,

Yours very truly, —— ——. HSG-G.

[fol. 1282½] Govt. Ex. No. 234

Cayuga Cement Corporation

New York Office, 30 East 42nd St.
Address reply to 30 E. 42nd St.

May 14th, 1918.

Mr. Geo. F. Bayle, Pres. Glens Falls Portland Cement Co., Glens Falls, N. Y.

Dear Mr. Bayle: In going over the Cayuga Cement Corporation's affairs I notice they have not been active in the Cement Manufacturers' Protective Association, and filed their contracts.

It seems to me that this is a very important matter and that all of the New York State mills should join in with the rest of the companies, so that we can all be working on the same basis. So far as we are concerned, we are prepared to get into the fold, provided the Glens Falls and the Helderberg Companies join with us.

[fol. 1283] I cannot say I am very proud of the contracts that I find, but still it is something that can be remedied, and I assure you it will be.

Trusting to hear from you on this matter, and that you may feel that we can all go in together, believe me

Sincerely yours, W. N. Beach. WNB/R.

The Edison Portland Cement Company

Stewartsville, N. J.

December 31, 1915.

Mr. A. C. Steece, Treas. Ironton Portland Cement Co., Ironton, Ohio.

Dear Sir: I beg herewith to hand you a copy of a letter relating to cash discount practices, which I submitted to the Executive Committee at its meeting at the Hotel Biltmore last week, and at which time I was requested to forward a copy of it to all the members of our Association, and I trust you will find the information of interest.

Yours very truly, W. S. Mallory, President. WSM-RBS.

Enclosure

[fol. 1284] The Edison Portland Cement Company
Stewartsville, N. J.

Dear Sirs: About two months ago I sent you a letter asking for information relative to your cash discount practice, and I beg herewith to give you the results of the investigation.

My letter was mailed to the representative companies in one hundred and twenty different lines, whom I thought would sell a considerable proportion of their products jobbers or dealers. A large proportion replied promptly, a very few declined to give information, and some did not reply, which made it necessary to write to other companies in their particular line, and as a result, I have had replies from the one hundred and twenty various lines, which are enumerated herewith:

[fol. 1284½]

The first question asked was: "What cash discount in ten days does your industry allow to the dealers?"

The replies gave the following facts:

5	Concerns	give	30	days	net,	and	do	not	allow	any	cash	discount.
1	"	"	30	"	"	"	allows	½ %	cash	discount	in	10 days.
6	"	"	30	"	"	"	1 %	"	"	"	10	"
1	"	"	60	"	"	"	1 %	"	"	"	10	"
1	"	"	90	"	"	"	1 %	"	"	"	30	"
2	"	"	30	"	"	"	1½ %	"	"	"	10	"
1	"	"	60	"	"	"	1½ %	"	"	"	10	"
1	"	"	30	"	"	"	2 %	"	"	"	7	"
75	"	"	30	"	"	"	2 %	"	"	"	10	"

(Of the above 75 concerns, 12 allow 2% cash discount on monthly accounts if paid on or before the 10th of the succeeding month.)

[fol. 1285½]

2	Concerns	give	60	days	net,	and	allow	2½ %	cash	discount	in	10 days.
1	"	"	60	"	"	"	"	2 %	"	"	"	15 "
1	"	"	60	"	"	"	"	2 %	"	"	"	30 "
1	"	"	90	"	"	"	"	2 %	"	"	"	30 "

1	"	"	90	"	"	"	"	3 %	"	"	"	10 "
2	"	"	90	"	"	"	"	3 %	"	"	"	30 "
1	"	"	90	"	"	"	"	3½%	"	"	"	10 "
2	"	"	30	"	"	"	"	4 %	"	"	"	10 "
1	"	"	60	"	"	"	"	4 %	"	"	"	10 "
1	"	"	60	"	"	"	"	4 %	"	"	"	20 "
1	"	"	30	"	"	"	"	5 %	"	"	"	10 "
2	"	"	60	"	"	"	"	5 %	"	"	"	10 "
2	"	"	60	"	"	"	"	5 %	"	"	"	30 "
2	"	"	90	"	"	"	"	5 %	"	"	"	30 "
1	"	"	120	"	"	"	"	5 %	"	"	"	30 "
2	"	"	30	"	"	"	"	6 %	"	"	"	10 "
3	"	"	60	"	"	"	"	6 %	"	"	"	10 "
1	"	"	120	"	"	"	"	6 %	"	"	"	10 "
1	"	"	30	"	"	"	"	7 %	"	"	"	10 "

1 Concern gives 30 days net, with following discounts in 10 days:—

2%	off	orders	amounting	to	not	less	than	$50.00 net.
3%	"	"	"	"	"	"	"	$100.00 "
5%	"	"	"	"	"	"	"	$340.00 "

(The number of discounts given exceed 120, for the reason that some concerns give different discounts for various periods.)

[fol. 1286] The second question was: Has there been any changes in the last five years in the amount of the cash discount, and if an increase, does it show a larger percentage of sales discounted; or if reduced, a smaller amount?"

114 concerns replied there had been no change; two concerns state they had increased discount, one from 1% to 2%, which gave "an increase in amount discounted"; the other increased from no discount to 2% on $50.00 invoices, 3% on $80.00 and 4% on $150.00 which resulted in a "decided increase in the amount discounted."

Four concerns reduced the amount of discounts, one from 6% to 2% with results that "about same number of customers discounted," another from 1% to no discount, another from 2% to 1%, which gave less discounts, and the fourth from 10% to 5%, which gave "about same amount discounted."

The third question was: "Do you allow a trade discount to the dealers, based on the amount of business done? If so, about how much?"

81 concerns do not allow a quantity discount and 39 give such discounts.

The amount of the total discount in dollars on the volume of sales, runs from 60% to 95% (4 concerns report 90% and over). The replies indicate that the concerns which insist on the discounts being taken within the discount period obtain the largest percentage of discounts. This is easy to understand, for the reason that the employee who handles the payments knows that if he does not make payment to a certain concern within the discount period the re-[fol. 1286½] mittance will be returned and his house will lose the discount, so he takes no chances with them and tries it on with the lenient ones and unfortunately is often successful. I believe it would take but little education and backbone to make all discounts come within the discount period.

Most of the replies are very interesting and many have asked that their comments be kept confidential, so I am only going to quote from the two extremes, the first being as follows:

We know of one manufacturer of — who does not make any allowance for cash. As a consequence, a great many firms who are financially able to pay, pigeon-hole his bills and he is continually hard pressed for funds. The writer has urged him not to try and be a pioneer in attempting to break down custom, but to raise his price accordingly and give the cash discount the trade demands."

The other is from a large concern with a national reputation obtained by high quality of product and extensive advertising—

"This Company and its predecessors, since the inauguration of this business, have used a 7% cash discount for payment in 10 days. In reality, this is a 5% trade and a 2% cash discount, dating the first of the following month. However, it has always been the means of securing prompt payment, and the accounts are practically closed out by the 15th of the following month. Our percentage of losses from bad debts is very much less than ½ of 1% of the total business." [fol. 1287] After careful consideration, the cement industry has decided to make terms of 30 days net and 5 cents per barrel discount for cash in 10 days (this is approximately 5% discount on the bulk price of cement f. o. b. mill). This was put into effect about thirty days ago. We use 5 cents instead of 5%, because all cement is sold on a delivered price and this avoids the possibility of the customer taking discount on the freight.

All cement invoices have printed or stamped on them the following:

"$— discount will be allowed if this invoice is paid on or before —— —, 191-."

(Total amount of discount in dollars and cents and blank date are to be filled in,—blank date to be ten days from date of invoice.)

Some concerns use a sticker, which is printed; "Do not ask us to allow a cash discount, unless you have earned it," and this is attached to invoice- which go to concerns who try to get the discount after the period has expired, then remittances with over-due discounts can better be returned, as customers have had two notices that payment must be made within the discount period.

I trust this information will be as interesting to you as the collection and tabulation of it has been to me.

Yours very truly, W. S. Mallory, President. WSM-RBS.

[fol. 1287½] Jan. 3, 1916.

Mr. W. S. Mallory, Pres. Edison Portland Cement Co., Stewartsville, N. J.

DEAR SIR: We have your favor of the 31st ult., enclosing copy of a letter in reference to the cash discount practices. This is very interesting information and we want to thank you for sending us this copy.

Personally the writer has been in favor of a higher rate of discount for the past two or three years, as he believes in the first place, it is not necessary to carry such a large amount on our books in outstanding accounts, and in the second place, it will tend to eliminate the undesirable dealer or contractor, as if he does not have the funds with which to take advantage of this large discount, he will be outdistanced by his competitors who possibly have.

Yours truly, —— ——. ACS.

[fol. 1288] GOVT. EX. No. 236

Copy to Mr. Chas. W. Bacon.

January 21st, 1916.

Mr. Richard Hardy, President Dixie Portland Cement Company, Chattanooga, Tenn.

MY DEAR DICK: As no doubt you have heard, we have formed the Cement Manufacturers Protective Association, and I am sending you three copies of the prospectus with the By-Laws and Constitution.

I wish you would look this over carefully and advise me what you think of it, as things are working out very nicely indeed, as far as the Lehigh District is concerned since this Association was formed, as all the Companies are now reporting all contracts closed, with delivery point, amount of cement contracted for, and deliveries applying against each, with prices and periods over which the deliveries will extend.

They are also reporting all overdue accounts and statistics covering cement manufactured, stock on hand, and shipments made.

The freight department of the Association is getting out books giving the freight rates to all the different points covered by the

Lehigh Valley district as far south as Virginia, and I hope later on, [fols. 1288½–1291] to be able to compile rates for the Southern States.

Would it not be a good idea to form an Association something on these lines, the same as they also have in the West, for the South?

On any point not clear that you would like further information, I would be glad to hear from you.

With kind regards, I am,

Sincerely yours, —— ——, President Cement Mfrs. Protective Assoc. S.

3-Enc.

[fol. 1292] Govt. Ex. No. 237

April 10, 1916.

Mr. W. P. Corbett, Sec. & G. M. S. Alsen's American Portland Cement Works, 45 Broadway, New York City, N. Y.

My Dear Corbett: Many thanks for your little note of the 7th instant, and frankly my dear fellow, it is words of this kind that makes one feel as if there is some use of the Association—in other words, with co-operation and good fellowship we should be able to get out of chaos, and I appreciate the position you are in until you hear from the other side; but I want you to feel that you are fully entitled to the information of this Association pending your receiving the looked-for instructions; and further I want you to see if you cannot strain a point and be here next Monday for the meeting, both of credits and contracts, as your personality will add a great deal to the strength of the Association, until, as stated, you receive full permission to join us.

In reference to dues, have you advised the other side of the small dues that have been set by the Association, viz.: six-tenths of a mill per barrel for shipments during the preceding year? I think this is essential and trust you will advise me.

With kindest regards,

Very truly yours, Cement Mfgrs. Protective Assn., by —— ——, President. REG-b.

[fol. 1292½] Govt. Ex. No. 238

Cement Manufacturers Protective Association

932 Commercial Trust Building, Philadelphia, Penna.

Charles W. Bacon, Secretary

May 7th, 1917.

Mr. J. K. Barbour, General Sales Manager Security Cement & Lime Co., Hagerstown, Md.

Dear Sir: It has been suggested that a comparison of the various quotation and contract and order forms used by the different members of the Protective Association would be of interest, with a view to possibly improving and standarizing the various forms of this kind in use.

I, therefore, ask that you bring with you to the next meeting of the Association, which will be on Monday, the 21st, copies of your quotation form and also your contract and order forms, provided you use different ones for these purposes.

Yours very truly, W. D. Lober, President.

[fol. 1293] Govt. Ex. No. 239

November Twenty-ninth, Nineteen Eighteen.

Mr. Archibald Cox, 233 Broadway, New York City.

Dear Mr. Cox: Enclosed herewith is copy of my suggestion of what to send the members relative to extending, in a limited way, the scope of the Association. As is customary, I submitted this to Mr. Holman—the chairman of the Committee—and he has replied relative to the suggestion, as per the attached memorandum.

In conference with Mr. Holman and Mr. Swett this morning on this subject, it was suggested that possibly the most enlightening and practicable way to get this before the members would be to ask your assistance in framing a letter which would be of value to the members in formulating their suggestions along lines that would be in harmony with your ideas as to what ought to be the scope of the subjects which could properly be discussed under our present Constitution and By-Laws.

If you could do this, in my opinion, it would prevent members from sending in suggestions which might have to be adversely passed upon, and possibly save us from *discourse*, which, as you know, we [fol. 1293½] are very anxious to avoid.

Will appreciate it if you will return Mr. Holman's memorandum with your reply.

Yours very truly, —— ——, Vice-President. HSG-G.

Enc.

[fol. 1294] GOVT. EX. No. 240

Alpha Portland Cement Company

General Offices: Easton, Pa.

March 26, 1919.

Mr. H. S. Gaines, Vice-President Cement Manufacturers Protective Association, #19 West 44th St., New York City.

MY DEAR MR. GAINES: At the various meetings of the members of the Cement Manufacturers Protective Association, and particularly meetings of the Credit Men, considerable stress was laid on the importance and desirability of close co-operation between the member companies. I have in mind an instance which emphasizes the lack of this co-operation and thought I would bring it to your attention so that you could use it as a means of bringing about more effectively what the Association has set out to accomplish.

[fol. 1294½] On the 14th of this month I wrote to the Edison Portland Cement Company at #8 West 40th Street, New York City asking them to kindly give me in confidence the benefit of certain experience which they had with a customer that they formerly sold. Up to the present time I have not received any response. It may be that they did answer my communication and the letter became lost in the mails but, of course, that can be determined upon investigation.

I do not like to put myself in the position of asking any member Company the second time for the same information as naturally I infer, when an answer is not made to a request of mine, that the Company with which the matter has been taken up does not care to respond but, in your position, I thought that you might be able to diplomatically find out why, in this case, the letter was not answered and also whether or not it is the purpose and intent of the Edison Company not to exchange information; if so, I think the other members should know it and be governed accordingly in their relations with the Edison Company.

You understand, of course, that we have other sources which are available to obtain information on any prospective customer or on anybody that we are interested in but, at the same time, the principle involved in this case is what concerns me and I think it would be well to look into it.

Very truly yours, Jno. J. Matthes, Sec'y-Treas. JJM. H.

[fol. 1295] Govt. Ex. No. 241

April First, Nineteen Nineteen.

Personal

Mr. J. J. Matthes, Secretary-Treasurer Alpha Portland Cement Co., Easton, Pa.

My Dear Mr. Matthes: Responding to your letter of March 26th, I had a long talk with Mr. J. C. La Rue, Secretary of the Edison Portland Cement Company yesterday in regard to the matter you mention.

Mr. La Rue tells me that he can find no record of having received your letter making an inquiry as to any of his customers. He expressed himself as more than willing to cooperate along these lines and that if you will send him an inquiry under personal cover, he will give it prompt attention.

He called my attention to several instances where he has recently cooperated with other manufacturers by giving them information as to accounts which he is selling, and especially to a letter of commendation from Mr. W. D. Lober, who complimented him highly upon his willingness to cooperate and thanking him for the complete detail of information given him along these lines.

[fol. 1295½] I feel certain that this letter must have been lost or diverted in some way, as Mr. La Rue convinced me of his willingness to do whatever he can to promote the interests of the industry, and he suggested that in cases of this kind where you did not receive a prompt reply, if you followed up to him with a second letter, he would appreciate very much your doing so.

As you doubtless know, the Edison Company has recently re-organized their entire office arrangements and now have everything at their office at 8 West 40th Street, but they are still in somewhat of a jumble over there and have not gotten fully straightened out.

Mr. La Rue will be looking to hear from you on this, and if you will drop him a line I am sure that it will receive his best attention.

With kindnest personal regards, I am,

Yours very truly, —— ——, Vice-President. HSG-G.

(Here follow Government's Exhibits Nos. 242, 243, 244, and 245, marked side folio pages 1296-1357, inclusive.)

PLANT CAPACITY AS REPORTED TO THE ASSOCIATION AND USED IN THE MONTHLY STATISTICS

These figures are intended to represent as nearly as possible the maximum physical capacity of the plants throughout a twelve-month period allowing for ordinary and usual interruptions in operation and assuming a continuous and sufficient demand.

Figures show number of barrels in even thousands, 000 omitted.

INTRODUCTION

At a meeting of the Portland Cement Association, held at Atlantic City in September, 1915, a committee of the Association made a report on trade conditions affecting the cement industry. At meetings of the Association at Chicago in May, 1916, September, 1917, and May, 1918, committees made further reports on the same general subject. All these committees studied very carefully the trade practices which prevailed more or less generally in the business. Their reports embody their conclusions and recommendations and were adopted by the Association. This pamphlet is a compilation of the essential features of the reports.

In the opinion of the committees the practices which they recommend are based upon sound business principles. Their recommendations are offered as ideal for the industry, and ought to be followed so generally as to become customs of the business. It was believed that the practices recommended would tend to eliminate unfair methods of competition and improper discriminations in price, and would at the same time maintain the quality of the product and stimulate the interest of the dealer to extend the sale and use of cement for all suitable purposes, and generally prove advantageous to all concerned.

What follows in this pamphlet makes very evident the evils of the past and the reasons supporting each recommendation of the committees. Doubtless every manufacturer will desire to avail himself of the suggestions. Of course, no member of the Association is in any way obligated by the reports, or because of the adoption of the reports by the Association, to follow the recommendations. It is not at all a matter of mutual agreement, but solely a question as to whether the recommendations appeal to each member of the Association severally as the best thing for him and all concerned.

Every member is urged to give very careful consideration to this pamphlet, because the subject is of the greatest importance, and because the recommendations of the committees embody the best judgment of those who have had wide experience and have very carefully inquired as to what business customs will best put the industry on a high plane and give the greatest benefit to the producer, the dealer and the consumer.

1. DEFINITION OF DEALER

A dealer is a person, firm or corporation *regularly engaged in selling Portland cement and other merchandise*, especially building materials, purchased by him for resale; who is also properly equipped with storage facilities; supplied with teams or trucks; and is recognized in his home town as a building material dealer.

2. CONSUMERS

There are only two classes of buyers of cement—dealers and consumers. *The consumer price should be paid by all consumers* including manufacturers of concrete blocks, cast stone, concrete drain and roofing tile, concrete sinks and laundry tubs, concrete shingles and all other concrete products.

3. DEALER DIFFERENTIAL

In order to secure the active and energetic assistance of the dealer in pushing the use of cement in competition with other materials, it is necessary that the business be so handled that the dealer will get a margin of profit which is satisfactory to him and that will compensate him for his work. Unless this is done he will lose interest in cement and discourage its use in favor of other materials.

Recognizing these facts most cement manufacturers have for some time made a differential in price between dealers and consumers, first of five cents per barrel and later of ten cents per barrel, although in some sections of the country some manufacturers are still using the five cent differential.

It is clearly to the cement manufacturers' interest to use their very best efforts to induce dealers to handle their cement business in such a way as to net them a fair margin of profit. One of the surest ways to accomplish this is to help dealers to inform themselves on the cost of doing business, a result of which will be *to discourage them from selling cement for carload delivery on a smaller margin than ten cents per barrel.*

4. FIVE CENTS PER BARREL DISCOUNT

In the latter part of 1915 the cash discount for payment within ten days from date of invoice was increased by practically all cement companies from two cents to five cents per barrel. This discount is closely related to the dealer differential, and for the reasons stated under preceding heading *it is desirable that the five-cent discount be continued.*

It is important in carrying out the provisions for the five-cent discount that no cement be quoted on or sold or payment accepted therefor except including packages; that each invoice be dated the date shipment

is made as shown on bill of lading for the shipment covered by it, *and that discount be not allowed in any circumstances unless remittances are mailed, as shown by postmark, not later than ten days from date of invoice.*

It has been suggested that on the face of all invoices the following be stamped or printed:

$ discount will be allowed if this invoice is paid on or before 191 .

(Total amount of discount in dollars and cents and blank date to be filled in—blank date to be ten days from date of invoice.)

5. COMMISSIONS

The practice of paying to dealers a commission on sales made direct to consumers has been followed by some manufacturers on the theory that, as a dealer handles a certain brand in his locality, he is entitled to compensation on sales made to others because his representation has popularized that particular brand.

The correctness of this theory can be successfully attacked from several angles, the principal of which is that the dealer is entitled to compensation only for actual service rendered in each instance. His profits as a merchant are earned only for such service as he actually performs on each barrel sold, as, for example, on cement handled through his warehouse or through his accounts when he assumes the credit risk and thus performs a service.

The ten-cent differential should make it possible for the dealer to sell at a profit all the cement he sells in his town, but if a consumer refuses to buy through a dealer and prefers to purchase direct from a manufacturer, the dealer renders no actual service and clearly is not entitled to compensation when he performs no actual service.

For these reasons and also because the payment of commissions is of questionable legality under the Clayton Act except when the dealer actually performs a service, *commissions should never be paid to dealers under any circumstances.*

Legal opinion has been secured on this point, and in order to make the matter clear questions are stated below, and following them the answers thereto:

"A" is a certain cement company's dealer in a town.

"B" is another dealer in the same town.

"C" is a contractor or other user of cement located or doing work in the same town.

Question 1: May the cement company sell to "A" and "B" (dealers) at one price and to "C" (contractor) at a higher price? If so, when is it proper and when is it not proper for the cement company to allow to "A" or "B" or both a commission on sale made to "C"?

Answer: You may sell to a contractor who is a consumer at a higher price than to a dealer. A difference in price to wholesalers, jobbers, and consumers tends to equalize the disadvantages which the same price would create, and therefore tends to stimulate competition. A commission should not be allowed to "A" or "B", the dealers, for a sale made by you to "C" except in those rare instances where you may be able definitely to assure yourself that "A" or "B" has rendered you a service or has been the procuring agent in bringing the business to you. If it can consistently be done, we recommend that no commission be paid except upon an agreement so to do in advance for a specific service rendered, as the payment of commission so-called, unless there is a very substantial ground for the allowance, will be considered as evidence against you that you had an exclusive contract with the dealer as to territory, and that the so-called commission is in fact but an allowance to him for business which you sold within the territory which belongs to him. Although you do not under any circumstances agree that a dealer shall have an exclusive territory, nevertheless we must bear in mind that the ultimate determination of a court and jury as to whether such an agreement was in fact made by you will not alone be determined by what you say is the agreement, but your conduct will have greater weight than your mere words, as the substance and result, rather than the form, will be made conclusive.

Question 2: May the cement company decline to quote "C" and refer him to "A", at the same time advising "A" that "C" is in the market for cement?

Answer: You have the right to decline to quote "C" and refer him to "A", at the same time advising "A", the dealer, that "C", the consumer, is in the market for cement. You have the right to refuse to sell to a consumer, as you have the right to choose to sell only to dealers. There is no objection, upon your refusing to sell to a consumer, to advise him that dealer "A" sells a certain brand at————, and that you assume the dealer has a sufficient stock to handle "C's" requirements, and there is no objection to your advising dealer "A" that "C" is apparently in the market for a certain brand, as he has written to you for prices, in reply to which you have informed him that dealer "A" sells that brand in that locality.

Question 3: On receipt of an inquiry from "C" may the cement company, after consulting with "A", quote "C" on behalf of "A"?

Answer: You should not quote "C" on behalf of dealer "A". This is clear and strong evidence of an unlawful mutual agreement for exclusive territory for "A".

This answer was discussed further with counsel with the result that the opinion was revised to the extent that the cement company may, on receipt of inquiry from a contractor, consult with the dealer and after

getting a price from the dealer advise the contractor that it (the cement company) has been authorized by the dealer to quote the contractor. It is preferable not to use the wording: "We quote you on behalf of the ABC Building Material Company as follows", but rather to use the wording, "We are authorized by the ABC Building Material Co. to quote you as follows."

It was pointed out to counsel that in many cases it is very desirable to quote a contractor after consulting with the dealer, especial emphasis being made of the point that in such cases the contractor generally is a customer of the cement company with headquarters in a town different from the town in which he wishes to use the cement and for that reason is acquainted with the cement company and is not acquainted with the dealer, so that it would be inconvenient for the cement company to find it necessary to tell the contractor that it could not quote him and ask him to get in touch with the dealer. Counsel advised that there is no objection to the cement company securing authority from the dealer to quote the contractor in such a case, but that it is not desirable to follow this course when the contractor and dealer are located in the same town, but preferably where they are in the same town to refer the contractor to the dealer without quoting. Counsel further advised, however, that even in the latter case if in some exceptional instances it is found especially desirable to deal with the contractor after consulting with the dealer it is allowable to do so.

Question 4: May the cement company sell to "A" in his town and refuse to quote "B" when he asks for a price and if the cement company desires refer him to "A"?

Answer: You may sell to "A", a dealer, and refuse to quote "B", a dealer in the same town, and if you so desire you may refer him to "A". You should at all times be extremely careful not to convey at any time, either by conduct or spoken or written words, the impression that the dealer has an exclusive territory or a right in any way to consider himself as the only man in town to whom you would sell cement. You do not agree to give exclusive territory, and you should be very careful that no inference arises that you have so agreed. We suggest the following form of reply:

"We have your letter of ———— date asking for quotations on ———— cement. In reply have to advise that we do not care at this time to quote, but you are probably aware that ———— is sold in ———— by ————, a dealer who should have in stock enough to supply your requirements, and we suggest that you communicate with him."

In the event you receive a subsequent letter inquiring why you do not wish to quote, the letter generally should be ignored, but if special instances present themselves where you deem it desirable to make a further reply explaining your reason, we suggest the following:

"Your letter of ———— date with inclosures was received today. The commercial experience of this company has convinced us that in many cases our best policy is to market ———— Portland cement through one dealer in a community. This enables that dealer to push the sale of our product with an energy which we might not otherwise secure. We do not require any dealer to agree in any way that he will not deal in the product of our competitors, but we do demand, and all that we demand is, that dealers who receive the benefit of our policy of marketing our cement through them shall show the energy which we expect in pushing our product and shall not discriminate against it. We are advised by counsel that this sales plan does not violate the Clayton Act or any other statute, and is not contrary to any public policy expressed in the laws of this country. (Strike out the preceding sentence except when inquiry refers to claimed violation of law.)

"We at no time have had any exclusive agencies or contracts with our customers restricting our right to sell where, when or to whom we might desire. We have always held ourselves free, and we have the right to select the customers with whom we desire to do business, and will continue this policy of freely selecting our customers as we may deem best for furthering the sale of our products. And so, while we may have sold ———— Company in the past, we may tomorrow offer to sell to you or any other dealer in your town, as may to us seem best for our commercial interests and the selling of as much of our product as is possible, for it is needless to suggest that that policy commends itself to us which will result in our selling as much of our product as we can.

"I thank you for calling my attention to the case in question, and I am quite sure that in view of the foregoing explanation you will appreciate our reason for preferring at this time to not sell ———— cement to you in ————."

Question 5: May the cement company sell to "B" at a higher price than is charged "A"? If so, when is it proper and when is it not proper to allow commission to "A" on sale made to "B"?

Answer: You should not sell to "B" at a higher price than you sell to "A", except where the difference in price is based on the grade, quality or quantity of the commodity sold, or the difference in the cost of selling or transportation, or made in good faith to meet competition. You should not allow a commission to "A" on a sale made by you to "B", except for services actually rendered in consummating the sale made to "B". In this connection note our recommendations in answer to Question 1.

Question 6: May the cement company sell to "A" and "B" at the same price and allow to "A" a commission on sale made to "B"?

Answer: You should sell to "A" and "B" at the same price except where conditions noted in answer to Question 5 are present, and you

should not allow a commission to "A" on a sale made to "B" except where conditions exist as found in answer to Questions 5 and 1.

6. QUOTATIONS TO DEALERS FOR DELIVERY AT TOWNS OTHER THAN THEIR HOME TOWN

In many cases quotations have been made to dealers in towns other than their home towns, where they are not regularly engaged in business as building material dealers. By reason of this condition and having no investment in such towns, such dealers frequently sell cement for delivery f. o. b. cars at such towns at a margin of profit smaller than the margin recognized and observed by building material dealers regularly engaged in business in those towns. This deprives the latter dealer of business to which he is justly entitled and causes demoralization and dissatisfaction. *Therefore, a dealer should be quoted the consumer price on cement for shipment to any town other than his home town,* except that it is proper to quote the dealer price to such a dealer on cement for delivery in towns adjacent to his home town in which there are no dealers.

7. CONTRACT FORM FOR DEALERS' USE

Great demoralization results from the ability of dealers to place orders with manufacturers for large amounts for deferred delivery upon the representation that the cement is for specific work which the dealer has sold, all or part of which has in reality not been sold by dealer for such work. In such a case the cement is later sold by dealer from time to time when the market has advanced at a price lower than warranted by the manufacturers' current prices to such dealer and lower than other dealers in the same town can sell at, based on manufacturers' prices to them for current requirements. This results in demoralization to the detriment of all manufacturers concerned in the market affected—the manufacturer who has such an unspecific contract delivering cement at prices below prevailing market prices, and the manufacturers who are trying to sell through other dealers being unable to secure business because of the disadvantage under which such dealers are placed in competition with the dealer who is being supplied by the other manufacturer at price below prevailing market.

Urging dealers to place orders for extended delivery for specific work, and permitting such dealers, at their option, to take more or less cement on such orders than actual quantity used in the work, *has been one of the most objectionable devices and practices known, and has done more than any other one thing to bring about demoralization.* This practice is closely akin to "guaranteeing prices against decline", and no good or wise merchant ever resorts to such practices. If a contract is made it should be a fair one and its terms observed by both parties.

No specific work contract should be made that is not bona fide, and such a contract should cover the quantity of cement used in the particular job described—no more, no less; and any change in the market during the period of the contract should not affect the price named in the contract. All specific work contracts with dealers should be in written contract form, and dealers should be required to report monthly their deliveries thereon. These suggestions, if consistently followed, will prevent padding of contracts and the loss and demoralization resulting therefrom.

If all manufacturers insist that every specific work contract with a dealer have attached thereto an executed copy of contract between the dealer and his customer for that particular work, it will largely eliminate the abuses recited.

For these reasons the attached form of dealer contract should be adopted and its use by dealers insisted upon and executed copy of the dealer contract be attached to the manufacturer's specific work contract with that dealer in every case. The manufacturer, of course, when he has any reasonable doubt of the existence of the specific work mentioned, should make a thorough investigation to disclose the fact or establish with certainty that the quantity in the dealer contract is correct. (See Form No. 5.)

8. REPORTS BY DEALERS OF DELIVERIES ON SPECIFIC WORK CONTRACT

To secure full benefit from dealer contracts described in the preceding section, *dealers should be required to make monthly reports of deliveries on specific work contracts in order that the misuse of cement by dealers may be eliminated and the demoralization which usually results may be prevented.* A form for this purpose is appended.

Comparison should be made regularly each month between the amount reported by dealer as delivered on contract and the amount actually shipped to dealer on contract. When the amount actually shipped is greater than that reported, and if the market price at time of shipment is higher than the contract price, the dealer should be invoiced on the 15th of each month at the difference in price for all excess deliveries in preceding month. (See Form No. 6.)

9. BLANKET CONTRACTS

A blanket contract is a contract covering unknown and uncertain requirements of dealers or contractors or consumers, for delivery beyond 15 days, representing a future possibility and not an actuality.

The making of blanket contracts with dealers or contractors either for flat amounts or for requirements during a stated period of time is unnecessary and unbusinesslike. Such contracts are an obligation of an

indefinite and uncertain character on the cement company, and result in demoralization and abuse. When made with a dealer, if the market advances above contract price, they result in demoralization. In case the market declines below contract price, the dealer refuses to take the cement for the reason that he cannot resell it in competition with dealers buying at market price then prevailing.

When made with a contractor, if the market advances the contractor has an advantage over his competitors in bidding on work to which he is not rightfully entitled. In case the market declines the reverse is true. He is at a disadvantage in figuring his bid in competition with other contractors whose bids are based on the prevailing market price. Usually he figures his bid on the prevailing market price and refuses to take deliveries on the contract for such work as he secures.

The practice of making blanket contracts cannot be too strongly condemned.

10. SALESMEN'S ORDER BLANKS

All sales made by salesmen should be covered by the signed order of the customer, a copy being retained by customer. This will prevent disputes and prevent the customer from claiming later that the salesman agreed to prices, terms, conditions, etc., not in accordance with custom. The attached form, which provides that the order is not binding on the cement company until accepted by its home office, should be adopted and its use insisted upon. (See Form No. 7.)

11. QUOTATIONS FOR IMMEDIATE ACCEPTANCE, FIFTEEN DAY SHIPMENT, ONE CAR ONLY

All quotations represent potential but indefinite and uncertain obligations of the cement company, and it is obviously desirable and proper to limit these obligations as much as practicable. Under the plan of sending broadcast, at every price change, thousands of unasked quotations, the potential obligations of each company, provided they are for acceptance within five, ten or thirty days or until canceled, or for thirty-day shipment or for amounts greater than one car each, reach very high figures.

In the event of general advances in price, which, under strong buying demand, car shortage or similar conditions, may occur at frequent intervals, these potential obligations to sell become real obligations to deliver unduly heavy tonnages at prices lower than the price warranted by commercial conditions. Thus the cement company is effectively prevented from taking advantage of the advanced price, and is compelled to accept business at prices lower than the changed conditions justify.

It is obvious, therefore, that in order to keep the situation more nearly in the control of the cement company, *all trade quotations should*

be for immediate acceptance, 15 day shipment, and for not more than one carload each. (See Form No. 1.)

12. EXTENSION OF DELIVERY DATES

The practice, after customers have placed orders for delivery within 15 days, of later permitting cancellation of these orders or extensions in shipping date originally agreed upon is in reality giving an option to the buyer which causes disturbance to cement company's operating and shipping plans which is an uncertain and indefinite obligation on the cement company.

It is obvious, therefore, that *strict insistence by manufacturers should be made on the following condition of sale:*

"Orders entered for shipment on a specific date will at our option be shipped on that date unless sooner ordered out by purchaser."

13. DEALERS SPECIFYING BRANDS IN MAKING PROPOSALS

It has been found that dealers, in bidding on inquiries for cement, particularly inquiries from municipalities, often do not state brand upon which they are bidding and later, in case they are awarded the business, not being obliged to supply any particular brand, try to auction the business off to manufacturers other than the one on whose price they based their proposal when bidding.

This practice obviously is undesirable from a manufacturer's standpoint and manufacturers are urged when quoting to dealers price to use in bidding on such inquiries, *to require dealers to state in their bid the name of the brand on which they are bidding.*

14. DEFINITION OF SPECIFIC WORK

Specific work is a definable piece of construction work requiring a carload or more of cement for delivery over a specified period of time beyond 15 days.

15. QUOTATIONS FOR SPECIFIC WORK

It is obvious, from the manufacturer's standpoint, that the period for acceptance of a quotation should be as short as possible without inflicting a hardship or undue inconvenience on purchasers of cement. The longer the acceptance period the greater are the manufacturer's potential obligations and such obligations, particularly in an active market, may be undesirable. Certainly it is to the manufacturer's interest to control as nearly as possible at all times the volume of business he may be called upon to take in a given period at a stated price.

The cost of cement entering into a given piece of work should correspond as nearly as possible to the price prevailing at time bids for the work are submitted. In bringing about this condition, however,

quotations should not be held open for an unnecessarily long period for the reason stated. This means, then, that quotations should be made only a reasonable time before and held open only a reasonable time after bids are submitted.

Quotations on specific work are made to two general classes of prospective purchasers:

1. Those who are in position to buy immediately.
   a. Dealer buying for resale to a contractor who has contract for specific work, or for resale to an owner.
   b. Contractor who has contract for specific work.
   c. Owner (including railroads, industrial plants, etc.).
2. Those who are not in position to buy immediately.
   a. Dealer buying for resale to contractor figuring contract for specific work.
   b. Contractor figuring contract for specific work.

Quotations to prospective purchasers of Class 1 may be dismissed in a few words. When a concern or individual needs cement, as soon as the need is known there is no reason why purchase should be delayed. Since a contractor to whom a contract has been awarded occupies the same position as a dealer buying for warehouse stock or an owner in that he can buy immediately, quotations for specific work made to those included in Class 1 should be for acceptance within not more than five days.

Quotations to prospective purchasers of Class 2, namely, those who are not in position to buy at time quotation is made (this class is made up largely of contractors figuring specific work) present a different condition. Such quotations are usually on cement for use in specific work contract for which has not been awarded and should be for acceptance within not more than 15 days.

It is important that quotations on specific work be made only when a full and accurate description of the work is furnished by the concern or individual asking for quotation.

Quotations should be for acceptance *within not more than five days when prospective purchaser is in position to buy immediately.*

Quotations should be for acceptance *within not more than 15 days when prospective purchaser is not in position to buy immediately.* (See Form No. 3.)

16. SPECIFIC WORK SALES CONTRACT

A specific work sales contract is a contract covering the cement required for specific work (see definition of Specific Work on page 12).

It is clear that *a specific work sales contract should be executed only when the person or concern desiring to buy has been awarded contract for such work, or in case the owner is the buyer such specific work sales*

contract should be executed only when it has been definitely decided that the work in question is to be done immediately or within a reasonably short time.

In case a dealer is the buyer, buying for resale to a contractor or an owner, such specific work sales contract should be executed *only when dealer has theretofore sold the cement to* his customer. It is desirable that copy of contract between dealer and his customer be attached to such specific work sales contract. (See Section 7—Contract Form for Dealers' Use—page 9.)

Specific work sales contract should accurately describe the work as to location, character, name of owner, contractor or other party doing the work.

It is important in specific work sales contracts (as it is in quotations and other documents used in the industry), that they be definite and exact as to their provisions. (See Form No. 4.)

17. QUANTITY AND DELIVERY PERIOD OF SALES TO CEMENT PRODUCTS PLANTS, INDUSTRIAL PLANTS, RAILROADS, ELECTRIC LINES, STATE, COUNTY AND MUNICIPAL GOVERNMENTS

Railroads, industrial plants and manufacturers of cement products, including concrete blocks, cast stone, concrete drain and roofing tile, concrete sinks and laundry tubs, concrete shingles, etc., have been in the habit of buying their requirements for season delivery or their requirements with a maximum and minimum limit for season delivery, or flat amounts for season delivery, or flat amounts with leeway for season delivery.

As to concrete products plants, the claim has been made that the nature of their business is such that they distribute price lists covering their products and manufacture them for stock and later sale, and in view of this that they should be sold their requirements for the season.

This condition is largely theoretical. In reality, if such concerns are sold for delivery within 10 days or for deferred delivery when the sale is for specific work only, they will be able to change their prices from time to time to accord with changes in the cement market without any considerable inconvenience and with no injury. To sell such concerns season requirements, or large quantities for deferred delivery, is likely to result in such concerns, in the event of a price advance, retailing the cement at prices with which legitimate dealers paying the market price are unable to compete, thus putting such dealers out of the market and destroying such channels of trade.

In view of these conditions *concrete products plants, including manufacturers of the items listed above, should not be sold blanket requirements for season delivery or large amounts for deferred delivery,* but sales to this class of customers should be on either of the following bases:

1. For delivery within 15 days from date of order, or
2. Requirements of specific work which is known to exist, with a maximum amount limitation.

In the case of *Industrial Plants, Manufacturing Establishments, etc., there is no real necessity for such concerns to buy their requirements for the season*, and they should be sold only on the following bases:

1. Delivery within 15 days from date of order, or
2. Requirements of specific work which is known to exist, with a maximum amount limitation.

In the case of *Railroads, Electric Lines, State, County and Municipal Governments and Regularly Constituted Boards and Commissions thereof, there is also no real necessity for such concerns to buy their requirements for the season*, and such buyers should be sold only on the following bases:

1. Delivery within 15 days from date of order:
2. Requirements of specific work which is known to exist, with a maximum amount limitation.

It is recommended that *sales to classes of purchasers referred to in this section should be made direct preferably:* that where such sales are made through dealers, except in the case of Railroads (where it is preferable that all sales be made direct), it is important that Cement Companies check up such cases carefully to prevent possibility of cement ordered by dealers on such contracts being sold through dealers and used for other purposes, contrary to contracts.

18. GIVING ADVANCE NOTICE OF PRICE CHANGES

The practice of giving notice of a price advance is unbusinesslike and cannot be too strongly condemned. The theory of advance in price is that conditions do not justify the sale of cement at the former price. The practice of giving notice of an advance in price is opposed to this theory in that the practice results in large quantities of cement being bought at prices lower than conditions justify. The argument has been advanced in favor of the practice that dealers should be protected at the time of a change in price to the extent of being enabled to fill their warehouses before the advance takes effect. This argument lacks strength in that it would tend to cause dealers to defer their purchases even when they need cement for the reason that they would know they would receive notice of an advance and in the meantime be enabled to take advantage of a decline in price, should one occur. Clearly this would have the effect of influencing the dealer not to keep his stocks at a level to meet demand and in addition would foster speculation, a practice which it is generally agreed in the cement industry is not a desirable one.

In the few cases where the practice of giving a five-day notice of price advance has been indulged in the extent of it was supposed to be confined to a single carload and to dealers only, but, in fact, it was usually not so restricted in either respect. Quantities of business placed at the old price usually were unlimited and during the five-day interval quotations were made indiscriminately, some of them covering specific work for as much as 30-day acceptance.

A further objection to the practice as it has worked out under trial is that a contractor who has a contract covering a given piece of work has no incentive to buy until he actually must have cement. This is true for the reason stated in reference to dealers—that is, that contractor knows he will receive notice of an advance in price and by waiting for such a notice, knows that he will be enabled to take advantage of a decline in price should one occur.

Therefore, when quotations are issued covering a change in price *the change should be made effective on the date quotations are written, and in no case should the practice of what has become known in the industry as "price tipping" be indulged in.*

19. GUARANTEEING SALES AGAINST DECLINE IN PRICE

The practice of a cement company in guaranteeing customers against decline in price is inherently unfair and unbusinesslike. Besides the paying or allowing of rebates or special concessions in any form, directly or indirectly, to any person, firm, corporation, dealer, lineyard company, or its agents or employees, is unfair competition and illegal discrimination.

Quotations and sales should be made in accordance with the methods described in this pamphlet and *in no case should the cement company guarantee its customer against a decline in price.*

20. SPECIFICATIONS *

The specifications under which practically all cement is marketed in this country are, of course, recognized as standard and it is clearly to the interest of all cement companies to discourage freak and unreasonable specifications.

No cement should be sold or quoted on subject to specifications other than those of the American Society for Testing Materials, adopted September 1, 1916.

The company wishing to make sale should, of course, use its influence to have the specifications made regular, and in addition, when prospective purchaser insists on other than standard specifications, a report of

* EDITOR'S NOTE—Reference in this section to Government specifications may be disregarded for the time being at least, the Government Departmental Committee on specifications for cement having recently passed a resolution that the requirement for fineness be changed to take effect six months after the close of the war with Germany, instead of July 1, 1918.

the occurrence should be made to the Committee on Technical Problems of the Association with the request that it try to prevail upon the prospective purchaser to adopt standard specifications, one of the chief objects of that Committee being to maintain the quality of, and standardize the specifications for, Portland cement.

The reason for omitting reference to Government Specifications is that these specifications, although they are now exactly the same as the specifications of the American Society, contain the provision that the fineness requirements will be automatically changed July 1, 1918, which, in the opinion of many authorities, is unnecessary.

Of course, in furnishing cement for Government work it may be necessary for the company making the sale to incorporate Government specifications in the conditions of sale, but in case deliveries are to run beyond July 1, 1918, the sale should provide clearly that the cement delivered under it is to conform to Government Specifications as now written and not to Government Specifications as they will be after July 1, 1918, in case the changed provision as to fineness goes into effect.

21. CHARGE FOR BIN TEST

When cement is set aside in sealed bins and tested for the exclusive use of a single customer or group of customers, mill operation and shipping procedure are limited and restricted, with consequent inconvenience, lessened efficiency and increased costs, by reason of great investment required in storage facilities and to carry additional stock of cement.

The cost of this additional service varies as among companies and differs according to time of year, condition of stocks and length of time the cement is held. While the exact cost is difficult to determine it varies from three cents to ten cents per barrel and it is clear that *this cost, in no instance lower than three cents per barrel, should be borne by the purchaser of cement.*

It has been found that in some cases customers at time of purchase demand bin test facilities; and in others without making such a demand at time of purchase, later under their interpretation of standard specifications demand that bin test facilities be supplied.

When it is demanded at time sale is made that cement be set aside in sealed bins and tested, contract should provide for an additional charge for the facilities supplied.

When it is not demanded at time sale is made that cement be set aside in sealed bins and tested, contract should provide that in case such a demand is made later Cement Company shall not be obliged to comply with the demand but may do so at its option, in which event an additional charge will be made for the facilities supplied.

The additional charge referred to in this section is for service and

storage facilities only and is not to be confused with the charge for actual testing referred to in Section 22.

22. COMMERCIAL LABORATORY TESTING CHARGE

As all quotations and sales are subject to Standard Specifications, the cement company guarantees the cement to conform thereto. If the purchaser, or some other interested party, desires to assure himself that such condition is fulfilled by the cement company, and employs a commercial laboratory or tester to make tests to determine the fact, the cost of such service should not be borne by the cement company.

It is generally realized that *under no circumstances should cement manufacturers bear commercial laboratory charges for testing* cement or pay these charges for the buyer's account.

23. SACKS

It should be thoroughly understood, and the position firmly maintained that:

All packages are provided solely for the cement user and are sold to and paid for by him on the same terms as the cement. They are delivered to transportation company in a serviceable condition, filled with cement, and any loss due to damage en route should be assumed by the transportation company.

Any loss due to damage while in possession of the dealer should be assumed by him.

Any loss due to damage while in possession of user should be assumed by him.

Cloth sacks will be repurchased by the cement company from original purchaser only when in serviceable condition, or when a reasonable amount of repairing will put them in serviceable condition for further use as cement containers.

The theory sometimes advanced that the cement container is a free package, that the cement company lends the cloth sack to the user, or by any process assumes any loss due to wear and tear, except that occurring while in the cement company's hands, is unsound and inconsistent, and the practice of maintaining this attitude is condemned.

In view of these facts *it should be made the rule that only such cloth sacks as are serviceable and can be used again be repurchased*, and that no returned cloth sacks be repurchased unless they are in serviceable condition as cement containers or can be made so by a reasonable amount of repairing.

In all cases the cement company's count and inspection should be final and the cost of returning empty cloth sacks to the cement company's mill should be borne by purchaser.* (See note at bottom of page.)

* The sack provisions in forms accompanying this report are on the basis of charges for packages, in effect prior to September 16, 1918.

24. CREDIT

The free interchange of credit information among cement companies is desirable in the interest of reducing losses, eliminating the practice of cement companies acting in the capacity of bankers, and concentrating the handling of cement in the hands of competent and responsible dealers.

Bureaus for the collection and distribution of credit information have been established in some sections of the country and it is desirable that similar bureaus be organized in other sections.

25. DEALERS' ORGANIZATIONS

It is the recommendation of the committee that Cement Manufacturers do not become members of any dealers' organization.

26. BULK CEMENT

Handling cement in bulk, where the nature of the work permits, is worthy of very careful consideration. It is convenient and economical and has proved eminently satisfactory to those who have used it.

It eliminates:

1. Investment in sacks on hand and en route to job filled with cement.
2. Investment in empty sacks on hand and en route to cement mills.
3. Freight charges on shipments of returned empty sacks.
4. Sack losses necessarily incident to the use of cement in sacks.

It also reduces the number of men required on the job. Many contractors using cement in bulk have effected a saving of from five to ten cents per barrel in addition to the saving in purchase price.

Form No. 1

QUOTATION TO DEALERS FOR WAREHOUSE STOCK

IMPERIAL PORTLAND CEMENT COMPANY

IMPERIAL, U. S. A.

We quote for immediate acceptance, subject to change without notice, shipment within fifteen (15) days from date of order, acceptance of order in writing by this company, and to terms, conditions and limitations on the reverse side hereof, in carloads, f. o. b. station named:

	in 4 cloth sacks at	per standard bbl.
IMPERIAL Portland Cement		
	" 4 paper bags at	" " "

Unless otherwise agreed, this quotation is limited to one carload of cement and applies only on shipments billed to and unloaded at point of delivery specified.

This quotation is based upon today's market and is applicable to immediate orders only.

Prices for specific work requiring deliveries beyond 15 days will be quoted upon application accompanied by full information and description of the work.

Yours respectfully,

IMPERIAL PORTLAND CEMENT COMPANY.

Terms, Conditions and Limitations

PAYMENT: 30 days net; 5 cents per barrel discount for PAYMENT IN FULL within 10 days from date of invoice. Payments to be made in cash or equivalent at our Office, Imperial, U. S. A. Original paid freight bills to be sent us promptly for comparison.

Sacks must be paid for at same time as cement.

If purchaser fails to comply with terms of payment or with any of the other terms of sale, we reserve the right to cancel unfilled portion of any contract or order, purchaser remaining liable for all unpaid accounts.

Orders are subject to approved credit, and if at any time purchaser's financial responsibility be or become, in our opinion, impaired or unsatisfactory, we reserve the right to require payment in advance or satisfactory assurance that bills will be promptly paid when due.

In making delivered prices, we only guarantee cost at destination, and we will not be responsible for shortage or damage occurring in transit. Our responsibility ceases when shipments are delivered to railroad company on cars at our mill. Railroad company's bills of lading shall be conclusive as to quantity and good condition of both cement and packages when loaded on cars.

We will pay to original purchaser 10 cents each for empty cloth cement sacks purchased of us, bearing our brand, on their receipt in serviceable condition at our mill, if returned within 90 days after their purchase, freight prepaid, subject to our inspection and count. We do not purchase sacks bearing brands other than our own, or sacks that have been wet or are otherwise useless.

Shipments in paper bags are made at purchaser's risk of breakage and resultant loss of cement.

Orders entered for shipment on a specific date will, at our option, be shipped on that date unless sooner ordered out by purchaser.

We reserve the right to prescribe the route by which shipments shall be forwarded. All railroad demurrage, car service and terminal charges at destination shall be settled for and borne by purchaser.

The purchaser shall give us shipping instructions in writing a reasonable time before shipments are to be made. All orders and contracts are accepted subject to contingencies of manufacturing and shipping, and other causes beyond our control, and we will not be responsible for delays in transit. Should any contingency at any time arise whereby production or shipments are curtailed or delayed, we reserve the right to prorate our shipments of cement to all purchasers of record at such time. In addition to orders or contracts accepted hereunder, we may have accepted, and shall from time to time accept, other orders and contracts so as to have a market for our estimated output of cement under normal conditions; therefore, in the event we shall at any time, because of any such contingency, be unable to deliver to all our customers the entire quantity of cement required and called for by all of our contracts then in force, the total of our production then available shall be applied pro rata on all of said contracts according to their requirements respectively, and the amount deliverable on each contract may be reduced accordingly, and there shall be no liability on our part for the reduction so made.

IMPERIAL portland cement to be furnished hereunder is when shipped to conform in every respect to Standard Specifications for portland cement adopted September 1, 1916, by the American Society for Testing Materials, but we cannot be responsible for improper use of cement; therefore, we will not guarantee finished work.

Purchaser waives any provisions of said specifications which may be interpreted as involving the setting aside of cement in sealed bins for test before shipment, unless such an arrangement is expressly agreed to in contract when executed, in which event an additional charge will be made, and stated in the contract, for the facilities supplied.

IMPERIAL PORTLAND CEMENT COMPANY.

Form No. 2

QUOTATION TO LINEYARD

IMPERIAL PORTLAND CEMENT COMPANY

IMPERIAL, U. S. A.

We quote for immediate acceptance, subject to change without notice, shipment within fifteen (15) days from date of order, acceptance of order in writing by this Company, and to terms, conditions and limitations on the reverse side hereof, "IMPERIAL" Portland Cement for your yards, in carloads, f. o. b. stations named, at the following prices per standard barrel, viz.:

F. O. B.	IN CLOTH SACKS	IN PAPER BAGS

Unless otherwise agreed, this quotation is limited to one carload of cement for each or any station named and applies only on shipments billed to and unloaded at point of delivery specified, respectively.

This quotation is based upon today's market and is applicable to immediate orders only.

Prices for specific work requiring deliveries beyond 15 days will be quoted upon application accompanied by full information and description of the work.

Yours respectfully,

IMPERIAL PORTLAND CEMENT COMPANY.

Terms, Conditions and Limitations

PAYMENT: 30 days net; 5 cents per barrel discount for PAYMENT IN FULL within 10 days from date of invoice. Payments to be made in cash or equivalent at our Office, Imperial, U. S. A. Original paid freight bills to be sent us promptly for comparison.

Sacks must be paid for at same time as cement.

If purchaser fails to comply with terms of payment or with any of the other terms of sale, we reserve the right to cancel unfilled portion of any contract or order, purchaser remaining liable for all unpaid accounts.

Orders are subject to approved credit, and if at any time purchaser's financial responsibility be or become, in our opinion, impaired or unsatisfactory, we reserve the right to require payment in advance or satisfactory assurance that bills will be promptly paid when due.

In making delivered prices, we only guarantee cost at destination, and we will not be responsible for shortage or damage occurring in transit. Our responsibility ceases when shipments are delivered to railroad company on cars at our mill. Railroad company's bills of lading shall be conclusive as to quantity and good condition of both cement and packages when loaded on cars.

We will pay to original purchaser 10 cents each for empty cloth cement sacks purchased of us, bearing our brand, on their receipt in serviceable condition at our mill, if returned within 90 days after their purchase, freight prepaid, subject to our inspection and count. We do not purchase sacks bearing brands other than our own, or sacks that have been wet or are otherwise useless.

Shipments in paper bags are made at purchaser's risk of breakage and resultant loss of cement.

Orders entered for shipment on a specific date will, at our option, be shipped on that date unless sooner ordered out by purchaser.

We reserve the right to prescribe the route by which shipments shall be forwarded. All railroad demurrage, car service and terminal charges at destination shall be settled for and borne by purchaser.

The purchaser shall give us shipping instructions in writing a reasonable time before shipments are to be made. All orders and contracts are accepted subject to contingencies of manufacturing and shipping, and other causes beyond our control, and we will not be responsible for delays in transit. Should any contingency at any time arise whereby production or shipments are curtailed or delayed, we reserve the right to prorate our shipments of cement to all purchasers of record at such time. In addition to orders or contracts accepted hereunder, we may have accepted, and shall from time to time accept, other orders and contracts so as to have a market for our estimated output of cement under normal conditions; therefore, in the event we shall at any time, because of any such contingency, be unable to deliver to all our customers the entire quantity of cement required and called for by all of our contracts then in force, the total of our production then available shall be applied pro rata on all of said contracts according to their requirements respectively, and the amount deliverable on each contract may be reduced accordingly, and there shall be no liability on our part for the reduction so made.

IMPERIAL portland cement to be furnished hereunder is when shipped to conform in every respect to Standard Specifications for portland cement adopted September 1, 1916, by the American Society for Testing Materials, but we cannot be responsible for improper use of cement; therefore, we will not guarantee finished work.

Purchaser waives any provisions of said specifications which may be interpreted as involving the setting aside of cement in sealed bins for test before shipment, unless such an arrangement is expressly agreed to in contract when executed, in which event an additional charge will be made, and stated in the contract, for the facilities supplied.

IMPERIAL PORTLAND CEMENT COMPANY.

Form No. 3
In Triplicate

SPECIAL QUOTATION FOR SPECIFIC WORK

IMPERIAL PORTLAND CEMENT COMPANY

IMPERIAL, U. S. A.

We quote you, subject to all the terms, conditions and limitations on both sides hereof, on "IMPERIAL" PORTLAND CEMENT for work herein described; and for shipment according to contract requirements, between date hereof and 19- , not to exceed, however, bbls. in any one month:

4 Cloth Sacks at per Standard Bbl.

IMPERIAL Portland Cement in

4 Paper Bags at " " "

in carloads, f. o. b. cars
This price includes the sacks in which the cement is to be shipped.

This quotation is intended to cover the entire and actual quantity (estimated at barrels) of Portland cement which buyer shall be required to, and in fact shall, furnish or use in the following described work.

DESCRIPTION OF WORK

*This quotation is subject to the execution of a written contract between you and your customer in conformity herewith on our regular form furnished for dealers' use, the original or a duplicate thereof to be filed with us.

†This quotation is for acceptance within 5 days from this date and is subject to the execution of our regular form Specific Work Sales Contract.

Yours respectfully,

IMPERIAL PORTLAND CEMENT COMPANY.

This quotation is for acceptance within 15 days from this date and is subject to the execution of our regular form Specific Work Sales Contract at the time this quotation is accepted.

Terms, Conditions and Limitations

PAYMENT: 30 days net; 5 cents per barrel discount for PAYMENT IN FULL within 10 days from date of invoice. Payments to be made in cash or equivalent at our Office, Imperial, U. S. A. Original paid freight bills to be sent us promptly for comparison.

Sacks must be paid for at same time as cement.

If purchaser fails to comply with terms of payment or with any of the other terms of sale, we reserve the right to cancel unfilled portion of any contract or order, purchaser remaining liable for all unpaid accounts.

If at any time purchaser's financial responsibility be or become, in our opinion, impaired or unsatisfactory, we reserve the right to require payment in advance or satisfactory assurance that bills will be promptly paid when due.

In making delivered prices, we only guarantee cost at destination, and we will not be responsible for shortage or damage occurring in transit. Our responsibility ceases when shipments are delivered to railroad company on cars at our mill. Railroad company's bills of lading shall be conclusive as to quantity and good condition of both cement and packages when loaded on cars.

We will pay to original purchaser 10 cents each for empty cloth cement sacks purchased of us, bearing our brand, on their receipt in serviceable condition at our mill, if returned within 90 days after their purchase, freight prepaid, subject to our inspection and count. We do not purchase sacks bearing brands other than our own, or sacks that have been wet or are otherwise useless.

Shipments in paper bags are made at purchaser's risk of breakage and resultant loss of cement.

The quotation on reverse side is limited to the quantity and delivery stipulated and work described.

Orders entered for shipment on a specific date will, at our option, be shipped on that date unless sooner ordered out by purchaser.

We reserve the right to prescribe the route by which shipments shall be forwarded. All railroad demurrage, car service and terminal charges at destination shall be settled for and borne by purchaser.

The purchaser shall give us shipping instructions in writing a reasonable time before shipments are to be made. All orders and contracts are accepted subject to contingencies of manufacturing and shipping, and other causes beyond our control, and we will not be responsible for delays in transit. Should any contingency at any time arise whereby production or shipments are curtailed or delayed, we reserve the right to prorate our shipments of cement to all purchasers of record at such time. In addition to orders or contracts accepted hereunder, we may have accepted, and shall from time to time accept, other orders and contracts so as to have a market for our estimated output of cement under normal conditions; therefore, in the event we shall at any time, because of any such contingency, be unable to deliver to all our customers the entire quantity of cement required and called for by all of our contracts then in force, the total of our production then available shall be applied pro rata on all of said contracts according to their requirements respectively, and the amount deliverable on each contract may be reduced accordingly, and there shall be no liability on our part for the reduction so made.

IMPERIAL portland cement to be furnished hereunder is when shipped to conform in every respect to Standard Specifications for portland cement adopted September 1, 1916, by the American Society for Testing Materials, but we cannot be responsible for improper use of cement; therefore, we will not guarantee finished work.

Purchaser waives any provisions of said specifications which may be interpreted as involving the setting aside of cement in sealed bins for test before shipment, unless such an arrangement is expressly agreed to in contract when executed, in which event an additional charge will be made, and stated in the contract, for the facilities supplied.

Form No. 4
In Triplicate

IMPERIAL PORTLAND CEMENT COMPANY
Imperial, U. S. A.

Specific Work—Sales Contract, No._____

THIS AGREEMENT, and a duplicate hereof, made this day of 191 , by and between IMPERIAL PORTLAND CEMENT COMPANY (a corporation), of Imperial, U. S. A., hereinafter called "SELLER," and of , hereinafter called "BUYER," WITNESSETH:

That in consideration of the price and subject to all the terms, conditions and limitations set forth on this and the reverse side hereof, which it is hereby mutually understood and expressly agreed are a part hereof, SELLER hereby sells and agrees to deliver, and the BUYER hereby purchases and agrees to receive and pay for approximately barrels of "IMPERIAL" Portland cement, at a price of $ per standard bbl. in 4 cloth sacks, in carload lots, f. o. b. cars , to be used in the following described work, and 4 paper bags, shipped between the date hereof and , 191 .

DESCRIPTION OF WORK

This contract is intended to, and does, within the limitations hereof, cover the entire quantity of Portland cement which BUYER shall, during the time herein specified, furnish or use in the work above described.

The amount of Portland cement required for the said work is estimated by BUYER at
barrels, but nothing herein contained shall obligate SELLER to furnish hereunder more than the quantity of "IMPERIAL" cement actually furnished by BUYER for, and used in, said work. Said cement is to be shipped as nearly as practicable to meet the necessities of the work; it being understood, however, that under no circumstances shall SELLER be obligated to ship hereon more than barrels during any one calendar month; or during any 30 day period; it being further provided, however, that BUYER shall in any event receive and pay for in accordance with price and terms hereof, all cement shipped hereunder.

BUYER shall have no right to assign this contract. The material covered by it is sold to BUYER upon the representation that it is purchased for use in the construction of work referred to. Use of the cement in any other work than that specified or disposition of it for any other purpose or resale of it for use in other than above described work shall give SELLER the option to terminate this contract and to refuse to deliver any more cement under it.

This contract shall be binding upon the heirs, executors, administrators, successors, or assigns of the respective parties hereto, but shall not be assigned by BUYER without written consent of SELLER.

ENTERED INTO and signed, subject to official written approval of an Executive Officer of SELLER at its General Office, Imperial, U. S. A., the day and year first above written.

Approved....., 191 .

Contract No._____

Date_____ 191—

IMPERIAL PORTLAND CEMENT CO.

IMPERIAL, U. S. A.

and

Other Terms, Conditions and Limitations Governing This Contract

BUYER, when ordering cement to be shipped hereon, shall refer to this contract by its number and date, and the BUYER shall, on or about the first day of each month, if requested by and on form furnished by SELLER, correctly inform the SELLER of the amount of "IMPERIAL" CEMENT delivered or used by him on the work described during the preceding month or months since date hereof.

The terms of payment shall be as follows, viz.: 30 days net, or, if invoice is PAID IN FULL within 10 days from date of shipment, 5 cents per barrel discount will be allowed, payments to be made in cash or equivalent at SELLER'S Office, Imperial, U. S. A. Freight charges per tariff applying, from Imperial, U. S. A., to point of delivery specified, shall be paid by BUYER for account of SELLER, and the original paid freight bills sent to SELLER promptly for proper comparison.

If at any time the financial responsibility of buyer becomes impaired or unsatisfactory to SELLER it reserves the right to require payments in advance or satisfactory security or guarantee that invoices will be promptly paid when due. If BUYER fails to comply with terms of payment, SELLER reserves the right to cancel unfilled portion of any contract or order, BUYER remaining liable for all unpaid accounts.

The price herein provided includes the packages in which the cement shall be shipped.

SELLER will pay original purchaser 10 cents each for empty cloth cement sacks purchased hereunder bearing its brand, on their receipt in serviceable condition at SELLER'S mill, if returned within 90 days after their purchase, freight prepaid, subject to SELLER'S inspection and count. SELLER will not purchase sacks bearing brands other than its own, or sacks that have been wet or otherwise made useless.

SELLER'S invoice quantities shall be the basis for settlement, and BUYER shall not hold SELLER, responsible for shortage of, or damage to, either cement or packages occurring in transit. Railroad company's bills of lading at the point of shipment shall be conclusive as to quantity and good condition of cement and packages when loaded on cars at SELLER'S mill. All railroad demurrage, car service, and terminal charges imposed at destination shall be settled for, and borne by, BUYER.

The price specified on the reverse side hereof is a firm price and not subject to change or alteration except as may be herein otherwise expressly stipulated, any agreement, oral or otherwise, with the salesman or any other person to the contrary notwithstanding; it being further understood and agreed that all conditions of the sale are herein wholly set out.

SELLER reserves the right to determine and direct the route by which shipments hereunder shall be forwarded.

BUYER shall give SELLER shipping instructions in writing a reasonable time before shipments are to be made. All orders and contracts are accepted subject to contingencies of manufacturing and shipping, and other causes beyond SELLER'S control, and SELLER will not be responsible for delays in transit. Should any contingency at any time arise, whereby production or shipments are curtailed or delayed, SELLER reserves the right to pro rate its shipment of cement to all purchasers of record at such time. In addition to orders or contracts accepted hereunder SELLER may have accepted and may from time to time accept, other orders and contracts so as to have a market for its entire estimated output of cement under normal conditions; therefore in the event SELLER shall at any time, because of any such contingency, be unable to deliver to all its customers the entire quantity of cement required and called for by all of its contracts then in force, the total of SELLER'S production then available shall be applied pro rata on all of said contracts according to their requirements respectively, and the amount deliverable on each contract may be reduced accordingly and there shall be no liability on SELLER'S part for the reduction so made.

The IMPERIAL portland cement to be shipped hereunder is when shipped to conform in every respect to Standard Specifications for portland cement adopted September 1, 1916, by the American Society for Testing Materials, but seller cannot be responsible for improper use of cement, therefore will not guarantee finished work.

Buyer waives any provisions of said specifications which may be interpreted as involving the setting aside of cement in sealed bins for test before shipment, unless such an arrangement is expressly agreed to in contract when executed, in which event an additional charge will be made, and stated in the contract, for the facilities supplied.

Time is the essence of this contract.

Buyer.

Other Terms, Conditions and Limitations Governing This Contract

If at any time the financial responsibility of buyer becomes impaired or unsatisfactory to seller, it reserves the right to require payments in advance or satisfactory security or guarantee that invoices will be promptly paid when due. If buyer fails to comply with terms of payment, seller reserves the right to cancel unfilled portion of any contract or order, buyer remaining liable for all unpaid accounts.

Sacks must be paid for at same time as cement.

The Seller has a contract with Imperial Portland Cement Company, Imperial, U. S. A. (Shipper), for the cement to be furnished and delivered hereon, and Buyer agrees that this contract is subject to contingencies of manufacturing and shipping and other causes beyond control of Seller or Shipper, and that should any contingency at any time arise whereby Shipper's production or shipments are curtailed or delayed, the right is reserved by both Shipper and Seller to prorate the shipments and deliveries of cement to all buyers of record at such time; that in addition to this contract, Shipper and Seller may have accepted, and may from time to time accept, other orders and contracts within their ability under normal conditions to supply same, therefore in the event either Shipper or Seller at any time be unable to deliver to all customers the entire quantity of cement called for by all contracts then in force, the total of Shipper's output then available shall be applied pro rata on all orders or contracts according to their requirements respectively, and the amount deliverable on each may be reduced accordingly, and there shall be no liability on the part of Shipper or Seller for the reduction so made.

When deliveries hereunder are in carloads, f. o. b. cars railroad company's tracks, Shipper's invoice quantities shall be the basis for settlement, and Buyer shall not hold Seller responsible for shortage of or damage to, either cement or packages occurring in transit. Railroad company's bills of lading at the point of shipment shall be conclusive as to quantity and good condition of cement and packages when loaded on cars at shipper's mill. All railroad demurrage, car service, and terminal charges imposed at destination shall be settled for, and borne by, Buyer.

The price specified on the reverse side hereof is a firm price, and not subject to change or alteration except as may be herein otherwise expressly stipulated, any agreement, oral or otherwise, with the **salesman or any other person to the** contrary notwithstanding; it being further understood and agreed that all conditions of the sale are herein wholly set out.

Seller reserves the right to determine and direct the route by which shipments hereunder shall be forwarded.

IMPERIAL portland cement to be furnished hereunder is when shipped to conform in every respect to Standard Specifications for portland cement adopted September 1, 1916, by the American Society for Testing Materials, but Shipper or **Seller cannot be responsible for improper use of cement, therefore will not guarantee finished work.**

Buyer waives any provisions of said specifications which may be interpreted as involving the setting aside of cement in sealed bins for test before shipment, unless such an arrangement is expressly agreed to in contract when executed, in which event an additional charge will be made, and stated in the contract, for the facilities supplied.

Time is the essence of this contract.

CONDITIONS OF SALE AND SHIPMENT

1. TERMS: 30 days net; 5 cents per barrel discount for payment in full, including sacks, within 10 days from date of invoice. Original paid freight bills to be sent to us promptly for comparison.

2. The Imperial Portland Cement Company shall be under no obligation to make shipment hereon in the event of any payment becoming past due.

3. Orders are subject to approved credit and if at any time purchaser's credit be or become, in our opinion, impaired or unsatisfactory, we reserve the right to require payment in advance or satisfactory assurance that bills will be promptly paid when due. Sacks must be paid for at same time as cement.

4. If purchaser fails to comply with terms of payment or with any of the other terms of sale, we reserve the right to cancel unfilled portion of any contract or order, purchaser remaining liable for all unpaid accounts.

5. We reserve the right to prescribe the route by which shipments shall be forwarded.

6. Orders entered for shipment on a specific date will, at our option, be shipped on that date unless sooner ordered out by purchaser.

7. Bills are payable in funds current in Imperial, U. S. A., and all exchange or collection charges must be paid by purchaser. Bills not paid when due, per invoices, will be subject to sight draft without notice.

8. Demurrage or other car service charges which railroad companies may impose, for detention of cars, shall be borne and settled for by purchaser.

9. We will pay original purchaser 10 cents each for empty cloth cement sacks purchased of us, bearing our brand, on their receipt in serviceable condition at our Mill, if returned within 90 days after their purchase, freight prepaid, subject to our inspection and count. We do not purchase sacks bearing brands other than our own, or sacks that have been wet or are otherwise useless.

10. When making delivered prices we only guarantee cost at destination, and we will not be responsible for shortage or damage occurring in transit. Our responsibility ceases when shipments are delivered to railroad company on cars at our Plant. Railroad company's bills of lading shall be conclusive as to quantity and good condition of cement and packages when loaded on cars.

11. The purchaser shall give us shipping instructions in writing a reasonable time before shipments are to be made. All orders and contracts are accepted subject to contingencies of manufacturing and shipping, and other causes beyond our control, and we will not be responsible for delays in transit. Should any contingency at any time arise, whereby production or shipments are curtailed or delayed, we reserve the right to prorate our shipments of cement to all purchasers of record at such time. In addition to orders or contracts accepted hereunder we may have accepted, and shall from time to time accept, other orders and contracts so as to have a market for our estimated output of cement under normal conditions; therefore, in the event we shall at any time because of any such contingency be unable to deliver to all our customers the entire quantity of cement required and called for by all of our contracts then in force, the total of our production then available shall be applied pro rata on all of said contracts according to their requirements respectively, and the amount deliverable on each contract may be reduced accordingly, and there shall be no liability on our part for the reduction so made.

12. It is mutually understood and agreed that the price at which the order on the reverse side hereof is accepted by the Imperial Portland Cement Company is a firm price and not subject to change or alteration except as may be herein otherwise expressly stipulated, any agreement, oral or otherwise, with the salesman or any other person to the contrary notwithstanding, it being further understood and agreed that all conditions of the sale are herein and in the acceptance hereof, wholly set out, and each and every of said conditions form a part of the order and are agreed to and accepted as such by purchaser.

13. This order contemplates delivery and use of material ordered at destination shown and in the work described, if any, and if diverted or used elsewhere purchaser hereby agrees to pay Imperial Portland Cement Company for cement so diverted, at its price current at point of ultimate destination, and in the event of such diversion without its consent the Imperial Portland Cement Company shall be under no obligation to make shipments hereon.

14. This order, if for cement to be used in specific work requiring deliveries beyond fifteen days from date, is subject to execution of our regular form Specific Work Sales Contract.

15. IMPERIAL portland cement to be furnished hereunder is when shipped to conform in every respect to Standard Specifications for portland cement adopted September 1, 1916, by the American Society for Testing Materials, but we cannot be responsible for improper use of cement, therefore we will not guarantee finished work.

Purchaser waives any provisions of said specifications which may be interpreted as involving the setting aside of cement in sealed bins for test before shipment, unless such an arrangement is expressly agreed to in contract when executed, in which event an additional charge will be made, and stated in the contract, for the facilities supplied.

INTRODUCTION

At a meeting of the Portland Cement Association, held at Atlantic City in September, 1915, a committee of the Association made a report on trade conditions affecting the cement industry. At a meeting of the Association at Chicago in May, 1916, a committee made a further report on the same general subject. Both committees studied very carefully the trade practices which prevailed more or less generally in the business. Their reports embody their conclusions and recommendations and were adopted by the Association. This pamphlet is a compilation of the essential features of the two reports.

In the opinion of the committees the practices which they recommend are based upon sound business principles. Their recommendations are offered as ideal for the industry, and ought to be followed so generally as to become customs of the business. It was believed that the practices recommended would tend to eliminate unfair methods of competition and improper discriminations in price, and would at the same time maintain the quality of the product and stimulate the interest of the dealer to extend the sale and use of cement for all suitable purposes, and generally prove advantageous to all concerned.

What follows in this pamphlet makes very evident the evils of the past and the reasons supporting each recommendation of the committees. Doubtless every manufacturer will desire to avail himself of the suggestions. Of course, no member of the Association is in any way obligated by the reports, or because of the adoption of the reports by the Association, to follow the recommendations. It is not at all a matter of mutual agreement, but solely a question as to whether the recommendations appeal to each member of the Association severally as the best thing for him and all concerned.

Every member is urged to give very careful consideration to this pamphlet, because the subject is of the greatest importance, and because the recommendations of the committees embody the best judgment of those who have had wide experience and have very carefully inquired as to what business customs will best put the industry on a high plane and give the greatest benefit to the producer, the dealer and the consumer.

1. DEFINITION OF DEALER

A dealer is a person, firm or corporation *regularly engaged in selling Portland cement and other merchandise,* especially building materials, purchased by him for resale; who is also properly equipped with storage facilities; supplied with teams or trucks; and is recognized in his home town as a building material dealer.

2. CONSUMERS

There are only two classes of buyers of cement—dealers and consumers. *The consumer price should be paid by all consumers* including manufacturers of concrete blocks, cast stone, concrete drain and roofing tile, concrete sinks and laundry tubs, concrete shingles and all other concrete products.

3. DEALER DIFFERENTIAL

In order to secure the active and energetic assistance of the dealer in pushing the use of cement in competition with other materials, it is necessary that the business be so handled that the dealer will get a margin of profit which is satisfactory to him and that will compensate him for his work. Unless this is done he will lose interest in cement and discourage its use in favor of other materials.

Recognizing these facts most cement manufacturers have for some time made a differential in price between dealers and consumers, first of five cents per barrel and later of ten cents per barrel, although in some sections of the country some manufacturers are still using the five cent differential.

It is clearly to the cement manufacturers' interest to use their very best efforts to induce dealers to handle their cement business in such a way as to net them a fair margin of profit. One of the surest ways to accomplish this is to help dealers to inform themselves on the cost of doing business, a result of which will be *to discourage them from selling cement for carload delivery on a smaller margin than ten cents per barrel.*

4. FIVE CENTS PER BARREL DISCOUNT

In the latter part of 1915 the cash discount for payment within ten days from date of invoice was increased by practically all cement companies from two cents to five cents per barrel. This discount is closely related to the dealer differential, and for the reasons stated under preceding heading *it is desirable that the five-cent discount be continued.*

It is important in carrying out the provisions for the five-cent discount that no cement be quoted on or sold or payment accepted therefor except including packages; that each invoice be dated the date shipment is made as shown on bill of lading for the shipment covered by it, *and that discount be not allowed in any circumstances unless remittances*

are mailed, as shown by postmark, not later than ten days from date of invoice.

It has been suggested that on the face of all invoices the following be stamped or printed:

$ discount will be allowed if this invoice is paid on or before 191 .

(Total amount of discount in dollars and cents and blank date to be filled in—blank date to be ten days from date of invoice.)

5. COMMISSIONS

The practice of paying to dealers a commission on sales made direct to consumers has been followed by some manufacturers on the theory that, as a dealer handles a certain brand in his locality he is entitled to compensation on sales made to others because his representation has popularized that particular brand.

The correctness of this theory can be successfully attacked from several angles, the principal of which is that the dealer is entitled to compensation only for actual service rendered in each instance. His profits as a merchant are earned only for such service as he actually performs on each barrel sold, as, for example, on cement handled through his warehouse or through his accounts when he assumes the credit risk and thus performs a service.

The ten-cent differential should make it possible for the dealer to sell at a profit all the cement he sells in his town, but if a consumer refuses to buy through a dealer and prefers to purchase direct from a manufacturer, the dealer renders no actual service and clearly is not entitled to compensation when he performs no actual service.

For these reasons and also because the payment of commissions is of questionable legality under the Clayton Act except when the dealer actually perform a service, *commissions should never be paid to dealers under any circumstances.*

Legal opinion has been secured on this point, and in order to make the matter clear questions are stated below, and following them the answers thereto:

"A" is a certain cement company's dealer in a town.

"B" is another dealer in the same town.

"C" is a contractor or other user of cement located or doing work in the same town.

Question 1: May the cement company sell to "A" and "B" (dealers) at one price and to "C" (contractor) at a higher price? If so, when is it proper and when is it not proper for the cement company to allow to "A" or "B" or both a commission on sale made to "C"?

Answer: You may sell to a contractor who is a consumer at a higher price than to a dealer. A difference in price to wholesalers,

jobbers, and consumers tends to equalize the disadvantages which the same price would create, and therefore tends to stimulate competition. A commission should not be allowed to "A" or "B", the dealers, for a sale made by you to "C" except in those rare instances where you may be able definitely to assure yourself that "A" or "B" has rendered you a service or has been the procuring agent in bringing the business to you. If it can consistently be done, we recommend that no commission be paid except upon an agreement so to do in advance for a specific service rendered, as the payment of commission so-called, unless there is a very substantial ground for the allowance, will be considered as evidence against you that you had an exclusive contract with the dealer as to territory, and that the so-called commission is in fact but an allowance to him for business which you sold within the territory which belongs to him. Although you do not under any circumstances agree that a dealer shall have an exclusive territory, nevertheless we must bear in mind that the ultimate determination of a court and jury as to whether such an agreement was in fact made by you will not alone be determined by what you say is the agreement, but your conduct will have greater weight than your mere words, as the substance and result, rather than the form, will be made conclusive.

Question 2: May the cement company decline to quote "C" and refer him to "A", at the same time advising "A" that "C" is in the market for cement?

Answer: You have the right to decline to quote "C" and refer him to "A", at the same time advising "A", the dealer, that "C", the consumer, is in the market for cement. You have the right to refuse to sell to a consumer, as you have the right to choose to sell only to dealers. There is no objection, upon your refusing to sell to a consumer, to advise him that dealer "A" sells a certain brand at ————, and that you assume the dealer has a sufficient stock to handle "C's" requirements, and there is no objection to your advising dealer "A" that "C" is apparently in the market for a certain brand, as he has written to you for prices, in reply to which you have informed him that dealer "A" sells that brand in that locality.

Question 3: On receipt of an inquiry from "C" may the cement company, after consulting with "A", quote "C" on behalf of "A"?

Answer: You should not quote "C" on behalf of dealer "A". This is clear and strong evidence of an unlawful mutual agreement for exclusive territory for "A".

This answer was discussed further with counsel with the result that the opinion was revised to the extent that the cement company may, on receipt of inquiry from a contractor, consult with the dealer and after getting a price from the dealer advise the contractor that it (the cement company) has been authorized by the dealer to quote the contractor.

It is preferable not to use the wording: "We quote you on behalf of the ABC Building Material Company as follows", but rather to use the wording, "We are authorized by the ABC Building Material Co. to quote you as follows."

It was pointed out to counsel that in many cases it is very desirable to quote a contractor after consulting with the dealer, especial emphasis being made of the point that in such cases the contractor generally is a customer of the cement company with headquarters in a town different from the town in which he wishes to use the cement and for that reason is acquainted with the cement company and is not acquainted with the dealer, so that it would be inconvenient for the cement company to find it necessary to tell the contractor that it could not quote him and ask him to get in touch with the dealer. Counsel advised that there is no objection to the cement company securing authority from the dealer to quote the contractor in such a case, but that it is not desirable to follow this course when the contractor and dealer are located in the same town, but preferably where they are in the same town to refer the contractor to the dealer without quoting. Counsel further advised, however, that even in the latter case if in some exceptional instances it is found especially desirable to deal with the contractor after consulting with the dealer it is allowable to do so.

Question 4: May the cement company sell to "A" in his town and refuse to quote "B" when he asks for a price and if the cement company desires refer him to "A"?

Answer: You may sell to "A", a dealer, and refuse to quote "B", a dealer in the same town, and if you so desire you may refer him to "A". You should at all times be extremely careful not to convey at any time, either by conduct or spoken or written words, the impression that the dealer has an exclusive territory or a right in any way to consider himself as the only man in the town to whom you would sell cement. You do not agree to give exclusive territory, and you should be very careful that no inference arises that you have so agreed. We suggest the following form of reply:

"We have your letter of ———— date asking for quotations on ———— cement. In reply have to advise that we do not care at this time to quote, but you are probably aware that ———— is sold in ———— by ————, a dealer who should have in stock enough to supply your requirements, and we suggest that you communicate with him."

In the event you receive a subsequent letter inquiring why you do not wish to quote, the letter generally should be ignored, but if special instances present themselves where you deem it desirable to make a further reply explaining your reason, we suggest the following:

"Your letter of ———— date with inclosures was received today. The commercial experience of this company has convinced us that in

many cases our best policy is to market ———— Portland cement through one dealer in a community. This enables that dealer to push the sale of our product with an energy which we might not otherwise secure. We do not require any dealer to agree in any way that he will not deal in the product of our competitors, but we do demand, and all that we demand is, that dealers who receive the benefit of our policy of marketing our cement through them shall show the energy which we expect in pushing our product and shall not discriminate against it. We are advised by counsel that this sales plan does not violate the Clayton Act or any other statute, and is not contrary to any public policy expressed in the laws of this country. (Strike out the preceding sentence except when inquiry refers to claimed violation of law.)

"We at no time have had any exclusive agencies or contracts with our customers restricting our right to sell where, when or to whom we might desire. We have always held ourselves free, and we have the right to select the customers with whom we desire to do business, and will continue this policy of freely selecting our customers as we may deem best for furthering the sale of our products. And so, while we may have sold ———— Company in the past, we may tomorrow offer to sell to you or any other dealer in your town, as may to us seem best for our commercial interests and the selling of as much of our product as is possible, for it is needless to suggest that that policy commends itself to us which will result in our selling as much of our product as we can.

"I thank you for calling my attention to the case in question, and I am quite sure that in view of the foregoing explanation you will appreciate our reason for preferring at this time to not sell ———— cement to you in ————."

Question 5: May the cement company sell to "B" at a higher price than is charged "A"? If so, when is it proper and when is it not proper to allow commission to "A" on sale made to "B"?

Answer: You should not sell to "B" at a higher price than you sell to "A", except where the difference in price is based on the grade, quality or quantity of the commodity sold, or the difference in the cost of selling or transportation, or made in good faith to meet competition. You should not allow a commission to "A" on a sale made by you to "B", except for services actually rendered in consummating the sale made to "B". In this connection note our recommendations in answer to Question 1.

Question 6: May the cement company sell to "A" and "B" at the same price and allow to "A" a commission on sale made to "B"?

Answer: You should sell to "A" and "B" at the same price except where conditions noted in answer to Question 5 are present, and you should not allow a commission to "A" on a sale made to "B" except where conditions exist as found in answer to Questions 5 and 1.

6. QUOTATIONS TO DEALERS FOR DELIVERY AT TOWNS OTHER THAN THEIR HOME TOWN

In many cases quotations have been made to dealers in towns other than their home towns, where they are not regularly engaged in business as building material dealers. By reason of this condition and having no investment in such towns, such dealers frequently sell cement for delivery f. o. b. cars at such towns at a margin of profit smaller than the margin recognized and observed by building material dealers regularly engaged in business in those towns. This deprives the latter dealer of business to which he is justly entitled and causes demoralization and disatisfaction. *Therefore, a dealer should be quoted the consumer price on cement for shipment to any town other than his home town,* except that it is proper to quote the dealer price to such a dealer on cement for delivery in towns adjacent to his home town in which there are no dealers.

7. CONTRACT FORM FOR DEALERS' USE

Great demoralization results from the ability of dealers to place orders with manufacturers for large amounts for deferred delivery upon the representation that the cement is for specific work which the dealer has sold, all or part of which has in reality not been sold by dealer for such work. In such a case the cement is later sold by dealer from time to time when the market has advanced at a price lower than warranted by the manufacturers' current prices to such dealer and lower than other dealers in the same town can sell at, based on manufacturers' prices to them for current requirements. This results in demoralization to the detriment of all manufacturers concerned in the market affected—the manufacturer who has such an unspecific work contract delivering cement at prices below prevailing market prices, and the manufacturers who are trying to sell through other dealers being unable to secure business because of the disadvantage under which such dealers are placed in competition with the dealer who is being supplied by the other manufacturer at price below prevailing market.

Urging dealers to place orders for extended delivery for specific work, and permitting such dealers, at their option, to take more or less cement on such orders than actual quantity used in the work, *has been one of the most objectionable devices and practices known, and has done more than any other one thing to bring about demoralization.* This practice is closely akin to "guaranteeing prices against decline", and no good or wise merchant ever resorts to such practices. If a contract is made it should be a fair one and its terms observed by both parties.

No specific work contract should be made that is not bona fide, and such a contract should cover the quantity of cement used in the partiular job described—no more, no less; and any change in the market during the period of the contract should not affect the price named

in the contract. All specific work contracts with dealers should be in written contract form, and dealers should be required to report monthly their deliveries thereon. These suggestions, if consistently followed, will prevent padding of contracts and the loss and demoralization resulting therefrom.

If all manufacturers insist that every specific work contract with a dealer have attached thereto an executed copy of contract between the dealer and his customer for that particular work, it will largely eliminate the abuses recited.

For these reasons the attached form of dealer contract should be adopted and its use by dealers insisted upon and executed copy of the dealer contract be attached to the manufacturer's specific work contract with that dealer in every case. The manufacturer, of course, when he has any reasonable doubt of the existence of the specific work mentioned, should make a thorough investigation to disclose the fact or establish with certainty that the quantity in the dealer contract is correct. (See Form No. 5.)

8. REPORTS BY DEALERS OF DELIVERIES ON SPECIFIC WORK CONTRACT

To secure full benefit from dealer contracts described in the preceding section, *dealers should be required to make monthly reports of deliveries on specific work contracts in order that the misuse of cement by dealers may be eliminated and the demoralization which usually results may be prevented.* A form for this purpose is appended.

Comparison should be made regularly each month between the amount reported by dealer as delivered on contract and the amount actually shipped to dealer on contract. When the amount actually shipped is greater than that reported, and if the market price at time of shipment is higher than the contract price, the dealer should be invoiced on the 15th of each month at the difference in price for all excess deliveries in preceding month. (See Form No. 6.)

9. BLANKET CONTRACTS

A blanket contract is a contract covering unknown and uncertain requirements of dealers or contractors or consumers, for delivery beyond 15 days, representing a future possibility and not an actuality.

The making of blanket contracts with dealers or contractors either for flat amounts or for requirements during a stated period of time is unnecessary and unbusinesslike. Such contracts are an obligation of an indefinite and uncertain character on the cement company, and result in demoralization and abuse. When made with a dealer, if the market advances above contract price, they result in demoralization. In case the market declines below contract price, the dealer refuses to take the

cement for the reason that he cannot resell it in competition with dealers buying at market price then prevailing.

When made with a contractor, if the market advances the contractor has an advantage over his competitors in bidding on work to which he is not rightfully entitled. In case the market declines the reverse is true. He is at a disadvantage in figuring his bid in competition with other contractors whose bids are based on the prevailing market price. Usually he figures his bid on the prevailing market price and refuses to take deliveries on the contract for such work as he secures.

The practice of making blanket contracts cannot be too strongly condemned.

10. SALESMEN'S ORDER BLANKS

All sales made by salesmen should be covered by the signed order of the customer, a copy being retained by customer. This will prevent disputes and prevent the customer from claiming later that the salesman agreed to prices, terms, conditions, etc., not in accordance with custom. The attached form, which provides that the order is not binding on the cement company until accepted by its home office, should be adopted and its use insisted upon. (See Form No. 7.)

11. QUOTATIONS FOR IMMEDIATE ACCEPTANCE, FIFTEEN DAY SHIPMENT, ONE CAR ONLY

All quotations represent potential but indefinite and uncertain obligations of the cement company, and it is obviously desirable and proper to limit these obligations as much as practicable. Under the plan of sending broadcast, at every price change, thousands of unasked quotations, the potential obligations of each company, provided they are for acceptance within five, ten or thirty days or until cancelled, or for thirty-day shipment or for amounts greater than one car each, reach very high figures.

In the event of general advances in price, which, under strong buying demand, car shortage or similar conditions, may occur at frequent intervals, these potential obligations to sell become real obligations to deliver unduly heavy tonnages at prices lower than the price warranted by commercial conditions. Thus the cement company is effectively prevented from taking advantage of the advanced price, and is compelled to accept business at prices lower than the changed conditions justify.

It is obvious, therefore, that in order to keep the situation more nearly in the control of the cement company, *all trade quotations should be for immediate acceptance, 15 day shipment, and for not more than one carload each.* (See Form No. 1.)

12. EXTENSION OF DELIVERY DATES

The practice, after customers have placed orders for delivery within 15 days, of later permitting cancellation of these orders or extensions in

shipping date originally agreed upon is in reality giving an option to the buyer which causes disturbance to cement company's operating and shipping plans which is an uncertain and indefinite obligation on the cement company.

It is obvious, therefore, that *strict insistence by manufacturers should be made on the following condition of sale:*

"Orders entered for shipment on a specific date will at our option be shipped on that date unless sooner ordered out by purchaser."

13. DEALERS SPECIFYING BRANDS IN MAKING PROPOSALS

It has been found that dealers, in bidding on inquiries for cement, particularly inquiries from municipalities, often do not state brand upon which they are bidding and later, in case they are awarded the business, not being obliged to supply any particular brand, try to auction the business off to manufacturers other than the one on whose price they based their proposal when bidding.

This practice obviously is undesirable from a manufacturer's standpoint and manufacturers are urged when quoting to dealers price to use in bidding on such inquiries, *to require dealers to state in their bid the name of the brand on which they are bidding.*

14. DEFINITION OF SPECIFIC WORK

Specific work is a definable piece of construction work requiring a carload or more of cement for delivery over a specified period of time beyond 15 days.

15. QUOTATIONS FOR SPECIFIC WORK

It is obvious, from the manufacturer's standpoint, that the period for acceptance of a quotation should be as short as possible without inflicting a hardship or undue inconvenience on purchasers of cement. The longer the acceptance period the greater are the manufacturer's potential obligations and such obligations, particularly in an active market, may be undesirable. Certainly it is to the manufacturer's interest to control as nearly as possible at all times the volume of business he may be called upon to take in a given period at a stated price.

The cost of cement entering into a given piece of work should correspond as nearly as possible to the price prevailing at time bids for the work are submitted. In bringing about this condition, however, quotations should not be held open for an unnecessarily long period for the reason stated. This means, then, that quotations should be made only a reasonable time before and held open only a reasonable time after bids are submitted.

Quotations on specific work are made to two general classes of prospective purchasers:

1. Those who are in position to buy immediately.
   a. Dealer buying for resale to a contractor who has contract for specific work, or for resale to an owner.
   b. Contractor who has contract for specific work.
   c. Owner (including railroads, industrial plants, etc.).
2. Those who are not in position to buy immediately.
   a. Dealer buying for resale to contractor figuring contract for specific work.
   b. Contractor figuring contract for specific work.

Quotations to prospective purchasers of Class 1 may be dismissed in a few words. When a concern or individual needs cement, as soon as the need is known there is no reason why purchase should be delayed. Since a contractor to whom a contract has been awarded occupies the same position as a dealer buying for warehouse stock or an owner in that he can buy immediately, quotations for specific work made to those included in Class 1 should be for acceptance within not more than five days.

Quotations to prospective purchasers of Class 2, namely, those who are not in position to buy at time quotation is made (this class is made up largely of contractors figuring specific work) present a different condition. Such quotations are usually on cement for use in specific work contract for which has not been awarded and should be for acceptance within not more than 15 days.

It is important that quotations on specific work be made only when a full and accurate description of the work is furnished by the concern or individual asking for quotation.

Quotations should be for acceptance *within not more than five days when prospective purchaser is in position to buy immediately.*

Quotations should be for acceptance *within not more than 15 days when prospective purchaser is not in position to buy immediately.* (See Form No. 3.)

16. SPECIFIC WORK SALES CONTRACT

A specific work sales contract is a contract covering the cement required for specific work (see definition of Specific Work on page **12**).

It is clear that *a specific work sales contract should be executed only when the person or concern desiring to buy has been awarded contract for such work, or in case the owner is the buyer such specific work sales contract should be executed only when it has been definitely decided that the work in question is to be done immediately or within a reasonably short time.*

Specific work sales contract should accurately describe the work as to location, character, name of owner, contractor or other party doing the work.

It is important in specific work sales contracts (as it is in quotations and other documents used in the industry), that they be definite and exact as to their provisions. (See Form No. 4.)

17. QUANTITY AND DELIVERY PERIOD OF SALES TO CEMENT PRODUCTS PLANTS, INDUSTRIAL PLANTS, RAILROADS, ETC.

Railroads, industrial plants and manufacturers of cement products including concrete blocks, cast stone, concrete drain and roofing tile, concrete sinks and laundry tubs, concrete shingles, etc., have been in the habit of buying their requirements for season delivery, or their requirements with a maximum and minimum limit for season delivery, or flat amounts for season delivery, or flat amounts with leeway for season delivery.

As to concrete products plants, the claim has been made that the nature of their business is such that they distribute price lists covering their products and manufacture them for stock and later sale, and in view of this that they should be sold their requirements for the season.

This condition is largely theoretical. In reality if such concerns are sold for delivery within 15 days or for deferred delivery when the sale is for specific work only, they will be able to change their prices from time to time to accord with changes in the cement market without any considerable inconvenience and with no injury. To sell such concerns season requirements or large quantities for deferred delivery, is likely to result in such concerns, in the event of price advance, retailing the cement at prices with which legitimate dealers paying the market price are unable to compete, thus putting such dealers out of the market and destroying such channels of trade. It would have the further effect of improperly preventing manufacturers from taking advantage of such price advances.

In view of these conditions *concrete products plants, including manufacturers of the items listed above, should not be sold blanket requirements for season delivery or large amounts for deferred delivery,* but sales to this class of customers should be on either of the following bases:

1. For delivery within 15 days from date of order, or
2. Requirements of specific work which is known to exist, with a maximum amount limitation.

In the case of *railroads, electric lines, industrial plants, etc., there is no real necessity in most instances for such concerns to buy their requirements for the season* and they should be sold only on the following bases:

1. Delivery within 15 days from date of order, or
2. Flat amounts, with a leeway of ten per cent over or under, or
3. Requirements of specific work which is known to exist, with a maximum amount limitation.

18. GIVING ADVANCE NOTICE OF PRICE CHANGES

The practice of giving notice of a price advance is unbusinesslike and cannot be too strongly condemned. The theory of advance in price is that conditions do not justify the sale of cement at the former price. The practice of giving notice of an advance in price is opposed to this theory in that the practice results in large quantities of cement being bought at prices lower than conditions justify. The argument has been advanced in favor of the practice that dealers should be protected at the time of a change in price to the extent of being enabled to fill their warehouses before the advance takes effect. This argument lacks strength in that it would tend to cause dealers to defer their purchases even when they need cement for the reason that they would know they would receive notice of an advance and in the meantime be enabled to take advantage of a decline in price, should one occur. Clearly this would have the effect of influencing the dealer not to keep his stocks at a level to meet demand and in addition would foster speculation, a practice which it is generally agreed in the cement industry is not a desirable one.

In the few cases where the practice of giving a five-day notice of price advance has been indulged in the extent of it was supposed to be confined to a single carload and to dealers only, but, in fact, it was usually not so restricted in either respect. Quantities of business placed at the old price usually were unlimited and during the five-day interval quotations were made indiscriminately, some of them covering specific work for as much as a 30-day acceptance.

A further objection to the practice as it has worked out under trial is that a contractor who has a contract covering a given piece of work has no incentive to buy until he actually must have cement. This is true for the reason stated in reference to dealers—that is, that contractor knows he will receive notice of an advance in price and by waiting for such a notice, knows that he will be enabled to take advantage of a decline in price should one occur.

Therefore, when quotations are issued covering a change in price *the change should be made effective on the date quotations are written, and in no case should the practice of what has become known in the industry as "price tipping" be indulged in.*

19. GUARANTEEING SALES AGAINST DECLINE IN PRICE

The practice of a cement company in guaranteeing customers against decline in price is inherently unfair and unbusinesslike. Beside the paying or allowing of rebates or special concessions in any form, directly or indirectly, to any person, firm, corporation, dealer, lineyard company, or its agents or employees, is unfair competition and illegal discrimination.

Quotations and sales should be made in accordance with the methods described in this pamphlet and *in no case should the cement company guarantee its customer against a decline in price.*

20. SPECIFICATIONS

The specifications under which practically all cement is marketed in this country are, of course, recognized as standard and it is clearly to the interest of all cement companies to discourage freak and unreasonable specifications.

No cement should be sold or quoted on subject to specifications other than those of the United States Government or of the American Society for Testing Materials.

The company wishing to make sale should, of course, use its influence to have the specifications made regular and in addition when prospective purchaser insists on other than standard specifications, a report of the occurrence should be made to the Association with the request that it try to prevail upon the prospective purchaser to adopt standard specifications.

21. CHARGE FOR BIN TEST

When it is demanded that cement be set aside in sealed bins and tested for the exclusive use of a single customer or group of customers, mill operation and shipping procedure are limited and restricted, with consequent inconvenience, lessened efficiency and increased costs, by reason of greater investment required in storage facilities and to carry additional stock of cement.

The cost of this additional service varies as among companies and differs according to time of year, condition of stocks and length of time the cement is held. While the exact cost is difficult to determine it varies from three cents to ten cents per barrel and it is clear that *this cost, in no instance lower than three cents per barrel, should be borne by the purchaser of cement.*

This charge is for service and storage facilities only and is not to be confused with the charge for actual testing referred to in next succeeding section.

22. COMMERCIAL LABORATORY TESTING CHARGE

As all quotations and sales are subject to Standard Specifications, the cement company guarantees the cement to conform thereto. If the purchaser, or some other interested party, desires to assure himself that such condition is fulfilled by the cement company, and employs a commercial laboratory or tester to make tests to determine the fact, the cost of such service should not be borne by the cement company.

It is generally realized that *under no circumstances should cement manufacturers bear commercial laboratory charges for testing* cement or pay these charges for the buyer's account.

23. SACKS

It should be thoroughly understood, and the position firmly maintained that:

All packages are provided solely for the cement user and are sold to and paid for by him on the same terms as the cement. They are delivered to transportation company in a serviceable condition, filled with cement, and any loss due to damage en route should be assumed by the transportation company.

Any loss due to damage while in possession of the dealer should be assumed by him.

Any loss due to damage while in possession of user should be assumed by him.

Cloth sacks will be repurchased by the cement company from original purchaser only when in serviceable condition, or when a reasonable amount of repairing will put them in serviceable condition for further use as cement containers.

The theory sometimes advanced that the cement container is a free package, that the cement company lends the cloth sack to the user, or by any process assumes any loss due to wear and tear, except that occurring while in the cement company's hands, is unsound and inconsistent, and the practice of maintaining this attitude is condemned.

In view of these facts *it should be made the rule that only such cloth sacks as are serviceable and can be used again, be repurchased*, and that no returned cloth sacks be repurchased unless they are in serviceable condition as cement containers or can be made so by a reasonable amount of repairing.

In all cases the cement company's count and inspection should be final and the cost of returning empty cloth sacks to the cement company's mill should be borne by purchaser.

24. CREDIT

The free interchange of credit information among cement companies is desirable in the interest of reducing losses, eliminating the practice of cement companies acting in the capacity of bankers, and concentrating the handling of cement in the hands of competent and responsible dealers.

Bureaus for the collection and distribution of credit information have been established in some sections of the country and it is desirable that similar bureaus be organized in other sections.

Form No. 1

QUOTATION TO DEALERS FOR WAREHOUSE STOCK

IMPERIAL PORTLAND CEMENT COMPANY

IMPERIAL, U. S. A.

We quote for immediate acceptance, subject to change without notice, shipment within fifteen (15) days from date of order, acceptance of order in writing by this Company, and to terms, conditions and limitations on the reverse side hereof, in carloads, f. o. b. station named:

	in 4 cloth sacks at	per standard bbl.
IMPERIAL, Portland Cement		
	" 4 paper bags at	" " "

Unless otherwise agreed, this quotation is limited to one carload of cement and applies only on shipments billed to and unloaded at point of delivery specified.

This quotation is based upon today's market and is applicable to immediate orders only.

Prices for specific work requiring deliveries beyond 15 days will be quoted upon application accompanied by full information and description of the work.

Yours respectfully,

IMPERIAL PORTLAND CEMENT COMPANY.

Terms, Conditions and Limitations

PAYMENT: 30 days net; 5 cents per barrel discount for PAYMENT IN FULL within 10 days from date of invoice. Payments to be made in cash or equivalent at our Office, Imperial, U. S. A. Original paid freight bills to be sent us promptly for comparison.

Sacks must be paid for at same time as cement.

If purchaser fails to comply with terms of payment or with any of the other terms of sale, we reserve the right to cancel unfilled portion of any contract or order, purchaser remaining liable for all unpaid accounts.

Orders are subject to approved credit, and if at any time purchaser's financial responsibility be or become, in our opinion, impaired or unsatisfactory, we reserve the right to require payment in advance or satisfactory assurance that bills will be promptly paid when due.

In making delivered prices we only guarantee cost at destination, and we will not be responsible for shortage or damage occurring in transit. Our responsibility ceases when shipments are delivered to railroad company on cars at our mill. Railroad company's bills of lading shall be conclusive as to quantity and good condition of both cement and packages when loaded on cars.

We will pay to original purchaser 10 cents each for empty cloth cement sacks purchased of us, bearing our brand, on their receipt in serviceable condition at our mill, if returned within 90 days after their purchase, freight prepaid, subject to our inspection and count. We do not purchase sacks bearing brands other than our own, or sacks that have been wet or are otherwise useless.

Shipments in paper bags are made at purchaser's risk of breakage and resultant loss of cement.

Orders entered for shipment on a specific date will, at our option, be shipped on that date unless sooner ordered out by purchaser.

We reserve the right to prescribe the route by which shipments shall be forwarded. All railroad demurrage, car service and terminal charges at destination shall be settled for and borne by purchaser.

The purchaser shall give us shipping instructions in writing a reasonable time before shipments are to be made. All orders and contracts are accepted subject to contingencies of manufacturing and shipping, and other causes beyond our control, and we will not be responsible for delays in transit. Should any contingency at any time arise whereby production or shipments are curtailed or delayed, we reserve the right to prorate our shipments of cement to all purchasers of record at such time. In addition to orders or contracts accepted hereunder, we may have accepted, and shall from time to time accept, other orders and contracts so as to have a market for our estimated output of cement under normal conditions; therefore, in the event we shall at any time, because of any such contingency, be unable to deliver to all our customers the entire quantity of cement required and called for by all of our contracts then in force, the total of our production then available shall be applied pro rata on all of said contracts according to their requirements respectively, and the amount deliverable on each contract may be reduced accordingly, and there shall be no liability on our part for the reduction so made.

"IMPERIAL" Portland Cement to be furnished hereunder is when shipped to conform in every respect to specifications of United States Government, or Standard Specifications for Portland Cement as adopted by the American Society for Testing Materials when tested by methods of testing recommended by the American Society of Civil Engineers, but we cannot be responsible for improper use of cement, therefore we will not guarantee finished work.

IMPERIAL PORTLAND CEMENT COMPANY.

Form No. 2

QUOTATION TO LINEYARD

IMPERIAL PORTLAND CEMENT COMPANY

IMPERIAL, U. S. A.

We quote for immediate acceptance, subject to change without notice, shipment within fifteen (15) days from date of order, acceptance of order in writing by this Company, and to terms, conditions and limitations on the reverse side hereof, "IMPERIAL" Portland Cement for your yards, in carloads f. o. b. stations named, at the following prices per standard barrel, viz.:

F. O. B.	IN CLOTH SACKS	IN PAPER BAGS

Unless otherwise agreed, this quotation is limited to one carload of cement for each or any station named and applies only on shipments billed to and unloaded at point of delivery specified, respecttively.

This quotation is based upon today's market and is applicable to immediate orders only.

Prices for specific work requiring deliveries beyond 15 days will be quoted upon application accompanied by full information and description of the work.

Yours respectfully,

IMPERIAL PORTLAND CEMENT COMPANY.

Terms, Conditions and Limitations

The purchaser shall give us shipping instructions in writing a reasonable time before shipments are to be made. All orders and contracts are accepted subject to contingencies of manufacturing and shipping, and other causes beyond our control, and we will not be responsible for delays in transit. Should any contingency at any time arise, whereby production or shipments are curtailed or delayed, we reserve the right to prorate our shipments of cement to all purchasers of record at such time. In addition to orders or contracts accepted hereunder, we may have accepted, and shall from time to time accept, other orders and contracts so as to have a market for our estimated output of cement under normal conditions; therefore, in the event we shall at any time, because of any such contingency, be unable to deliver to all our customers the entire quantity of cement required and called for by all of our contracts then in force, the total of our production then available shall be applied pro rata on all of said contracts according to their requirements respectively, and the amount deliverable on each contract may be reduced accordingly, and there shall be no liability on our part for the reduction so made.

"IMPERIAL" Portland Cement to be furnished hereunder is when shipped to conform in every respect to specifications of United States Government, or Standard Specifications for Portland Cement as adopted by the American Society for Testing Materials when tested by methods of testing recommended by the American Society of Civil Engineers, but we cannot be responsible for improper use of cement, therefore we will not guarantee finished work.

SPECIAL QUOTATION FOR SPECIFIC WORK

IMPERIAL PORTLAND CEMENT COMPANY

IMPERIAL, U. S. A.

We quote you, subject to all the terms, conditions and limitations on both sides hereof, on "IMPERIAL" PORTLAND CEMENT for work herein described; and for shipment according to contract requirements, between date hereof and 191 , not to exceed, however, bbls. in any one month:

4 Cloth Sacks at per Standard Bbl.

IMPERIAL Portland Cement in

4 Paper Bags at " " "

in carloads, f. o. b. cars
This price includes the sacks in which the cement is to be shipped.

This quotation is intended to cover the entire and actual quantity (estimated at barrels) of Portland cement which buyer shall be required to, and in fact shall, furnish or use in the following described work.

DESCRIPTION OF WORK

*This quotation is subject to the execution of a written contract between you and your customer in conformity herewith on our regular form furnished for dealers' use, the original or a duplicate thereof to be filed with us.

†This quotation is for acceptance within 5 days from this date and is further subject to the execution of our regular form Specific Work Sales Contract.

Yours respectfully,

IMPERIAL PORTLAND CEMENT COMPANY.

*This paragraph should be used only when contract is with a dealer for resale to a consumer. It should be omitted when contract is with the consumer direct.

†Quotations should be for acceptance within five days when prospective purchaser is in position to buy immediately and within fifteen days when prospective purchaser is not in position to buy immediately. For explanation see page No. 12 subject No. 15: Quotations for Specific Work.

Terms, Conditions and Limitations

PAYMENT: 30 days net; 5 cents per barrel discount for PAYMENT IN FULL within 10 days from date of invoice. Payment to be made in cash or equivalent at our Office, Imperial, U. S. A. Original paid freight bills to be sent us promptly for comparison.

Sacks must be paid for at same time as cement.

If purchaser fails to comply with terms of payment or with any of the other terms of sale, we reserve the right to cancel unfilled portion of any contract or order, purchaser remaining liable for all unpaid accounts.

If at any time purchaser's financial responsibility be or become, in our opinion, impaired or unsatisfactory, we reserve the right to require payment in advance or satisfactory assurance that bills will be promptly paid when due.

In making delivered prices we only guarantee cost at destination, and we will not be responsible for shortage or damage occurring in transit. Our responsibility ceases when shipments are delivered to railroad company on cars at our mill. Railroad company's bills of lading shall be conclusive as to quantity and good condition of both cement and packages when loaded on cars.

We will pay to original purchaser 10 cents each for empty cloth cement sacks purchased of us, bearing our brand, on their receipt in serviceable condition at our mill, if returned within 90 days after their purchase, freight prepaid, subject to our inspection and count. We do not purchase sacks bearing brands other than our own or sacks that have been wet or are otherwise useless.

Shipments in paper bags are made at purchaser's risk of breakage and resultant loss of cement.

Orders entered for shipment on a specific date will, at our option, be shipped on that date unless sooner ordered out by purchaser.

We reserve the right to prescribe the route by which shipments shall be forwarded. All railroad demurrage, car service and terminal charges at destination shall be settled for and borne by purchaser.

The purchaser shall give us shipping instructions in writing a reasonable time before shipments are to be made. All orders and contracts are accepted subject to contingencies of manufacturing and shipping, and other causes beyond our control, and we will not be responsible for delays in transit. Should any contingency at any time arise whereby production or shipments are curtailed or delayed, we reserve the right to prorate our shipments of cement to all purchasers of record at such time. In addition to orders or contracts accepted hereunder, we may have accepted, and shall from time to time accept, other orders and contracts so as to have a market for our estimated output of cement under normal conditions; therefore, in the event we shall at any time, because of any such contingency, be unable to deliver to all our customers the entire quantity of cement required and called for by all of our contracts then in force, the total of our production then available shall be applied pro rata on all of said contracts according to their requirements respectively, and the amount deliverable on each contract may be reduced accordingly, and there shall be no liability on our part for the reduction so made.

"IMPERIAL" Portland cement to be furnished hereunder is when shipped to conform in every respect to specifications of United States Government, or Standard Specifications for Portland Cement as adopted by the American Society for Testing Materials when tested by methods of testing recommended by the American Society of Civil Engineers, but we cannot be responsible for improper use of cement, therefore we will not guarantee finished work.

IMPERIAL PORTLAND CEMENT COMPANY
Imperial, U. S. A.

Specific Work—Sales Contract, No._____

THIS AGREEMENT, and a duplicate hereof, made this day of 191 , by and between IMPERIAL PORTLAND CEMENT COMPANY (a corporation), of Imperial, U. S. A., hereinafter called "SELLER," and of , hereinafter called "BUYER," WITNESSETH:

That in consideration of the price and subject to all the terms, conditions and limitations set forth on this and the reverse side hereof, which it is hereby mutually understood and expressly agreed are a part hereof, SELLER hereby sells and agrees to deliver, and the BUYER hereby purchases and agrees to receive and pay for approximately barrels of "IMPERIAL" Portland cement, at a price of $ per standard bbl. in 4 cloth sacks, in carload lots, f. o. b. cars , to be used in the following described work, and 4 paper bags, shipped between the date hereof and , 191 .

DESCRIPTION OF WORK

This contract is intended to, and does, within the limitations hereof, cover the entire quantity of Portland cement which BUYER shall, during the time herein specified, furnish or use in the work above described.

The amount of Portland cement required for the said work is estimated by BUYER at barrels, but nothing herein contained shall obligate SELLER to furnish hereunder more than the quantity of "IMPERIAL" cement actually furnished by BUYER for, and used in, said work. Said cement is to be shipped as nearly as practicable to meet the necessities of the work; it being understood, however, that under no circumstances shall SELLER be obligated to ship hereon more than barrels during any one calendar month; or during any 30 day period; it being further provided, however, that BUYER shall in any event receive and pay for in accordance with price and terms hereof, all cement shipped hereunder.

BUYER shall have no right to asssign this contract. The material covered by it is sold to BUYER upon the representation that it is purchased for use in the construction of work referred to. Use of the cement in any other work than that specified or disposition of it for any other purpose or resale of it for use in other than above described work shall give SELLER the option to terminate this contract and to refuse to deliver any more cement under it.

This contract shall be binding upon the heirs, executors, administrators, successors, or assigns of the respective parties hereto, but shall not be assigned by BUYER without written consent of SELLER.

ENTERED INTO and signed, subject to official written approval of an Executive Officer of SELLER at its General Office, Imperial, U. S. A., the day and year first above written.

Approved....., 191 .

and

Other terms, Conditions and Limitations Governing this Contract

BUYER, when ordering cement to be shipped hereon, shall refer to this contract by its number and date, and the BUYER shall, on or about the first day of each month, if requested by and on forms furnished by SELLER, correctly inform the SELLER of the amount of "IMPERIAL" CEMENT delivered or used by him on the work described during the preceding month or months since date hereof.

The terms of payment shall be as follows, viz.: 30 days net, or, if invoice is PAID IN FULL, within 10 days from date of shipment, 5 cents per barrel discount will be allowed, payments to be made in cash or equivalent at SELLER'S Office, Imperial, U. S. A. Freight charges per tariff applying, from Imperial, U. S. A., to point of delivery specified, shall be paid by BUYER for account of SELLER, and the original paid freight bills sent to SELLER promptly for proper comparison.

If at any time the financial responsibility of buyer becomes impaired or unsatisfactory to SELLER it reserves the right to require payments in advance or satisfactory security or guarantee that invoices will be promptly paid when due. If BUYER fails to comply with terms of payment, SELLER reserves the right to cancel unfilled portion of any contract or order, BUYER remaining liable for all unpaid accounts.

The price herein provided includes the packages in which the cement shall be shipped.

SELLER will pay original purchaser 10 cents each for empty cloth cement sacks purchased hereunder bearing its brand, on their receipt in serviceable condition at SELLER'S mill, if returned within 90 days after their purchase, freight prepaid, subject to SELLER'S inspection and count. SELLER will not purchase sacks bearing brands other than its own, or sacks that have been wet or otherwise made useless.

SELLER'S invoice quantities shall be the basis for settlement, and BUYER shall not hold SELLER responsible for shortage of, or damage to, either cement or packages occurring in transit. Railroad company's bills of lading at the point of shipment shall be conclusive as to quantity and good condition of cement and packages when loaded on cars at SELLER'S mill. All railroad demurrage, car service, and terminal charges imposed at destination shall be settled for, and borne by, BUYER.

The price specified on the reverse side hereof is a firm price and not subject to change or alteration except as may be herein otherwise expressly stipulated, any agreement, oral or otherwise, with the salesman or any other person to the contrary notwithstanding; it being further understood and agreed that all conditions of the sale are herein wholly set out.

SELLER reserves the right to determine and direct the route by which shipments hereunder shall be forwarded.

BUYER shall give SELLER shipping instructions in writing a reasonable time before shipments are to be made. All orders and contracts are accepted subject to contingencies of manufacturing and shipping, and other causes beyond SELLER'S control, and SELLER will not be responsible for delays in transit. Should any contingency at any time arise, whereby production or shipments are curtailed or delayed, SELLER reserves the right to prorate its shipment of cement to all purchasers of record at such time. In addition to orders or contracts accepted hereunder SELLER may have accepted and may from time to time accept, other orders and contracts so as to have a market for its entire estimated output of cement under normal conditions; therefore in the event SELLER shall at any time, because of any such contingency, be unable to deliver to all its customers the entire quantity of cement required and called for by all of its contracts then in force, the total of SELLER'S production then available shall be applied pro rata on all of said contracts according to their requirements respectively, and the amount deliverable on each contract may be reduced accordingly and there shall be no liability on SELLER'S part for the reduction so made.

The "IMPERIAL" Portland cement to be shipped hereunder is, when shipped, to conform in every respect to Specifications of United States Government, or Standard Specifications for Portland Cement as adopted by the American Society for Testing Materials when tested by methods of testing recommended by the American Society of Civil Engineers, but SELLER cannot be responsible for improper use of cement, therefore will not guarantee finished work.

Time is the essence of this contract.

Other Terms, Conditions and Limitations Governing this Contract

If at any time the financial responsibility of buyer becomes impaired or unsatisfactory to seller, it reserves the right to require payments in advance or satisfactory security or guarantee that invoices will be promptly paid when due. If buyer fails to comply with terms of payment, seller reserves the right to cancel unfilled portion of any contract or order, buyer remaining liable for all unpaid accounts.

Sacks must be paid for at same time as cement.

The Seller has a contract with Imperial Portland Cement Company, Imperial, U. S. A. (Shipper), for the cement to be furnished and delivered hereon, and Buyer agrees that this contract is subject to contingencies of manufacturing and shipping and other causes beyond control of Seller or Shipper, and that should any contingency at any time arise whereby Shipper's production or shipments are curtailed or delayed, the right is reserved by both Shipper and Seller to prorate the shipments and deliveries of cement to all buyers of record at such time; that in addition to this contract, Shipper and Seller may have accepted, and may from time to time accept, other orders and contracts within their ability under normal conditions to supply same, therefore in the event either Shipper or Seller at any time be unable to deliver to all customers the entire quantity of cement called for by all contracts then in force, the total of Shipper's output then available shall be applied pro rata on all orders or contracts according to their requirements respectively, and the amount deliverable on each may be reduced accordingly, and there shall be no liability on the part of Shipper or Seller for the reduction so made.

When deliveries hereunder are in carloads, f. o. b. cars railroad company's tracks, Shipper's invoice quantities shall be the basis for settlement, and Buyer shall not hold Seller responsible for shortage of or damage to, either cement or packages occurring in transit. Railroad company's bills of lading at the point of shipment shall be conclusive as to quantity and good condition of cement and packages when loaded on cars at shipper's mill. All railroad demurrage, car service, and terminal charges imposed at destination shall be settled for, and borne by, Buyer.

The price specified on the reverse side hereof is a firm price, and not subject to change or alteration except as may be herein otherwise expressly stipulated, any agreement, oral or otherwise, with the salesman or any other person to the contrary notwithstanding; it being further understood and agreed that all conditions of the sale are herein wholly set out.

Seller reserves the right to determine and direct the route by which shipments hereunder shall be forwarded.

"IMPERIAL" Portland cement to be furnished hereunder is when shipped to conform in every respect to specifications of United States Government, or Standard Specifications for Portland Cement as adopted by the American Society for Testing Materials when tested by methods of testing recommended by American Society of Civil Engineers, but Shipper or Seller cannot be responsible for improper use of cement, therefore will not guarantee finished work.

CONDITIONS OF SALE AND SHIPMENT

1. TERMS: 30 days net; 5 cents per barrel discount for payment in full, including sacks, within 10 days from date of invoice. Original paid freight bills to be sent to us promptly for comparison.

2. The Imperial Portland Cement Company shall be under no obligation to make shipment hereon in the event of any payment becoming past due.

3. Orders are subject to approved credit and if at any time purchaser's credit be or become, in our opinion, impaired or unsatisfactory, we reserve the right to require payment in advance or satisfactory assurance that bills will be promptly paid when due. Sacks must be paid for at same time as cement.

4. If purchaser fails to comply with terms of payment or with any of the other terms of sale, we reserve the right to cancel unfilled portion of any contract or order, purchaser remaining liable for all unpaid accounts.

5. We reserve the right to prescribe the route by which shipments shall be forwarded.

6. Orders entered for shipment on a specific date will, at our option, be shipped on that date unless sooner ordered out by purchaser.

7. Bills are payable in funds current in Imperial, U. S. A., and all exchange or collection charges must be paid by purchaser. Bills not paid when due, per invoices, will be subject to sight draft without notice.

8. Demurrage or other car service charges which railroad companies may impose, for detention of cars, shall be borne and settled for by purchaser.

9. We will pay original purchaser 10 cents each for empty cloth cement sacks purchased of us, bearing our brand, on their receipt in serviceable condition at our Mill, if returned within 90 days after their purchase, freight prepaid, subject to our inspection and count. We do not purchase sacks bearing brands other than our own, or sacks that have been wet or are otherwise useless.

10. When making delivered prices we only guarantee cost at destination, and we will not be responsible for shortage or damage occurring in transit. Our responsibility ceases when shipments are delivered to railroad company on cars at our Plant. Railroad company's bills of lading shall be conclusive as to quantity and good condition of cement and packages when loaded on cars.

11. The purchaser shall give us shipping instructions in writing a reasonable time before shipments are to be made. All orders and contracts are accepted subject to contingencies of manufacturing and shipping, and other causes beyond our control, and we will not be responsible for delays in transit. Should any contingency at any time arise whereby production or shipments are curtailed or delayed, we reserve the right to prorate our shipments of cement to all purchasers of record at such time. In addition to orders or contracts accepted hereunder we may have accepted, and shall from time to time accept, other orders and contracts so as to have a market for our estimated output of cement under normal conditions; therefore, in the event we shall at any time because of any such contingency be unable to deliver to all our customers the entire quantity of cement required and called for by all of our contracts then in force, the total of our production then available shall be applied pro rata on all of said contracts according to their requirements respectively, and the amount deliverable on each contract may be reduced accordingly, and there shall be no liability on our part for the reduction so made.

12. It is mutually understood and agreed that the price at which the order on the reverse side hereof is accepted by the Imperial Portland Cement Company is a firm price and not subject to change or alteration except as may be herein otherwise expressly stipulated, any agreement, oral or otherwise, with the salesman or any other person to the contrary notwithstanding, it being further understood and agreed that all conditions of the sale are herein and in the acceptance hereof, wholly set out, and each and every of said conditions form a part of the order and are agreed to and accepted as such by purchaser.

13. This order contemplates delivery and use of material ordered at destination shown and in the work described, if any, and if diverted or used elsewhere purchaser hereby agrees to pay Imperial Portland Cement Company for cement so diverted, at its price current at point of ultimate destination, and in the event of such diversion without its consent the Imperial Portland Cement Company shall be under no obligation to make shipments hereon.

14. This order, if for cement to be used in specific work requiring deliveries beyond fifteen days from date, is subject to execution of our regular form Specific Work Sales Contract.

15. "IMPERIAL" Portland cement to be furnished hereunder is when shipped to conform in every respect to specifications of United States Government, or Standard Specifications for Portland Cement as adopted by the American Society for Testing Materials when tested by methods of testing recommended by the American Society of Civil Engineers, but we cannot be responsible for improper use of cement, therefore we will not guarantee finished work.

TO EXECUTIVE COMMITTEE OF THE ASSOCIATION OF AMERICAN PORTLAND CEMENT MANUFACTURERS

INTRODUCTION

The report of the Sub-committee of the Committee on Trade Conditions was presented to the entire Committee on September 13th, to the Executive Committee on September 14th, and to the Association on September 15th and 16th. Each paragraph was thoroughly discussed and with several changes was passed by the members present. The report in its present form contains all changes approved by the members.

The report has been referred to counsel and has received their approval.

Since the May meeting the Trade Conditions Committee has undertaken a careful investigation and study of conditions surrounding and affecting the sale and delivery of cement, in an effort to reach a conclusion as to what constitutes the best practice in each material and important particular, so as to be able to recommend definite practices which will most satisfactorily fit conditions, protect and serve the interests of the manufacturer, and at the same time operate in perfect fairness to the cement user and dealer.

The magnitude and importance of the cement industry demand that the sale and distribution of the product be conducted upon firm and definitely fixed principles, and that doubt and uncertainty be eliminated.

It appears that the importance of this attitude is being more fully appreciated by the cement manufacturers, and that the membership is desirous of a full and free discussion of the various subjects involved in order that the consensus of opinion may be ascertained and established as custom, and so recognized by all cement manufacturers.

Uniform observance of the best practices will promptly eliminate many abuses and irregularities now prevalent.

Meetings of the Committee were held in Chicago May 19 and September 3, and in Atlantic City September 13; and a subcommittee held meetings in Chicago July 19, August 13, and in Atlantic City September 13.

SCOPE OF THE WORK

The following subjects were given consideration and study:

1. Quotations for:
   Immediate acceptance.
   Fifteen-day shipment.
   One car only.
2. Five cents per barrel discount.
3. Cement company not responsible for loss or damage en route.
4. Extension of delivery dates.
5. Specifications.
6. Special quotations for specific work.
7. Specific work sales contracts.
8. Blanket contracts.
9. Contract form for dealer's use.
10. Report by dealer of deliveries on specific work contracts.
11. Salesmen's order blanks.
12. Additional charge for bin test.
13. Commercial laboratory testing charge.
14. Sacks.
    (*a*) Quotations, terms of sale and payment to include payment for package at the same time as for cement.
    (*b*) Inspection—should the manufacturers or users ultimately stand loss on cloth sacks.
15. Quotations to dealers for delivery at towns other than their home town.
16. Definition of "Dealer."
17. Dealer differential.
18. Commissions to dealers.
19. Interchange of credit information.
20. Practice of incorporating so-called "waterproofing compounds" at manufacturer's mill.
21. Giving advance notice of price changes and guaranteeing price against decline.

FORMS

Forms covering the following are attached:

1. Trade quotations.
2. Lineyard quotations.
3. Quotations for specific work.
4. Specific work sales contracts.
5. Specific work sales contracts for dealer's use.
6. Deliveries on specific work.
7. Salesmen's order blank.

1. QUOTATIONS FOR—
Immediate Acceptance
Fifteen-Day Shipment
One Car Only.

In view of the desirability of having all manufacturers adopt, so far as practicable, the best business practices, and in order to bring before the Association in the most exact and intelligible way the Committee's ideas as to what these practices should be, the sample forms attached were prepared.

These forms embody the Committee's conclusions as to the best trade practices under all the circumstances after thorough and painstaking investigation and study.

Broadly speaking, the terms and conditions in all the forms are the same. They differ only in minor respects where necessary to meet different conditions.

Forms 1 and 2 cover regular trade quotations. It will be noticed that they are for immediate acceptance, fifteen-day shipment, and cover only one car.

The principal purpose of regular trade quotations is to inform the trade of market changes.

All quotations represent potential obligations of the cement company, and it is evidently desirable and advantageous to limit these obligations as much as practicable. Under the plan of sending broadcast, at every price change, thousands of unasked quotations, the potential obligations of each company, provided they are for acceptance within five, ten, or thirty days or until cancelled, or for thirty-day shipment or for amounts greater than one car each, reach very high figures.

In the event of general advances in price, which, under strong buying demand, car shortage, or similar conditions, may occur at frequent intervals, these potential obligations to sell become real obligations to deliver unduly heavy tonnages at prices lower than the price warranted by commercial conditions. Thus the cement company is effectively prevented from taking advantage of the advanced price, and is compelled to accept business at prices unnecessarily low.

Adoption of the limitations mentioned places the situation more nearly in the control of the cement company.

CONCLUSION

Therefore, the Committee recommends that all trade quotations be for immediate acceptance, fifteen-day shipment, and for not more than one car each.

2. FIVE CENTS PER BARREL DISCOUNT

Changing the cash discount rate from two cents per barrel to five cents per barrel has a number of advantages.

There is a persistent demand from dealers for a greater margin of profit in the handling of cement, and an increasing realization by manufacturers that to do so will enlist the dealer more actively and earnestly in pushing the sale of cement. While it is proposed to offer dealers and consumers alike the five-cent discount, it is thought that it will be taken advantage of more generally by dealers than by consumers; and as between dealers, those who would avail themselves of it to the greatest extent would be dealers who conduct their business on a substantial basis and insist on a fair margin of profit. In other words, it will be taken advantage of by the best and most capable merchants in the building material field, who are the ones doing the most in pushing the sale and increasing the use of Portland cement. Thus a premium would be placed on intelligent marketing of our product. In the operation of the present discount rate of two cents this tendency is noted. It is the opinion of the Committee that at five cents the condition would be more pronounced.

The Committee believes that, generally speaking, the dealer would, on only a small part of his business, pass on to his customers the five-cent per barrel discount.

The proposed advance in discount rate would also secure more prompt payments, reduce the amount of outstanding accounts, and consequently reduce losses on bad accounts.

CONCLUSION

Therefore, after careful consideration, the Committee recommends:

That the discount rate be changed from two to five cents for payment in full within ten days, and that all invoices have stamped or printed thereon:

> $ discount will be allowed if this invoice is paid on or before 191 .
> (Total amount of discount in dollars and cents and blank date to be filled in—blank date to be ten days from date of invoice.)

Also that no cement be quoted or sold or payments accepted for same except including packages.

Also that each invoice be dated the date shipment is made, as shown on bill of lading for the shipment covered by it.

Also that discount be not allowed under any circumstances unless remittances are mailed, as shown by postmark, not later than ten days from date of invoice.

3. CEMENT COMPANY NOT RESPONSIBLE FOR LOSS OR DAMAGE EN ROUTE

According to terms of sale the cement company delivers to the railroad a quantity of material of full weight and count and in good condition as

to cement and package. When so receipted for the railroad assumes full responsibility to deliver at destination without loss or damage. The custom of cement companies assuming responsibility is unnecessary and costly, and its discontinuance would reduce clerical work and decrease the cost of doing business. It would compel dealers and contractors to depend upon their own resources, force them to assume a responsibility which is properly theirs to adjust with the transportation company, and tend to make them better merchants and business-men.

CONCLUSION

Therefore, the Committee recommends that one of the terms of sale be that: "In making delivered prices we only guarantee cost at destination and we will not be responsible for shortage or damage occurring in transit. Our responsibility ceases when shipments are delivered to the railroad company on cars at our mill. Railroad company's bills of lading shall be conclusive as to quantity and good condition of both cement and package when loaded on cars."

4. EXTENSION OF DELIVERY DATES

The practice of allowing customers to place orders for delivery within thirty days and later permitting cancellations or extensions in shipping date originally agreed to is in reality an option on the part of the buyer which causes disturbance to cement company's operating and shipping plans, and is an uncertain and indefinite obligation on the cement company.

CONCLUSION

Therefore, the Committee recommends the strict insistence by manufacturers on the following condition of sale:

"Orders entered for shipment on a specific date will at our option be shipped on that date unless sooner ordered out by purchaser."

5. SPECIFICATIONS

As the recognition of various specifications covering the manufacture and sale of Portland cement would be exceedingly inconvenient and confusing, it is clearly desirable to discourage freak and unreasonable specifications.

CONCLUSION

Therefore, the Committee recommends that no cement be sold or quoted subject to specifications other than Specifications of the United States Government or Standard Specifications of the American Society for Testing Materials.

6. SPECIAL QUOTATIONS FOR SPECIFIC WORK

The making of quotations for specific work as at present practised is uncertain and unbusinesslike, and results in great abuse and consequent demoralization. It is most desirable that such quotations be made according to definite and well-understood rules, and the Committee submits a form of specific work quotation.

The cost of cement entering into a given piece of work should correspond as nearly as possible to the price prevailing at the time bids for the work are submitted. In most cases there is no good reason for giving the contractor a price to figure a job more than ten days before bids are submitted. To do so results in no benefit, as the contractor passes the advantage along to the owner in case of market advance. It is also apparent that where one contractor is quoted an unduly long time before bidding (say more than ten days) and protected at that price, and other contractors who do not ask for prices until ten days or less prior to bidding are quoted on a higher price, in the event of an advance in the market meanwhile the contractor first mentioned is at an advantage over his competitors, which is unnecessary and unfair.

The Committee, therefore, recommends it be established as custom that, so far as practicable, specific work quotations be not made more than ten days before the date bids are to be received.

Also abuse and demoralization result from the practice of holding for acceptance, within unreasonably long periods of time, quotations for specific work. Such quotations are an obligation of an uncertain character on the cement company; and by reason of their existence the cement company is unable to benefit by market advances, with consequent substantial loss.

Adoption of the attached form will correct these abuses, place the control of the situation in the hands of the manufacturer, where it belongs, and will have the advantage of being definite and exact.

The form provides that, if quotation is accepted, it is subject to execution of regular form of specific work sales contract.

The form also provides that when quotation is to dealer, if accepted it is further subject to the execution of a written contract between such dealer and his customer on regular form, furnished by the cement company, the original or duplicate thereof to be filed with the cement Company. (Copy of this form is attached.)

Thirty days is a reasonable period within which the work is to be awarded. If the award is delayed beyond that time, there is no obligation on part of the cement company. The use of this form will cause its provisions to become established as custom; and contractors and others bidding on work will make their bids, so far as the cement is concerned, good for acceptance only until the expiration date of the quotation.

The form is self-explanatory, and aside from the conditions recited

above, its terms are the same as the specific work sales contract referred to elsewhere.

CONCLUSION

Therefore, the Committee recommends that the practice of making specific work quotations an unreasonably long time before bids are submitted and the protection of prices quoted for indefinite and unreasonably long periods of time after date made is unnecessary and unbusinesslike, and condemns it as bad practice.

The Committee also recommends that the methods suggested in this form be followed, and that the form be adopted and used.

7. SPECIFIC WORK SALES CONTRACT

Definition.—A "SPECIFIC CONTRACT" is a contract covering the cement required over a specific period beyond fifteen (15) days for a definable piece of construction work for which plans have been drawn, time of completion and quantities estimated, bids or proposals asked for, or contract let, or ready to be let. The minimum quantity to be covered by a "Specific Contract" should be one (1) carload.

It is important, in specific work sales contracts (as it is in quotations and other documents used in the industry), that they be definite and exact as to their provisions, and be used in a uniform manner by the cement companies.

The principal provisions of the attached form have been discussed elsewhere in this report. Those that have not been otherwise covered are summed up as follows:

The form provides that the quantity shall be fixed and stated as definitely as possible; that the contract covers the entire requirements of the work, but not in any event more than 110 per cent. of the amount estimated and stated in the contract; also that the delivery period be definitely fixed, and that shipment be made as required by progress of the work, but not more per month than a stated maximum. This tends to make the manufacturer's obligations on contracts definite, not only as to total, but as to monthly shipping requirements.

CONCLUSION

Therefore, the Committee recommends the adoption of the accompanying form, which embodies the Committee's ideas of the best practice.

8. BLANKET CONTRACTS

Definition.—A blanket contract is a contract covering unknown and uncertain requirements of dealers, contractors, or consumers, for delivery beyond fifteen (15) days, representing a future possibility and not an actuality, such as "Paving work," "Sewerage work," "State road work," etc.

The making of blanket contracts with dealers or contractors either for flat amounts or for requirements during a stated period of time is unnecessary and unbusinesslike. Such contracts are an obligation of an indefinite and uncertain character on the cement company, and result in demoralization and abuse.

When made with a dealer, if the market advances above contract price, they result in demoralization similar to that resulting from padded contracts recited in Paragraph 10, under the heading, "Contract Form for Dealer's Use." In case the market declines below contract price, the dealer refuses to take the cement for the reason that he cannot resell it in competition with dealers buying at market price then prevailing.

When made with a contractor, if the market advances, such contractor has an advantage over his competitors in bidding on work to which he is not rightfully entitled. In case the market declines, the reverse is true. He is at a disadvantage in figuring his bid in competition with other contractors whose bids are based on the prevailing market price. Usually he figures his bid on the prevailing market price and refuses to take deliveries on the contract for such work as he secures.

CONCLUSION

Therefore, the Committee condemns the blanket contract and advises against making it, except with the United States Government, with states, counties, and municipalities and with steam railroads.

9. CONTRACT FORM FOR DEALERS' USE

Great demoralization results from the ability of dealers to place orders with manufacturers for large amounts for deferred delivery upon the representation that the cement is for specific work which the dealer has sold, all or part of which has in reality not been sold by dealer for such work, and which is later sold by dealer from time to time when the market has advanced at lower prices than warranted by the manufacturers' prices to such dealer and lower than other dealers in the same town can sell at, based on manufacturers' prices to them for current requirements. This results in demoralization to the detriment of all manufacturers concerned in such a given market—the manufacturer who has such an unspecific work contract delivering cement at prices below prevailing market prices, and the manufacturers who are trying to sell through other dealers in the same market being unable to secure business because of the disadvantage under which such dealers are placed in connection with the dealer who is being supplied by the other manufacturer at price below prevailing market.

Urging dealers to place orders for extended delivery for specific work, and permitting such dealers, at their option, to take more or less cement

on such orders *than actual quantity used* in the work, has been one of the most objectionable devices and practices known, and has done more than any other one thing to bring about demoralization. This practice is a twin brother to "guaranteeing prices against decline," and no good or wise merchant ever resorts to such practices. If a contract is made it should be a fair one and observed by both parties.

No specific work contract should be made that is not bona fide, and such a contract should cover the exact quantity of cement used in the particular job described—no more, no less; and any change in the market during the period of the contract should not affect the price named in the contract. All specific work contracts with dealers should be written in contract form, and dealers should be required to report monthly their deliveries thereon. These suggestions, if consistently followed, will prevent stuffing of contracts and the loss and demoralization resulting therefrom.

If all manufacturers insist that every specific work contract with a dealer have attached thereto an executed copy of contract between the dealer and his customer for that particular work, it will largely eliminate the abuses recited above.

CONCLUSION

Therefore, the Committee recommends that the attached form of Dealer Contract be adopted, and its use by dealers insisted upon, and that an executed copy be attached to manufacturer's specific work contract with that dealer in every case.

The Committee further recommends that in all such cases the manufacturer also make, where he has any reasonable doubt of the existence of the specific work mentioned, a thorough investigation to disclose the fact and establish with certainty that the quantity of the contract is correct.

10. REPORTS BY DEALERS OF DELIVERIES ON SPECIFIC WORK CONTRACT

A signed monthly statement from the dealer, showing deliveries made by him the preceding month and the total deliveries, including the preceding month, on the specific work covered by contract, would act as a further protection against the abuses above outlined. A form for this purpose is appended.

CONCLUSION

And, the Committee recommends that it be adopted by all manufacturers and its use insisted upon in all cases.

11. SALESMEN'S ORDER BLANKS

All sales made by salesmen should be covered by the signed order of the customer, a copy of which is given to the customer. This will prevent disputes and prevent the customer from insisting later that the salesman

agreed to do certain things different from custom, since the form attached carries the following condition: "This order is not binding upon The Imperial Portland Cement Company until accepted by its home office in writing by an officer of the Company, and is subject to all the terms of sale and shipment on reverse side hereof.

"It is mutually understood and agreed that the price at which the order on the reverse side hereof is accepted by the Imperial Portland Cement Company is a firm price, and not subject to change or alterations, except as may be herein otherwise expressly stipulated, any agreement, oral or otherwise, with the salesman or any other person to the contrary notwithstanding; it being further understood and agreed that all conditions of the sale are herein, and in the acceptance hereof, wholly set out, and each and every one of said conditions form a part of the order and are agreed to and accepted as such by purchaser."

CONCLUSION

Therefore, the Committee recommends the adoption of the accompanying form and insistence on its use. It further recommends that it be established as custom that orders placed through salesmen must be signed by the customer.

12. ADDITIONAL CHARGE FOR BIN TEST

Where it is demanded that cement be set aside in sealed bins and tested for the exclusive use of a single customer or group of customers, mill operation and shipping procedure are limited and restricted, with consequent inconvenience, lessened efficiency, and increased costs, by reason of greater investment required in storage facilities and to carry additional stocks of cement.

CONCLUSION

Therefore, the Committee recommends that a charge shall be made for the facilities furnished and services rendered, and that this charge shall be commensurate with the actual cost thereof.

The Committee believes that the cost varies as among companies and differs according to time of year, condition of stocks, and length of time the cement is held. For these reasons the exact cost is difficult to ascertain, and the Committee up to this time has not been able to determine upon a definite figure. However, it is the Committee's opinion that the cost is in no case less than three cents per barrel, and that it varies from that to about ten cents per barrel.

13. COMMERCIAL LABORATORY TESTING CHARGE

As all quotations and sales are subject to Standard Specifications, the cement company guarantees the cement to conform thereto. If the pur-

chaser, or some other interested party, desires to assure himself that such condition is fulfilled by the cement company, and employs a commercial laboratory or tester to make tests to determine the fact, the cost of such service should not be borne by the cement company.

CONCLUSION

Therefore, the Committee recommends that the custom be established that under no circumstances shall manufacturers bear commercial laboratory charges for testing cement or pay them for the buyer's account.

14. SACKS

It should be thoroughly understood, and the position firmly maintained, that:

All packages are provided for the use of the cement user and are sold to and paid for by him on the same terms as the cement.

They are delivered to transportation company in a serviceable condition, filled with cement, and that any loss due to damage en route should be assumed by the transportation company.

Any loss due to damage while in possession of the dealer should be assumed by him.

Any loss due to damage while in possession of user should be assumed by him.

Cloth sacks will be repurchased by the cement company from original purchaser only when in serviceable condition, or when a reasonable amount of repairing will put them in serviceable condition for further use as cement containers.

The theory sometimes advanced that the cement container is a free package, that the cement company lends the cloth sack to the user, or by any process assumes any loss due to wear and tear, except that occurring while in the cement company's hands, is believed to be unsound and inconsistent, and the practice of maintaining this attitude is condemned.

CONCLUSION

Therefore, the Committee recommends that it be made the rule that only such cloth sacks as are serviceable and can be used again be repurchased, and that no returned cloth sacks be repurchased unless they are in serviceable condition as cement containers, or can be made so by a reasonable amount of repairing.

15. QUOTATIONS TO DEALERS FOR DELIVERY AT TOWNS OTHER THAN THEIR HOME TOWN

In many cases quotations are made to dealers in towns other than their home towns, where they are not regularly engaged in business as building

material dealers. By reason of this condition, and having no investment in such towns, such dealers frequently sell cement for delivery f. o. b. cars at such towns at a margin of profit smaller than the margin recognized and observed by building material dealers regularly engaged in business in those towns. This deprives the latter dealer of business to which he is justly entitled, and causes demoralization and dissatisfaction.

CONCLUSION

Therefore, the Committee recommends that no dealer be quoted for shipment to any town other than his home town except at consumer price, excepting only in towns adjacent to his home town in which there is no dealer.

16. DEFINITION OF DEALER

The Committee recommends that the following be adopted as the definition of a dealer: "A dealer is a merchant, firm, or corporation regularly engaged in selling Portland cement and other building materials purchased by him for resale only; who is also properly equipped with storage facilities; supplied with teams or trucks; and is recognized in his home town as a building-material dealer.

17. DEALER DIFFERENTIAL

For some time past the custom has been to make prices to consumers and contractors at least five cents per barrel higher than to dealers. There is an insistent demand by dealers that this differential be greater than five cents per barrel. Generally speaking, the five cents per barrel differential has given fair satisfaction. It is believed that the principle of making higher prices to consumers and contractors than are made to dealers is correct, and that there has been a material improvement in the situation in territories where this practice has been followed. It is, therefore, believed that the practice should be general in all territories, and that all companies follow the same practice. In order to get the active and energetic assistance of the dealer in pushing the use of cement in competition with other materials it is necessary that the business be so handled that the dealer will get a margin of profit which is satisfactory to him and which will compensate him for his work. Unless this is done he will lose interest in cement and discourage its use in favor of other materials.

CONCLUSION

Therefore, the Committee recommends that it be established as a custom in quoting contractors and consumers to add not less than five cents per barrel to the dealer's price, and that the manufacturers use their best efforts to induce dealers to handle their cement business in such a way as to net them a fair margin of profit.

18. COMMISSIONS

The practice of paying to dealers a commission of any amount on sales made direct to consumers has been followed on the theory that, as a dealer handles a certain brand in his locality, he is entitled to compensation on sales made to others because his representation has popularized that particular brand.

The correctness of this theory can be successfully attacked from a number of angles, and it is the opinion of the Committee that the dealer is entitled to compensation only for actual service rendered in each instance; that his profits as a merchant are earned only for such service as he actually performs on each barrel sold, as, for instance, on cement handled through his warehouse or through his books when he assumes the credit risk and thus performs a service.

It is also the opinion of the Committee that under the Clayton Act the payment of commissions is of questionable legality except when the dealer actually performs a service.

Legal opinion has been secured on this point, and in order to make the matter clear questions are stated below, and following them the answers thereto:

"A" is a certain cement company's dealer in a town.
"B" is another dealer in the same town.
"C" is a contractor or other user of cement located or doing work in the same town.

Question 1: May Cement Company sell to "A" and "B" (dealers) at one price and to "C" (contractor)at a higher price? If so, when is it proper and when is it not proper for Cement Company to allow to "A" or "B" or both a commission on sale made to "C"?

Answer 1: You may sell to a contractor who is a consumer at a higher price than to a dealer. A difference in price to wholesalers, jobbers, and consumers tends to equalize the disadvantages which the same price would create, and therefore tends to stimulate competition. A commission should not be allowed to "A" or "B", the dealers for a sale made by you to "C" except in those rare instances where you may be able definitely to assure yourself that "A" or "B" has rendered you a service or has been the procuring agent in bringing the business to you. If it can consistently be done, we recommend that no commission be paid except upon an agreement so to do in advance for a specific service rendered as the payment of commission so called unless there is a very substantial ground, for the allowance will be considered as evidence against you that you had an exclusive contract with the dealer as to territory, and that the so-called commission is in fact but an allowance to him for business which you sold within the territory which belongs to him. Although you do not

under any circumstances agree that a dealer shall have an exclusive territory, nevertheless we must bear in mind that the ultimate determination of a court and jury as to whether such an agreement was in fact made by you will not alone be determined by what you say is the agreement, but your conduct will have greater weight than your mere words, as the substance and result, rather than the form, will be conclusive.

Question 2: May Cement Company decline to quote "C" and refer him to "A", at the same time advising "A" that "C" is in the market for cement?

Answer 2: You have the right to decline to quote "C" and refer him to "A", at the same time advising "A", the dealer, that "C", the consumer, is in the market for cement. You have the right to refuse to sell to a consumer, as you have the right to choose to sell only to dealers. There is no objection upon your refusing to sell to a consumer, to advise him that dealer "A" sells a certain brand at ——, and that you assume the dealer has a sufficient stock to handle "C's" requirements, and there is no objection to your advising dealer "A" that "C" is apparently in the market for a certain brand, as he has written to you for prices, in reply to which you have informed him that dealer "A" sells that brand in that locality.

Question 3: On receipt of any inquiry from "C" may Cement Company, after consulting with "A", quote "C" on behalf of "A"?

Answer 3: You should not quote "C" on behalf of dealer "A". This is clear and strong evidence of an unlawful mutual arrangement for exclusive territory for "A".

Question 4: May Cement Company sell to "A" in his town and refuse to quote "B" when he asks for a price and if Cement Company desires refer him to "A"?

Answer 4: You may sell to "A", a dealer, and refuse to quote "B", a dealer in the same town, and if you so desire you may refer him to "A". You should at all times be extremely careful not to at any time, either by conduct or spoken or written words, convey the impression that the dealer has an exclusive territory or a right in any way to consider himself as the only man in the town to whom you would sell cement. You do not agree to give exclusive territory, and you should be very careful that no inference arises that you have so agreed. We suggest the following form of reply:

"We have your letter of ———— date asking for quotations on ———— Cement. In reply have to advise that we do not care at this time to quote, but you are probably aware that ———— is sold in ———— by —— ——, a dealer who should have in stock enough to supply your requirements, and we suggest that you communicate with him.

"Yours truly,

"—— ——."

In the event you receive a subsequent letter inquiring why you do not wish to quote, the letter generally should be ignored, but if special instances present themselves where you deem it desirable to make a further reply explaining your reason, we suggest the following:

"Your letter of ———— date with inclosures was received today. The commercial experience of this company has convinced us that in many cases our best policy is to market ———— Portland Cement through one dealer in a community. This enables that dealer to push the sale of our product with an energy which we might not otherwise secure. We do not require any dealer to agree in any way that he will not deal in the product of our competititors, but we do demand, and all that we demand, is that dealers who receive the benefit of our policy of marketing our cement through them shall show the energy which we expect in pushing our product and shall not discriminate against it. We are advised by counsel that this sales plan does not violate the Clayton Act or any other statute, and is not contrary to any public policy expressed in the laws of this country. [Strike out the preceding sentence except when inquiry refers to claimed violation of law.]

"We at no time have had any exclusive agencies or contracts with our customers restricting our right to sell where, when, or to whom we might desire. We have always held ourselves free, and we have the right to select the customers with whom we desire to do business, and will continue this policy of freely selecting our customers as we may deem best for furthering the sale of our products. And so, while we may have sold ———— Company in the past, we may tomorrow offer to sell to you or any other dealer in your town, as may to us seem best for our commercial interests and the selling of as much of our product as is possible, for it is needless to suggest that that policy commends itself to us which will result in our selling as much of our product as we can.

"I thank you for calling my attention to the case in question, and I am quite sure that in view of the foregoing explanation you will appreciate our reason for preferring at this time to not sell ———— cement to you in ————."

Question 5: May Cement Company sell to "B" at a higher price than is charged "A"? If so, when is it proper and when is it not proper to allow commission to "A" on sale made to "B"?

Answer 5: You should not sell to "B" at a higher price than you sell to "A", except where the difference in price is based on the grade, quality, or quantity of the commodity sold or the difference in the cost of selling or transportation, or made in good faith to meet competition. You should not allow a commission to "A" on a sale made by you to "B", except for services actually rendered in consummating the sale made to "B". In this connection note our recommendations in answer to Question 1.

Question 6: May Cement Company sell to "A" and "B" at the same price and allow to "A" a commission on sale made to "B"?

Answer 6: You should sell to "A" and "B" at the same price except

where conditions noted in answer to Question 5 are present, and you should not allow a commission to "A" on a sale made to "B" except where conditions exist as found in answer to Questions 5 and 1.

CONCLUSION

Therefore, the Committee recommends that the payment of all commissions to dealers be entirely eliminated.

19. CREDIT

The Committee also recommends the free interchange of credit information between companies in the interest of reducing losses—eliminating the practice of cement companies acting in the capacity of bankers, and concentrating the handling of cement in the hands of competent and responsible dealers.

The Committee further recommends that the Executive Committee consider the matter of organizing a bureau for the collection and distribution of credit information.

20. INCORPORATING SO-CALLED "WATERPROOFING COMPOUNDS" AT MANUFACTURER'S MILL

The Committee recommends that practice of mixing waterproofing compounds with cement at the mills be discouraged.

21. GIVING ADVANCE NOTICE OF PRICE CHANGES AND GUARANTEEING PRICE AGAINST DECLINE

The Committee condemns the following practices as pernicious and recommends their complete elimination:

Giving Advance Notice of Price Changes.—These should become effective immediately whenever conditions necessitate or warrant such changes.

Guaranteeing Sales Against Decline in Price.—A sale with an agreement expressed or implied that in the event of a decline in the market the price will be adjusted to correspond is an option with the advantage all on one side, and therefore unfair. Making sales so conditioned is a practice which cannot be too strongly condemned.

Sales contracts should be firm, and not give the seller option to deliver, nor buyer option to receive, thereon at terms other than those stated therein.

Paying or allowing rebates or special concessions in any form, directly or indirectly, to any person, firm, corporation, dealer, lineyard company, or its agents or employees, is unfair competition and illegal discrimination.

Quoting prices and selling to dealers for future delivery extending beyond fifteen days from date of order is bad practice, because if the price goes up the manufacturer is called upon for all the cement, and if it goes down the dealer refuses to take *any* cement at contract price.

CONCLUSION

Therefore, the Committee recommends that under no circumstances shall any reduction be made in price on sales previously made.

The personnel of the Committee is shown on the appended sheet, from which it will be learned that the territory in which the companies with which the individual members are connected operate is widely distributed geographically. In consequence of this the findings and recommendations of the Committee take account of the diversified and different conditions existing.

The Committee is practically unanimous in all the recommendations hereinbefore made, and now presents this to the Executive Committee for its consideration and approval; and further suggests that thereafter the report be submitted to the open meeting of the Association at Atlantic City in September, 1915.

It further recommends that the report be approved by the Association as comprising the latest and best compilation of good trade practices and ethics, and that the forms recommended be also approved.

The members of the Committee, and especially of the sub-committee, have given freely of their time and energy in the studies and investigations of the Committee and in the preparation of the recommended forms, and the Vice-Chairman wishes to make acknowledgment thereof and to express his appreciation of the spirit of helpfulness and coöperation shown.

Respectfully submitted,

COMMITTEE ON TRADE CONDITIONS,

By B. F. Affleck,
Vice-Chairman.

Orders entered for shipment on a specific date will, at our option, be shipped on that date unless sooner ordered out by purchaser.

We reserve the right to prescribe the route by which shipments shall be forwarded. All railroad demurrage, car service and terminal charges at destination shall be settled for and borne by purchaser.

The purchaser shall give us shipping instructions in writing a reasonable time before shipments are to be made. All orders and contracts are accepted subject to contingencies of manufacturing and shipping, and other causes beyond our control, and we will not be responsible for delays in transit. Should any contingency at any time arise, whereby production or shipments are curtailed or delayed, we reserve the right to prorate our shipments of Cement to all purchasers of record at such time. In addition to orders or contracts accepted hereunder, we may have accepted, and shall from time to time accept, other orders and contracts so as to have a market for our estimated output of Cement under normal conditions; therefore, in the event we shall at any time, because of any such contingency, be unable to deliver to all our customers the entire quantity of Cement required and called for by all of our contracts then in force, the total of our production then available shall be applied pro rata on all of said contracts according to their requirements respectively, and the amount deliverable on each contract may be reduced accordingly, and there shall be no liability on our part for the reduction so made.

"IMPERIAL" Portland Cement to be furnished hereunder is when shipped to conform in every respect to specifications of United States Government, or Standard Specifications for Portland Cement as adopted by the American Society for Testing Materials when tested by methods of testing recommended by the American Society of Civil Engineers, but we cannot be responsible for improper use of Cement, therefore we will not guarantee finished work.

IMPERIAL PORTLAND CEMENT COMPANY.

Form No. 1

TRADE QUOTATIONS

IMPERIAL PORTLAND CEMENT COMPANY

IMPERIAL, U. S. A.

We quote, subject to change without notice, shipment within fifteen (15) days from date of order, acceptance of order in writing by this Company, and to terms, conditions and limitations on the reverse side hereof, in carloads, f. o. b. station named:

IMPERIAL Portland Cement	in 4 cloth sacks at	per standard bbl.
	" 4 paper bags	" "

This quotation is based upon today's market and is applicable to immediate orders only.

Prices for specific work requiring deliveries beyond 15 days will be quoted upon application accompanied by full information and description of the work.

Yours respectfully,

IMPERIAL PORTLAND CEMENT COMPANY.

Terms, Conditions and Limitations

PAYMENT: 30 days net 5 cents per barrel discount for PAYMENT IN FULL within 10 days from date of invoice. Payments to be made in cash or equivalent at our office, Imperial, U. S. A. Original paid freight bills to be sent us promptly for credit.

If purchaser fails to comply with terms of payment or with any of the other terms of sale, we reserve the right to cancel unfilled portion of any contract or order, purchaser remaining liable for all unpaid accounts.

Orders are subject to approved credit, and if at any time purchaser's financial responsibility be or become, in our opinion, impaired or unsatisfactory, we reserve the right to require payment in advance or satisfactory assurance that bills will be promptly paid when due.

In making delivered prices we only guarantee cost at destination, and we will not be responsible for shortage or damage occurring in transit. Our responsibility ceases when shipments are delivered to Railroad Company on cars at our Mill. Railroad Company's bills of lading shall be conclusive as to quantity and good condition of both Cement and packages when loaded on cars.

We will pay to original purchaser 10 cents each for empty cloth cement sacks purchased of us, bearing our brand, on their receipt in serviceable condition at our Mill, if returned within 90 days after their purchase, freight prepaid, subject to our inspection and count. We do not purchase sacks bearing brands other than our own, or sacks that have been wet or are otherwise useless.

Unless otherwise agreed, the quotation on reverse side is limited to One Carload of Cement and applies only on shipments billed to and unloaded at point of delivery specified.

Orders entered for shipment on a specific date will, at our option, be shipped on that date unless sooner ordered out by purchaser.

We reserve the right to prescribe the route by which shipments shall be forwarded. All railroad demurrage, car service and terminal charges at destination shall be settled for and borne by purchaser.

The purchaser shall give us shipping instructions in writing a reasonable time before shipments are to be made. All orders and contracts are accepted subject to contingencies of manufacturing and shipping, and other causes beyond our control, and we will not be responsible for delays in transit. Should any contingency at any time arise, whereby production or shipments are curtailed or delayed, we reserve the right to prorate our shipments of Cement to all purchasers of record at such time. In addition to orders or contracts accepted hereunder, we may have accepted, and shall from time to time accept, other orders and contracts so as to have a market for our estimated output of Cement under normal conditions; therefore, in the event we shall at any time, because of any such contingency, be unable to deliver to all our customers the entire quantity of Cement required and called for by all of our contracts then in force, the total of our production then available shall be applied pro rata on all of said contracts according to their requirements respectively, and the amount deliverable on each contract may be reduced accordingly, and there shall be no liability on our part for the reduction so made.

"IMPERIAL" Portland Cement to be furnished hereunder is when shipped to conform in every respect to specifications of United States Government, or Standard Specifications for Portland Cement as adopted by the American Society for Testing Materials when tested by methods of testing recommended by the American Society of Civil Engineers, but we cannot be responsible for improper use of Cement, therefore we will not guarantee finished work.

IMPERIAL PORTLAND CEMENT COMPANY.

Form No. 2
Line Yard Form

TRADE QUOTATIONS

IMPERIAL PORTLAND CEMENT COMPANY

IMPERIAL, U. S. A.

We quote, subject to change without notice, shipment within fifteen (15) days from date of order, acceptance of order in writing by this Company, and to terms, conditions and limitations on the reverse side hereof, "IMPERIAL" Portland Cement for your Yards, in carloads, f. o. b. stations named, at the following prices per standard barrel, viz.:

F. O. B.	IN CLOTH SACKS	IN PAPER BAGS

This quotation is based upon today's market and is applicable to immediate orders only.

Prices for specific work requiring deliveries beyond 15 days will be quoted upon application accompanied by full information and description of the work.

Yours respectfully,

IMPERIAL PORTLAND CEMENT COMPANY.

Terms, Conditions and Limitations

PAYMENT: 30 days net; 5 cents per barrel discount for PAYMENT IN FULL within 10 days from date of invoice. Payments to be made in cash or equivalent at our Office, Imperial, U. S. A. Original paid freight bills to be sent us promptly for credit.

If purchaser fails to comply with terms of payment or with any of the other terms of sale, we reserve the right to cancel unfilled portion of any contract or order, purchaser remaining liable for all unpaid accounts.

Orders are subject to approved credit, and if at any time purchaser's financial responsibility be or become, in our opinion, impaired or unsatisfactory, we reserve the right to require payment in advance or satisfactory assurance that bills will be promptly paid when due.

In making delivered prices we only guarantee cost at destination, and we will not be responsible for shortage or damage occurring in transit. Our responsibility ceases when shipments are delivered to Railroad Company on cars at our Mill. Railroad Company's bills of lading shall be conclusive as to quantity and good condition of both Cement and packages when loaded on cars.

We will pay to original purchaser 10 cents each for empty cloth cement sacks purchased of us, bearing our brand, on their receipt in serviceable condition at our Mill, if returned within 90 days after their purchase, freight prepaid, subject to our inspection and count. We do not purchase sacks bearing brands other than our own, or sacks that have been wet or are otherwise useless.

Unless otherwise agreed, the quotation on reverse side is limited to One Carload of Cement for each or any station named and applies only on shipments billed to and unloaded at point of delivery specified, respectively.

Orders entered for shipment on a specific date will, at our option, be shipped on that date unless sooner ordered out by purchaser.

We reserve the right to prescribe the route by which shipments shall be forwarded. All railroad demurrage, car service and terminal charges at destination shall be settled for and borne by purchaser.

The purchaser shall give us shipping instructions in writing a reasonable time before shipments are to be made. All orders and contracts are accepted subject to contingencies of manufacturing and shipping, and other causes beyond our control, and we will not be responsible for delays in transit. Should any contingency at any time arise, whereby production or shipments are curtailed or delayed, we reserve the right to prorate our shipments of Cement to all purchasers of record at such time. In addition to orders or contracts accepted hereunder, we may have accepted, and shall from time to time accept, other orders and contracts so as to have a market for our estimated output of Cement under normal conditions; therefore, in the event we shall at any time, because of any such contingency, be unable to deliver to all our customers the entire quantity of Cement required and called for by all of our contracts then in force, the total of our production then available shall be applied pro rata on all of said contracts according to their requirements respectively, and the amount deliverable on each contract may be reduced accordingly, and there shall be no liability on our part for the reduction so made.

"IMPERIAL" Portland Cement to be furnished hereunder is when shipped to conform in every respect to specifications of United States Government, or Standard Specifications for Portland Cement as adopted by the American Society for Testing Materials when tested by methods of testing recommended by the American Society of Civil Engineers, but we cannot be responsible for improper use of cement, therefore we will not guarantee finished work.

IMPERIAL PORTLAND CEMENT COMPANY.

SPECIAL QUOTATION FOR SPECIFIC WORK

IMPERIAL PORTLAND CEMENT COMPANY

IMPERIAL, U. S. A.

We quote you, subject to all the terms, conditions and limitations on both sides hereof, on "IMPERIAL" PORTLAND CEMENT for work herein described; and for shipment according to contract requirements, between date hereof and 191 , not to exceed, however, bbls. in any one month:

IMPERIAL Portland Cement in 4 Cloth Sacks at per Standard Bbl.
4 Paper Bags at " " "

in carloads, f. o. b. cars
This price includes the sacks in which the Cement is to be shipped.

This quotation is intended to cover the entire and actual quantity (estimated at barrels) of Portland Cement which buyer shall be required to, and in fact shall, furnish or use in the following described work, but not in any event to exceed 110% of the estimated quantity above stated.

DESCRIPTION OF WORK

This quotation, if to a dealer for resale of Cement for use in the work described, is subject to the execution of a written contract between such dealer and his customer in conformity herewith on our regular form furnished for dealers' use, the original or a duplicate thereof to be filed with us.

This quotation is for acceptance within 5 days of formal award of contract for work described, but is void if not accepted within 30 days from date hereof; It is further subject to the execution of our regular form Specific Work Sales Contract.

Yours respectfully,

IMPERIAL PORTLAND CEMENT COMPANY.

ACCEPTANCE: I (we) hereby accept the price, terms and all the conditions and limitations of the above special quotation and agree to execute promptly a contract therefor on your regular form Specific Work Sales Contract, covering Portland Cement required and used for the work described.

.....
Purchaser.

IMPERIAL PORTLAND CEMENT COMPANY.

Form No. 4
In Triplicate

IMPERIAL PORTLAND CEMENT COMPANY
Imperial, U. S. A.

Specific Work—Sales Contract, No._____

THIS AGREEMENT, and a duplicate hereof, made this day of 191 , by and between IMPERIAL PORTLAND CEMENT COMPANY (a corporation), of Imperial, U. S. A., hereinafter called "SELLER," and of , hereinafter called "BUYER," WITNESSETH:

That in consideration of the price and subject to all the terms, conditions and limitations set forth on this and the reverse side hereof, which is hereby mutually understood and expressly agreed are a part hereof, SELLER hereby sells and agrees to deliver, and the BUYER hereby purchases and agrees to receive and pay for barrels of "IMPERIAL" Portland Cement, at a price of $ per standard bbl. in 4 Cloth Sacks, 4 Paper Bags, in carload lots, f. o. b. cars , to be used in the following described work, and shipped between the date hereof and , 191

DESCRIPTION OF WORK

This contract is intended to, and does, within the limitations hereof, cover the entire quantity of Portland Cement which BUYER shall, during the time herein specified, furnish or use in the work above described.

The amount of Portland Cement required for the said work is estimated by BUYER at barrels, but nothing herein contained shall obligate SELLER to furnish hereunder more than the quantity of "IMPERIAL" Cement actually furnished by BUYER for, and used in, said work, nor in any event more than a maximum quantity of barrels (said maximum quantity being 110% of estimated requirements). Said Cement is to be shipped as nearly as practicable to meet the necessities of the work; it being understood, however, that under no circumstances shall SELLER be obligated to ship hereon more than barrels during any one calendar month; or during any 30 day period; it being further provided, however, that BUYER shall in any event receive and pay for in accordance with price and terms hereof, all Cement shipped hereunder.

This contract shall be binding upon the heirs, executors, administrators, successors, or assigns of the respective parties hereto, but shall not be assigned by BUYER without written consent of SELLER.

ENTERED INTO and signed, subject to official written approval of an Executive Officer of SELLER at its General Office, Imperial, U. S. A., the day and year first above written.

Contract No._____

Date_____ 191—

IMPERIAL PORTLAND CEMENT CO.

IMPERIAL, U. S. A.

and

Other Terms, Conditions and Limitations Governing This Contract

The quantity of "IMPERIAL" CEMENT mentioned on reverse side hereof is for use in the work described, and if BUYER shall sell or otherwise dispose of any portion of said Cement, or use any portion thereof in any work other than above described or assign this contract or any part thereof, or fail to comply with terms of payment, or any of the conditions and limitations in this agreement set out, or if in the opinion of SELLER the BUYER'S credit be or become impaired, then, in any such event or events, SELLER may, at his option, decline to make further deliveries hereunder, BUYER remaining liable for all unpaid accounts.

BUYER, when ordering Cement to be shipped hereon, shall refer to this contract by its number and date, and the BUYER shall, on or about the first day of each month, if requested by and on forms furnished by SELLER, correctly inform the SELLER of the amount of "IMPERIAL" CEMENT delivered or used by him on the above described work during the preceding month or months since date hereof.

The terms of payment shall be as follows, viz.: 30 days net, or, if invoice is PAID IN FULL within 10 days from date of shipment, 5 cents per barrel discount will be allowed, payments to be made in cash or equivalent at SELLER'S Office, Imperial, U. S. A. Freight charges per tariff applying, from Imperial, U. S. A., to point of delivery specified, shall be paid by BUYER for account of SELLER, and the original paid freight bills sent to SELLER promptly for proper credit.

The price herein provided includes the packages in which the Cement shall be shipped.

SELLER will pay original purchaser 10 cents each for empty cloth cement sacks purchased hereunder bearing its brand, on their receipt in serviceable condition at SELLER'S Mill, if returned within 90 days after their purchase, freight prepaid, subject to SELLER'S inspection and count. SELLER will not purchase sacks bearing brands other than its own, or sacks that have been wet or are otherwise useless.

SELLER'S invoice quantities shall be the basis for settlement, and BUYER shall not hold SELLER responsible for shortage of, or damage to, either Cement or packages occurring in transit. Railroad Company's bills of lading at the point of shipment shall be conclusive as to quantity and good condition of Cement and packages when loaded on cars at SELLER'S Mill. All railroad demurrage, car service, and terminal charges imposed at destination shall be settled for, and borne by, BUYER.

The price specified on the reverse side hereof is a firm price, and not subject to change or alteration except as may be herein otherwise expressly stipulated, any agreement, oral or otherwise, with the salesman or any other person to the contrary notwithstanding; it being further understood and agreed that all conditions of the sale are herein wholly set out.

SELLER reserves the right to determine and direct the route by which shipments hereunder shall be forwarded.

BUYER shall give SELLER shipping instructions in writing a reasonable time before shipments are to be made. All orders and contracts are accepted subject to contingencies of manufacturing and shipping, and other causes beyond SELLER'S control, and SELLER will not be responsible for delays in transit. Should any contingency at any time arise, whereby production or shipments are curtailed or delayed, SELLER reserves the right to prorate its shipments of Cement to all purchasers of record at such time. In addition to orders or contracts accepted hereunder SELLER may have accepted, and shall from time to time accept, other orders and contracts so as to have a market for its entire estimated output of Cement under normal conditions; therefore, in the event SELLER shall at any time, because of any such contingency, be unable to deliver to all its customers the entire quantity of Cement required and called for by all of its contracts then in force, the total of SELLER'S production then available shall be applied pro rata on all of said contracts according to their requirements respectively, and the amount deliverable on each contract may be reduced accordingly and there shall be no liability on SELLER'S part for the reduction so made.

The "IMPERIAL" Portland Cement to be shipped hereunder is when shipped to conform in every respect to Specifications of United States Government, or Standard Specifications for Portland Cement as adopted by the American Society for Testing Materials when tested by methods of testing recommended by the American Society of Civil Engineers, but SELLER cannot be responsible for improper use of Cement therefore will not guarantee finished work.

Time is the essence of this contract.

Other Terms, Conditions and Limitations Governing This Contract

The quantity of "IMPERIAL" CEMENT mentioned on the reverse side hereof is sold and delivered for use in the work described, and if Buyer shall sell or otherwise dispose of any portion of said Cement, or use any portion thereof in any work other than that described or assign this contract or any part thereof, or fail to comply with terms of payment, or any of the conditions and limitations of this contract, or if the Buyer's credit be or become impaired, then, in any such event or events, Seller may, at his option, decline to make further deliveries hereunder, Buyer remaining liable for all unpaid accounts.

The Seller has a contract with Imperial Portland Cement Company, Imperial, U. S. A. (Shipper) for the Cement to be furnished and delivered hereon, and Buyer agrees that this contract is subject to contingencies of manufacturing and shipping and other causes beyond control of Seller or Shipper, and that should any contingency at any time arise whereby Shipper's production or shipments are curtailed or delayed, the right is reserved by both Shipper and Seller to pro rate the shipments and deliveries of Cement to all buyers of record at such time; that in addition to this contract, Shipper and Seller may have accepted, and shall from time to time accept, other orders and contracts within their ability under normal conditions to supply same, therefore in the event either Shipper or Seller shall at any time be unable to deliver to all customers the entire quantity of Cement called for by all contracts then in force, the total of Shipper's output then available shall be applied pro rata on all orders or contracts according to their requirements respectively, and the amount deliverable on each may be reduced accordingly, and there shall be no liability on the part of Shipper or Seller for the reduction so made.

When deliveries hereunder are in carloads f. o. b. cars Railroad Company's tracks, Shipper's invoice quantities shall be the basis for settlement, and Buyer shall not hold Seller responsible for shortage of or damage to, either Cement or packages occurring in transit. Railroad Company's bills of lading at the point of shipment shall be conclusive as to quantity and good condition of Cement and packages when loaded on cars at Shipper's Mill. All railroad demurrage, car service, and terminal charges imposed at destination shall be settled for, and borne by, Buyer.

The price specified on the reverse side hereof is a firm price, and not subject to change or alteration except as may be herein otherwise expressly stipulated, any agreements, oral or otherwise, with the salesman or any other person to the contrary notwithstanding; it being further understood and agreed that all conditions of the sale are herein wholly set out.

Seller reserves the right to determine and direct the route by which shipments hereunder shall be forwarded.

"IMPERIAL" Portland Cement to be furnished hereunder is when shipped to conform in every respect to Specifications of United States Government, or Standard Specifications for Portland Cement as adopted by the American Society for Testing Materials when tested by methods of testing recommended by American Society of Civil Engineers, but Shipper or Seller cannot be responsible for improper use of Cement, therefore will not guarantee finished work.

Time is the essence of this contract.

Conditions of Sale: This order is not binding upon the Imperial Portland Cement Company until accepted from its Home Office in writing by an Officer of the Company, and is subject to all the conditions of sale and shipment on reverse side hereof.

_____*Salesman*

_____*Purchaser*

1. TERMS: 30 days net; 5 cents per barrel discount for payment in full, including sacks, within 10 days from date of invoice. Original paid freight bills to be sent to us promptly for credit.

2. The Imperial Portland Cement Company shall be under no obligation to make shipment hereon in the event of any payment becoming past due.

3. Orders are subject to approved credit, and if at any time purchaser's credit be or become, in our opinion, impaired or unsatisfactory, we reserve the right to require payment in advance or satisfactory assurance that bills will be promptly paid when due.

4. If purchaser fails to comply with terms of payment or with any of the other terms of sale, we reserve the right to cancel unfilled portion of any contract or order, purchaser remaining liable for all unpaid accounts.

5. We reserve the right to prescribe the route by which shipments shall be forwarded.

6. Orders entered for shipment on a specific date will, at our option, be shipped on that date unless sooner ordered out by purchaser.

7. Bills are payable in funds current in Imperial, U. S. A., and all exchange or collection charges must be paid by purchaser. Bills not paid when due, per invoices, will be subject to sight draft without notice.

8. Demurrage or other car service charges which railroad companies may impose for detention of cars shall be borne and settled for by purchaser.

9. We will pay original purchaser 10 cents each for empty cloth cement sacks purchased of us, bearing our brand, on their receipt in serviceable condition at our Mill, if returned within 90 days after their purchase, freight prepaid, subject to our inspection and count. We do not purchase sacks bearing brands other than our own, or sacks that have been wet or are otherwise useless.

10. In making delivered prices we only guarantee cost at destination, and we will not be responsible for shortage or damage occurring in transit. Our responsibility ceases when shipments are delivered to Railroad Company on cars at our Plant. Railroad Company's bills of lading shall be conclusive as to quantity and good condition of Cement and packages when loaded on cars.

11. The purchaser shall give us shipping instructions in writing a reasonable time before shipments are to be made. All orders and contracts are accepted subject to contingencies of manufacturing and shipping, and other causes beyond our control, and we will not be responsible for delays in transit. Should any contingency at any time arise, whereby production or shipments are curtailed or delayed, we reserve the right to prorate our shipments of Cement to all purchasers of record at such time. In addition to orders or contracts accepted hereunder we may have accepted, and shall from time to time accept, other orders and contracts so as to have a market for our estimated output of Cement under normal conditions; therefore, in the event we shall at any time, because of any such contingency be unable to deliver to all our customers the entire quantity of Cement required and called for by all of our contracts then in force, the total of our production then available shall be applied pro rata on all of said contracts according to their requirements respectively, and the amount deliverable on each contract may be reduced accordingly, and there shall be no liability on our part for the reduction so made.

12. It is mutually understood and agreed that the price at which the order on the reverse side hereof is accepted by the Imperial Portland Cement Company is a firm price and not subject to change or alteration except as may be herein otherwise expressly stipulated, any agreement, oral or otherwise, with the salesmen or any other person to the contrary notwithstanding, it being further understood and agreed that all conditions of the sale are herein, and in the acceptance hereof, wholly set out, and each and every of said conditions form a part of the order and are agreed to and accepted as such by purchaser.

13. This order contemplates delivery and use of material ordered at destination shown and in the work described, and if diverted or used elsewhere purchaser hereby agrees to pay Imperial Portland Cement Company for Cement so diverted, at its price current at point of ultimate destination, and in the event of such diversion without its consent the Imperial Portland Cement Company shall be under no obligation to make shipments hereon.

14. This order, if for Cement to be used in specific work requiring deliveries beyond fifteen days from date, is subject to execution of our regular form Specific Work Sales Contract.

15. "IMPERIAL" Portland Cement to be furnished hereunder is when shipped to conform in every respect to specifications of United States Government, or Standard Specifications for Portland Cement as adopted by the American Society for Testing Materials when tested by methods of testing recommended by the American Society of Civil Engineers, but we cannot be responsible for improper use of Cement, therefore we will not guarantee finished work.

Dear Sir: In answer to your wire of the 17th instant, would state that some of the manufacturers who are members of this Association do not report information for all our reports. In other words, our work consists of sending out contract reports, credit reports and statistical reports. Some manufacturers do not report all three. Some report credits only; others credits and statistics.

Attached, I will give you a list of all the member Companies showing what information they report to this Association and the capacity. This capacity figure was reported to the Association by the individual companies, not compiled from any data that we have in

our office and therefore the responsibility for the accuracy of same we do not assume.

The attached memorandum or companies are the only companies which are members of this Association. Standard and Whitehall, which you mention in your wire have never been members in any way.

Yours very truly, Cement Manufacturers Protective Assn.,
By —— ——, Secretary. CWB. GY.

PORTLAND CEMENT ASSOCIATION

CHICAGO December 1, 1919

A. D. Naylor, Treasurer
Knickerbocker Portland Cement Co., Inc.
30 East 42nd Street
New York City

Dear Mr. Naylor:

The organization known as the Association of American Portland Cement Manufacturers, which had offices in the Bellevue Court Building, Philadelphia, was reorganized in 1916 as the Portland Cement Association and the offices moved to the Conway Building, Chicago.

The old Association was organized in 1902 by a number of Lehigh Valley cement manufacturers for the primary purpose of evolving a satisfactory plan for handling cement sacks. Promotional work of this Association did not become very active until 1912.

Yours very truly,

W.M.Kinney-ED

253

General Manager

W M Kinney

Reproduction of original call for meeting of cement manufacturers, September 11, 1902, which led to the formation of the organization now known as the Portland Cement Association

The undersigned, manufacturers of Portland Cement, recognising the fact that the present methods of handling the subject of "sacks" are almost universally unsatisfactory, and believing that the question can be profitably discussed and a satisfactory plan evolved at a meeting of the representatives of the Eastern Mills, hereby pledge themselves to attend such a meeting to be held at such time and place as may be most convenient to a majority of those signing.

Portland Cement Association

111 West Washington Street, Chicago

File 9-4-5-4.

August 30, 1920.

A. D. Naylor, President Knickerbocker Portland Cement Co., Inc., 30 E. Forty-second Street, New York, N. Y.

Dear Sir: Almost 18 years ago, to be exact, on September 11, 1902, the first meeting of portland cement manufacturers was held at Sherry's in New York City. This meeting was the forerunner of many similar meetings, which finally resulted in the formation of what is now known as the Portland Cement Association.

Call for the first meeting was endorsed by several men still prominently connected with the cement industry. With the thought that you may be interested in framing and hanging in your office a copy of this first call, one is enclosed. Additional copies may be secured from this office.

Yours very truly, W. M. Kinney, General Manager. W. M. Kinney-ED.

Enclosure.

[fol. 1364½] Govt. Ex. No. 255

Portland Cement Association

111 West Washington Street, Chicago

Telephone: Franklin 1540

January 30, 1918.

Mr. Loring A. Cover, President Security Cement & Lime Co., Equitable Building, Baltimore, Md.

Dear Sir: At the meeting held at the Blackstone, Chicago, on Tuesday, January 22, to consider special promotion for the year 1918, representatives of 14 member companies shipping into the states tributary to the Minneapolis, Milwaukee, Chicago, Indianapolis and Pittsburgh offices, were represented. Seven additional members were represented by proxy.

After a full discussion, the schedule of dues sent you on January 7 was unanimously adopted and it was agreed that the basis should be shipments for the year 1917. It was further agreed that the Executive Committee of the Association should reduce the dues at the [fol. 1365] end of any given period if in their judgment such action should be deemed advisable.

The following resolutions were also adopted:

1. That a sub-office be established in Iowa at a location chosen by the General Manager of the Association.

2. That promotion work be carried on in the upper peninsula of Michigan with funds to be raised for the purpose by an assessment of 1 cent per barrel on 1917 shipments into that territory, this work to be handled through the Milwaukee Office.

3. That the Executive Committee be requested to extend to the Michigan Concrete Roads Association an invitation to merge with the Association in the conduct of their promotional efforts.

4. That the General Manager of the Association should convey to the Executive Committee that it was the sense of the meeting that the advertising propaganda as carried on at present is insufficient and should be immediately increased, especially during the present period of dullness. It was also the sense of the meeting that all advertising should be done by the Association and discontinued by members.

Yours very truly, H. E. Hilts, General Manager.

(Here follow Government's Exhibits Nos. 256, 257, 258, 259, 260, 317, 318, 319, 320, marked side folio pages 1366-1377, inclusive.)

SPECIFIC WORK QUOTATION

Saylor's Portland Cement

Coplay Cement Manufacturing Co.

New York, Sept. 8, 1919.

Felton Construction Corp.,
1450 Michigan Avenue,
Buffalo, N. Y.

Gentlemen:

We quote you subject to all the terms, conditions and limitations on both sides hereof on SAYLOR'S PORTLAND CEMENT for work herein described, and for shipment according to contract requirements.

In carload lots, f. o. b. cars at Silver Creek, N. Y.

In cloth sacks $ 2.88 per standard barrel (376 lbs. net) including four (4) sacks.

If shipped in paper sacks thirty-five (35) cents per barrel less than cloth price.

If shipments are required from bins set aside for the storage of specially tested cement, an additional charge of three (3) cents per barrel will be made for storage service.

QUANTITY

10,000 barrels.

DESCRIPTION OF WORK:

New York State Highway Work.

Terms of Payment: On approved credit, 5 cents per barrel off for cash in ten days from date of invoice, or 30 days net from date of invoice. If, during the performance of the work, the financial responsibility of the purchaser becomes impaired or unsatisfactory to the COPLAY CEMENT MANUFACTURING COMPANY, cash payments with above discount must be made before shipment, or satisfactory security must be given by the purchaser.

This quotation is for acceptance within 5 days of formal award of contract for work described, but in any event is void if not accepted within 15 days from date hereof; it is further subject to the execution of our regular form of Contract.

Yours respectfully,

COPLAY CEMENT MANUFACTURING COMPANY.

Form A2—5-19

VULCANITE PORTLAND CEMENT COMPANY

SPECIFIC JOB QUOTATION

New York, September 15, 1919.

ALBERT MOYER
Manager of Sales

Messrs. Felton Construction Company,
Buffalo, N.Y.

We quote you on VULCANITE Portland Cement for shipment according to contract requirements, subject to all terms, conditions and limitations on both sides hereof. Quantity to be shipped not to exceed, however, 5000 bbls. within any one month. Price below quoted is based on present conditions and is for shipment to be made before October 1st, 1920 when this contract shall expire. No order under this contract will be received after that date, unless the date of expiration shall have been extended by express agreement in writing.

VULCANITE Portland Cement in 4 cloth sacks, at $ 2.55 per standard bbl., including the sacks.
VULCANITE Portland Cement in 4 paper bags, at $ 2.53 per standard bbl., including the bags.
VULCANITE Portland Cement in bulk, at $ 2.23 for 376 lbs.
F.O.B. cars, Forestville or Silver Creek, N.Y. in carload lots

The buyer to have the benefit of any reduction and to be liable for any advance in freight rates. Any tax on freight bills is to be paid by the buyer. In the event of prepayment of freight or other railroad or terminal charges the buyer shall settle these in cash on presentation of invoice by the seller.

This quotation is intended to cover the entire and actual quantity not to exceed 10000 barrels of VULCANITE Portland Cement which buyer shall be required to, in fact shall furnish or use in the following described work. If upon investigation it is found that the work described will not require the number of barrels stated above we will reduce this quantity to accord with the requirements of the job.

DESCRIPTION OF WORK Concrete Road #1469 Chautauqua County, N.Y. Silver Creek, Forestville, N.Y. 4.94 mi. Felton Construction Co. Buffalo, N.Y. low bidders and contractors

CHARGE FOR BIN TEST.—If cement is held in bins at our Works awaiting result of tests, a charge of 3c. per barrel will be made. We, however, will not agree to hold cement in such bins for a period longer than 45 days except by special arrangement.

Buyer shall have no right to assign this contract. The material covered by it is sold to the buyer upon the representation that it is purchased for use in the construction of work referred to. Use of the cement in any other work than that specified, or disposition of it for any other purpose, or resale of it for use in other than above described work, shall give the seller the option to terminate this contract and to refuse to deliver any more cement under it.

This quotation is void unless accepted within fifteen days from this date.

We send you this proposition in duplicate; upon our receiving one of the copies accepted by you in writing, it shall constitute a contract between us, subject to execution in writing by this company.

Remarks If at any time during the life of this contract the Vulcanite Portland Cement Company reduces its price at above destination the price named in this contract will be reduced accordingly on all unshipped balances at date reduction is made.

Respectfully yours,

VULCANITE PORTLAND CEMENT CO.

THE

WHITEHALL CEMENT MANUFACTURING COMPANY

LAND TITLE BUILDING

PHILADELPHIA

Aug. 28, 1919.

Felton Construction Corp.,
1450 Michigan Ave.,
Buffalo. N.Y.

Gentlemen:

Following your letter of Aug. 25th we take pleasure in quoting you on cement for New York State road work for delivery between Jan. 1, 1920 and Oct. 31, 1920 --

Silver Creek, N.Y., 10,000 barrels,
$1.85 bulk, mill, 53¢ freight, 40¢ sacks,

Sheridan, N.Y., 13,650 barrels,
$1.85 bulk, mill, 53¢ freight, 40¢ sacks,

Depew, N.Y., 15,385,
$1.85 bulk, mill, 49¢ freight, 40¢ sacks,

Cloth sacks are charged at 10¢ each and credited same amount when returned to our mill in good condition, freight prepaid, within ninety days from date of shipment. There is an additional charge of 5¢ each, to cover replacement, for all sacks not returned in good condition, within that period.

This quotation is for acceptance on or before Sept. 20, 1919.

Thanking you for the inquiry, we remain

Yours very truly,

GHE-M

Manager of Sales.

HERCULES CEMENT CORPORATION

PHILADELPHIA

May 17th 1919

State Highway Commissioners of New Jersey
1006 Broad St. Bank Bldg.,
Trenton, N.J.

Dear Sirs:-

In keeping with your inquiry recently sent out, we are pleased to enclose herewith our quotation for 19,000 barrels of Cement, F.o.b. cars Merlo Park, Iselin, and Rahway, N.J. We understand from the Penna R.R. that Colonia, N.J. is the receiving station for less than carload freight only, and that at the present time no tariff is published for carload shipments to this point.

We are in a position to make shipment of any quantity, up to five carloads per day, which you may require for this work. We have a large stock on hand and at the present time are operating our plant to capacity.

Our cement has been used in a number of places in the State of New Jersey on Highway work, and has given entire satisfaction in every instance.

We hope to be favored with this business and wish to assure you that if we are so favored, we will be able to give you service and quality that could not be surpassed by any of our competitors.

Very truly,
Hercules Cement Corporation

ALPHA PORTLAND CEMENT COMPANY

May 16, 1919.

R. H. Exton, Business Agt.,
State Highway Commission of New Jersey,
1001 Broad Street Bank Bldg.,
Trenton, N. J.

Dear Sir:

We quote you subject to all the terms, conditions and limitations on both sides hereof on ALPHA PORTLAND CEMENT for work herein described; and for shipment according to contract requirements.

In carload lots, f. o. b. cars Menlo Park, Iselin or Rahway, N. J.

In cloth sacks $ 3.82 per standard barrel (376 lbs. net).

If shipped in paper sacks thirty-five (35c) cents per barrel less than cloth price.

If shipped in bulk sixty-five (65c) cents per barrel less than cloth price.

The price of cement stated herein is based on the freight rates in effect at the present time and is subject to advance or reduction as the freight rates may be advanced or reduced. This price will be advanced to the extent of any additional war taxes on transportation charges on cement imposed by the Government.

This quotation is intended to cover the actual quantity (estimated at 19,000—— barrels) of ALPHA PORTLAND CEMENT for use in the following described work:

DESCRIPTION OF WORK For use in New Jersey State Highway from Menlo Park to Rahway, N. J. If this cement is to be set aside in special bins at our mill and held for test prior to shipment there will be an additional charge of 5¢ per barrel for this bin service. Any decline in our market price during 1919 shall apply to shipments under this quotation made after date of reduction and during such period as our lower market price is in effect.

Terms of Payment: On approved credit, 5 cents per barrel off for cash in ten days from date of invoice, or 30 days net from date of invoice. If, during the performance of the work, the financial responsibility of the purchaser becomes impaired or unsatisfactory to the ALPHA PORTLAND CEMENT COMPANY, cash payments with above discount must be made before shipment, or satisfactory security must be given by the purchaser.

This quotation shall not be binding upon this Company unless accepted in writing by the purchaser on or before

May 31, 1919.

Awaiting the favor of your acceptance, we remain,

Yours very truly,

LC. ALPHA PORTLAND CEMENT COMPANY

By E. T. Williams

ACCEPTANCE: I (we) hereby accept the price, terms and all conditions and limitations of the above special quotation and agree to execute promptly a contract therefor on your regular Memorandum of Agreement form, covering Portland Cement required and used for the work described.

Cement to be delivered F. O. B. cars at Menlo Park—Iselin—Colonia and Rahway N. J. Empty cloth Bags to be returned in bundles of 50 bags each and returned to the Mill by you Freight prepaid, mill count and inspection to govern.

Terms—Five cents per bbl. Discount for cash in Ten days from date of Invoice. Should there be a reduction in the market price of Edison Cement during the life of this contract, we will give you the benefit of such deduction on the unshipped balance at the time this reduction becomes effective.

In the event of our being favored with this order the Edison Cement Co will be pleased to accord the State Highway Samplar [fol. 1378½] every facility for drawing samples of cement as cars are loaded at their mill. further they will forward to the State Highway Dept a copy of laboratory report of every car shipped against Contract.

This quotation is subject to any increase or decrease in Freight rates during the life of this contract.

We understand that the State Highway Dept does not have to pay war tax on shipments of cement by filing a certificate with the Rail Road Co at point of shipment if this is correct we will deduct the war tax from Invoice.

Edison portland cement Co claim they can take care of daily shipments in the neighborhood of 12000 barrels.

Yours truly, Manning Freeman & Son.

[fol. 1379] Edison Portland Cement Co.

8 West 40th Street, New York

May 15th, 1919.

M. Freeman & Son, Metuchen, N. J.

GENTLEMEN: Having reference to your advice that you propose submitting a quotation on Edison Portland Cement to cover the 19,000 some odd barrels to be purchased by the New Jersey State Highway Commission for roadwork in the vicinity of Menlo Park, Iselin, Colonia and Rahway, N. J., bids on which are to be received

May 19th, beg to advise you that in accordance with the request for such information contained in the "Information Sheet" issued by the New Jersey State Highway Commission, bearing on this matter, at the present time, the Edison Portland Cement Company has approximately 450,000 barrels of the highest grade of cement in its bins at New Village, N. J., and as it is our purpose to continue the manufacture of our product to the full capacity of our Mills, we anticipate that we will have practically this stated quantity of cement on hand throughout the active building season. Our loading and shipping facilities can take care of daily shipments in the neighborhood of 12,000 barrels, assuring a dependable source of supply.

We might add that in the event of our being favored with this business, it would be our purpose to give this preferred handling with [fols. 1379½ & 1380] shipments exactly as desired by the Highway Department.

Yours very truly, R. A. Wetzler, District Sales Manager. 2/J.

[fol. 1381] Govt. Ex. No. 322

Metuchen, N. J.

May 17th, 1919.

State Highway Commission of New Jersey.

Gentlemen: We will furnish 19000 Barrels more or less of Atlas Portland Cement in Cloth bags for $2.77 per Barrel and 19000 Barrels more or less in paper bags for $2.42 per Barrel. cloth bags redeemable at 15 cts each paper bags not redeemable.

Cement to be delivered F. O. B. cars at Menlo Park—Iselin—Colonia and Rahway N. J. empty cloth bags to be returned in bundles of 50 bags each and returned to the mill by you Freight prepaid, mill count and inspection to govern.

Terms—Five cents per bbl. discount for cash in ten days from date of invoice, should there be a reduction in the market price of Atlas Portland cement during the life of this contract we will give you the benefit of such reduction on the unshipped balance, at the time this reduction becomes effective.

This quotation is subject to any increase or decrease in Freight rates during the life of this contract.

[fol. 1381½] We understand that the State Highway Dept does not have to pay war tax on shipments of cement by filing a certificate with the Rail Road Co. at point of shipment, if this is correct we will deduct he war tax from Invoice, The Atlas Portland Cement Co will guarantee to ship on any schedule you may want up to 2000 barrels per day.

Yours truly, Manning Freeman & Son.

The Atlas Portland Cement Company

30 Broad Street, New York

May 16, 1919.

Manning Freeman & Son, 707 Middlesex Avenue, Metuchen, N. J.

GENTLEMEN: We understand that you are submitting a bid to the State Highway Commission of New Jersey on the Portland Cement requirements of paving State Route # 2, Section # 2, running from Menlo Park to Rahway, N. J.

[fol. 1382] If this contract is placed for Atlas Portland Cement we will guarantee to ship on any schedule they want, up to 2,000 barrels per day.

Very truly yours, The Atlas Portland Cement Company, by H. F. Dowd, District Sales Manager. SAP:EHT.

[fol. 1383] GOVT. EX. No. 324

The Allentown Portland Cement Co.

Allentown, Pennsylvania

March 24, 1919.

Mr. W. G. Thompson, State Highway Engineer, Trenton, N. J.

DEAR SIR: We wish to refer to your letter of the 12th instant, and also wish to apologize for delay in answering same, but the writer has been away for ten days, just returning Friday night.

We note you ask for price F. O. B. the plant, but our policy has always been to make a delivered price in order that we can compete with other cement manufacturers.

We will be very glad, therefore, to have you advise us at what points you will likely use cement so that we can send you quotations for these different destinations.

In the writer's opinion, he does not believe that there will be any reduction in the price of cement.

Very truly yours, The Allentown Portland Cement Co. R. L. Cope, Manager of Sales. RLCope/RES.

[fol. 1383½] GOVT. EX. No. 325

Alpha Portland Cement Company

Easton, Pa.

March 17, 1919.

Mr. W. G. Thompson, State Highway Engineer, Trenton, N. J.

DEAR SIR: We have your favor of the 12th inst. relative to prices on Alpha Portland Cement.

Our past experience has shown very conclusively that dealers and consumers of cement are not interested in our f.o.b. mill. They require in practically all cases, a price delivered at destination. In view of this general demand on the part of our trade, we have put in the policy of quoting prices delivered on cars at destination.

There are other reasons why a mill price is not practical. As all, or at least a very great portion, of our cement must of necessity be distributed through dealers and if we were to quote mill prices, it might easily interfere with the established custom of dealers' distribution. If we quote mill prices, then the cement becomes the property of the purchaser at our mill and could be shipped to any point designated by him and we would have no further control over [fol. 1384] the shipment. You will readily see that this would conflict with the present method of distributing cement through dealers.

In order to give you a general idea of the present prices, but without making any formal quotation, I might state that generally speaking, our quotations at this time are made on the basis of $3.00 per barrel in cotton f.o.b. our mill with freight rate and war tax to destination added. In this price is included four cotton bags which are re-purchased by us at 25¢ each when returned to our mill in good condition, freight prepaid, subject to our count and inspection. This price would fluctuate to some extent depending on local dealer conditions. You understand of course that so far as possible on work of this character, we would want the quotations made by local dealers as they are in position to perform services to the contractors, the cost of which may vary in different localities.

As regards your inquiry relative to any reduction in the price of cement, I would state that at the present time there is absolutely nothing in our manufacturing conditions which would warrant any reduction in the price of Alpha Portland Cement. There has been practically no decline in labor, coal or other materials entering into the manufacture of cement. If you will investigate carefully the present manufacturing conditions, we are sure you will find our present price on Portland Cement entirely reasonable.

If you should wish any further information regarding our prices or conditions of sale, we would be glad to have one of our executives [fol. 1384½] call on you at your convenience to go into this matter fully.

Yours very truly, F. M. Coogan, Second Vice-President.
FMC-LC.

March 18, 1919.

Mr. F. Coogan, 2nd Vice-Pres. Alpha Portland Cement Co., Easton, Penna.

DEAR SIR: Thank you for the information contained in your letter of March 17 relative to the price of cement f.o.b. your mill, in reply to our request of March 12.

Very truly yours, —— ——, State Highway Engineer.
WGT/O'B.

[fol. 1385] Govt. Ex. No. 326

State of New Jersey

State Highway Commission

Trenton

March 12, 1919.

Gentlemen: The State Highway Commission of New Jersey at its last meeting on March 6 directed its Engineer to secure from each of the cement manufacturers in business east of the Mississippi River a price per barrel at which it will sell cement f.o.b. the plant.

This price, it is expected, will be the one obtaining at the time the quotation is made. It is also requested that you make a statement as to whether or not, in your opinion, there will be a reduction in the price of cement, at the plant, within the next few weeks.

Very truly yours, W. G. Thompson, State Highway Engineer.

WGT/O'B.

[fol. 1385½] Govt. Ex. No. 327

The Atlas Portland Cement Company

New York

March 21, 1919.

Mr. W. G. Thompson, State Highway Engineer, State of New Jersey State Highway Commission, Trenton, N. J.

Dear Sir: Answering your inquiry relative to price per barrel on Atlas Portland Cement.

Our prices are quoted f. o. b. cars destination, based on $3.00 per barrel at our Plant at Northampton, Pa., plus freight. The above named price per barrel includes four (4) cloth sacks, which will be repurchased by us when returned to our Plant in good condition, at 25¢ each, equivalent to $1.00 per barrel.

It is our policy to market our product on as reasonable a basis of selling price as is consistent with fair return, and should conditions in the future—which we cannot foresee at present—become more [fol. 1386] favorable, it will give us pleasure to accommodate our selling prices to a decreased cost of manufacture.

Yours very truly, The Portland Cement Company, by W. A. Holman, Assistant to the President. WAH:MK.

[fol. 1386½] GOVT. EX. NO. 328

Coplay Cement Manufacturing Company

New York

March 17, 1919.

W. G. Thompson, State Highway Engineer, Trenton, N. J.

DEAR SIR: We are in receipt of your favor of the 12th inst. in reference to the price of cement, and the prospects for a change in the near future.

It is difficult for us to give you a price f. o. b. plant, without knowing the destination where the cement will be used. We have marketed our product in the State of New Jersey largely through dealers in building material, and we have agents at various points, some of whom we have done business with for many years. When construction work comes up in the territory where our customers operate, it is our policy to communicate with them and quote prices which [fol. 1387] are agreeable to all concerned. These local conditions are not the same at all points.

In reply to your question as to whether or not, in our opinion, there will be a reduction in the price of cement within the next few weeks, we would say that we can see no reason for a reduction in the price of cement. Our costs have not been reduced and there are no indications of reduction in the price of labor.

Cloth bags, however, are somewhat cheaper than they were last year. This, we understand, is not due so much to the lower price of cotton, as to the fact that mills which were turning out material for Government uses have gone back to the manufacture of cotton duck, which we use in cement bags. This material was not being made last year in sufficient quantity and the shortage had the effect of increasing the cost of bags to an abnormal basis, even in the midst of last year's war prices. There may be some reduction in the price we charge the buyer for bags, but this will have small bearing on the price of cement, as we credit the bags when returned at the same price which we charge for them, and a lower price for bags would only mean that the buyer would save the amount of the reduction on such bags as were not returned. The U. S. Department of Labor has recently issued a bulletin in which the opinion is stated that the high cost of all building material is with us to stay and that it is idle to expect a return to pre-war conditions, or any material re- [fol. 1387½] duction as long as the high cost of living necessitates a high wage of labor.

Very truly yours, Coplay Cement Mfg. Co. J. F. Twamley, General Sales Manager. JFT-AG.

[fol. 1388] GOVT. EX. NO. 329

Dexter Portland Cement Company

New York City

March 19th, 1919.

Mr. W. G. Thompson, State Highway Engineer, Trenton, N. J.

DEAR SIR: Replying to your March 12th letter, would advise it is not our policy to quote prices or sell our cement f. o. b. our plant at Nazareth, Pa. Our quotations are made on a delivered price basis f. o. b. destination. By this method we agree to deliver the cement to the buyer and assume the responsibility for its condition on arrival—otherwise claims for damage etc., would have to be made by the buyer.

In order to assist you in arriving at the information, which it is evidently your wish to secure, we enclose, herewith formal quotation showing present price of Dexter Portland Cement at Trenton, N. J. We repurchase cloth bags at 25c each or on the basis of $1.00 per barrel. The combined freight and war tax is figured at 37¢ per bbl., [fol. 1388½] using present tariffs and percent of war tax on freight rates to arrive at this figure. By subtracting $1.37 from the delivered price of $3.37, we believe you will have the required data.

In regard to your question as to whether a change in price is to occur in the near future, we can only say that our present price is based on the cost of the cement we have on hand and of our present cost of manufacture. If the price of labor, coal and the other materials used by us in manufacturing should decline and the demand for cement should be sufficient for us to run our plant at or near full capacity, the reduction in cost would undoubtedly be followed by a like reduction in our selling price. We do not care to venture a prediction as to how soon labor, coal etc. will return to normal prices.

Regretting that we cannot give you anything more definite, we remain,

Very truly yours, R. W. Hilles, Manager of Sales.

[fols. 1389 & 1390] Form A

Trade Quotation

Dexter Portland Cement Company

Nazareth, Pa.

March 18th, 1919.

Mr. W. G. Thompson, State Highway Engineer, State Highway Commission, Trenton, N. J.

DEAR SIR: We quote, for shipment within fifteen (15) days from date of order, in carloads, f. o. b. Trenton, N. J. subject to change without notice, and to terms, conditions and limitations on reverse side hereof:

Dexter Portland Cement in 4 cloth bags at 3.37 per standard bbl.

White—Dexter Portland Cement in cloth bags at per bbl., loaded in cars with Dexter so as to make full carload.

Price in paper bags 70¢ per bbl. less than in cloth bags.

This quotation is our present price and applies only to immediate orders.

Prices for specific work requiring deliveries beyond 15 days will be quoted on application, stating name of job, location and number of barrels required to complete the work.

Yours respectfully, Dexter Portland Cement Company. R. W. Hiles, Manager of Sales.

[fol. 1390½] March 21, 1919.

Mr. R. W. Hilles, Mgr. Sales, Dexter Portland Cement Co., 103 Park Ave., New York City.

DEAR SIR: Receipt is acknowledged of your letter of March 19 in reply to our request of March 12 for prices on cement f. o. b. your mill.

After some calculation we can arrive at what may be the price of cement f. o. b. your mill, which very nearly answers our question, though I must confess I fail to understand the mystery surrounding the mill price of cement.

We were directed by the State Highway Commission to request the price f. o. b. mill from every cement company east of the Mississippi River. Some companies voluntered the information without question; others gave it in an equivocal manner; some refused to give any information. You will readily understand that the State High-
[fol. 1391] way Commission is most apt to deal with the companies that meet its request in a candid, open manner. I would not burden you with this explanation were it not for the fact that your letter is typical of a great many others received from cement companies.

Very truly yours, —— ——, State Highway Engineer.
WGT/O'B.

Dexter Portland Cement Company

New York City

March 26th, 1919.

Mr. W. G. Thompson, State Highway Engineer, Trenton, N. J.

DEAR SIR: On receipt of your March 21st letter, as you are aware, I endeavored to arrange a meeting with you but failed on both Monday and Tuesday of this week. If you expect to be in Newark on Saturday, I will arrange to meet you at time and place appointed. Please advise me at Nazareth Thursday afternoon or Friday morning, if the above suggestion meets with your approval.

There is no mystery surrounding the mill price of cement. If [fol. 1391½] the consumer would profit by buying the cement f. o. b. the mill, I suppose the cement manufacturers would be willing to make prices in that way. In fact our company has long been

an advocate of quoting and selling in just such manner, but years ago we found our competitors were profiting by guaranteeing delivery and paying all losses and claims for damage in transit and taking the chance that they could collect from the railroad company. Under the encouragement of the Federal Trade Commission practically all the cement companies of the United States have adopted a uniform trade practice in this and many other matters.

I am very sorry that you got the impression that there was any mystery about the price that we expect to net at the mill, because there is no such mystery. Notwithstanding this brief attempt to clear the atmosphere, I still feel that you can ask and I answer a good many questions in a personal conversation that cannot be covered by pages of correspondence. If you agree with me, I hope you can help me find a mutually convenient time for us to meet.

Very truly yours, R. W. Hilles, Manager of Sales. L.

[fol. 1392] Dexter Portland Cement Company

Nazareth, Pa.

3-21-19.

Mr. W. G. Thompson, Highway Engr., Broad St. Bank Bldg., Trenton N. J.

My Dear Mr. Thompson: Our Manager of Sales, Mr. R. W. Hilles will be in Trenton N. J. on Monday March 24th, and will call on you at that time in order to give you any information you might desire on the policy of sales adopted by our company.

For any information you wish at this time do not hesitate to call on him for it, and if he is not familiar with it he will be very glad to see that you are put in touch with some one who has it.

Wishing you continued success, I remain

Very truly yours, Geo. W. Mulheron.

[fol. 1392½] Mr. Thompson: Mr. Hilles advises he will be unable to be in Trenton on Wednesday.

He will be in the Robert Treat Hotel, Newark, Saturday morning, and wishes you, if you are in that district, to stop and see him.

Mar. 24.

Mr. Thompson: Mr. Hilles called this afternoon and upon finding you were not in town he wished to know if he could change his appointment to tomorrow, the 25th, at 2:00 P. M.

He also wished to know if he could be advised at the Philadelphia office of the Dexter Portland Cement Co., Land Title Bldg., Phila. if you expect to be out of town and can not see him.

Edward.

Edw.: Tell Mr. Hilles I will be in on Wednesday.

T.

Giant Portland Cement Company

Philadelphia, Pennsylvania

March 17, 1919.

Mr. W. G. Thompson, State Highway Engineer, State of New Jersey, State Highway Commission, Trenton, N. J.

Dear Sir: Your favor of the 12th inst. duly received, and we would ask you to kindly advise us the quantity of cement you will require, point of delivery and period over which same will cover, and we will be very glad indeed to name you price on our good "Old Reliable" "Giant" Portland Cement, as soon as we receive this information.

Awaiting your reply, we remain,

Yours very truly, R. E. Griffith, Vice-President.

[fol. 1397½] March 18, 1919.

The Giant Portland Cement, Co., Philadelphia, Penna.

Gentlemen: Your letter of March 17 does not reply to our request of March 12 for the price of cement f. o. b. your mill.

We do not expect to be immediately in the market for cement in large quantities, but were directed by the State Highway Commission to secure from all cement manufacturers east of the Mississippi River the prices at which cement would be sold at the mill.

We have received satisfactory replies from six cement manufacturers in this district and would very much appreciate advice from you as to the price at which you will sell cement at your mill. Since the question of freight rates does not enter into the matter, we are instructed to secure information upon the mill price, which is all we require.

Very truly yours, —— ——, State Highway Engineer.

WGT/O'B.

Govt. Ex. No. 330

EDISON PORTLAND CEMENT CO.

NEW YORK March nineteenth
1 9 1 9

Mr. W. C. Thompson, State Highway Engineer,
State of New Jersey State Highway Commission,
Trenton, NEW JERSEY.

Dear Sir:

Your circular letter of March 12th addressed this company in reference to prices on Portland Cement and our thought with regard to the future market.

Our present quotation on EDISON Portland Cement to the consuming public, f. o. b. our Mills New Village, New Jersey, in carload lots, is -

$3.00 per barrel in cloth including sacks which are returnable under usual conditions at 25¢ each;

2.30 per barrel in paper bags;

1.95 per barrel in bulk.

We do not anticipate for a considerable length of time any general reductions in price on account of high costs.

In comparing present prices with those of the pre-war period, one must not lose sight of the very considerable increase in labor and transportation. The two items represent the major portion of our costs.

As a further expression of our personal thought on the subject, we permit me to say that since January 1st our mills have been operating their full capacity twenty-four hours per day, seven days per week. If we seriously believed lower costs might offer within the next twelve months, we would not now be accumulating stocks.

We are attaching copy of address by Professor Irving Fisher of Yale University, which you may not have seen, and which, in my opinion, provides the most thorough exposition on present high costs and present high levels.

It is to be understood that the above prices are not a firm quotation, which we should be pleased submit to you upon receipt of detailed information regarding quantity, deliveries, etc.

Yours very truly,

Vice-President and
General Sales Manager.

H. M. Scott

HMS:C

Cement f.o.b. mill.

March 21, 1919.

Edison Portland Cement Co.,
8 West 40th Street,
New York City.

Gentlemen:

I thank you for your reply of March 17 to our request of March 12 for present price of cement f. o. b. your mill.

It is noted that judging from present indications there will be no reduction in the price of cement for some months.

I thank you also for the copy of address by Professor Irving Fisher, of Yale University, on the new price revolution, which goes pretty thoroughly into the matter.

Very truly yours,

State Highway Engineer.

WGT/O'B.

EDISON PORTLAND CEMENT CO.

NEW YORK April 4th, 1919.

Mr. [illegible] Thompson, State Highway Engineer,
State of New Jersey Highway Commission,
Trenton, NEW JERSEY.

Dear Sir:

Referring to circular letter of March 12th and our reply of the 19th in reference to price on Portland Cement, you will be interested to know of a more or less general reduction in this territory April 1st of 15¢ per barrel, and a reduction in the exchange value of cloth sacks from 25¢ to 15¢ each.

As a matter of fact no reductions in our costs of manufacture have occurred, nor do we expect them to do so within the next nine or twelve months which would warrant such a reduction.

However, in line with the idea and purpose of the Industrial Board of the Department of Commerce, we want to do our part toward stimulating building construction, not alone from a selfish standpoint, but we believe it is the part of good citizenship for each of us in our own capacity to do everything possible to provide employment for our returning soldiers and for the local labor that may be unemployed.

There are real problems facing the world today and it is not sufficient to idly believe that they will adjust themselves.

The many new "isms" of which we seem fear best on unemployment.

With costs continuing at high levels, it is not unreasonable to anticipate possible price advances in view of the tremendous building need.

We trust you will pardon this rather lengthy letter, but inasmuch as the drop in question rougaly works out a reduction of about 5¢ per square yard, we thought you would be interested.

Yours very truly,

W. On. Scott.

Vice-President and
General Sales Manager.

[illegible]

[fol. 1398] Giant Portland Cement Company

Philadelphia, Pennsylvania

March 22, 1919.

Mr. W. G. Thompson, State Highway Engineer, Trenton, New Jersey.

DEAR SIR: Your favor of the 18th instant duly received, and we have always found that to name other than a delivered price means endless confusion to our friends, as they are then obliged to secure freight rates to different points to show the actual cost to them. Another reason that we refuse to quote other than a delivered price is that the policy of this Company has been not to quote a dealer for delivery outside of his own town, and therefore if we named a mill price to our dealer we felt that he could order the cement diverted while in transit if it was billed to him at a mill price, while by billing it direct to a given point it could not be done under our quotation.

Therefore, as much as we regret it it would be impossible for us to name you other than delivered price but would be very glad indeed to hear from you if you will give us the quantity required, point of delivery, and for what work same is required.

Yours very truly, R. E. Griffith, Vice President. REG/F

[fol. 1398½] GOVT. EX. No. 332

Knickerbocker Portland Cement Company, Inc.,

New York City

March 21, 1919.

Mr. W. G. Thompson, State Highway Engineer, Trenton, N. J.

DEAR SIR: We have your circular letter of March 12th and presume the cement required would be used in the State of New Jersey. Such being the case, would state, we are unable to quote you prices which would be attractive as the freight rates from our mill, which is located at Hudson, N. Y., to points in New Jersey, are so high, that we cannot meet the competition there and secure sufficient revenue to show us a profit on our product.

Very truly yours, H. H. Ward, Sales Manager. HHW:EF.

[fol. 1399] GOVT. EX. NO. 333

The Lawrence Cement Company

No. 1 Broadway, New York

March 15, 1919.

Mr. W. G. Thompson, State Highway Engineer, Trenton, N. J.

DEAR SIR: We are in receipt of your letter of the 12th inst. relative to cement requirements for the State of New Jersey.

Our present price for "Dragon" cement to the State is $2.00 per barrel at the mill, plus 25¢ each for cotton sacks, plus freight to [fol. 1399½] destination. War tax is also added and if cement is to be tested 3¢ per barrel is charged for that service.

You ask our opinion as to whether or not there will be a reduction in the price of cement within the next few weeks. We are of the opinion that the present manufacturing cost would not justify a reduction, but it is difficult to say what the future will bring forth in that regard. As you know, there are many brands of cement manufactured in what is called the Lehigh Valley district which makes it a highly competitive business and it is probable that one manufacturer could not get more for his goods than another. You can therefore readily understand that it would be very difficult for one manufacturer to express anything except his own opinion. Our opinion is that the price will not be lower in the very near future.

Yours very truly, Frank H. Smith, Sales Manager. FHS:H.

[fol. 1400] GOVT. EX. NO. 334

Lehigh Portland Cement Co.

Allentown, Pa.

March 18, 1919.

State of New Jersey, State Highway Commission, Trenton, N. J.

GENTLEMEN: In reply to your letter of March 12th inquiring as to our current quotation on cement f. o. b. plant, would explain that our practice is to quote all prices f. o. b. point of destination at which the material is to be used. On general requirements, quotations are made for delivery within a period of 15 days from date of order, while for specific operations, requiring known quantities of cement, we quote for delivery over extended time as the work may require.

If your inquiry contemplates any particular operations we shall be very glad to name quotation if you will be kind enough to inform us as to the delivery points, nature of work, and quantities of cement required.

With reference to your request for a statement of our opinion as to the possibility of an early price reduction on Portland Cement, would

say that it is impossible to definitely forecast the future on this point. [fol. 1400½] The cost of cement manufacture is governed practically by costs of labor and fuel and the ruling market prices are based on manufacturing costs under present conditions. Future changes in the cement market will be governed to a considerable extent by fluctuations in these costs, and it is not possible at this time to state what these changes will be or when they will occur.

Assuring you of our efforts to be of any possible service to you, we are,

Yours truly, Lehigh Portland Cement Company, B. L. Swett, Eastern Sales Manager. JB.

[fol. 1401] GOVT. EX. NO. 335

Penn-Allen Cement Company,

District Sales Office,

Philadelphia, Pa.

March 17, 1919.

Mr. W. G. Thompson, State Highway Engineer, Trenton, N. J.

DEAR SIR: Your favor of the 12th inst. received and contents noted. We do not quote mill prices, but make all quotations f. o. b. destination. In general, however, our present prices are figured on $3.00 per barrel at the mill, which includes four cloth sacks at 25 cents each; the destination prices depend upon the freight rate and upon the competition we must meet in the territory where shipment is required.

As to prices, the margin between the cost of manufacturing and selling is very small, and we can see no reduction in the cost of manufacturing in the immediate future. While coal has come down somewhat, it amounts to very little, and even then, the fact is that we have [fol. 1401½] a large supply of coal on hand purchased last fall at the high price, which we must now use, and we know that a good many manufacturers are in the same position. All our supplies and repair parts have been purchased at the high prices also.

We will reduce the price of our cement just as soon as we possibly can, but we can see nothing in the immediate future to warrant any reduction.

Very truly yours, Penn-Allen Cement Company, T. O. Bretherton, Secretary & General Sales Manager. TOB/T.

Philadelphia

March 17, 1919.

Mr. W. G. Thompson, City Highway Engineer, Trenton, N. J.

Dear Sir: We acknowledge receipt of your letter of the 12th inst. It is not our custom to quote prices on Phœnix Portland Cement f. o. b. mill, but rather to quote price delivered at destination. For your information, however, you are advised that our present mill basis is $3.00 per barrel including the bags. Our quotations are made invariably, however, f. o. b. destination, and our present price at Trenton is $3.37 per barrel.

I do not feel that I care to express an opinion as to any probable change in the price of cement. You are really able to form just as good an opinion of this as I would be able to give you. We both [fols. 1402½ & 1403] know, however, that the price of labor is not coming down at all, and it looks as though we have entered upon a new price level for all commodities, which will last for some years to come.

Yours very truly, Charles H. Cox, General Sales Manager.

[fol. 1404] Govt. Ex. No. 337

Vulcanite Portland Cement Co.

New York, March 18th, 1919.

State of New Jersey, State Highway Commission, Mr. W. G. Thompson, State Highway Engr., Trenton, New Jersey.

Dear Sir: Replying to your favor of March 12th, addressed to our Philadelphia Office, advising of a resolution put through the State Highway Commission at its last meeting on March 6th, directing you to secure from each of the Cement Manufacturers in business east of the Mississippi River a price per barrel at which tt will sell f. o. b. the plant.

I beg to advise that it is against the policy of this Company to name prices f. o. b. our Plant. This we have consistently declined to do for the United States Government, Railroads under Government control, Contractors doing Government Work or Railroad Work, or anyone else.

[fol. 1404½] Our prices for delivery to points within the State of New Jersey are based on competition existing at Northampton, Pa., where our largest competitor is located. To this base price is added the freight rate and war tax.

We will be pleased at all times to quote you delivered prices at such points where you may have work. If you will mention those points I will be very much pleased to furnish you a quotation.

Very truly yours, Vulcanite Portland Cement Company, Albert Moyer, Manager of Sales. AM.

Govt. Ex. No. 339

Edison Portland Cement Co.

March 16th, 1921.

State Highway Commission,
Broad Street Bank Bldg.,
Trenton, N.J.

Attention: Mr. R. W. Wildblood.

Gentlemen:-

In response to your inquiry of March 15th, we are pleased to submit the following quotation on 2625 barrels of EDISON PORTLAND CEMENT -

$3.48 per barrel in cloth bags,

delivered in carload lots, f.o.b. cars Rahway Reformatory, Pennsylvania Railroad Siding, Rahway, N.J.

This price includes the value of the bags for which we will refund 25¢ each when returned to our mill at New Village, N.J. in good condition, freight charges prepaid.

If at any time during the life of this quotation the price of EDISON CEMENT for the specified destination is less than named herein, cement shipped during such period of lower prices will be invoiced at the market price of EDISON in effect at time of shipment.

Terms of payment; 10¢ per barrel discount for cash paid within ten days from date of invoice, 30 days net.

This quotation is subject to the conditions outlined on the reverse hereof and will be held open for your acceptance within 15 days from today's date; shipments to be made as desired during the current calendar year.

Thanking you for the opportunity of submitting this proposal, and hoping to be favored with the business, remain

Very truly yours,

FAS.JN

District Supervisor.

ALPHA PORTLAND CEMENT COMPANY

GENERAL OFFICES EASTON, PA. March 21, 1921

State Highway Commission
Trenton, N. J.

Attention Mr. B. W. Wildblood

Gentlemen:

In accordance with your request of March 15th, your inquiry #322, we submit herewith quotation on Alpha Portland Cement.

Hoping to hear from you further, we remain

Yours truly

E. P. Williams

District Sales Manager

EPW LMS

ALPHA PORTLAND CEMENT COMPANY

GENERAL OFFICES EASTON, PA March 21, 1921

State Highway Commission
Trenton, N. J.

Gentlemen:

In response to your inquiry of the 15th, your #322,
We quote you subject to all the terms, conditions and limitations on both sides hereof on ALPHA PORTLAND CEMENT for work herein described, and for shipment according to contract requirements.

In carload lots, f. o. b. cars Rahway Reformatory P. R. R. Siding

In cloth sacks $ 3.51 per standard barrel (376 lbs. net).

If shipped in paper sacks [redacted] cents per barrel less than cloth price.

If shipped in bulk one dollar two ($1.02) cents per barrel less than cloth price.

The price of cement stated herein is based on the transportation charges in effect at the present time and is subject to advance or reduction as the transportation charges may be advanced or reduced.

Contract made under this quotation will include the following provision: "Any decline in Cement Company's market price during the life of this agreement shall apply to shipments under this agreement made after date of reduction and during such period as the lower market price may be in effect."

This quotation is intended to cover the actual quantity (estimated at 2605 barrels) of ALPHA PORTLAND CEMENT for use in the following described work.

DESCRIPTION OF WORK: New Jersey State Highway Job at Rahway, N. J.

Terms of Payment: On approved credit, 10 cents per barrel off for cash in ten days from date of invoice, or 30 days net from date of invoice, if, during the performance of the work the financial responsibility of the purchaser becomes impaired or unsatisfactory to the ALPHA PORTLAND CEMENT COMPANY, cash payments with above discount must be made before shipment, or satisfactory security must be given by the purchaser.

This quotation shall not be binding upon this Company unless accepted in writing by the purchaser on or before

March 26th

Awaiting the favor of your acceptance, we remain,

Yours very truly,

ALPHA PORTLAND CEMENT COMPANY

By E. P. Williams

ACCEPTANCE. I (we) hereby accept the price, terms and all conditions and limitations of the above special quotation and agree to execute promptly a contract therefor on your regular Memorandum of Agreement form, covering Portland Cement required and used for the work described.

Specific Job Quotation

Job #331

Main Office, Land Title Bldg., Philadelphia

Albert Moyer, Manager of Sales

New York, March 17th, 1921.

Messrs. —— ——, State of New Jersey, State Highway Commission, Trenton, N. J.:

We quote you on the full Portland Cement requirements of the following described work but not exceeding the estimated requirements of 2,625 barrels of Vulcanite Portland Cement. The cement shall only be ordered and shipped, as nearly as practicable, to meet the necessities of the work, it being understood, however, that under no circumstances shall the Cement Company be obligated to ship hereon more than 2,625 barrels during any 30 consecutive days nor subsequent to December 31st, 1921.

Price:

Vulcanitee Portland Cement in 4 cloth sacks, at $3.63 per standard bbl. including the sacks.

Vulcanite Portland Cement in 4 paper bags, at $2.88 per standard bbl. including the bags.

Vulcanite Portland Cement in bulk, at $2.63 for 376 lbs., equivalent to one (1) barrel net weight.

[fols. 1411 & 1412] F. O. B. cars, Rahway Reformatory siding, Rahway, N. J., in carload lots.

Description of work: (Work to be described).

Terms of payment:

Thirty days net or ten cts. per barrel discount for payment in full within ten days from date of invoice.

This quotation is void unless accepted within 15 days from date.

The acceptance of this quotation, verbally, or in writing, will not form a contract or obligate the Cement Company. Should the Purchaser wish to place orders under this quotation for the work herein specified, the acceptance of such orders by the Cement Company shall be at its option and subject to execution of formal contract covering the quantity and date of shipments required for the work specified, subject to all limitations as set forth in the contract.

Respectfully, Vulcanite Portland Cement Company, Albert Moyer, Manager of Sales.

DEAR SIRS: Your request for quotation #322.

We are pleased to submit the following proposition on 2,625 barrels of Pennsylvania Portland Cement.

Price $3.53 per barrel in cloth bags, f. o. b. cars Rahway Reformatory P. R. R. Siding, Rahway, N. J.

[fol. 1413] This price includes the value of the cloth bags which are redeemable at twenty-five cents each when returned to our mill in good condition, freight prepaid.

We also allow a discount of ten cents per barrel for cash in ten days from date of invoice.

This quotation contemplates shipment as required prior to December 1st, 1921, and will be held open for your acceptance up to and including ten days from the above date.

We are in a particularly good position to take care of the requirements of this job and hope that you will give our price your most favorable consideration.

Yours very truly, Pennsylvania Cement Company, A. J. Stanford, Assistant Sales Manager. AJS:AS.

SPECIFIC JOB QUOTATION No. 12031-8

We quote you on "ATLAS" Portland Cement for shipment prior to **December 31, 1921.**

$3.83 per barrel in 4 cloth bags
$2.88 per barrel in 4 paper bags
$2.63 per barrel in bulk
all in car load lots, f. o. b. cars **Rahway, N.J., Reformatory, P.R.R. Siding**

Any shipments made during 1921 on a contract placed under this quotation, will be at the current destination price on "ATLAS" Portland Cement on the date of shipment, if such price is below the destination price herein mentioned.

The above price includes a charge of **25c** each for cloth sacks. If at any time the cost of new cloth sacks to us shall be in excess of **25c** each, the above price for deliveries thereafter shall, at our option, be increased from time to time, by a sum determined by us not exceeding such excess. Cloth sacks will be repurchased at the same price at which they are charged out. If at any time we shall experience such difficulty in securing cloth sacks as, in our opinion, makes shipment in cloth sacks impracticable, then upon 5 days notice to you, we may (until such difficulty is removed) ship in paper sacks at a price of **$ 2.88** per barrel f. o. b. cars destination, or at your option in bulk at a price of **$2.63** per barrel f. o. b. cars destination. Paper sacks will not be repurchased by us.

Prices herein quoted are subject to any increase in transportation charges from those now in effect.

Terms of payment: On approved credit 30 days net or 10 cents per barrel discount for PAYMENT IN FULL within 10 days from date of invoice, provided there are no overdue accounts unpaid.

The terms, conditions, and limitations printed on the reverse of this quotation are made a part hereof as fully as if written here.

This quotation is intended to cover the full Portland Cement requirements of the work herein described, but not exceeding the estimated requirements of **2,625** barrels of "ATLAS" Portland Cement.

DESCRIPTION OF WORK: **State Highway work at Rahway, N. J.**

This quotation is for acceptance prior to **April 3, 1921.**
We hope to be favored with your order

Yours very truly,

THE ATLAS PORTLAND CEMENT COMPANY.

By E Jones

ACCEPTANCE: Please enter my (our) order in accordance with this quotation, as I (we) have the contract for the work described. I (we) hereby accept the price and all the conditions of the above specific job quotation and agree, at your option, to execute promptly a contract therefor on your regular Specific Work Sales form, covering Portland Cement required to be used for the work described. Any contract hereafter so executed either with you (the Atlas Company) or by your consent with a retail building material dealer, shall be substituted for this acceptance and shall constitute the only contract covering this work.

_____
Purchaser.

Govt. Ex. No. 346 & 1422

Cement Contract in Triplicate

THE SAXTON SUPPLY STORE of SAXTON, BEDFORD COUNTY, PA. hereinafter called the SELLER, sells and J. E. THROPP of EARLSTON, EVERETT, P.O. hereinafter called the PURCHASER, purchases Lehigh Portland Cement on the following terms and conditions:

The Purchaser does hereby represent to the seller that 1,000 barrels of cement are to be used in the construction of buildings and repairs to present structures around furnaces of J. E. Thropp

for which construction the Purchaser has contract and that he hereby purchases 1,000 barrels of Lehigh Portland Cement from the Seller for use in such work, and that no portion thereof will be used for any other purposes.

PRICE: $ 1.88 per standard barrel, including four cloth sacks

This price is based upon the present freight rate, and is subject to any advance or reduction as the freight rate may be advanced or reduced.

PLACE OF DELIVERY:

f.o.b. EARLSTON, KEARNEY, MELROSE, & SAXTON

TIME OF DELIVERY:

As desired by purchaser in car load lots previous to January 1st, 1917

The Purchaser shall give the Seller shipping instructions in writing a reasonable time before shipments are to be made; the Seller shall not be obliged, except at his option, to make deliveries after January 1st, 1917. The Seller shall have the right to direct the route by which all shipments hereunder shall be forwarded.

The Seller shall not be responsible for delays in the manufacture or shipping of cement, due to differences with employees, scarcity of labor, accident, inability to secure cars, coal or material, fire, flood, warfare, or other causes not under the manufacturer's control, nor for any delay in transportation.

TERMS OF PAYMENT:

5¢ per barrel for cash in 10 days from date of invoice- 30 days net.

REPURCHASE OF SACKS:

Purchaser to return sacks

CANCELLATION:

If the Purchaser shall fail to comply with any of the terms, conditions or limitations of this contract, or if any of the Purchaser's representations herein are untrue, the Seller may cancel this contract or any portion thereof, or any other order given to the Seller by the Purchaser, and such cancellation shall in no wise relieve the Purchaser from unpaid accounts, or from liability to said Seller at the contract price for cement delivered prior to such cancellation.

SPECIFICATIONS:

The cement delivered under this contract is to conform to standard specifications for Portland Cement adopted August 16th, 1909, by the American Society for Testing Materials, with methods of testing recommended January 17th, 1911, as amended by the American Society of Civil Engineers; or to United States Government specifications for Portland Cement, as set forth in Circular of the Bureau of Standards, No. 33.

LEHIGH PORTLAND CEMENT CO. 1423

Govt. Ex. No. 347

THE LEHIGH PORTLAND CEMENT COMPANY, a corporation of Pennsylvania (hereinafter called the "Cement Company") sells, and Saxton Supply Store, Saxton, Pa.

(hereinafter called the "Purchaser") purchases, Lehigh Portland Cement on the following terms and conditions:

The Purchaser does hereby represent to Cement Company that One Thousand (1,000) barrels of cement are to be used in the construction of Remodeling Plants of J. E. Thropp of Earleton, Pa. Plants at Kearney, Melrose, Earleton and Saxton, Pa. Work to be done by Owner.

and that he hereby purchases One Thousand(1,000) barrels of Lehigh Portland Cement from the Cement Company, for use in such work; and that no portion thereof will be used for any other purposes, whatsoever.

PLACE OF DELIVERY: Kearney, Pa. Melrose, Pa. Earleton, Pa. Saxton, Pa.

TIME OF DELIVERY: Prior to December 31, 1916.

The Purchaser shall give the Cement Company shipping instructions, in writing, a reasonable time before shipments are to be made; the Cement Company shall not be obliged, except at its option, to make deliveries after Dec. 31, 1916. The Cement Company shall have the right to direct the route by which all shipments hereunder shall be forwarded.

The Cement Company shall not be responsible for delays in manufacture or shipping, due to strikes, differences with employes, scarcity of labor, accident, inability to secure cars, coal or material, fire, flood, warfare, or other causes not under its control, nor for any delay in transportation.

PRICE: Per standard barrel, including package, $1.83 cloth $1.53 paper.

This price, which is special, has been given the Purchaser, by the Cement Company, because of the Purchaser's representations as to the use of the cement.

PAYMENT: Net cash in thirty (30) days, or five cents (5c) per barrel discount for cash in ten (10) days from date of invoice. Payable in New York or Chicago Exchange.

Sacks must be paid for at the same time as cement.

If, at any time, the financial responsibility of Purchaser becomes impaired or unsatisfactory to the Cement Company, it reserves the right to require payments in advance, or satisfactory security or guarantee that invoices will be promptly paid when due.

If Purchaser fails to comply with terms of payment, the Cement Company reserves the right to cancel unfilled portion of any contract or order, Purchaser remaining liable for all unpaid accounts.

PACKAGE: Cement to be packed in

If cement is shipped in cloth sacks, the Cement Company will repurchase from the original Purchaser, at ten cents (10c) each, the empty cloth sacks bearing the Lehigh brand, which are received by it in good condition, freight prepaid, at its works at West Coplay, Penna., or New Castle, Penna., within ninety (90) days from date of shipment of cement.

Claims for loss or damage will not be considered unless supported by seal record and Railroad agent's acknowledgment on freight bill. Freight over charge claims must be accompanied by original receipted freight bill.

CANCELLATION: It is understood and agreed by the parties hereto, that if any of the representations made by said Purchaser to Cement Company in and about securing the execution of this contract by Cement Company, are untrue, or, if any of the cement delivered hereunder is used for any purpose other than as represented, then, and in such case, upon learning thereof, the Cement Company may cancel this contract, or the undelivered portion thereof, or any other order given to the Cement Company by said Purchaser, and such cancellation shall in no wise release said Purchaser from unpaid accounts, or from liability to said Cement Company at the contract price for cement delivered prior to such cancellation.

SPECIFICATIONS: The cement delivered under this contract is to conform to standard specifications for Portland Cement adopted August 15, 1909, by the American Society for Testing Materials with methods of testing recommended January 17, 1912, as amended by the American Society of Civil Engineers, or to U. S. Government specifications for Portland Cement, as set forth in Circular of the Bureau of Standards No. 33.

ASSIGNMENT OF CONTRACT: This contract shall not be assigned by the Purchaser, except upon written assent thereto by the Cement Company.

J. K. Barbour, General Sales Manager.

(Here follows Government's Exhibits Nos. 346 and 347, marked side folio pages 1421-1423½, inc.)

[fol. 1424] Govt. Ex. No. 348

Doc. 14493

Portland Cement Requirements

May 18, 1916.

To the Boston Transit Commission:

The undersigned hereby bids the sum of One Dollar and eighty seven cents, ($1.87) per barrel for furnishing and delivering f. o. b. cars Boston, 30,000 to 40,000 barrels of Allentown Portland cement which shall contain not over 6½ per cent of alumina by analysis.

(Kind of Cement)

The cement is to be in cotton (4 bags to the barrel).

The latest date under which an order can be given under the contract is May 30th, 1917.

The Commission is to have the privilege of determining any time before the last order is given the exact number of barrels, be-

tween the minimum and maximum quantity, to be furnished.

The Contractor for construction, or some person authorized by him, or an employee of the Commission in case the cement should be called for by the Commission directly, is to give receipts for the cement as fast as it is obtained and these receipts are to be submitted by the one with whom the order for the cement is placed as the vouchers for his bills against the Commission.

Delivery is to be made f. o. b. cars Boston, at any of the rail-
[fol. 1424½] roads entering Boston, as may be designated by the Engineer.

The cement furnished is to be tested in the laboratory of the Boston Transit Commission and is to conform to the standard specifications of the American Society for Testing Materials, except that the test for constancy of volume shall also include the boiling test.

The minimum requirements for tensil strength for briquettes one inch square in cross-section shall be as follows, and the cement shall show no retrogression in strength within the period specified.

Age	Neat cement	Strength
24 hours in moist air		175 pounds
7 days (1 day in moist air, 6 days in water)		500 "
28 days (1 day in moist air, 27 days in water)		600 "
	One part cement, three parts Standard Ottawa sand.	
7 days (1 day in moist air, 6 days in water)		180 pounds
28 days (1 day in moist air, 27 days in water)		275 "

The cement must be of a brand which has been tested in the laboratory of the Commission and found to be one of the most suitable to withstand the action of salt water. This will be taken into consideration in awarding the contract.

A chemical analysis of each carload is to be furnished by the manufacturer.

The rate of delivery is to meet the requirements of the Commission but is not to exceed 2,500 barrels per week. Order is to be given the dealer — days in advance of required shipment.

The price given includes cement bags, and — cents each will be
[fol. 1425] credited for them when received at the warehouse of the undersigned in good condition or 10¢ (ten) cents when received at the mill in good condition.

A rebate of 5¢ (five) cents per barrel is to be allowed on bills covering shipments already made paid within ten days from date of receipt of such bills at the office of the Boston Transit Commission 15 Beacon street, Boston.

The undersigned agrees that any cement already paid for which does not, at the test by the Commission, conform to the specifications of the contract, shall be taken back by him and an equal amount of new cement conforming to the specifications furnished without expense to the Commission.

This offer is open for acceptance until Friday, June 2nd, 1916.

Cement quoted on this proposal to be furnished through J. P. O'Connell & Co., of Dorchester, Mass.

Allentown Portland Cement Co., by Delano F. W. Douglass, Mass. Manager, 120 Tremont St., Boston, Mass.

[fol. 1425½] GOVT. EX. No. 349

Doc. 14500

Portland Cement Requirements

May 18, 1916.

To the Boston Transit Commission:

The undersigned hereby bids the sum of One Dollar and Eighty Seven Cents ($1.87) per barrel for furnishing and delivering f. o. b. cars Boston, 30,000 to 40,000 barrels of (kind of cement) Lehigh Portland Cement which shall contain not over 6½ per cent of alumina by analysis. The cement is to be in cotton (4 bags to the barrel).

The latest date under which an order can be given under the contract is July first, 1917.

The Commission is to have the privilege of determining any time before the last order is given the exact number of barrels, between the minimum and maximum quantity, to be furnished.

The Contractor for construction, or some person authorized by him, or an employee of the Commission in case the cement should be called for by the Commission directly, is to give receipts for the cement as fast as it is obtained and these receipts are to be submitted by the one with whom the order for the cement is placed as the vouchers for his bills against the Commission.

[fol. 1426] Delivery is to be made f. o. b. cars Boston, at any of the railroads entering Boston, as may be designated by the Engineer.

The cement furnished is to be tested in the laboratory of the Boston Transit Commission and is to conform to the standard specifications of the American Society for Testing Materials, except that the test for constancy of volume shall also include the boiling test.

The minimum requirements for tensile strength for briquettes one in. square in cross-section shall be as follows, and the cement shall show no retrogression in strength within the periods specified.

Age	Neat cement	Strength
24 hours in moist air		175 pounds.
7 days (1 day in moist air, 6 days in water)		500 "
28 days (1 d " " " 27 " " ")		600 "
One part cement, three parts Standard Ottawa sand.		
7 days (1 day in moist air, 6 days in water)		180 pounds.
28 days (1 d " " " 27 " " ")		275 "

The cement must be of a brand which has been tested in the laboratory of the Commission and found to be one of the most suitable to withstand the action of salt water. This will be taken into consideration in awarding the contract.

A chemical analysis of each carload is to be furnished by the manufacturer.

The rate of delivery is to meet the requirements of the Commission but is not to exceed — barrels per week. Order is to be given the dealer — days in advance of required shipments.

[fol. 1426½] The price given includes cement bags, and — cents each will be credited for them when received at the warehouse of the undersigned in good condition or ten (10) cents when received at the mill in good condition. Freight Prepaid.

[A rebate of — cents per barrel is to be allowed on bills covering shipments already made paid within ten days from date of receipt of such bills at the office of the Boston Transit Commission, 15 Beacon street, Boston.]* Please see terms of payment below.†

The undersigned agrees that any cement already paid for, which does not, at the test by the Commission, conform to the specifications of the contract, shall be taken back by him and an equal amount of new cement conforming to the specifications furnished without expense to the Commission.

This offer is open for acceptance until June second, (2nd), 1916.

Lehigh Portland Cement Company, by C. E. Tileston.

[fol. 1427] Govt. Ex. No. 350

Doc. 14494

Portland Cement Requirements

May 17, 1916.

To the Boston Transit Commission:

The undersigned hereby bids the sum of One Dollar and eighty seven cents ($1.87) per barrel for furnishing and delivering f. o. b. cars Boston, 30,000 to 40,000 barrels of (kind of cement) Alpha Portland cement which shall contain not over 6½ per cent. of alumina by analysis. The cement is to be in cotton (4 bags to the barrel).

The latest date under which an order can be given under the contract is June 1st, 1917.

The Commission is to have the privilege of determining any time before the last order is given the exact number of barrels, between the minimum and maximum quantity, to be furnished.

[*Matter enclosed in brackets erased in copy.]

† Terms: Five (5) Cents per barrel discount for payment in full within ten days from date of invoice; thirty (30) days net.

The Contractor for construction or some person authorized by him, or an employee of the Commission directly, is to give receipts for the cement as fast as it is obtained and these receipts are to be submitted by the one with whom the order for the cement is placed as the vouchers for his bills against the Commission.

Delivery is to be made f. o. b. cars Boston, at any of the railroads entering Boston, as may be designated by the Engineer.

[fol. 1427½] The cement furnished is to be tested in the laboratory of the Boston Transit Commission and is to conform to the standard specifications of the American Society for Testing Materials, except that the test for constancy of volume shall also include the boiling test.

The minimum requirements for tensile strength for briquettes one in. square in cross-section shall be as follows, and the cement shall show no retrogression in strength within the periods specified.

Age	Neat cement	Strength
24 hours in moist air		175 pounds.
7 days (1 day in moist air, 6 days in water)		500 "
28 days (1 day in moist air, 27 days in water)		600 "
One part cement, three parts Standard Ottawa sand.		
7 days (1 day in moist air, 6 days in water)		180 pounds.
28 days (1 day in moist air, 27 days in water)		275 "

The cement must be of a brand which has been tested in the laboratory of the Commission and found to be one of the most suitable to withstand the action of salt water. This will be taken into consideration in awarding the contract.

A chemical analysis of each carload is to be furnished by the manufacturer.

The rate of delivery is to meet the requirements of the Commission but is not to exceed 5,000 barrels per week. Order is to be given to the dealer 3 days in advance of required shipment.

The price given includes cement bags, and — cents each will be credited for them when received at the warehouse of the undersigned [fol. 1428] in good condition or 10 cents when received at the mill in good condition, Alsens, N. Y., freight prepaid.

A rebate of 5 cents per barrel is to be allowed on bills covering shipments already made paid within ten days from date of bills, which is the date of shipment.

The undersigned agrees that any cement already paid for, which does not, at the test by the Commission, conform to the specifications of the contract, shall be taken back by him and an equal amount of new cement conforming to the specifications furnished without expense to the Commission.

This offer is open for acceptance until June 1, 1916.

Alpha Portland Cement Co. Thos. E. Santee, Mgr.

Alpha Portland Cement Company

General Offices: Easton, Pa.

Doc. 14494. File #419

Boston, Mass., May 17, 1916.

Boston Transit Commission, Boston, Mass.

GENTLEMEN: We quote you subject to all the terms, conditions and limitations on both sides hereof on Alpha Portland Cement for work [fol. 1428½] herein described; and for shipment according to contract requirements.

In carload lots, f. o. b. cars Boston, Mass.

In cloth sacks $1.87 per standard barrel (376 lbs. net) including four (4) sacks.

If shipped in paper sacks thirty (30) cents per barrel less than cloth price.

This quotation is intended to cover the actual quantity (estimated at 30,000 to 40,000 barrels) of Alpha Portland Cement for use in the following described work:

Description of work:

Requirements to June 1st, 1917.

Terms of Payment: On approved credit, 5 Cents per barrel off for cash in ten days from date of invoice, or 30 days net from date of invoice. If, during the performance of the work, the financial responsibility of the purchaser becomes impaired or unsatisfactory to the Alpha Portland Cement Company, cash payments with above discount must be made before shipment, or satisfactory security must be given by the purchaser.

This quotation shall not be binding upon this Company unless accepted by the purchaser on or before 6/16/16.

Awaiting the favor of your acceptance, we remain,

Yours very truly, Alpha Portland Cement Company, by Thos. E. Santee, New England Manager.

[fol. 1429] Acceptance.—I (we) hereby accept the price, terms and all conditions and limitations of the above special quotation and agree to execute promptly a contract therefor on your regular Memorandum of Agreement form, covering Portland Cement required and used for the work described.

—— ——, Purchaser.

Dated —— —, ——.

[fol. 1430] GOVT. EX. No. 351

Doc. 14498

Portland Cement Requirements

May 18th, 1916.

To the Boston Transit Commission:

The undersigned hereby bids the sum of One Dollar and eighty seven cents ($1.87) per barrel for furnishing and delivering f. o. b. cars Boston, 30,000 to 40,000 barrels of (kind of cement) Saylor's Portland cement which shall contain not over 6½ per cent. of alumina by analysis. The cement is to be in cotton (4 bags to the barrel).

The latest date under which an order can be given under the contract is December 31st, 1916.

The Commission is to have the privilege of determining any time before the last order is given the exact number of barrels, between the minimum and maximum quantity, to be furnished.

The Contractor for construction, or some person authorized by him, or an employee of the Commission directly, is to give receipts for the cement as fast as it is obtained and these receipts are to be submitted by the one with whom the order for the cement is placed as the vouchers for his bills against the Commission.

Delivery is to be made f. o. b. cars Boston, at any of the railroads [fol. 1430½] entering Boston, as may be designated by the Engineer.

The cement furnished is to be tested in the laboratory of the Boston Transit Commission and is to conform to the standard specifications of the American Society for Testing Materials, except that the test for constancy of volume shall also include the boiling test.

The minimum requirements for tensile strength for briquettes one in. square in cross-section shall be as follows, and the cement shall show no retrogression in strength within the periods specified.

Age	Neat cement	Strength
24 hours in moist air		175 pounds.
7 days (1 day in moist air, 6 days in water)		500 "
28 days (1 day in moist air, 27 days in water)		600 "
One part cement, three parts Standard Ottawa sand.		
7 days (1 day in moist air, 6 days in water)		180 pounds.
28 days (1 day in moist air, 27 days in water)		275 "

The cement must be of a brand which has been tested in the laboratory of the Commission and found to be one of the most suitable to withstand the action of salt water. This will be taken into consideration in awarding the contract.

A chemical analysis of each carload is to be furnished by the manufacturer.

The rate of delivery is to meet the requirements of the Commismission but is not to exceed 2,000 barrels per week. Order is to be given the dealer two days in advance of required shipment.

[fol. 1431] The price given includes cement bags, and — cents each will be credited for them when received at the warehouse of the undersigned in good condition or 10 cents when received at the mill in good condition.

Discount.

A rebate of — cents per barrel is to be allowed on bills covering shipments already made paid within ten days from date of receipt of such bills at the office of the Boston Transit Commission, 15 Beacon street, Boston.

The undersigned agrees that any cement already paid for, which does not, at the test by the Commission, conform to the specifications of the contract, shall be taken back by him and an equal amount of new cement conforming to the specifications furnished without expense to the Commission.

This offer is open for acceptance until June 18th, 1916.

The Coplay Cement Mfg. Co., stands ready to furnish Saylor's Portland Cement for requirements of the Boston Transit Commission with a guarantee that this cement will only show 5½% (or less) of oxide alumina. This is probably lower than any other cement manufacturers in this country can show.

A discount of 5¢ per bbl. will be allowed for cash in 10 days from date of Invoice.

Coplay Cement Mfg. Co., 453 Washington St., Boston, Mass.

[fol. 1431½] Govt. Ex. No. 352

Doc. 14495

Portland Cement Requirements

Boston, Mass., May 18, 1916.

To the Boston Transit Commission:

The undersigned hereby bids the sum of One Dollar and eighty seven cents ($1.87) per barrel for furnishing and delivering f. o. b. cars Boston, 30,000 to 40,000 barrels of (kind of cement) Atlas cement which shall contain not over 6½ per cent. of alumina by analysis. The cement is to be in cotton (4 bags to the barrel).

The latest date under which an order can be given under the contract is June 1st, 1917.

The Commission is to have the privilege of determining any time before the last order is given the exact number of barrels, between the minimum and maximum quantity, to be furnished.

The Contractor for construction, or some person authorized by him, or an employee of the Commission directly, is to give receipts for the cement as fast as it is obtained and these receipts are to be submitted by the one with whom the order for the cement is placed as the vouchers for his bills against the Commission.

Delivery is to be made f. o. b. cars Boston, at any of the railroads entering Boston, as may be designated by the Engineer.

[fol. 1432] The cement furnished is to be tested in the laboratory of the Boston Transit Commission and is to conform to the standard specifications of the American Society for Testing Materials, except that the test for constancy of volume shall also include the boiling test.

The minimum requirements for tensile strength for briquettes one in. square in cross-section shall be as follows, and the cement shall show no retrogression in strength within the periods specified.

Age	Neat cement	Strength
24 hours in moist air		175 pounds.
7 days (1 day in moist air, 6 days in water)		500 "
28 days (1 day in moist air, 27 days in water)		600 "
One part cement, three parts Standard Ottawa sand.		
7 days (1 day in moist air, 6 days in water)		180 pounds.
28 days (1 day in moist air, 27 days in water)		275 "

The cement must be of a brand which has been tested in the laboratory of the Commission and found to be one of the most suitable to withstand the action of salt water. This will be taken into consideration in awarding the contract.

A chemical analysis of each carload is to be furnished by the manufacturer.

The rate of delivery is to meet the requirements of the Commismission but is not to exceed 3,500 barrels per week. Order is to be given the dealer 2 days in advance of required shipment.

The price given includes cement bags, and [10]* cents each will be credited for them when received at the warehouse of the undersigned [fol. 1432½] in good condition or 10 cents when received at the mill in good condition.

A rebate of five cents per barrel is to be allowed on bills covering shipments already made paid within ten days from date of invoice.

The undersigned agrees that any cement already paid for, which does not, at the test by the Commission, conform to the specifications of the contract, shall be taken back by him and an equal amount of new cement conforming to the specifications furnished without expense to the Commission.

This offer is open for acceptance until May 23rd, 1916.

[fol. 1433] GOVT. EX. No. 353

Phœnix Portland Cement Company

Nazareth, Penna., March 17, 1916.

Cement Manufacturers Protective Assoc., 219 Commercial Trust Bldg., Philadelphia, Pa.

Attention: Mr. Charles W. Bacon, Sec'y.

Contract No. 2198-90

DEAR SIR: Referring to your letter of the 16th inst., regarding contract with William Fisher, we are very much surprised to receive the information you give us and will start an immediate investigation. If we find that this contract is "blanket" we will immediately take steps to see that it is cancelled.

Very truly yours, Phœnix Portland Cement Co., Ira L. Gilkyson, Treasurer. ILG/SEW.

[fol. 1433½] GOVT. EX. No. 354

Vulcanite Portland Cement Co.

New York, March 17, 1916.

Cement Manufacturers' Protective Ass'n, 220 Commercial Trust Building, Philadelphia, Pa.

GENTLEMEN: Please investigate the following contracts of the Dexter Portland Cement Co. through G. H. Allen, Manchester, Conn.

Retaining Wall on Summit St., Wm. Neill, Contr. & Owner. We are advised that no such contract exists, that this work has not yet been let.

Bridge and sidewalks, 3,000 bbls. This is evidently the Town's Contract. With the exception of the sidewalks which have been let to W. F. Potter & Co., who have accepted Giant cement through the Harry F. Hills Lumber Co., there have been no bridges mentioned as yet in the town, the only contract which has been asked for being 1,000 bbls. for use of the town during 1916, on which Mr. Allen quoted $1.52 in 1,000 to 3,000 bbl. lots.

[fol. 1434] The request by the town for a quotation was not made until January 5, 1916. Our dealer as well as Mr. Allen, knew in 1915 that the town would make such a request but our dealer was advised that he could not place an order or make a contract for work that had not been let or for which no request for bids had been made.

Contract for 8 houses and sidewalks, Hemlock, Summit and Maple Sts., has not yet been let and we do not understand that Mr. E. C. Elliott, who is named as contractor, has this work.

All of these should be cancelled in order that the manufacturer may be protected and the market of Manchester and South Manchester not disturbed.

Yours very truly, Vulcanite Portland Cement Co., Albert Moyer, Manager of Sales. AM.

Alpha Portland Cement Co.

Easton, Pa.

November 7, 1916.

Mr. Chas. W. Bacon, Secretary Cement Manufacturers Protective Association, Philadelphia, Pa.

Dear Sir: Please refer to Edison contract A-131-219, 1,000 barrels for garage through Frank P. McCarthy, Syracuse, N. Y. This garage is 50′ x 177′; there is no cellar and the walls are of hollow tile. The concrete work has been sub-let and will only require 2 or 300 barrels. The contractor has not yet bought his cement for the job.

Yours very truly, F. M. Coogan, Secretary. FMC/OH.

[fol. 1438½] Request for Information

Nov. 8, 1916.

Mr. H. M. Scott, Asst. to President Edison Portland Cement Co., New York, N. Y.

Dear Sir: We desire to call your attention to Contract #A-131-219 on last printed list for (brand) Edison, with Frank P. McCarthy. Delivery Point, Syracuse, N. Y.

Remarks:
This garage is 50′ x 177′; there is no cellar and the walls are of hollow tile. The concrete work has been sub-let and will only require 2 or 300 barrels. The contractor has not yet bought his cement for the job.
Reply on reverse side.
Received Nov. 13, 1916. C. W. Bacon.

Replying to information on reverse side hereof, we have again visited work's site and find that wall of hollow tile will be used, although originally it was planned to build of concrete, as it was thought a supply of good gravel was on the work's site. We are accordingly reducing our contract from 1,000 barrels to 200 barrels.
O. K. B.

[fol. 1439] Govt. Ex. No. 363

Lehigh Portland Cement Co.

Allentown, Pa.

November 16, 1917.

Mr. H. S. Gaines, V. Pres. Cement Mfgrs. Protective Asso., Philadelphia, Pa.

Dear Sir: Stamford, Conn., is a point at which local conditions have been considerably demoralized due to a number of contracts apparently inflated or fictitious.
I believe that you will find it worth while to look up the operations at this point.
Yours truly, Lehigh Portland Cement Company. B. L. Swett, Eastern Sales Manager. JB.

[fol. 1439½] Govt. Ex. No. 364

Alpha Portland Cement Co.

Easton, Pa., August 24, 1918.

Sales Department: Effective at once, please discontinue quoting on or accepting contracts either direct or through dealers covering

the requirements of Industrial or Concrete Product Plants, Municipal, County or State requirements. The business for such concerns will have to be quoted either for 15 day shipment or for a definable specific job the same as we sell to all other classes of trade.

The question of the advisability of accepting such contracts has been before us for some time and from our experience we are convinced our new policy is the proper way to handle such business.

The compelling reasons in deciding on this policy were:

First. This practice discriminated in favor of a certain class of consumers.

Second. Such contracts were unfair, in that they gave optional benefits to the buyer without obligation on his part and placed on the books of the cement company potential obligations on which it [fol. 1440] was impossible to figure with any degree of accuracy the actual shipments which might be called for.

Third. Such contracts cannot be accurately investigated as they usually cover only optional quantities, and when such contracts are taken through dealers it makes it possible for the dealer to divert shipments from such contracts to other work. This makes it possible for the dealer who may abuse such contracts to under-bid his competitors on any new business that comes up in his town.

Fourth. It has also caused considerable annoyance when contractors were bidding on specific work, for Industrials covered by requirement contracts. The Industrials offered to sell the cement to the contractor at less than our market price. This gave the contractor the idea that we were discriminating by giving the Industrials lower prices than we were quoting other consumers.

We have, therefore, decided to change our policy and in future we will follow the policy stated above.

Yours truly, F. M. Coogan, Second Vice President.

The Allentown Portland Cement Co.

Allentown, Pennsylvania

April 25, 1918.

Cement Manufacturers Protective Association, Berkeley Building, 19 West 44th St., New York City.

Attention of H. S. Gaines

Gentlemen: Enclosed please find request for investigation of contract 465, 3,500 barrels sold by the Knickerbocker Cement Co. to L. Suzio Construction Co. We are under the impression that the L. Suzio Construction Co. when placing their business with the Knickerbocker people usually over-estimate the quantity of cement necessary for the work covered by the contract.

They order forward a large quantity of the cement at once before the job can be investigated, and in this way have considerable on hand in their warehouses at a low price. This of course gives them a decided advantage over the other dealers in Meriden, Conn.

For this reason we are very desirous of having a prompt investigation on the contract mentioned above.

Thanking you for your attention, we are,

Yours very truly, The Allentown Portland Cement Co.
F. A. Weibel, Sales Department. FAW:GER.

[fol. 1442] Govt. Ex. No. 367

March 5, 1919.

Mr. Frank H. Smith, Sales Mgr. the Lawrence Cement Company, No. 1 Broadway, New York.

My Dear Frank: Your little note of the 3d instant duly received, and the information you have been given that we are selling B. & H. Hibbard Company is erroneous, as we are selling the Hibbard Masons Supply Company of New Britain, as dealers, and in view of the fact that they are carrying building materials in stock for resale and are equipped with teams for delivery of same we feel that they are entitled to a dealer's price, and this is further drawn out by their name appearing in the Directory of dealers in building materials as published by the Mercantile Printing Company of Wilmington, Del.

Yours very truly, —— ——, Vice President. REG/F.

New York

June 1, 1917.

Mr. Charles W. Bacon, Secty, Cement Mnfrs. Protective Assoc., 220 Commercial Trust Bldg., Philadelphia, Pa.

Dear Sir: We have cancelled balance of one-quarter barrel due under contract Met-10144 account N. Ryan Company, 9th Street & Gowanus Canal, Brooklyn, which was listed to cover requirements of Newman & Carey in paving Smith Street from Lorraine to Percival Streets, Brooklyn, N. Y.

Kindly amend your records accordingly.

Very truly yours, The Atlas Portland Cement Company by D. H. MacFarland, Assistant to the President. HBR-IMC.

(Here follow Government's Exhibits Nos. 374, 373a, 376, 375a, 377, 378, 379, 380, 381, 382, 383, 384, 385, 386, 387, 388, 389, 390, 391, 392, 393, 394, 395, 396a, 397a, 398, 399, 400, 403a, 404a, 405, 406, 407, 408, 409, 410, 411, 412, 413, 414, 415, 416, 417, 418, 419, 420, 421, 422, 423, 424, 425, 426, 427, 428, 429, marked side folio, pages 1445½-1471, inc.).

Govt. Ex. No. 374

QUANTITY AND RELATIVE PERCENT OF CEMENT PRODUCED 1918-1920, INC.

STATEMENT-showing cement produced by all companies reporting to the Cement Manufacturers' Protective Association, 1918-20, inclusive, as shown on Form 12, and the amount of business transacted by each company as reflected in the relative percentage of production of each company as compared to the total production, as computed by the Government.

TOTAL	42339	100.00	41469	100.00	49763	100.00

By comparing columns 5 and 6 with columns 3 and 4 it will be observed that the relative capacity of any one mill, as compared to the total capacity of all mills is in no way affected by the number of days a plant may be active, and is the same whether a plant is active for a day, a month, 300 days or 360 days.

Govt. Ex. No. 389

STATEMENT-showing business actually transacted by defendant companies from mills reporting to the Cement Manufacturers' Protective Association for 1930, as reflected by cement shipped, as compared to the business which each company would receive on a relative capacity basis.

Company	Amount of total business each Co. would receive on a relative capacity basis for 1930.	Percent of total business actually received by each Co. as reflected by shipments for 1930.

1469-1471

[fol. 1471½] Govt. Ex. No. 513

The Edison Portland Cement Co.

Stewartsville, N. J.

January 9, 1913.

Mr. John R. Morron, President Eastern Cement Association, 30 Broad St., New York, N. Y.

Dear Mr. Morron: Enclosed please find a copy of report made by our Statistical Committee, which I trust you will very carefully consider.

Yours very truly, (Signed) W. S. Mallory, Chairman Committee on Statistics.

P.S.—I have sent a duplicate of the above letter to every member of our Association, and also to the Companies who are not members, as I believe it is desirable to have them all thoroughly understand the danger of over-producing in Winter months. W. S. M.

[fol. 1472] Govt. Ex. No. 514

Eastern Cement Association

Stewartsville, N. J.

January 30, 1913.

Mr. John R. Morron, President Atlas Portland Cement Co., 30 Broad Street, New York.

Dear Mr. Morron: Since the last meeting of our Association, I have been going carefully into the question of compiling the monthly statistics for our Committee covering the last four years, as a basis of comparison with future figures, and find that with your permission, our Committee can obtain them from Mr. Percy H. Wilson, Statistician of the Association of American Portland Cement Manufacturers, and in this way it will save you the trouble of making up these past figures for our Committee.

Also with your permission, we can obtain from Mr. Wilson duplicates of the future figures on production shipments and stock on hand, and handling the matter in this way, it will only be necessary for your company to forward one set of figures, and the writer believes this will save some confusion.

[fol. 1472½] If this plan is satisfactory to you, I would appreciate it if you would so advise me, and I will turn your letter over to Mr. Wilson as authority for delivering to our Secretary, Mr. Kittrell, the past and future statistics.

At the next meeting of our Association, our Committee will present for your consideration the desirability of forwarding to the executive officer for each of the members of the Eastern Cement Association

a monthly typewritten sheet giving the production, shipments and stock on hand of each individual company, the desirability for such action being a matter of education to all of our members as to the exact statistical condition.

Trusting that you will cooperate with our Committee in permitting us to obtain the statistics from Mr. Wilson and will be prepared to consider the other question at our next meeting, I am

Yours very truly, (Signed) W. S. Mallory Chairman Committee on Statistics.

[fol. 1473] Govt. Ex. No. 515

July 22, 1913.

Dear Mr. Harding: Thank you very much for yours of the 21st, and the statistics you send me are very interesting. That ratio of shipments to production is just about right, and the percentage of operation as related to maximum was very well attended to in each instance.

I wish you would stop in and see me the next time you are here. I think conditions are looking quite a little better in some respects.

Yours very truly, Morron.

Mr. W. H. Harding, 1718 Land Title Bldg., Philadelphia, Pa.

[fol. 1473½] Govt. Ex. No. 516

Dec. 29, 1913.

Dear George: I thought perhaps it might be of interest to you to see a rather accurate account of a little informal talk which I made to the Cement Manufacturers at their annual dinner, as it, I think, expresses the Atlas opinion of conditions.

Yours very truly, Mr. George F. Baker, Jr., 2 Wall Street, York.

Above enclosure: memo.:

"The future first depends upon a careful inventory of conditions and knowledge of actual facts. A knowledge of proper depreciation. A correct sinking fund for depletion of rock. An accurate knowledge of cost per bbl. of all other factors which must be added to mill cost before real cost is properly understood. When these facts have been made clear, then it would seem each manfr. would realize the lowest minimum price at which he can afford to sell so as to make fair and reasonable return to stockholders or owners. The arbitrary increase of output in any territory will not mean, in the majority of cases, that the smaller Co. or Cos. would be unable to live, [fol. 1474] but an arbitrary will make the entire regional situation unsatisfactory as to profit, because each will think he must dispose

of his entire profit, and therefore will narrow difference between cost of production and selling price below a normal return. Good judgment in regard to output will be far more substantial than even the best distributing advantage and force which any Co. may have. In an industry which has shown a continued increase from its inception in this country, where amts. shipped each year for 10 yrs. has been greater than the preceding year, and where new usages are going to increase the demand, in spite of general present conditions, it would behoove each one of us, and not just some of us, to be cautious in not mfg. and carrying in stock the capacity of a mill, but to curtail according to what each may think is a normal condition, and realizing that should he continue to violate the 11th commandment, he will force others into the same position.

A careful and close watchfulness of costs will not result in a difference greater than a few cents between the Cos. who are today well organized and located. On the other hand, an ill-considered selling price will constantly narrow the difference between the cost and the selling price many times and amt. of any saving in operation. I therefore contend that future of cement business, more or less, lies in the process of digestion. I think the increase in usage will, before many yrs. enable each present operating Co. to run its maximum, and still be short of supplying the wants. Until that time to operate at maximum, out of proportion to the conditions, would result in about the same unsatisfactory results as oc-[fol. 1474½] curred the year before this last one. The Atlas Co. expects to observe this principle until some of the Cos. less patient force it to change the policy. Then it will do it vigorously and not temporarily.

Subterfuges and rebates of any kind, including blank (blanket—?) orders, are detrimental in practice to consumers, dealers and manfrs. These practices are hard to change when once inaugurated. They create competition against the manfr. himself, and do not belong to modern business methods, which should be public and above board. It is impossible to regulate the price of any commodity by agreement. The price of cement, fortunately or unfortunately, must always remain about the same with each living condition. Year before last, when competition rampant, prices of all brands about same, even at low level and in spite of vicous competition. If demand should increase and supply diminish, price will still remain about on a level for brands of equal quality, until such time as an individual will develops a local condition of congestion, which will be temporary.

Good business practices are based upon good morals. Good morals should come under head of moral law. Moral law, is conceded, in most cases, not to violate civil law, and it therefore seems to me that the principles cannot be attacked by any form of our Government, and that it is perfectly within our rights to discuss those practices of distribution which will be fair to the distributor and the consumer or dealer.

[fol. 1475] Govt. Ex. No. 517

Feb. 16, 1914.

Dear Mr. Hagar: I was just wondering in looking over your figures of January and the non-production at Pittsburgh, as to whether it meant that the plant was down, or that you were only manufacturing clinker and not finished product. This was drawn to my attention because Mr. Holman told me that you were very nice in saying to him that you thought our January shipments were good, and I told Mr. Holman that our January shipments were not anywhere near as good a percentage as yours, that you had shipped over 100% of the cement produced. In other words, that your stock on hand Feb. 1st was less than it was Jan. 1st, and it brought to my mind that perhaps the difference might be in clinker unreported. Am I right?

Yours very truly, —— ——.

Mr. E. M. Hagar, Prest. Universal Portland Cement Co., 72 W. Adams St., Chicago.

[fol. 1475½] Govt. Ex. No. 518

April 9, 1914.

Dear Mr. Hagar: Thank you very much for yours of the 7th, and I too have pleasant recollections of my call upon you, and look forward to seeing you when you are next here.

I note that the spring season had not opened with you, and that shipping instructions are bad, and they are simply awful with us this mont-, both east and west. The west has dropped off so there is nothing at all, not half per day of March up to this time, and, unlike you, our sales are not good. However, we hope for better things later on.

I am enclosing you our figures for March, and you will notice that we are far below our March of last year too.

Yours very truly, —— ——.

Mr. E. M. Hagar, President, Universal Portland Cement Co., 72 W. Adams St., Chicago, Ill.

[fol. 1476] Govt. Ex. No. 519

May 14, 1914.

Dear Mr. Hagar: Enclosed find our figures for April.

I enjoyed our little visit together in Philadelphia very much.

Yours very truly, Morron.

Mr. E. M. Hagar, President, Universal Portland Cement Co., 72 W. Adams St., Chicago, Ill.

[fol. 1476½] Govt. Ex. No. 520

May 19, 1914.

Dear Mr. Fuller: Thank you very much for yours of the 18th. Evidently Mr. Weaver must have misunderstood the remark which he refers to. The Atlas company has no right to criticise and does not want to criticise the prices that other people get for their product, but possibly the remark Mr. Weaver referred to was one that I made in which I stated that the Atlas company always had and always would have keen competition, that they did not care what anybody sold his product for, but that they were dead opposed to any concern's rebating or paying commissions or discounts, or subterfuges; that the thing to do was to sell its cement in a straightforward way at any price it wanted to, but have it in the open so that competitors can do just as they choose in regard to meeting it or not. But I, personally, have no use for anyone who tries to create evidence on any proposition, contrary to the real truth.

Thank you very much for the invitation to visit your plant, and I would like to do it. You know I never pretend to know much about cement or its manufacture, and the only thing I am giving real attention to is, widening the difference between cost of production and [fol. 1477] selling price; but I would like very much to stop in and see you, and I expect to do so.

As I understand it, we are giving consideration to a proposition to give one of your grinding mills a test, and I hope it will result in doing business.

I have been told that you have a very orderly and well run plant, and this letter gives me an opportunity of thanking you for allowing our representatives to go through, some few days ago; and at any time we can reciprocate your courtesy please let me know.

Yours very truly, —— ——.

Mr. J. W. Fuller, Manager Director, The Allentown Portland Cement Co., Allentown, Pa.

[fol. 1477½] Govt. Ex. No. 521

March 5, 1915.

Dear Mr. Affeck, Iam very glad to have your letter of the 3rd, and return you our figures for the month of February, and write particularly to congratulate you upon the curtailment of your output of both clinker and finished product. It is the science of merchandising to do this, and it will win in the end just as sure as night follows day.

It is true that the Edison Company expects to suspend business April 1st, and, confidentially, it is because of losses in the fire, and the fact that they do not feel able to compete with the present unsatisfactory conditions here in the east.

I am very optimistic myself about the western situation. There is only one thing I have in the back of my mind which I should

like to talk over with you one day. I am inclined to think, if conditions do not change in the east, that they cannot consistently remain as they are in the west.

I would be glad to see you when you are here next.

Yours very truly, Morron.

Mr. B. F. Affleck, President, Universal Portland Cement Co., 208 So. La Salle St., Chicago:

[fol. 1478] Govt. Ex. No. 522

Office of the President Universal Portland Cement Co., Chicago

March 11, 1915.

Mr. John R. Morron, President Atlas Portland Cement Co., 30 Broad Street, New York City.

Personal

My Dear Mr. Morron: Thank you for your kind note of the 5th with enclosure.

I have just received the Association statistics. It is pleasing to note a total curtailment in production in the country during the first two months of the year of 29%, against which we have a shrinkage in shipments of 4%. It is noted, however, that the production in Michigan for the first two months of 1915 was 15% greater than in 1914. In the No. 5 group, including our Pittsburgh plant, the production shows an increase of 4%. Our production of cement, however, was 4% less and of clinker about 50% less.

Our operations are continuing on a basis of about 50% and while our shipments will be much better than they were last month, they will be lighter than any previous March since 1912.

Yours truly, (Signed) B. F. Affleck.

Personal Note, H. G. Trexler to Morron

Oct. 29/15.

Has arranged dinner at Lehigh Country Club, Tuesday Nov. 9, 7:30 with auto trip next morning and luncheon afterwards at Club. Invites Morron.

Govt. Ex. No. 525

October 29, 1915.

Harry C. Trexler, Allenton, Penna.

Dear Mr. MacFarland: I am anxious to have my friends among Cement Manufacturers see some of the beauties of nature near Allentown at this time of the year.

I have accordingly arranged a dinner at the Lehigh Country Club for Tuesday, November 9th at 7:30 P. M., an auto trip starting from Allentown the following morning to the game preserve and a luncheon afterward at the Lehigh Country Club.

I will be pleased to have you one of my guests for the program outlined and trust you will be able to be present.

Yours respectfully, (Signed) Harry C. Trexler.

D. H. MacFarland, New York, N. Y.

[fol. 1479½] Govt. Ex. No. 526

November 1st, 1915.

Dear Mr. Trexler: Thank you very much for your kind invitation of October 29th to see some of the beauties of nature near Allentown.

It will give me a great deal of pleasure to accept your dinner invitation at the Lehigh Country Club, Tuesday, November 9th, at 7:30 P. M.

With very kind regards, I am

Sincerely yours, MacFarland

Mr. Harry C. Trexler, Allenton, Penna.

[fol. 1480] Govt. Ex. No. 527

Bath Portland Cement Company,

Philadelphia, Pa.

Nov. 13, 1915.

Mr. D. H. MacFarland, Atlas Portland Cement Co., 30 Broad Street, New York City.

Dear Sir: Enclosed find copy of letter written on Nov. 8th to our representative, C. R. Buckley, Baltimore, Maryland. Mr. Buckley just recently came with us, and in sending him to Baltimore he misunderstood our instructions. We learned of this, and immediately took steps to correct same.

As per the attached copy of letter, you will note the lines under which Mr. Buckley is working, the same applying to all our representatives. If you should hear of anything to the contrary we would be pleased indeed to have you take up the matter with this office.

We are enclosing copy of one of Mr. Buckley's reports, which explains itself.

With very kindest regards, and assuring you of our hearty cooperation, remain

Very truly yours, Bath Portland Cement Company, per (Signed) John C. Larimer.

Bath Portland Cement Company

[fol. 1480½] November 9, 1915.

Called on the following concern November 9, 1915:
Name: National Supply Company.
Town: Baltimore, Md.
Dealer, contractor or consumer: Dealer.
Regarding what matter: ——.

Remarks

This was my second visit to these people. They considered Bath but came to the conclusion that they would not handle it this year. Security is the brand they shove.

Buying what brands? Security & a litle Alpha and Atlas.

C. R. Buckley, Salesman.

Copy

Philadelphia, —— 8, 1915.

C. R. Buckley, Baltimore, Md.

Dear Sir: We have your letter of the 6th also reports of visits to various concerns. We note your remarks regarding the Eastern [fol. 1481] Supply Co. Beg to advise that in view that we are not able to book these people prior to the advance, we will be unable to book their order less than $1.73.

Keep on as you are doing, getting acquainted with the trade, and quote not less than $1.00 and 1.05 mill. The opportunity will come later when you will be able to get in with these various concerns.

On account of increased cost of production, cement might possibly advance another ten cents between now and the first of the year and in consequence it will be easier to secure business.

Very truly yours, Bath Portland Cement Company.

[fol. 1481½] GOVT. EX. No. 528

J. A. Horner, Treas., Nazareth Co., to Morron

Nov. 15/15.

Has heard exaggerated reports on what Nazareth Co. has been doing last six months in mfg. and shipping. From Jan. 1st last to present time mill down tight within 3 days of six months, going down tight Dec. 1 and with proposed changes and repairs will not be operated till last of Jan. or 1st of Feb. 3 manfrs told me in last several days it was generally understood we had added two large kilns. This seems so unfair I wish you to know true condition. Hoped to close down mill Nov. 15 or at least part of it, but for reasons (as stated) must keep mill operating till Dec. 1.

[fol. 1482] GOVT. EX. No. 529

Morron to Horner

Nov. 16/15.

Thanks for yours of 15th. I never pay any attention to rumors. Am glad you are not to operate the extra two kilns, because if your Co. is run as ours, we find it much sounder to regulate mfg. in relation to our demand. There always has been a great temptation to run mills full, and I do not believe it is to interest of public policy to do it.

"We must not, of course, any of us, do anything that is without the spirit of the law, but good business sense is a thing each Co. should take into consideration; it is their duty to do it. As far as I am concerned, I expect to continue in this business, as I always have, in trying to regulate supply and demand, as far as this individual co. is concerned.

[fol. 1482½] GOVT. EX. No. 530

Coogan Secy. Alpha to MacFarland

Nov. 16/15.

Have arranged to meet some gentlemen at Raleigh, Washington, Friday, Nov. 19, at 11 A. M. As to arranging this day, thought

you gentlemen would be attending Phila. meeting on Thus. and could go down either Thursday night or Friday morning.

Attached to above are following:

Minutes of Meeting at Machinery Club, 50 Church St., Thursday, Nov. 4, 1 P. M.

Present: Erdell, Cope, Weaver, Griffith, Moyer, Alker, Miller, Hilles, Dutton, Brown, Swett, Gilkyneon, Horner, Beach, Coogan, Stradkey.

F. M. Coogan appointed Sec. Lists of outstanding contracts as sent to each member by Sec. discussed. From records and reports at hand would appear that number of contracts were duplicated by different dealers and number of contracts lodged with more than one Co. Investigation developed that cement for some jobs was furnished by another dealer with different brands of cement. Number of contracts shown on list were entirely completed and occupied by tenants and in some cases no such jobs as covered by contract existed. [fol. 1483] It was decided that secy. make up list of results of investigation so far made, and that copy be sent to each member where present with request that they check over their contracts and [were]* found to be not bona fide to have them cancelled, or if quantities were not in accordance with requirements of the job, quantities should be reduced. List of the results is attached hereto. These jobs are listed in order in which they are shown on original report sent by you after our meeting of Oct. 19. On original report you will find the full information regarding number of bbls. originally contracted for an- number shipped against each job.

Meeting adjourned at 5 P. M. On [investigation]* of R. W. Hilles, the gentlemen were invited to meeting at Union League Club, Phila., Thursday, Nov. 18, at 3 P. M. invitation

---

[fol. 1483½] Govt. Ex. No. 531

Minutes of Meeting at Hotel Raleigh, Washington, Friday, Nov. 19/15, 11 A. M.

Nov. 19/15.

Present: Young, Chairman, Miller, Brown, Cover, Kelly, Scott, Swett, MacFarland, Moyer, Stapleton, Barbour, Law, Fetter, Harter, Dutton, Ford, Griffith, McCante, Dalbey, Coogan.

Matter of sale, methods and trade practices in South talked over in detail. There seem to be great difficulty and misunderstanding as between Southern Mills and those located in Baltimore District

[*Words and figures enclosed in brackets erased in copy.]

and Lehigh Valley in regard to new method of discount and also method of sales to railroads, etc. After discussion these matters thoroughly discussed by all and it was decided there should be frequent meetings for dissemination of information regarding trade practices as they might affect the different producing districts.

Unanimously decided next meeting be held in N. Y. Tuesday, Dec. 14, 10 A. M. at Hotel Biltmore.

F. M. Coogan, Secy.

[fol. 1484] GOVT. EX. No. 532

The Atlas Portland Cement Company

New York

Subject: Meetings.
Mr. MacFarland, New York.

St. Louis-New York, Nov. 28th, 1915.

DEAR MR. MACFARLAND: As you know, I have been at Hannibal, and came down here to St. Louis to have a talk with Mr. Conrades, and it would seem to me that he will put some life into this situation, so that we will be more aggressive. There is hard competition here, but we have got to get more business, that is all there is to it.

The main reason for my writing you this letter is because in a talk which Mr. McConell had with me yesterday afternoon he related having been shown a memorandum of what he called some meeting held in Washington of the Southern Manufacturers of cement, and some others as I recall it, in which your name appears, and Mr. McConnell stated to me that the record of that meeting as it had been shown to him was one that he felt sure I would not approve of, and that brought up to my mind a condition on which I have spoken to you a great many times, and which I feel sure you fully appreciate, [fol. 1484½] but I want to emphasize it again. The Atlas Company wants to do anything it can legitimately to improve trade ethics. We have made changes in our terms to 5c a barrel so as to make it an inducement for dealers to handle cement as against other building materials. We are willing to do anything that is within the spirit of the law to straighten out bad customs, but the Atlas Company will not and must not, take part in any conferences which might be misinterpreted.

I know that you feel just as I do on this, but it is a good deal like an automobile; it is not what you do yourself when you drive, but you have got to be on the lookout for what the other fellow does, and while you might not have any intention of entering into any conference that would touch upon any matters other than those which we believe in, still if you take four, five, six, or a dozen men and put them together, somebody is liable to misinterpret it, and the Atlas Company is so staunch in its policy that I feel it necessary to write you this letter again, so that you may be guided thereby. Now do not misunderstand me; I do not think you have done a thing you

should not have done, but in the enthusiasm of some of these other fellows you cannot tell what they will report, and I do not want you to take part in any conferences of any kind that are not strictly in accord with our policy. Furthermore, it seems to me that it would be the safest thing, even when you are talking over these ethics which we have a right to discuss as I understand it, that you should have Mr. Cox, or some lawyer there to take down the record of the [fol. 1485] meeting, so that there can be no misunderstanding, or that no one after it is all over can say that you were trying to do something which you really did not intend to do.

At the time of the investigation about a year ago of our company and others in the industry, I was perfectly frank in showing them everything, and telling them the exact conditions, and the only danger that we were in at any time was what some other fellow said we were trying to do, not what we were really trying to do, and the strength of our position was that I had a record of our intentions, and we were not dependent upon somebody else's memory as to what was done.

This must have your very careful attention, and you must handle the matter on those lines always, and without exception.

Yours truly, (Signed) J. R. M.

[fol. 1485½] Govt. Ex. No. 533

Memorandum

December 1, 1915.

At an informal meeting of various Eastern manufacturers at the Railroad Club, held November 30th, I made the statement that from two recent letters I had received I felt there might be a misapprehension as to the exact position of the Atlas Company in connection with the handling of its business and, therefore, wanted to state that we were always glad to furnish and receive statistical information of past performances, and that we would be willing to do anything that was within the spirit, as well as the letter of the law, to correct bad customs, but that we would under no circumstances be a party to any arrangement that might be construed as having at any time a price understanding or agreement, and to illustrate to those present—without mentioning the names of the Companies from which I had received letters that might be misconstrued—I read the substance of my reply to a letter I wrote November 30th to Mr. J. C. Lorimer of the Bath Portland Cement Company, and another letter I wrote Mr. W. B. Dutton, General Sales Manager of the Coplay Cement Manufacturing Company.

(Signed) D. H. MacFarland.

[fol. 1486] Govt. Ex. No. 534

Memorandum

Telephone conversation between President John R. Morron and W. S. Malory between eleven and eleven-thirty o'clock Saturday, December fourth, 1915, there being present in the president's office, at 30 Broad street, at that time Mr. W. E. Miner and Mr. D. H. MacFarland.

The conversation related to statistical information compiled by Mr. Mallory of the cement business.

President Morron stated to Mr. Mallory that it was his understanding that the statistics compiled by Mr. Mallory showed the production in past years of the various plants, and that wherever he showed a minus sign it would indicate that the Atlas Company's average production for this year was less than its average production for the three years; and that wherever he showed a plus sign it would indicate that the Atlas Company's shipments averaged greater than the average for the three years. This information is valuable as by these plus and minus statements he was able to determine Atlas volume of business.

[fol. 1486½] President Morron stated to Mr. Mallory that he felt that at the recent conferences some of those attending misinterpreted the object of the compilation of these statistics and have inferred that they were dealing with the price of cement, and that he had written Mr. MacFarland to that effect, instructing that he should not be a party to any further conference, because some of those attending such conferences seemed to be impressed with, and to convey the, idea that they related to prices which was not to be considered for a moment, and therefore we would not be a party to or take part in any way in any further conferences, nor would we be represented at any time or place with any one, except a chaperon be present, meaning an attorney.

December 4th, 1915.

[fol. 1487] Govt. Ex. No. 535

Jan. 11, 1916.

D. H. MacFarland, Chicago, Ill.:

Enclosed herewith please find copy of letter from Mr. Clark in explanation of tabulation of bids opened on the 10th inst. by the City of Worcester,

Yours very truly, —— ——. CAK/MH.

Enc.

The Atlas Portland Cement Co.

Boston

C. A. Kimball: Jan. 10, 1916.

Explaining our tabulation of bids today at Worcester, Mass. you will note that the only two manufacturers who bid direct maintained

the proper price. Smith Green Co. also maintained the right price but put one over on us as regarding cash discount telling us previous to the bid that they would confine 5¢ per bbl. discount to ten days from date of invoice, but actually giving the benefit of 5¢ per bbl. cash discount if payable on 26th of month following delivery. It is said in Worcester that the contract will be awarded F. E. Powers Co. whose price with bags off amounts to $1.47 per bbl. being even lower [fol. 1487½] than other bids which may have specified cash discount of 5¢ per bbl. There is some talk that one of the Worcester dealers will write to the Manufacturers of the brands named by F. E. Powers Co., protesting against their making shipments on price basis which is so clearly under the market.

E. W. Clark

The Atlas Portland Cement Co., Boston

C. A. Kimball, Jan. 10, 1916

Bids at Worcester, Mass., today resulted as follows:

		Per bag	Per bbl.	Bag rebate pre-paid by dealer	Terms	Bags at local shed
Saylors direct		.48¾	$1.95	9¾¢	5/10	...
Giant "		.48¾	1.95	9	no terms	...
Smith Green Co.	Alsen	.46¾	1.85	...	5¢ on 20th	7¾¢
Smith Green Co.	Lehigh, Atlas, Allentown, Dexter	.48¾	1.95	...	5¢ on 20th	10 ¢
B. F. Marsh Co.	Pen Allen, Phœnix, Saylors, Vulcanite, Atlas	48¾	1.95	...	5/10	9 85/100

Yours very truly, E. W. Clark.

[fol. 1488] Govt. Ex. No. 536

W. S. Mallory, Easton, Pa.

January 17, 1916.

Mr John R. Morron, 30 Broad Street, New York, N. Y.

Dear Mr. Morron: At the meeting on January 14th, of the Cement Manufacturers' Protective Association, it was decided that

statistics relative to the production, shipments, and stock on hand, should hereafter be sent direct to the Secretary and compiled by him, and in accordance with this action, the December sheet, which is already in your hands, will be the last sheet that I expect to compile.

You will remember that at the time of the Association meeting at the Biltmore, I spoke to you, and you in turn took the matter up with Mr. Young as to the matter of checking the statistics, and since that time I have personally expended $135.65 covering the salary and expenses of man doing the checking, also the printing and mailing of the sheets themselves, together with trips which it was [fol. 1488½] necessary for me to make to the Tidewater, Whitehall and Knickerbocker offices to obtain the statistics.

At your convenience, I will appreciate it if you will arrange to reimburse me for this expenditure, in accordance with our understanding.

Yours very truly, (signed) W. S. Mallory.

[fol. 1489] Govt. Ex. No. 537

The Atlas Portland Cement Co.

New York

W. N. Miner, Treasurer

February 1, 1916.

The next meeting of the Cement Manufacturers Protective Association will be held at two o'clock on the afternoon of February 21st at the office in the Commercial Tryst Building, Philadelphia, Pa. I understand you will arange to be present.

I told Mr. Coogan that you would take up sales matters in connection with the Association during my absence, and also notified Mr. Bacon, Secretary of the Association to take up matters direct with you during the month of February.

Mr. Bacon will send you within a few days some forms on which we are to report our contracts. I talked on the telephone this morning with Mr. McKenna, indicating to him that these forms were coming, and told him just about how they should be worked up. Therefore, when these forms come, I presume you will turn them [fol. 1489½] over to Messrs. Kimball and McKenna so that the reports can be sent to the Association promptly.

I understand that at the meeting yesterday morning when the Credit men were there that there was some objection made by Mr. Medler when a few of the Sales Managers came into the room. I was not present at the time, but, of course, know why Mr. Medler objected owing to a previous letter we had from Mr. Stimson. Mr. Cox told me that he had been obligated to see Mr. Stimson, and see if he could not work it up so that our people would be straightened

out in a way that would permit the Credit Department to participate in the same way that the other companies were doing. Mr. Cox felt sure that Mr. Stimson's ruling was prior to the formation of the present association and he indicated that Mr. Stimson's letter to Mr. Morron, wherein he approved of the plan of the present association, would serve to cancel the previous letter. I think you will find that Mr. Cox will have a talk with Mr. Stimson in a few days, and if we do not hear anything from Mr. Stimson I presume that you will take the matter up.

Mr. Coogan will come in within a few days, and will let you have a full set of the freighr rates that were prepared by the Alpha Company and corrected up to date. When these are received, will you write Mr. Bacon, Secretary of the Association, and ask him to let us have five sets of freight rates, and when they are received will you have Mr. McKenna see that the sets received from the Association are corrected in the same way that the set has been corrected [fol. 1490] by Mr. Coogan, and then have Mr. McKenna be sure to see that these freighr rates are the basis we ure in arriving at our delivered prices.

So that you may understand the situation, the Association has taken over all the Alpha freight rate books and has paid them, or will pay for the balance that the Alpha Co. has been outstanding, representing the actual cost of the sets that are left. Then, a little later on, the Association will issue a new set under Association covers.

Yours very truly, D. H. MacFarland.

[fol. 1490½] Govt. Ex. No. 538

March 9, 1916.

Mr. John R. Morron, Atlas Portland Cement Co., 30 Broad Street, New York City.

Dear Mr. Morron: The Cement Manufacturers of the Nazareth District request the pleasure of your company for dinner on Tuesday, March 14th, at six P. M. at Delmonicos.

The moving pictures taken of the trip through Colonel Trexler's game preserve will be shown.

We hope that you will be able to *the* present.

Yours very truly, Bath Portland Cement Co., Dexter Portland Cement Co., Nazareth Cement Co., Penn-Allen Cement Co., Pennsylvania Cement Co., Phœnix Portland Cement Co.

Kindly address reply to Wm. N. Beach, 30 E. 42nd St., New York City.

[fol. 1491] Govt. Ex. No. 539

March 20, 1916.

Dear Mr. Beach: I am in Chicago now, and have just gotten back from the west, and find your letter of the 9th, inviting me to dine March 14th, and see the moving pictures, as a guest of the Bath, Dexter, Phœnix, Penn Allen, Pennsylvania and Phœnix Cement Companies.

I do not know of any dinner I would rather have attended, and regret exceedingly that my absence prevented my being there, and will you please convey this regret to each of the companies which were hosts.

With kind regards, I am,

Yours very truly, —— ——.

Mr. William N. Beach, 30 East 42nd St., New York.

[fol. 1491½] Govt. Ex. No. 540

Vulcanite Portland Cement Company

New York, May 3, 916.

Mr. D. H. McFarland, Atlas Portland Cement Co., 30 Broad Street, New York City.

Dear Sir:

Trade Practices

I am enclosing copy of Trade Practices which are in effect by this Company. This was read to you the other night mainly for your information. Considerable discussion developed due to the clause which makes quotations expire 30 days after the date of the quotation regardless of date an advance may take place. Some seem to think that quotations should be extended so as to expire 30 days after an advance, in addition some seem to think that it is better policy for their Company to have a price cover a job and such job be covered 30 days after an advance regardless as to whether the contractor has been quoted a price or not. Others seem to think that a clause should be inserted that the quotation should not be made [fol. 1492] until 10 days prior to opening of bids and for acceptance 5 days after award of contract but in any event to expire 30 days from date of quotation.

We believe that specific job quotations should be left open for acceptance within 5 days after award of contract by owner to contractor, and in no event after 30 days from date of quotation. Quotation should not be made for the job when quoting contractors direct but only be good for such contractors that had already been quoted, that the quotation should promptly expire 30 days from date of quotation regardless of when advance took place.

The main difference seems to be the quoting of the job instead of quoting the contractor. This would appear to me to cause the loss of quite some money to any Company adopting this policy. The whole idea of any restriction whatever in the quotation is to restrict. If you quote the job, you do not restrict—you simply keep all business open, sometimes amounting in the aggregate to five million barrels, a period of time longer than you are obligated for. If the advance was say, 10¢ a bbl. it would mean the loss of $500,000.00. This is well worth thinking about.

The objection we make to quoting only 10 days prior to the opening of bids is simply on the basis of it being absolutely impracticable. Some companies might have sufficient clerical force and a large enough force of salesmen to follow each job so intimately as to be positively advised as to the dates that bids would be opened. There are some twenty-four manufacturers of Portland Cement in [fol. 1492½] the Eastern States, and out of that twenty-four, there are only a few that could afford to be that well equipped. Such a clerical force would be out of proportion to their output. Furthermore, a great deal of the business in the East is done through architects and engineers and they themselves do not know what day they are going to open bids. They might make up their mind to award the contract tomorrow and again it might not be awarded for three weeks, but in any event the contractors that are estimating would want a price they could rely on and be covered for some specified period, say 30 days.

An impracticable clause is like an unenforceable law. It had better not be put on the statute books but if it once gets on, the only way to get it off is to enforce it, which brings about more or less confusion.

We do not object to a clause which gives us the privilege of declining to enter into a contract with the contractors unless the contract is made within 5 days of the formal award of the contract to him. This is along the line of restriction and to the benefit of the manufacturer, and it is no injury to the contractor unless he wants to gamble or speculate, in which event it is his own fault if he loses.

All the other clauses in this list of trade practices seem to have been favorably commented upon.

Yours very truly, Vulcanite Portland Cement Co. (Signed) Albert Moyer, Manager of Sales. AM.

Signed in absence of the writer.

Mallory to speak at the meeting they will have in Boston in September on exchanging information etc. Mr. Mallory is inclined to accept the invitation but asks if there is any objection to his presenting our form of statistics, particularly the sheets on which percentage calculations are made.

Will you kindly give me your opinion concerning this proposition?

Yours very truly, B. F. Affleck, President. B.F.A.-HC-A.

[fol. 1493½] GOVT. EX. No. 542

May 22, 1916.

DEAR MR. AFFLECK: I would not think it was the best policy to have Mr. Mallory present the form of statistics used by the Association. I do not mean by this to imply that anything is being done which is not within the law, but it has been my experience that as the wheel revolves there comes a time when some one abuses their privilege, and when that one industry does, then the Government usually looks around to see where there are others, and they usually tackle those who are notorious first, irrespective of facts.

We would become more or less notorious by talking about our affairs to another industry.

Yours very truly, Morron.

Mr. B. F. Affleck, Prest. Universal Portland Cement Co., 208 So. La Salle St., Chicago, Ill.

(Here follows Government's Exhibit 543, marked side folio pages 1494-1497.)

[fol. 1498] GOVT. EX. No. 544

To save time, it is agreed, subject to all objections to materiality, relevancy and all other objections not expressly waived by the admissions, as follows:

In 1903, the Atlas Portland Cement Company brought suit against the Alpha Portland Cement Company (the nominal defendant being Martin's Creek Portland Cement Company, owned by Alpha Portland Cement Company), in the United States Court for the Eastern District of Pennsylvania, on account of the infringement of letters-patent of the United States No. 645,031, of March 6, 1900, to Hurry & Seaman.

Hurry & Seaman, employees of the Atlas Portland Cement Company, were the first to burn powdered coal, with commercially successful results, in rotary kilns. Prior to their invention covered by the patent, cement was made in rotary kilns by burning oil, and the new coal-burning apparatus effected a material saving in

cost of manufacture. The patent contained some claims that could be construed as covering the combination with a rotary cement furnace, of any means for injecting into the delivery end of the furnace a jet of air, and means for feeding to said jet powdered coal, whereby a core of powered coal in combustion was produced in the furnace.

The suit was elaborately contested, evidence being taken in Eng- [fol. 1498½] land and in different parts of the United States, making a record of several volumes. It was argued at final hearing for a week in July, 1906. Before any decision was handed down, a settlement was effected between the parties and other cement companies who were using substantially the same apparatus, as follows:

On November 23rd, 1906, the certificate of incorporation of North American Portland Cement Company was filed, the capital stock being subscribed by the Atlas Portland Cement Company, Lehigh Portland Cement Company, Alpha Portland Cement Company, American Cement Company, Vulcanite Portland Cement Company and Lawrence Portland Cement Company. The Atlas Portland Cement Company, the owner of the patent, granted to North American Portland Cement Company an exclusive license, with power to sub-license the use of the inventions covered by the Hurry & Seaman patent, a copy of which is marked "Exhibit A," and the North American Portland Cement Company at the same time granted to Lehigh Portland Cement Company, Alpha Portland Cement Company, American Cement Company, Vulcanite Portland Cement Company and Lawrence Portland Cement Company, licenses to use said inventions, in the form of the specimen marked "Exhibit B."

On December 30, 1907, an Association of Licensed Cement Manufacturers was formed by an agreement, of which Exhibit C is a copy, the licenses held by the members other than those above mentioned being in the form of Exhibit D.

[fol. 1499] On April 16, 1907, the United States Court of Appeals for the Seventh Circuit handed down its opinions in Rubber Tire Wheel Co. vs. Milwaukee Rubber Works Co., 154 Fed. 359; and Indiana Manufacturing Co. vs. J. I. Case Threshing Machine Co., 154 Fed. 365; and on October 20, 1908, the same Court handed down its opinion in Goshen Rubber Works vs. Single Tube, etc. Co., 166 Fed. 431; all of which were communicated to the companies members of the Association by its counsel and may be taken as part of this agreement.

On January 13, 1909, a supplemental license substantially in the form of Exhibit E, was executed by the companies named therein, with the exception of Northampton Portland Cement Company, which had gone into bankruptcy. Before executing the supplemental license all the companies were advised by their counsel that the license was in exact accordance with the decisions above mentioned and in all respects lawful.

The license agreement of January 13, 1909, was terminated pursuant to a provision therein for termination on January 1, 1911.

On January 6, 1911, the Association of Licensed Cement Manufacturers was dissolved and abandoned.

On January 2, 1912, the United States Court of Appeals for the Seventh Circuit handed down its decision on the appeal of the case of Atlas Portland Cement Company vs. Sandusky Portland Cement Company, affirming the decision of the lower Court in 1910 and holding that unless the broad claims of the Hurry & Seaman patent were limited to the particular means for burning powdered coal, [fol. 1499½] they were void as too broad and consequently there was no infringement. The opinion of the Court appears in 196 Fed. 385, and may be taken as a part of this agreement. The sum of $200,000 per annum specified as royalty to the Atlas Portland Cement Company in the license agreement, was paid until the time of the decision, when in accordance with the provisions of the licenses it ceased to be due.

[fol. 1500] GOVT. EX. NO. 545

Exhibit A.

License Agreement

"Agreement made this 3 day of December, A. D., 1906, Between The Atlas Portland Cement Company, duly organized, incorporated and existing under the laws of the State of Pennsylvania, and having its principal place of business in Northampton, in the State of Pennsylvania, hereinafter called the Licensor, and North American Portland Cement Company, duly organized, incorporated and existing under the laws of the State of New Jersey and located in the City of Jersey City, in the State of New Jersey, hereinafter called the Licensee.

"Whereas the Licensor, as the assignee of Edward H. Hurry and Harry J. Seaman, did obtain, and is now the owner of the whole right, title and interest in and to Letters Patent of the United States No. 645,031, dated March 6th, 1900, for Apparatus for Burning Pulverized Fuel, jointly invented by the said Edward H. Hurry and [fol. 1501] Harry J. Seaman; and is also the sole and exclusive owner of all damages and profits recoverable at law or in equity from any and every party for any and every infringement of said Letters Patent and all claims and demands for such damages and profits.

"And Whereas the Licensor, as the assignee of Rolla C. Carpenter, did obtain, and is now the owner of the whole right, title and interest in and to Letters Patent of the United States No. 691,336, dated January 14th, 1902, for Process of Feeding Fine Fuel, invented by the said Rolla C. Carpenter, and in and to Letters Patent of the United States No. 691,337, dated January 14th, 1902, for Apparatus for Feeding Fine Fuel, invented by the said Rolla C. Carpenter; and is also the sole and exclusive owner of all damages and profits recoverable at law or in equity from any and every party for any and every infringement of said two Letters Patent Nos. 691,336 and 691,337 and all claims and demands for such damages and profits, excepting, however, certain rights and exemptions from payment of royalty, license fee and damages and from injunction reserved

under said two Letters Patent Nos. 691,336 and 691,337 to the Heldeberg Cement Company for its works at Howe's Cave, in the State of New York, the Cayuga Lake Cement Company for its works at Ithaca, in the State of New York, the Great Northern Portland Cement Company for its works at Baldwin, in the State of Michigan, and the Claire Portland Cement Company for its works at Claire, [fol. 1502] in the State of Michigan, as particularly set forth in a certain agreement or assignment made and executed between and by the said Rolla C. Carpenter and the Licensor herein named and dated the 10th day of October, 1901.

"And Whereas the Licensee is desirous of acquiring the hereinafter mentioned exclusive rights and license under the above recited several Letters Patent Nos. 645,031, 691,336 and 691,337, and all damages and profits recoverable at law or in equity from any and every party for any and every infringement of said several Letters Patent Nos. 645,031, 691,336 and 691,337, and each of them, and all claims and demands for such damages and profits, subject, however, to the rights and exemptions reserved under said Letters Patent Nos. 691,336 and 691,337, as aforesaid, and also subject to the reservation, terms, conditions and covenants hereinafter expressed.

Now, therefore, this agreement witnesseth that the Licensor and the Licensee, for and in consideration of the sum of One Dollar lawful money of the United States unto each of them paid by the other, and of other good and valuable considerations unto each of them moving from the other, at or before the ensealing and delivery of these presents, the receipt whereof is hereby acknowledged, do hereby mutually covenant and agree to and with each other as follows:

"I. That the Licensor does hereby grant unto the Licensee the exclusive right and license to manufacture, and to have manufactured [fol. 1503] by other parties for it, and to use, employ and practice any or all of the inventions shown, described and claimed in the above-recited several Letters Patent Nos. 645,031, 691,336 and 691,337, within and throughout the United States and the Territories and Colonial Possessions thereof, to the full end of the term for which said Letters Patent No. 645,031 are and may be granted and extended; and also the exclusive right to grant to other parties rights and licenses to manufacture, and to have manufactured by other parties for them, and to use, employ and practice any or all of said inventions within and throughout the whole or any part of the United States and the Territories and Colonial Possessions thereof, to the full end of the term for which said Letters Patent No. 645,031 are and may be granted and extended, or for any less period of time. Provided, however, that all of said rights and license are hereby granted to the Licensee upon and subject to the rights and exemptions reserved under said Letters Patent Nos. 691,336, and 691,337 as aforesaid, and also subject to the reservation, terms, conditions and covenants hereinafter particularly expressed.

"II. That the Licensor, and every corporation at least a majority of the shares of whose capital stock issued is now owned by the Licensor, shall have, and the Licensor does hereby reserve unto

itself and every such corporation, the non-exclusive right and license to manufacture, and to have manufactured by other parties for it and them, and to use, employ and practice any or all of the inven- [fol. 1504] tions shown, described and claimed in the above-recited several Letters Patent Nos. 645,031, 691,336 and 691,337, anywhere within the United States and the Territories and Colonial Possessions thereof, to the full end of the term for which said Letters Patent No. 645,031, are and may be granted and extended, upon and subject, however, to the terms, conditions and covenants particularly expressed in this clause II.

"That the Licensor shall keep a full, true and accurate written account of the number of barrels of all the Portland Cement, produced by the calcination of the raw materials in rotary or other cement kilns with coal, oil, gas, or other fuel under said several Letters Patent Nos. 645,031, 691,336 and 691,337, or any of them, or otherwise, which shall be sold or otherwise disposed of by or for it, and by or for every corporation at least a majority of the shares of whose capital stock issued is now owned by the Licensor, during each calendar year after the year 1906; and that such written account shall be open to the unrestricted examination of any officer or duly authorized representative of the Licensee at all reasonable times during business hours.

"That the Licensor shall, within the first fifteen days of the month of January in each year, commencing with January, 1908, and ending with January, 1917, render to the Licensee a full, true and accurate written statement setting forth therein the number of barrels of all such Portland Cement which shall have been sold or otherwise [fol. 1505] disposed of by or for it, and by or for every corporation at least a majority of the shares of whose capital stock issued is now owned by the Licensor, during the preceding calendar year; and that whenever the Licensee shall so request in writing any such written statement shall be accompanied by the affidavit of some executive officer of the Licensor having knowledge of the facts setting forth that such written statement is full, true and correct in all respects; and that the Licensor shall not be required to render any such written statement for the period between January 1st, and March 6th, 1917.

"And that the Licensor shall, within the first fifteen days of the month of January in each year, commencing with January, 1908, and ending with January, 1917, pay to the Licensee a royalty of four cents on each barrel of such Portland Cement in excess of Thirteen million five hundred thousand barrels which shall have been sold or otherwise disposed of by or for it, and by or for every corporation at least a majority of the shares of whose capital stock issued is now owned by the Licensor, during the preceding calendar year; and that the Licensor shall not be required to pay said royalty for the period between January 1st and March 6th, 1917.

"And that the Licensor and the Licensee do hereby mutually covenant and agree to and with each other that if any claim or claims of said Letters Patent No. 645,031 should, at any time prior [fol. 1506] to January 1st, 1913, be adjudged or decreed by any United States Circuit Court of Appeals in any suit in which an ap-

peal or writ of error shall have been taken and perfected within the time prescribed by law, or by any United States Circuit Court in any suit in which no appeal or writ of error shall have been taken or perfected within the time prescribed by law, to be invalid or to be limited in scope and by reason thereof any apparatus such as shall be used by the Licensor under the terms of this agreement might thereafter be manufactured, sold or used by any party without infringing any claim of said Letters Patent No. 645,031 not previously adjudged or decreed to be invalid in the manner aforesaid, then and in any such event all of the covenants and obligations of the Licensor expressed in this Clause II shall continue in full force and be binding upon and be fully and faithfully performed by the Licensor for and during each calendar year between 1906 and 1913, including the payment which shall become due in January, 1913, for the preceding calendar year under this clause II, and in any such event all of such covenants and obligations shall cease to be binding upon the Licensor and cease to have any force and effect for and during any period of time after the year 1912, except as to the aforesaid payment which shall become due in January, 1913; and that if any like adjudication or decree should be made or entered at any time after the year 1912, then and in any such event all of the covenants and obligations of the Licensor expressed in this Clause II, except [fol. 1507] the aforesaid payment which shall become due in January, 1913, shall cease to be binding upon the Licensor and cease to have any force and effect for and during any period of time after the entry of such judgment, decree or mandate, and the Licensor shall not be obligated to pay to the Licensee any royalty mentioned in this Clause II for the remainder of the calendar year in which any such judgment, decree or mandate shall be entered or for any period of time thereafter. Provided, however, that whenever the covenants and obligations of the Licensor expressed in this Clause II shall cease to be binding upon the Licensor and cease to have any force and effect according to the terms of this Clause II, the Licensor shall not be relieved, released or discharged from paying to the Licensee any royalty which shall have become payable to the Licensee according to the terms of this Clause II for any period of time prior thereto.

"III. That the Licensor does hereby sell, assign, transfer and set over unto the Licensee all damages and profits recoverable at law or in equity from any and every party for any and every infringement of the above recited several Letters Patent Nos. 645,031, 691,336 and 691,337, and each of them, and all claims and demands for such damages and profits, the same to be received, held and enjoyed by the Licensee for its own use and behoof forever, together with all actions, causes of actions and remedies for the recovery thereof.

"IV. That the Licensee shall, simultaneously with the execution [fol. 1508] and delivery of these presents, grant in writing to Lehigh Portland Cement Company, a Pennsylvania corporation, Alpha Portland Cement Company, a New Jersey corporation, American Cement Company, a New Jersey corporation, Vulcanite Portland

Cement Company, a New Jersey corporation, and Lawrence Cement Company of Pennsylvania, a Pennsylvania corporation, separately but not jointly, the non-exclusive right and license to manufacture, and to have manufactured by other parties for such sub-licensee, and to use, employ and practice any or all of the inventions shown, described and claimed in the above recited several Letters Patent Nos. 645,031, 691,336 and 691,337, anywhere within the United States and the Territories and Colonial Possessions thereof, to the full end of the term for which said Letters Patent No. 645,031 are and may be granted and extended, and said non-exclusive right and license to be thus granted to each of such sub-licensees, shall extend to it and every corporation at least a majority of the shares of whose capital stock issued is now owned by it; that said non-exclusive right and license to be thus granted by the Licensee to said Lehigh Portland Cement Company, Alpha Portland Cement Company, American Cement Company, Vulcanite Portland Cement Company and Lawrence Cement Company of Pennsylvania, separately but not jointly, shall be granted in and by License Agreements heretofore approved by the Licensor and Licensee herein named and to be exe-[fol. 1509] cuted by the Licensee herein named and sub-licensees above named, respectively, simultaneously with the execution of these presents.

"And that no such License Agreement made and executed in accordance with the terms of this clause IV shall be modified, altered, terminated or cancelled by said North American Portland Cement Company at any time hereafter, without the previous written consent of The Atlas Portland Cement Company aforesaid.

"V. That the Licensee shall have the right to grant sub-licenses under the above recited several Letters Patent Nos. 645,031, 691,336 and 691,337, or any of them, to parties, other than said Lehigh Portland Cement Company, Alpha Portland Cement Company, American Cement Company, Vulcanite Portland Cement Company and Lawrence Cement Company of Pennsylvania, upon such terms, conditions and covenants and upon such royalty or royalties as shall be satisfactory to the Licensee herein named, but every such sub-license shall be granted by the Licensee in writing. Provided, however, that every sub-license that shall be granted by the Licensee herein named under several Letters Patent Nos. 645,031, 691,336 and 691,337, or any of them, to every corporation, at least a majority of the shares of whose capital stock issued shall at any time, directly or indirectly, be owned by the Licensee herein named, and every sub-license that shall be granted by the Licensee herein named under said several Letters Patent Nos. 645,031, 691,336 and 691,337, [fol. 1510] or any of them, to any party without royalty, shall be granted upon condition that the same shall terminate immediately with any termination and cancellation of these presents; and that no sub-license shall be granted under said Letters Patent Nos. 691,336 and 691,337, or either of them, for a longer period of time than the terms for which said Letters Patent Nos. 645,031 are and may be granted and extended.

"VI. That the Licensee shall, in and by each License Agreement mentioned in clause IV hereof, release and discharge the sub-licensee, executing the same, and every corporation at least a majority of the shares of whose capital stock is issued is now owned by such sub-licensee, from all damages and profits recoverable at law or in equity from them and each of them for any and every infringement of the above recited several Letters Patent Nos. 645,031, 691,336 and 691,337, and each of them, and all claims and demands for such damages and profits, and all actions and causes of action for the recovery thereof, in the manner, particularly set forth in such License Agreement.

"VII. That the Licensee shall keep a full, true and accurate written account of—

"First. All royalties which shall be collected and received by it, and also that shall be due, during each calendar year after the year 1906, from said Lehigh Portland Cement Company, Alpha Portland Cement Company, American Cement Company, Vulcanite Portland [fol. 1511] Cement Company and Lawrence Cement Company of Pennsylvania respectively, under clause III of each of the License Agreements mentioned in clause IV hereof.

"Second. All sums of money and royalties which shall be collected and received by it, and also that shall be due, during each calendar year after the year 1906 from all its sub-licensees, other than the Licensor herein named, and other than said Lehigh Portland Cement Company, Alpha Portland Cement Company, American Cement Company, Vulcanite Portland Cement Company and Lawrence Cement Company of Pennsylvania.

"Third. All royalties which shall be collected and received by it, and also that shall be due, during each calendar year after the year 1906 from the Licensor under the terms of clause II hereof.

"Fourth. All sums of money which shall be collected and received by it during each calendar year after the year 1906 from any and every party as damages and profits for any infringement of the above recited several Letters Patent Nos. 645,031, 691,336 and 691,337, and each of them.

"And that such written account shall be open to the unrestricted examination of any officer or duly authorized representative of the Licensor at all reasonable times during business hours.

"And that the Licensee shall, within the last fifteen days of the month of January in each year, commencing with January, 1908, and ending with January, 1917, render to the Licensor a full, true [fol. 1512] and accurate written statement setting forth therein—

"(1) The aggregate amount of all royalties which shall have been collected and received by it during the preceding calendar year from said Lehigh Portland Cement Company, Alpha Portland Cement Company, American Cement Company, Vulcanite Portland Cement Company and Lawrence Cement Company of Pennsyl-

vania respectively, under clause III of each of the License Agreements mentioned in clause IV hereof.

"(2) The aggregate amount of all sums of money and royalties which shall have been collected and received by it during the preceding calendar year from all of its sub-licensees, other than the Licensor herein named and other than said Lehigh Portland Cement Company, Alpha Portland Cement Company, American Cement Company, Vulcanite Portland Cement Company and Lawrence Cement Company of Pennsylvania.

"(3) The aggregate amount of all royalties which shall have been collected and received by it during the preceding calendar year from the Licensor under the terms of clause II hereof.

"(4) The aggregate amount of all sums of money which shall have been collected and received by it during the preceding calendar year from any and every party as damages and profits for any infringement of the above recited several Letters Patent Nos. 645,031, 691,336 and 691,337, and each of them.

[fol. 1513] "And that whenever the Licensor shall so request in writing any such written statement shall be accompanied by the affidavit of some executive officer of the Licensee having knowledge of the facts setting forth that such written statement is full, true and correct in all respects.

"VIII. That the Licensee shall, within the first fifteen days of the months of January and July in each year, commencing with July, 1907, and ending with January, 1917, pay to the Licensor the sum of One Hundred Thousand Dollars for the preceding six calendar months; and shall, within the first fifteen days of the month of March, 1917, if this obligation be not sooner terminated in the manner set forth in this clause VIII, pay to the Licensor one-third of said semi-annual sum for the period of time between January 1st and March 6th, 1917.

"And that the Licensor and the Licensee do hereby further mutually covenant and agree to and with each other that whenever the covenants and obligations of said Lehigh Portland Cement Company, Alpha Portland Cement Company, American Cement Company, Vulcanite Portland Cement Company and Lawrence Cement Company of Pennsylvania, particularly expressed in clauses III and IV of the License Agreements mentioned in clause IV hereof to be made and executed by the Licensee herein named and the last above named five Companies, separately but not jointly, shall cease to be binding upon the last above named five Companies and cease to [fol. 1514] have any force and effect in the manner particularly set forth in clauses IV of such License Agreements, then and thereupon all of the covenants and obligations expressed in this clause VIII, to be performed by the Licensee herein named, shall cease to be binding upon the Licensee herein named and cease to have any force and effect for and during any period of time thereafter, but in any such event the Licensee herein named shall not be relieved, released or

discharged from the payment of any sum of money payable to the Licensor herein named for any period of time previous thereto, according to the terms of this clause VIII.

"Provided, however, and it is hereby mutually covenanted and agreed by and between the Licensor and Licensee that if said covenants and obligations of the last above-named five Companies should cease to be binding upon less than the whole number of said five Companies in the manner particularly set forth in Clauses IV of such License Agreements, then and in any such event the covenants and obligations expressed in this Clause VIII to be performed by the Licensee herein named shall not cease to be binding upon the Licensee herein named, but the said semi-annual payment of One Hundred Thousand Dollars shall be reduced to the extent to which such of said five Compaines shall be relieved or released from the making of semi-annual payments under the terms of Clauses IV of such License Agreements, or in other words, the Licensee herein [fol. 1515] named shall not be obligated to pay the Licensor herein named for any six calendar months any amount greater than the aggregate amount which the last above-named five Companies, or such of them as shall not have been relieved or released from said covenants and obligations as aforesaid, shall be obligated to pay to the Licensee herein named for such six calendar months according to the terms of Clauses IV of such License Agreements.

"IX. And that the Licensee shall, within the last fifteen days of the month of January in each year, commencing with January, 1908, and ending with January, 1917, pay to the Licensor the royalties and sums of money mentioned in paragraphs (1), (2), (3) and (4) of Clause VII hereof which shall have been collected and received by it during the preceding calendar year, up to but not exceeding the sum of Sixty-four Thousand Dollars for such calendar year; and shall pay to the Licensor as soon as collected and received by the Licensee all royalties and sums of money mentioned in paragraphs (1), (2), (3) and (4) of Clause VII hereof, which shall have been collected and received by it for the period of time between January 1st and March 6th, 1917, not exceeding, however, the sum of Eleven Thousand and Five Hundred Dollars.

"And that the Licensor and the Licensee do hereby mutually covenant and agree to and with each other that the Licensor shall not be entitled to, and the Licensee shall not be obligated to pay [fol. 1516] the Licensor, any sum of money in excess of said sum of Sixty-four Thousand Dollars for any calendar year out of the royalties and sums of money mentioned in said paragraphs (1), (2), (3) and (4) of Clause VII hereof, and any sum of money in excess of said sum of Eleven Thousand Five Hundred Dollars for the period of time between January 1st and March 6th, 1917, out of the royalties and sums of money mentioned in said paragraphs (1), (2), (3) and (4) of Clause VII hereof.

"X. That the Licensee hereby admits and acknowledges the validity of the above recited several letters Patent Nos. 645,031

691,336 and 691,337, and each claim thereof as fully as if the same had been adjudged or decreed to be good and valid by the Supreme Court of the United States; and further hereby admits and acknowledges that the Licensor is the sole and exclusive owner of the whole right, title and interest in and to said several Letters Patent Nos. 645,031, 691,336 and 691,337, subject to the rights and exemptions reserved under said Letters Patent Nos. 691,336 and 691,337, as aforesaid and that the title of the Licensor thereto is good and valid as fully as if the same had been adjudged or decreed to be good and valid by the Supreme Court of the United States; and that the Licensee shall not, at any time while this Agreement continues in force, directly or indirectly, attack or question, or assist any other party, to attack or question the validity of said several Letters Patent Nos. 645,031, 691,336 and 691,337, or any claim therof, or the title of the Licensor thereto.

[fol. 1517] "And that the Licensee herby covenants and agrees to and with the Licensor that a clause substantially similar to this Clause X shall be inserted in every written License Agreement which shall hereafter be made and executed by the Licensee and each of its sub-licensees under said several Letters Patent Nos. 645,031, 691,336 and 691,337, and each of them.

"XI. That the Licensee shall mark, or cause to be marked, in a durable manner and in a conspicuous place, every apparatus, embodying any invention shown, described and claimed in the above recited several Letters Patent Nos. 645,031, 691,336 and 691,337, which shall be manufactured by or for it, with the word 'Patented,' or any proper abbreviation thereof, and the date of each of such of said three Letters Patent as shall cover such apparatus; and shall require every sub-licensee of it to covenant, in the License Agreement under said several Letters Patent Nos. 645,031, 691,336 and 691,337, or any of them, which shall be made and executed by the Licensee and such sub-licensee to mark, or caused to be marked, in a similar manner, every apparatus embodying any such invention which shall have been and shall be manufactured by or for such sub-licensee.

"And that the Licensor shall mark, or cause to be marked, in a similar manner, every apparatus which has been and shall be manufactured by or for it under said several Letters Patent Nos. 645,031, 691,336, 691,337 or any of them.

"XII. That the Licensor shall, within thirty days after being re-
[fol. 1518] quested to do so in writing by the Licensee, bring a suit in equity or at law against every party who shall manufacture, sell, or use any apparatus in infringement of the above recited several Letters Patent Nos. 645,031, 691,336 and 691,337, or any of them, whose name or names and residence or residences shall be stated in such written request, and shall diligently prosecute such suit to final hearing; and the Licensee shall bear and pay all costs, expenses and fees, including fees of counsel, which shall be incurred in and about the bringing and prosecution of such suit. Provided, however, that there shall be stated in every such written request sufficient

information to guide the Licensor in proving the manufacture, sale or use of the infringing apparatus and the construction thereof; and that the Licensor shall be advised by its counsel that the apparatus alleged in such written request to be an infringing apparatus is within the scope of any one or more of the claims of said several Letters Patent Nos. 645,031, 691,336 and 691,337, or any of them, not previously adjudged by any United States Circuit Court to be invalid.

"And that the Licensor shall, without any request of the Licensee, have the right to bring and prosecute any and every suit in equity or at law upon said several Letters Patent Nos. 645,031, 691,336, 691,337, or any of them, against any and every party who shall infringe said several Letters Patent Nos. 645,031, 691,336 and 691,337, or any of them; and that the Licensee shall bear and pay all costs, [fol. 1519] expenses and fees, including fees of counsel, that shall be incurred in the bringing and prosecution of every such suit.

"And that the Licensor shall have the right to bring and prosecute every suit included within the terms of this clause XII in the joint names of the Licensor and the Licensee, or in the name of either of them, as may be required by law; and that all damages, profits and costs which shall be recoverable in every such suit shall belong to the Licensee subject to the terms of this agreement.

"And that the Licensee shall have the right to, and may at its option, compromise and settle any and every suit which shall be commenced under the terms of this clause XII in such manner and upon such terms as shall be satisfactory to the Licensee, and shall also have the right to grant a release to any and every defendant in any such suit releasing every such defendant from all damages and profits recoverable in equity or at law for any infringement of said several Letters Patent Nos. 645,031, 691,336 and 691,337, and each of them, and all claims and demands for such damages and profits; and that the Licensee shall have the right to be represented by its counsel in every such suit as associate counsel with the counsel for the Licensor therein.

"XIII. That if the Licensee should at any time neglect, fail or refuse to keep, observe or perform any of the covenants herein mentioned (excepting the covenants set forth in Clause XI. hereof) to [fol. 1520] be kept, observed or performed by it, then the Licensor shall have the right to, and may at its option, serve upon the Licensee a written notice of such default, stating therein the covenant or covenants which the Licensee shall have neglected, failed or refused to keep, observe or perform; and if such default should continue for a period of thirty days from and after the service upon the Licensee of such written notice, then the Licensor may terminate and cancel this agreement by serving upon the Licensee a written notice of such termination and cancellation thereof; and such written notices may be served upon the Licensee by delivering them to any officer of the Licensee, or by enclosing them in post paid envelopes addressed to the Licensee at the last known post office address of its principal office and depositing the same in any post office in the United States to be forwarded by registered mail.

"And that if this agreement should be terminated and canceled in the manner set forth in this clause XIII, then, and immediately thereupon, all of the rights, licenses, privileges, benefits and covenants herein mentioned as available to and binding upon the respective parties to these presents, shall cease to be available to and binding upon them, or any of them, and shall not, at any time thereafter, have any force and effect; and that no such termination and cancellation of the agreement shall relieve, release or discharge the Licensor from rendering to the Licensee according to the terms of clause II hereof any written statement of the number of barrels of [fol. 1521] any such Portland Cement which shall have been sold or otherwise disposed of by or for the Licensor, and by or for every corporation at least a majority of the shares of whose capital stock issued is now owned by it, during any period of time previous thereto, or from paying to the Licensee any royalty which shall be payable according to the terms of clause II hereof on any such portland cement which shall have been sold or otherwise disposed of by or for the Licensor, and by or for every corporation at least a majority of the shares of whose capital stock issued is now owned by it, for any period of time previous thereto; and that no such termination and cancellation of this agreement shall relieve, release or discharge the Licensee from rendering to the Licensor according to the terms of clause VII hereof any written statement of any sums of money or royalties which shall have been collected and received by the Licensee any time previous thereto, or from the payment to the Licensor according to the terms of clauses VIII and IX hereof of any sum of money which shall be payable to the Licensor according to the terms of clauses VIII and IX hereof for any period of time previous thereto.

"And that if this agreement should be terminated and cancelled in the manner set forth in this clause XIII, then, and immediately thereupon, all of its right, title and interest in and to every License Agreement which shall have been made and executed by the Licensee with every sub-licensee under the above-recited several Letters Patent [fol. 1522] Nos. 645,031, 691,336 and 691,337, or any of them, and all rights, privileges, benefits, advantages, sums of money and royalties to which the Licensee herein named shall be entitled and which shall be recoverable by it thereunder shall vest in the Licensor, and the Licensee shall thereupon, by an instrument or instruments in writing requisite in law for the purpose and executed in due form of law, assign the same unto the Licensor. Provided, however, and it is hereby further mutually covenanted and agreed by and between the Licensor and the Licensee that if the right, title and interest of the Licensee in and to every License Agreement which shall have been made and executed by the Licensee with every sub-licensee under the above recited several Letters Patent Nos. 645,031, 691,336 and 691,337, or any of them, and all rights, privileges, benefits, advantages, sums of money and royalties to which it shall be entitled and which shall be recoverable by it thereunder, shall vest in the Licensor herein named, or be assigned by the

Licensee to the Licensor herein named under the terms of this clause XIII, then the Licensor herein named shall credit to the Licensee herein named any and all royalties and sums of money which it shall collect from the sub-licensees under the terms of such License Agreements for any and every period of time prior to the date when the right, title and interest of the Licensee herein named in and to such License Agreements shall vest in, or be assigned to, the Licensor herein named as aforesaid.

"In witness whereof, the Licensor and the Licensee have caused their respective corporate seals to be hereunto affixed and duly attested, and these presents to be signed by their respective duly authorized officers the day and year first above written."

[fol. 1523] GOVT. EX. No. 546

Exhibit B

License Agreement

"Agreement made this Third day of December, A. D., 1906, between North American Portland Cement Company, duly organized, incorporated and existing under the Laws of the State of New Jersey and located in the City of Jersey City, in the State of New Jersey, hereinafter called the Licensor, and The Lehigh Portland Cement Company, duly organized, incorporated and existing under the Laws of the State of Pennsylvania, and located in the City of Allentown, in the State of Pennsylvania, hereinafter called the Licensee.

"Whereas the Atlas Portland Cement Company (hereinafter called the Atlas Company) and the Licensor herein named made and executed a certain License Agreement bearing even date herewith and executed simultaneously with these presents, wherein the Atlas Company granted unto the Licensor herein named the exclusive right and license to manufacture, and to have manufactured by other parties for it, and to use, employ and practice any or all of the inventions shown, described and claimed in certain Letters Patent of the United States, No. 645,031, dated March 6th, 1900, and granted to the Atlas Company, as the assignee of Edward H. Hurry and Harry J. Seaman, for Apparatus for Burning Pulverized Fuel, jointly invented by the said Edward H. Hurry and Harry J. Seaman, and shown, described and claimed in certain other Letters Patent of the United States Nos. 691,336 and 691,337, dated January 14th, 1902, and granted to the Atlas Company, as the assignee of Rolla C. Carpenter, for Process of Feeding Fine Fuel and Appa-[fol. 1524] ratus for Feeding Fine Fuel respectively, invented by the said Rolla C. Carpenter, within and throughout the United States and the Territories and Colonial Possessions thereof, to the full end of the term for which said Letters Patent No. 645,031 are and may be granted and extended; and also the exclusive right to

grant to other parties rights and licenses to manufacture, and to have manufactured by other parties for them, and to use, employ and practice any or all of said inventions within and throughout the whole or any part of the United States and the Territories and Colonial Possessions thereof, to the full end of the term for which said Letters Patent No. 645,031 are and may be granted and extended, or for any less period of time; and wherein the Atlas Company assigned unto the Licensor herein named all damages and profits recoverable at law or in equity from any and every party for any and every infringement of said several Letters Patent Nos. 645,031, 691,336 and 691,337, and each of them, and all claims and demands for such damages and profits, upon and subject, however, to the rights and exemptions reserved under said Letters Patent Nos. 691,336 and 691,337 to the Heldeberg Cement Company for its works at Howe's Cave, New York, the Cayuga Lake Cement Company for its works at Ithaca, New York, the Great Northern Portland Cement Company for its works at Baldwin, Michigan and the Claire Portland Cement Company for its works at Claire, Michigan, as [fol. 1525] therein particularly recited, and also upon and subject to the reservation, terms, conditions and covenants therein particularly expressed.

"And whereas the Licensee is desirous of acquiring the hereinafter mentioned right and license under said several Letters Patent Nos. 645,031, 691,336 and 691,337, and is also desirous of acquiring the release hereinafter set forth, subject, however, to the terms, conditions and covenants hereinafter expressed.

"Now, therefore, this agreement witnesseth that the Licensor and the Licensee, for and in consideration of the sum of One Dollar lawful money of the United States unto each of them paid by the other, and of other good and valuable considerations unto each of them moving from the other, at or before the ensealing and delivery of these presents, the receipt whereof is hereby acknowledged, do hereby mutually covenant and agree to and with each other as follows:

"I. That the Licensor does hereby grant unto the Licensee, and every corporation at least a majority of the shares of whose capital stock issued is now owned by the Licensee, and such corporation or corporations as shall hereafter be organized to take over and which shall become the owner or owners of the plants located at Wellston, Ohio, and at Mitchell, Indiana, now owned by the Licensee, the non-exclusive right and license to manufacture, and to have manufactured by other parties for it and them, and to use, employ and practice any or all of the inventions shown, described and claimed in [fol. 1526] said several Letters Patent Nos. 645,031, 691,336 and 691,337 within and throughout the United States and the Territories and Colonial Possessions thereof, to the full end of the term for which said Letters Patent No. 645,031 are and may be granted and extended. Upon and subject, however, to the terms, conditions and covenants hereinafter particularly expressed.

"II. That the Licensor, for the considerations aforesaid, does hereby release and discharge the Licensee, and every corporation at

least a majority of the shares of whose capital stock issued is now owned by the Licensee, from all damages and profits recoverable at law or in equity from them and each of them for any and every infringement of said several Letters Patent Nos. 645,031, 691,336 and 691,337, and each of them, and from all claims and demands for such damages and profits and from all actions and causes of action for the recovery thereof.

"III. That the Licensee shall keep a full, true and accurate written account of the number of barrels of all the Portland Cement produced by the calcination of the raw materials in rotary or other cement kilns with coal, oil, gas or other fuel under said several Letters Patent Nos. 645,031, 691,336 and 691,337, or any of them, or otherwise, which shall be sold or otherwise disposed of by or for it, and by or for every corporation at least a majority of the shares of whose capital stock issued is now owned by it, and by or for such corporation or corporations as shall hereafter be organized to take [fol. 1527] over and which shall become the owner or owners of the plants located at Wellston, Ohio, and at Mitchell, Indiana, now owned by the Licensee, during each calendar year after the year 1906; and that such written account shall be open to the unrestricted examination of any officer or duly authorized representative of the Licensor at all reasonable times during business hours.

"That the Licensee shall, within the first fifteen days of January in each year, commencing with January, 1908, and ending with January, 1917, render to the Licensor a full, true and accurate written statement setting forth therein the number of barrels of all such Portland Cement which shall have been sold or otherwise disposed of by or for it, and by or for every corporation at least a majority of the shares of whose capital stock issued is now owned by it, and by or for such corporation or corporations as shall hereafter be organized to take over and which shall become the owner or owners of the plants located at Wellston, Ohio, and at Mitchell, Indiana, now owned by the Licensee, during the preceding calendar year; and that whenever the Licensor shall so request in writing any such written statement shall be accompanied by the affidavit of some executive officer of the Licensee having knowledge of the facts setting forth that such written statement is full, true and correct in all respects; and that the Licensee shall not be required to render any such written statement for the period between January 1st and March 6th, 1917.

[fol. 1528] "And that the Licensee shall, within the first fifteen days of January in each year, commencing with January, 1908, and ending with January, 1917, pay to the Licensor a royalty of four cents on each barrel of such Portland Cement in excess of eight million two hundred and fifty thousand barrels which shall have been sold or otherwise disposed of by or for it, and by or for every corporation at least a majority of the shares of whose capital stock issued is now owned by it, and by or for such corporation or corporations as shall hereafter be organized to take over and which shall become the owner or owners of the plants located at Wellston, Ohio, and at

Mitchell, Indiana, now owned by the Licensee, during the preceding calendar year; and that the Licensee, shall not be required to pay said royalty for the period between January 1st and March 6th, 1917.

"IV. That the Licensee shall, within the first fifteen days of the months of January and July in each year, commencing with July, 1907, and ending with January, 1917, pay to the Licensor the sum of forty thousand six hundred and twenty-five (40,625) dollars for the preceding six calendar months, in addition to the royalty payable by the Licensee to the Licensor according to the terms of Clause III hereof; and shall, within the first fifteen days of the month of March, 1917, if this covenant and obligation be not sooner terminated in the manner set forth in this Clause IV, pay to the Licensor one-third of said semi-annual sum for the period of time between January 1st and March 6th, 1917.

[fol. 1529] "And that the Licensor and the Licensee do hereby mutually covenant and agree to and with each other that if any claim or claims of said Letters Patent No. 645,031 should, at any time prior to January 1st, 1913, be adjudged or decreed by any United States Circuit Court of Appeals in any suit in which an appeal or writ of error shall have been taken and perfected within the time prescribed by law, or by any United States Circuit Court in any suit in which no appeal or writ of error shall have been taken and perfected within the time prescribed by law, to be invalid or to be limited in scope and by reason thereof any apparatus such as shall be used by the Licensee under the terms of this agreement might thereafter be manufactured, sold or used by any party without infringing any claim of said Letters Patent No. 645,031 not previously adjudged or decreed to be invalid in the manner aforesaid, then and in any such event all of the covenants and obligations of the Licensee expressed in clauses III and IV hereof shall continue in full force and be binding upon and be fully and faithfully performed by the Licensee for and during each calendar year between 1906 and 1913, including the payments which shall become due in January, 1913, for the preceding six calendar months under this clause IV and for the preceding calendar year under clause III hereof, and in any such event all of such covenants and obligations shall cease to be binding upon the Licensee and cease to have any force and effect for and [fol. 1530] during any period of time after the year 1912, except as to the aforesaid payments which shall become due in January, 1913; and that if any like adjudication or decree should be made or entered at any time after the year 1912, then and in any such event all of the covenants and obligations of the Licensee expressed in clauses III and IV hereof, except the aforesaid payments which shall become due in January, 1913, shall cease to be binding upon the Licensee and cease to have any force and effect for and during any period of time after the entry of such judgment, decree or mandate, and the Licensee shall not be obligated to pay to the Licensor any royalty or sum of money mentioned in clauses III and IV hereof for the remainder of the calendar year in which any such judgment, decree

or mandate shall be entered or for any period of time thereafter. Provided, however, that whenever the covenants and obligations of the Licensee expressed in clauses III and IV hereof shall cease to be binding upon the Licensee and cease to have any force and effect according to the terms of this clause IV, the Licensee shall not be relieved, released or discharged from paying to the Licensor any royalty or sum of money which shall have become payable to the Licensor according to the terms of clauses III and IV hereof for any period of time prior thereto.

"V. That the Licensee hereby admits and acknowledges the validity of said several Letters Patent Nos. 645,031, 691,336 and 691,337 [fol. 1531] and each claim thereof as fully as if the same had been adjudged or decreed to be good and valid by the Supreme Court of the United States; and further hereby admits and acknowledges that the Licensor has the exclusive rights and license above recited subject to the rights and exemptions reserved under said several Letters Patent as aforesaid, and that said rights and license of the Licensor are good and valid as fully as if the same had been adjudged or decreed to be good and valid by the Supreme Court of the United States; and that the Licensor has the lawful right to grant the right and license herein granted to the Licensee under said several Letters Patent Nos. 645,031, 691,336 and 691,337; and that the Licensee shall not, at any time while this agreement continues in force, directly or indirectly, attack or question, or assist any other party to attack or question, the validity of said several Letters Patent Nos. 645,031, 691,336 and 691,337, or any of them or any claim thereof, or the exclusive rights and license of the Licensor thereunder.

"VI. That the Licensee shall mark, or cause to be marked, in a durable manner and in a conspicuous place, every apparatus embodying any invention shown, described and claimed in said several Letters Patent Nos. 645,031, 691,336 and 691,337 which has been and shall be manufactured by or for it, and by or for every corporation at least a majority of the shares of whose capital stock issued is now owned by it, with the word 'Patented,' or any proper [fol. 1532] abbreviation therof, and the date of each of such of said three Letters Patent as shall cover such apparatus.

"VII. That, if the Licensee should at any time neglect, fail or refuse to keep, observe or perform any of the covenants herein mentioned (excepting the covenant set forth in clause VI hereof) to be kept, observed or performed by it, then the Licensor shall have the right to, and may at its option, and if then the Atlas Company should request it in writing to do so then the Licensor shall, serve upon the Licensee a written notice of such default, stating therein the covenant or covenants which the Licensee shall have neglected, failed or refused to keep, observe or perform; and, if such default should continue for a period of thirty days from and after the service upon the Licensee of such written notice, then the Licensor shall have the right to, and may at its option, and if then requested in writing by the Atlas Company to do so

shall, terminate and cancel this agreement by serving upon the Licensee a written notice of such termination thereof; and such written notices may be served upon the Licensee by delivering them to any office of the Licensee, or by enclosing them in post-paid envelopes addressed to the Licensee at its last known post-office address and depositing the same in any post-office in the United States to be forwarded by registered mail.

"And that if this agreement should be terminated and canceled in the manner set forth in this clause VII, then, and immediately [fol. 1533] thereupon, all of the rights, license, privileges, benefits and covenants herein mentioned as available to and binding upon the respective parties to these presents (exepting the release granted and set forth in clause II hereof), shall cease to be available to and binding upon them, or any of them, and shall not, at any time thereafter, have any force and effect, but no such termination and cancellation of this agreement shall relieve, release or discharge the Licensee from rendering to the Licensor any written statement for any period of time prior thereto according to the terms of clause III hereof, or from the payment to the Licensor of any royalty or sum of money which shall be payable to the Licensor for any period of time prior thereto according to the terms of clauses III and IV hereof; and no such termination and cancellation of this agreement shall impair or affect the release granted and set forth in clause II hereof.

"VIII. And that the right, title and interest of the Licensor in and to this agreement and its rights, privileges and benefits hereunder, may be assigned by it to the Atlas Company, but to no other party, and shall pass to and vest in the Atlas Company immediately upon any termination of above recited License Agreement between the Atlas Company and the Licensor herein named according to the terms thereof; and that the right, title and interest of the Licensee in and to this agreement, and its rights, license, privileges and benefits hereunder, shall not be assignable by it or by operation of law. Privided however, and it is hereby further mutually covenanted and agreed by and between the Licensor and the Licensee that if the right, title and interest of the Licensor in and to this agreement, and its rights, privileges and benefits hereunder, should at any time pass to and vest in the Atlas Company, or be assigned by the Licensor to the Atlas Company, under the terms of this Clause VIII, then the Atlas Company shall credit to the Licensor any and all royalties and sums of money which the Atlas Company shall collect from the Licensee herein named under the terms of this agreement for any period of time prior to the date when the right, title and interest of the Licensor in and to this agreement shall pass to and vest in or be assigned to the Atlas Company as aforesaid.

"In witness whereof the Licensor and the Licensee have caused their respective corporate seals to be hereunto affixed and duly attested and these presents to be signed by their respective duly authorized officers the day and year first above written."

[fol. 1534] GOVT. EX. No. 547

Exhibit C.

License Agreement

Whereas, the North American Portland Cement Company, a corporation organized and existing under the laws of the State of New Jersey, hereinafter called the Licensor, is the owner of the exclusive right to grant rights and licenses to manufacture, have manufactured, use, employ, and practice the inventions patented or covered by letters patent of the United States No. 645,031, dated March 6, 1900, granted to the Atlas Portland Cement Company, assignee of Edward H. Hurry and Harry J. Seaman, to the full end of the term for which said letters patent were granted or may be extended; and

"Whereas, ——, a corporation organized and existing under the [fol. 1535] laws of the State of —, and having its principal office at ——, hereinafter called the Licensee, is desirous of acquiring a non-exclusive license under said Letters Patent No. 645,031, and also under certain other United States Letters Patent relating to the construction and operation of rotary cement kilns under which the Licensor has the right to grant licenses, namely, United States Letters Patent to Carpenter Nos. 691,336 and 691,337 of January 14, 1902, assigned by said Carpenter to the Atlas Portland Cement Company, and the exclusive right to grant licenses under which has been granted by the said Atlas Company to the said North American Portland Cement Company;

"Now, therefore, this agreement witnesseth that the Licensor and the Licensee for and in consideration of the sum of One Dollar, unto each of them paid by the other, and of other good and valuable consideration, receipt of which is hereby acknowledged, mutually covenant and agree to and with each other as follows:

"First. The Licensor hereby grants unto the Licensee the non-exclusive right and license to manufacture or to have manufactured for it, and to use, employ and practice throughout the United States and its Territories and Colonial possessions any and all of the inventions patented and covered in and by said Letters Patent Nos. 645,031, 691,336, and 691,337, and any reissue thereof, to the full end of the term for which said Letters Patent No. 645,031 are granted, [fol. 1536] or until the earlier termination of this license in the manner hereinafter provided, or until the termination of the obligation of the Licensee to pay royalty hereunder as hereinafter provided.

"Second. The Licensor hereby waives all claims for profits and damages due said Licensor from the Licensee by reason of past infringement by the Licensee of said Letters Patent Nos. 645,031, 691,336, and 691,337, all claims for recovery of such profits and damages having been assigned to the Licensor by the said Atlas Portland Cement Company and being now owned by the Licensor. It is, however, understood and agreed that the above waiver by the

Licensor of any claim or claims against the Licensee for such profits and damages shall continue only so long as the Licensee fully observes all the terms and conditions hereof; and if at any time prior to January 1st, 1913, the rights and privileges of the Licensee under this license shall be terminated by the Licensor as hereinafter provided, then in such event such claim for profits and damages, accruing prior to the date hereof, shall come into full force and effect and the Licensor shall have the same right to sue for and collect the same as it would have if this license agreement had not been made. It is, however, understood and agreed that nothing herein contained is intended as a waiver on the part of the Licensee of the right to the operation or pleading of the statute of limitation applicable to the recovery of profits and damages for infringement.

[fol. 1537] "And it is furthermore understood and agreed that, in the event of the termination of the rights and privileges of the Licensee under this license agreement, should the Licensor sue for and recover from the Licensee any profits or damages, or both, for the infringement of said Letters Patent No. 645,031, 691,336 or 691,337, any royalties which may have been paid by the Licensee to the Licensor shall act as a credit against any such recovery for profits or damages, or both, as and to the extent hereinafter provided.

"The Liability in point of time for back profits and damages shall not exceed six years, and the payment of one year's license fees shall reduce the term recoverable for back profits and damages one-sixth, and the payment of two years' license fees shall reduce the term recoverable in like manner, and so on during the term of the agreement.

"Third. The Licensee hereby agrees to keep a full, true and accurate written account of the number of barrels (380 lbs. each) of all the Portland cement produced by or for it in rotary kilns with pulverized carbonaceous fuel under said letters patent No. 645,031, or under any other letters patent under which the license is granted, which shall be used, sold and shipped or otherwise disposed of, by or for it (not including sales for future delivery), during each half calendar year, from and after January 1, 1907; that such written account shall be open to the examination of any officer or duly [fol. 1538] authorized representative of the Licensor, at all reasonable times during business hours; that such written account shall be rendered as hereinafter provided to the Licensor during the term of this license, showing the number of barrels of cement as aforesaid which shall have been used, sold or disposed of by or for the Licensee during the preceding half calendar year; that whenever the Licensor shall so request in writing, any such account shall be verified by the sworn affidavit of some executive officer of the Licensee having knowledge of the facts recited therein.

"The Licensee agrees to pay to the Licensor a royalty of one and a half cents ($.01½) on each such barrel of Portland cement, used, or sold and shipped or otherwise disposed of by or for it as aforesaid, commencing January 1st, 1907 (except that if this Licensee shall use, sell, or cause to be sold any such cement obtained from any

of the six companies now owning the capital stock of the Licensor and now having licenses under the letters patent enumerated herein, or from any concern to which this Licensor has since its organization granted or may hereafter grant a license under said patent No. 645,031 or the other patents above specifically enumerated, and made by such company or concern under such license, this Licensee shall not be required to pay any royalty on such cement; but all such cement shall be reported in the written accounts of this Licensee and exemption from royalty thereon shall be claimed in said [fol. 1539] accounts); such royalty to be paid and the aforesaid written accounts to be rendered within the first fifteen (15) days of January and July of each year during the term of this license for such cement so used or shipped during the preceding calendar half year; accounts to be rendered and royalties to be paid for 1907, however, as follows: within sixty days from the date of execution of this agreement the Licensee is to render the account and pay the royalties above provided for on all such cement used or shipped by it between January 1st, 1907, and the date of execution hereof and within the first fifteen (15) days of January, 1908, to render the account and pay the royalties above provided for on all such cement used or shipped by it during the balance of 1907. And the Licensee agrees within one month after the expiration of said letters patent No. 645,031, or of the obligation of the Licensee to pay royalty hereunder, to render said account and pay royalties due as above provided for all such cement used or shipped by it between the last preceding January 1st or July 1st and the date of such expiration.

"Fourth. The royalties as provided in the preceding section, unless reduced in amount as hereinafter set forth, shall be due and payable by the Licensee absolutely for the period to and including January 1, 1913; if prior to that date any claim of said Letters Patent No. 645,031 or of any other United States letters patent above enumerated shall have been finally adjudged or decreed by [fol. 1540] any United States Circuit Court of Appeals or (if no appeal or writ of error is taken or perfected) by any United States Circuit Court, to be invalid or limited in scope, whereby the Licensee's apparatus and operation shall infringe no claim of any of such letters patent, not so *ad*adjudged or decreed invalid, the Licensee shall be relieved and discharged from the rendering of any account and payment of any royalties under this agreement accruing subsequent to January 1, 1913. If no claim of any of such letters patent is so adjudged or decreed to be invalid or limited in scope, the said accounts and royalties under this agreement shall be due and payable by the Licensee during the existence of this agreement; but if at any time subsequent to January 1, 1913, any claim of any of such letters patent shall be so finally adjudged or decreed to be invalid or limited in scope, whereby the Licensee's apparatus and operations shall infringe no claim of any of such letters patent, not so adjudged or decreed to be invalid, the Licensees shall be relieved and discharged from the rendering of any account and payment of any royalties under this agreement accruing subsequent to

the entry of the final judgment, decree or mandate so adjudging any such claim to be invalid or limited in scope.

"Fifth. The Licensee hereby admits and acknowledges that said letters patent No. 645,031 and each claim thereof are good and valid; and that the Licensor has the exclusive rights and license above recited; that the said rights and license of the Licensor are [fol. 1541] good and valid; that the Licensor has the lawful right to grant the license herein granted to the Licensee; and the Licensee covenants and agrees that it will not at any time during the existence of this agreement directly or indirectly attack or question the validity of said letters patent No. 645,031, nor any claim thereof, nor the scope thereof, nor the exclusive rights and license of the Licensor thereunder.

"Sixth. The Licensee agrees to mark or cause to be marked in a durable manner and in a conspicuous place every apparatus embodying any invention patented or covered by the said letters patent No. 645,031, or by any other letters patent included in this agreement, which has been or shall be manufactured by or for it, with the word "Patented," or any proper abbreviation thereof, and the date of each said letters patent covering such apparatus.

"Seventh. If the Licensee shall at any time neglect, fail or refuse to keep, observe, or perform any of the covenants herein required to be kept, observed or performed by it, then the Licensor shall have the right to, and may at its option, serve upon the Licensee a written notice of such default, stating therein the covenant or covenants which the Licensee shall have neglected, failed or refused to keep, observe or perform; and if such default shall continue for a period of thirty days from and after the service upon the Licensee of such written notice, then the Licensor shall have the right to and may at [fol. 1542] its option, terminate and cancel the rights and privileges of the Licensee under this agreement by serving upon the Licensee a written notice of such termination and cancellation; and such written notices may be served upon the Licensee by delivering them to any officer of the Licensee or by enclosing them in postpaid envelopes addressed to the Licensee at its last known post-office address, and depositing the same in any post-office in the United States to be forwarded by registered mail; and upon such service of any such last mentioned notice, the rights and privileges of the Licensee hereunder shall forthwith cease and terminate.

"Eighth. It is agreed that the right, title and interest of the Licensor in and to this agreement may be assigned by it to the Atlas Portland Cement Company, but to no other party; and that the right, title and interest of the Licensee in and to this agreement shall not be assignable by it or by operation of law; except that if the Licensee shall at any time voluntarily or by operation of law sell or transfer its entire Portland cement business and all of its Portland cement works to a single person, firm or corporation, then said transferee shall, provided it first notify the Licensor in writing that it accepts and

agrees to the covenants, terms and conditions of this License agreement, be substituted in the place and stead of the Licensee. It is, however, hereby further agreed that in the event of a bona fide judicial sale of the property of the Licensee taking place during the existence of this agreement, the purchaser at any such judicial sale [fol. 1543] shall take the property free from this license agreement and undertakings of the Licensee herein and shall occupy the same position as regards the Licensor or the letters patent included within this agreement as though this agreement had not been made; or said purchaser may at his option, by notifying the Licensor in writing to that effect within thirty (30) days after the confirmation of any such sale, be substituted in the place and stead of the Licensee and be entitled to all the privileges and benefits and be bound by all the obligations of the Licensee herein.

"It is agreed that if the right, title and interest of the Licensor in and to this agreement shall at any time be assigned by the Licensor to or become vested in the Atlas Portland Cement Company, the Licensee shall be immediately notified in writing by the Licensor of that fact, whereupon the Atlas Portland Cement Company shall stand in the place and stead of the Licensor as a party to this agreement, and all royalties as provided in the Third Clause hereof, accruing subsequent to said notice shall be payable to the Atlas Portland Cement Company.

"Ninth. The Licensor agrees that if at any time during the term of this agreement it shall reduce the rate of royalty to any other licensee below that provided herein, or shall otherwise grant to any other licensee any special privileges in connection with its license, the Licensee hereunder shall be entitled to the same reduction in [fol. 1544] royalty and to the same special privileges, during the continuation of the same to such other licensee, provided, however, that the expression 'other licensee' shall not apply to or include any of the six companies now owning the capital stock of the Licensor and which are licensees under said Letters Patent No. 645,031, or any other licensee or licensees to whom a license has been granted under said patent No. 645,031 previously hereto.

"Tenth. The Licensor agrees at its own expense, within six months of the date hereof, to institute suit for infringement of said letters patent No. 645,031, against one or more unlicensed manufacturers who may infringe said letters patent, unless the Licensor shall already have commenced such suit or suits, and to prosecute one or more of such suits to final hearing as vigorously as possible, and in the event of succeeding in such suit or suits so prosecuted to proceed vigorously against all other infringers. The Licensor further agrees that it will during the license herein granted at its own expense defend the Licensee in any and all suits for infringements of patents heretofore issued (except patents covered by Paragraph Eleventh hereof) that may be brought against said Licensee for the manufacture or use of apparatus for burning cement in rotary kilns by means of pulverized carbonaceous fuel, and pay all judgments

given in such suits for profits and damages for such infringement; provided, however, that the Licensor shall not be obligated or required to pay expenses for so defending said Licensee and judgments [fol. 1545] for such profits and damages to an aggregate amount greater than the aggregate amount of royalties which shall have been received from the Licensee under this agreement.

"Eleventh. The Licensor hereby agrees that if it now or hereafter owns any other United States letters patent relating to the construction and operation of rotary cement kilns, or the right to grant licenses under any such patent, it will within ninety days notify the Licensee in writing of such fact and will in like manner and within said period tender to the Licensee a license under such patent upon such terms as will be reasonably sufficient, in view of the circumstances and contingencies of each case, to compensate the Licensor for its obligations and outlay involved in acquiring and maintaining the right to grant such license to this Licensee or to compensate the Licensor for the appropriate share assignable to this Licensee in the obligations and outlay involved in acquiring and maintaining title to such patent; the form of such license to correspond as closely as feasible to this license and the duration of such license to be until the expiration of such patent, but at the option of the Licensor to be terminable at the expiration or termination of the obligation of the Licensee to pay royalty under this agreement or at any subsequent time; the Licensor agreeing that this Licensee shall be entitled to the most favorable terms and to all of the privileges that are given under such patent by the Licensor to any licensee thereunder other than [fol. 1546] the six companies and other previous licensees above referred to in Paragraph Ninth hereof. In case the Licensee fails within ninety days after tender of the proposed license agreement to execute and deliver the same to the Licensor, the obligation of the Licensor to grant any license to this Licensee under the patent under which such license was offered shall thereupon cease and terminate.

"In witness whereof, the Licensor and the Licensee have caused their respective corporate seals to be hereunto affixed, and duly attested, and these presents to be signed by their respective duly authorized officers, this 31st day of December, 1907.

In the presence of:—— ——.

"State of New York,
County of New York, ss:

"On the — day of ——, 1908, before me personally came —— ——, to me known, who, being by me duly sworn, did depose and say that he resided in ——; that he is the —— of the North American Portland Cement Company, one of the corporations described in and which executed the above instrument; that he knew the seal of said corporation; that the seal affixed to said instrument was said corporate seal; that it was so affixed by order of the Board of Directors of said corporation, and that he signed his name and the name of said corporation thereto by like order."

[fol. 1547] GOVT. Ex. No. 548

Exhibit D.

Articles of Agreement

of the

Association of Licensed Cement

Manufacturers

"Agreement, made this 30th day of December, 1907, by and between the North American Portland Cement Company, a New Jersey corporation, hereinafter called the North American Company, the Atlas Portland Cement Company, a Pennsylvania Corporation, hereinafter called the Atlas Company, the Lehigh Portland Cement Co., a Pennsylvania corporation, hereinafter called the Lehigh Company, the Alpha Portland Cement Company, a New Jersey corporation, hereinafter called the Alpha Company, the American Cement Company, a New Jersey corporation, hereinafter called the American Company, the Vulcanite Portland Cement Company, a New Jersey corporation, hereinafter called the Vulcanite Company, the Lawrence Cement Company of Pennsylvania, a Pennsylvania corporation, hereinafter called the Lawrence Company, the Dexter Portland Cement Company, a Pennsylvania corporation, hereinafter called the Dexter Company, the Pennsylvania Cement Company, a Pennsylvania corporation, hereinafter called the Pennsylvania Company, the Buchhorn Portland Cement Company, a New Jersey corporation, hereinafter called the Buckhorn Company, the Penn-Allen Portland Cement Company, a Pennsylvania corporation, hereinafter called the Penn-Allen Company, the Nazareth Cement Company, a Pennsylvania corporation, hereinafter called the Nazareth Company, the Catskill Cement Company, a New Jersey corporation, hereinafter called the Catskill Company; and such other companies as may now or hereafter sign this agreement and become parties thereto, as hereinafter provided.

"Whereas, the parties hereto are actively engaged in the manu-

facture and sale of Portland cement, and are desirous of forming an association for the purpose of discussing the various questions of interest to the industry arising from time — of exchanging views [fol. 1548] as to the best methods of manufacturing and of extending and developing the business; of investigating and assisting in the improvement of methods and devices for the manufacture and handling of Portland cement by its members; of establishing an association laboratory if thought best, which is to be so equipped that tests can be made on mechanical, chemical and technical matters for the association, or special tests may be made for any member of the association by arrangement with the Board of Managers; of protecting its members, so far as may seem best, from attack under patents or securing to them protection thereunder; of establishing publicity, traffic, mechanical and other departments and appointing committees for the above purposes, and also of doing all things incidental and conducive to the attainment of the above and similar objects; and

"Whereas, the North American Company controls letters patent of the United States No. 645,031, dated March 6th, 1900, granted to the Atlas Company, assignee of Edward H. Hurry and Harry J. Seaman, and Nos. 691,336 and 691,337, dated January 14, 1902, granted to the Atlas Company, assignee of Rolla C. Carpenter, and has the exclusive right to grant sub-licenses thereunder, and may acquire the right to grant licenses under other patents;

"Now, therefore, in consideration of the mutual promises and undertakings herein set forth, and of the grant by the North American Company of a license under said letters patent No. 645,031, [fol. 1549] 691,336 and 691,337, or under other letters patent controlled by it, to each of the signators, hereto, and the sum of One Dollar each to the other paid, the receipt whereof is hereby acknowledged, it is agreed as follows:

"First. That the parties hereto, including all parties who may hereafter become parties hereto, do hereby and under this agreement associate themselves together on the terms and conditions hereinafter set forth as the 'Association of Licensed Cement Manufacturers.'

"Second. Each of the parties hereto shall annually appoint, from its executive officers, one (1) person who shall be its representative in said Association, and who shall hold office for the period of (1) year, or until his successor is appointed.

"Written notice shall be filed with the Secretary of the Association by each member, of the appointment of its representative, who shall not be authorized to act as such representative until such notice is filed and who shall remain such representative until notice appointing a new representative shall be filed by such member.

"Said Association shall hold its first meeting at Room 1344, No. 30 Broad Street, in the City and State of New York, on the 9th day of January, 1908, and the term of office of the first representatives of the members of said Association shall commence from said date; and each and any of the members now or hereafter parties hereto

shall fill any vacancy arising from the death or resignation of its [fol. 1550] representative in said Association or otherwise; each member's representative may appear and vote in person, or such member may appear and vote by proxy who shall be an executive officer of said member, appointed by written proxy duly executed by such member, and the vote of such representative or proxy shall be binding upon the party he represents. Meetings of said Association shall be held on the Mondays preceding the second Tuesdays in the months of March, June, September and December, and the hour and place of meeting shall be fixed by the Board of Managers as hereinafter stated. Special meetings may be called as provided in the By-Laws adopted by the Board of Managers.

"Third. At all meetings of the Association each member thereof shall be entitled to one vote; and a majority of all members in good standing shall constitute a quorum.

"Fourth. The management and control of all affairs and property of the Association is hereby vested in a Board of Managers having fourteen (14) members who shall be selected as follows at the meeting of the Association to be held on January 9th, 1908, and thereafter at the regular March meeting held in each year.

"The North American Company shall be entitled to appoint one member of said Board of Managers; and each of the following companies shall be entitled to appoint one member of said board, to wit: The Atlas Company, Lehigh Company, Alpho Company, American Company, Vulcanite Company and the Lawrence Company; such [fol. 1551] appointments in each instance to be made in writing under the seal of the company making the same, and to be filed with the Secretary of the Association. In case any one or more of the six companies last above mentioned shall cease to be a member of the Association, the number of managers to be appointed by the North American Company shall correspondingly be increased; and in case the North American Company shall cease to be a member of the Association, the number of managers it is entitled to appoint shall be appointed by a majority of the six companies above specifically mentioned then in good standing as members hereof. The other seven members of the Board of Managers shall be elected by the other members of this Association in good standing by a majority of their votes, to be cast in writing at the annual meeting. The members of the Board of Managers shall hold office for one year or until their successors shall be appointed or elected as above provided.

"Nine members of said Board shall constitute a quorum. The Board is hereby authorized by the affirmative vote of a majority of its members to appoint committees, establish necessary departments, control and manage the affairs and property of the Association, and do whatever in its judgment may be necessary to generally carry out the purposes of the Association.

"In case of the resignation, death or inability to act of any one [fol. 1552] of the managers who was appointed as above provided, the company appointing such manager shall be entitled to fill his

place for the remainder of his term by filing with the Secretary of the Association the written appointment of a new manager, and in the case of similar vacancy caused by the resignation, death or inability to act of any manager who was elected as above provided, such vacancy shall be filled for the remainder of his term by the majority vote of the remaining managers representing the members entitled to elect the manager whose vacancy is to be filled.

"Fifth. The Board shall elect from its members the following officers of the Association, and fix their compensation, if any, a president, vice-president, secretary and treasurer, and it may provide for the appointment or election of such other officers as it may from time to time designate. One person may hold the offices of secretary and treasurer. Said Association shall have an office in the City of New York, State of New York, or at such other place as the Board may from time to time designate, and shall hold its regular meetings at such office, or at such other place as shall be previously designated by said Board. The Board of Managers shall, by an affirmative vote of a majority thereof, make such by-laws as shall be deemed necessary to carry out the powers conferred upon it.

"Sixth. The said Board is authorized and hereby empowered to [fol. 1553] employ, if desirable a general manager and any other assistants to carry on the work entrusted to it and perform its obligations hereunder, and may require from its officers, their assistants and agents, sufficient and proper security for the performance of the duties to be severally performed by them.

"Seventh. The said Board is authorized and hereby empowered to expend during the life of this agreement such sums not to exceed Fifty Thousand Dollars ($50,000) per calendar year as may be needed to carry out the work entrusted to it, and to cover the necessary expenses of the Association, the said Board and the various other committees and departments which may be appointed or established as aforesaid. All expenditures of funds for any purpose are to be made under the order of the said Board.

"Said fund for the purposes of the Association as aforesaid shall be provided as follows: First, by a subscription from the North American Company which shall be equivalent to twenty (20) per cent of the amount required. Second, by dues from the members of the Association, which shall be equivalent to eighty (80) per cent. of the amount required and which shall be determined by the said Board and charged pro rata against units of fifty thousand (50,000) barrels of output of Portland cement of all the members hereof, including the Atlas, Lehigh, Alpha, American, Vulcanite and Lawrence Cement Companies. In case the North American Company hereafter engages in the manufacture and sale of Portland [fol. 1554] cement, its subscription shall be reduced to ten per cent. (10%) and the dues from the members of the Association shall be increased to ninety (90%) per cent.; but the North American

Company shall in that case also pay its proportion of said dues according to its pro rata of output.

"Assessments for subscription and dues may, commencing on or after April 1st, 1908, be voted and levied by the Board of Managers either quarterly or at less frequent intervals (the total assessment for any calendar year, however, not to exceed Fifty Thousand Dollars), and shall be payable by each member within thirty (30) days after written notice from the Board. The apportionment of each assessment shall be based upon the production of Portland cement by each member during the twelve months immediately preceding the date of such assessment, as set forth in written reports to be filed by each member as hereinafter provided, commencing from December 1st 1907, or as otherwise ascertained; and in case any assessments are levied prior to December 1st, 1908, the apportionment shall be based upon the production of the members since December 1st, 1907, as shown by such reports or as otherwise ascertained. Each member of this Association shall within twenty (20) days after the first of each month, commencing with January 1st, 1908, file with the Secretary of the Association a sworn statement giving the total amount of Portland cement produced at all [fol. 1555] plants of such member, and also of the total amount of Portland cement shipped therefrom during the preceding month. In case of the failure of any member to file such report within such time, the Association shall be entitled forthwith to examine the books of said company to ascertain the amount of such production and shipment, the expense of such examination being chargeable to such member; and the Association shall at all reasonable times have the right to examine the books of any member to verify any reports rendered. The failure of any member to render such reports within the time above provided or to make payment of assessments when due shall be sufficient cause for the termination of the membership of such member by action of the Board as hereinafter provided.

"Eighth. If any party hereto shall fail to perform its agreements and undertakings hereunder, its membership in the Association shall be terminated and all its interest in the Association and its assets shall cease, and its rights hereunder shall be canceled, provided, however, that before any such termination and cancellation, said party shall be cited to appear before the Board of Managers at a certain time and place and show cause why its membership should not be terminated and its rights and interests should not be forfeited, and after such hearing the said Board may terminate the membership and cancel all rights of the party hereunder by giving thirty (30) days written notice to that effect, and such action of said Board [fol. 1556] shall, by an affirmative vote of a majority thereof, be final and conclusive.

"Ninth. It is furthermore mutually agreed that if any party hereto shall cease to be a licensee under letters patent Nos. 645,031, 691,336 and 691,337, by reason of the cancellation or termination

of its license by act of the licensor under the terms and conditions thereof, and shall cease to have the right to use and practice the invention of said patents, said party shall forthwith cease to be a party hereto, and all its interests in the assets of the Association shall cease upon a written declaration to that effect by the Board of Managers.

"Tenth. A declaration of cancellation as above provided shall terminate all rights, benefits and privileges of said offending party under this agreement and all its interest in the Association and the assets thereof, and shall relieve each and all of the other parties hereto from all duties, liabilities or obligations hereunder to said offending party, and the several parties hereto then remaining shall stand to said offending party in the same position and shall have the same rights as against said offending party as if this contract had not been made, and said offending party had at no time been a party hereto, except that the Association may nevertheless be entitled to receive, sue for and collect all assessment payable for the period up to the date of cancellation or termination of the membership of such offending member; but such termination shall not op- [fol. 1557] erate as to said offending party to in any manner affect any obligations under these presents as between the parties remaining, and as between them it shall continue in force as if said offending party had at no time been a party hereto.

"Eleventh. Any person or concern actively engaged in the manufacture of Portland cement and who also is a licensee in good standing of the North American Company under United States letters patent No. 645,031, 691,336 and 691,337, or under other letters patent now or hereafter owned or controlled by the North American Company, may be elected a member of this Association by the Board of Managers hereof by a two-third vote of all its members, and such person or concern shall then become a member hereof upon signing this agreement or a duplicate copy hereof.

"Twelfth. This agreement and the mutual covenants and agreements herein contained shall continue in force so long as the obligation to pay royalty to the North American Company under its licenses under the Hurry & Seaman and Carpenter patents, above recited, remains in force, as set forth in the form of license agreement hereto annexed, dated September 1, 1907, which said form has been executed by the Dexter Company, under date of October 1st, 1907, by the Pennsylvania Company, under date of October 15th, 1907, by the Buckhorn Company, under date of September 30, 1907, by the Penn-Allen Company, under date of September 28th, [fol. 1558] 1907, by the Nazareth Company, under date of October 20th, 1907, and the Catskill Company, under date of November 21st, 1907; and shall terminate upon the termination of such obligation.

"Upon the termination of this agreement and the dissolution of the said Association for any cause, the moneys and assets of any kind remaining after the payment of all proper obligations con-

tracted in behalf of the parties hereto by the Board of Managers or officers, shall be distributed to the then members of the Association pro rata in the proportion of the amounts contributed by each.

"In witness whereof, the several parties hereto have hereunto affixed the signatures of their corporations, by their officers thereunto duly authorized, or by their duly accredited representatives, this 30th day of December, 1907.

In presence of: Frederick S. Duncan.

[fol. 1559] GOVT. Ex No. 549

Exhibit E.

"Agreement made this thirteenth day of January, 1909, between North American Portland Cement Company, a New Jersey corporation, hereinafter called the Licensor, and The Atlas Portland Cement

Company, a Pennsylvania corporation, Lehigh Portland Cement Company, a Pennsylvania corporation, Alpha Portland Cement Company, a New Jersey corporation, American Cement Company, a New Jersey corporation, Vulcanite Portland Cement Company, a New Jersey corporation, Lawrence Cement Company of Pennsylvania, a Pennsylvania corporation, Pennsylvania Cement Company, a Pennsylvania corporation, Penn-Allen Portland Cement Company, a Pennsylvania corporation, Nazareth Cement Company, a Pennsylvania corporation, Catskill Cement Company, a New Jersey corporation, Bath Portland Cement Company, a Pennsylvania corporation, Glens Falls Portland Cement Company, a New York corporation, Phœnix Cement Company, a Pennsylvania corporation, Edison Portland Cement Company, a New Jersey corporation, Whitehall Portland Cement Company, a Pennsylvania corporation, Northampton Portland Cement Company, a Delaware corporation, and such other Portland Cement Companies as may now or hereafter be Licensees under the below mentioned patents and sign this agreement and become parties hereto, hereinafter called the Licensees.

"Whereas, the Licensor has licensed each of the Licensees to use, employ and practice, in the manufacture of Portland Cement, any and all of the inventions patented and covered in and by United [fol. 1560] States Letters Patent No. 645,031 of March 6, 1900, and Nos. 691,336 and 691,337, both of January 14, 1902, the exclusive right to grant licenses under which is owned by the Licensor.

"And whereas it is the desire of all the parties hereto that the right and license to manufacture Portland Cement by the use of the inventions set forth in the above recited patents shall be exercised during the term of this agreement upon the terms and conditions herein set forth, in addition to the terms and conditions set forth in the License Agreements heretofore made between the Licensor and each of the Licensees.

"Now, therefore, this agreement witnesseth that in consideration of the premises and the sum of One Dollar by each to the other in hand paid, the receipt of which is hereby acknowledged, and the mutual covenants herein contained, the parties named and referred to herein as Licensees do each and all severally covenant and agree, mutually with the Licensor as follows:

"First: That during the continuance of this agreement each Licensee (anything in its license agreement heretofore made to the contrary notwithstanding) shall have and enjoy the non-exclusive right and license to manufacture and to have manufactured for it and to use, employ and practice any and all of the inventions covered by the said Letters Patent Nos. 645,031, 691,336 and 691,337, upon and subject to the terms, conditions and covenants expressed in its license heretofore made, but only within the limitations herein [fol. 1561] specified where the same are applicable and not otherwise, that is to say, in the production of Portland Cement sold or disposed of by such Licensee only in full compliance with the minimum price provisions set forth in Schedule 'A,' hereto annexed and made a part hereof, and in compliance with each and all the other terms,

conditions and provisions of said Schedule 'A,' which said Licensee hereby covenants to observe in all respects and particulars; it being expressly understood and agreed that any use of any of said inventions by such Licensee during the continuance of this agreement by a sale of Portland Cement in violation of such minimum price provisions or other failure to observe any limitation of this license shall be outside the scope of the license privilege of such Licensee and an infringement of the patent covering the invention so practiced and subject such Licensee to the liability hereinafter provided, as liquidated damages and not as a penalty, for such infringement.

"And to insure the due observance thereof, each of the parties hereto hereby agrees that it will not, except as provided herein or in said Schedule 'A,' directly or indirectly sell, deliver, or otherwise dispose of or be interested in the sale, delivery or other disposition of any Portland Cement covered hereby, or offer to sell, deliver or otherwise dispose of any such cement otherwise than in full compliance with the terms and conditions of this Agreement and of said Schedule 'A'; and will not, except as in said Schedule 'A' expressly [fol. 1562] provided, allow to any consumer, dealer, or to any purchaser whatever, any commission, discount, rebate or reduction from any prices fixed in said Schedule 'A' except in settlement with insolvent debtors for such cement previously sold and will not, directly or indirectly, grant or give any bonus or gratuity in connection with the sale or other disposition of such cement, except, however, that a prospective purchaser requesting a sample for test may be given a sample not exceeding one barrel.

"Second: That whenever in the judgment of the Board of Directors of the Licensor it is desirable in order to prevent the parties hereto being deprived of the full benefit of the practice of said inventions by reason of quotations or sales of Portland Cement for delivery within the territory covered hereby by persons or concerns not parties hereto, the Licensor may by written notice to each party hereto reduce the minimum prices generally for any one or more delivery points or sections set forth in Schedule 'A' aforesaid, or for any one or more specific jobs, such reduction to remain in force during the period named in said notice and during any further period or periods named in any further written notice or notices which shall be given by the Licensor to each party hereto. Upon the termination of such period or periods of reduction of prices, the minimum prices set forth in Schedule 'A' shall forthwith be restored and remain in full force and effect.

[fol. 1563] "Third. That the Licensor may, upon the unanimous vote of all of the members of its Board of Directors who are present at a meeting of such Board duly called in writing for the purpose of considering and acting upon changes in the terms and provisions of Schedule A (provided always the members present at such meeting constitute a quorum), change or add to any of the prices, terms and provisions of said Schedule A; and whenever any change or addition shall be so made a copy of such change or addition shall be

forthwith given by the Licensor to each and all of the Licensees, and thereupon said Schedule A as thus changed or added to shall be binding upon all the parties hereto with the same force and effect as if said changes or additions had originally been incorporated in said Schedule A.

"Fourth. That if any Licensee should be held by the arbitrator hereinafter mentioned to have in any manner, directly or indirectly, violated any of the limitations, terms, conditions and covenants of this agreement or of said Schedule 'A,' or to have, directly or indirectly, done any act or thing in violation thereof, then such Licensee shall forthwith pay to the Licensor, as liquidated damages and not as a penalty, a sum amounting to not less than five cents per barrel and not exceeding fifty cents per barrel on the entire amount of Portland cement sold or otherwise disposed of by such Licensee in violation of any such limitations, terms, conditions and covenants of this agreement or of said Schedule 'A' as determined by the [fol. 1564] arbitrator hereinafter mentioned, and such damages shall be paid in case of quotations or offers to sell as well as in cases of actual sales of Portland cement in violation of any such limitations, terms, conditions or covenants. But the amount of damages to which any Licensee shall be liable under any and all the provisions of this agreement shall not in any event exceed in the aggregate for any one calendar year a sum equal to ten times the amount of the total original deposit of such Licensee as specified in Paragraph Sixth of this agreement.

"Fifth. That within fifteen days from and after the date of these presents an arbitrator shall be elected by the Board of Managers of the Association of Licensed Cement Manufacturers to serve until his appointment is revoked or his resignation is accepted by said Board, in which case the said Association shall elect a new arbitrator by a similar vote. In case the said Association fails to elect an arbitrator as above provided or to fill any vacancy existing in said office for a period of thirty days after written notice from the Licensor, then the Licensor may by written notice to each of the other parties hereto, appoint an arbitrator who shall perform all the duties and have all the privileges and powers of the arbitrator herein provided for until the election of an Arbitrator by said Association as herein provided.

"Whenever any party to this agreement shall be charged with the violation in any manner of any of the limitations, terms, con- [fol. 1565] ditions and covenants of this agreement or of said Schedule 'A,' then such arbitrator shall afford such accused and also any accusing party or parties an opportunity to be heard with regard to such charge; and such arbitrator may of his own volition notify any party to this agreement to appear before him at a date to be fixed by such arbitrator for a hearing with respect to any alleged violation by such party of any of the limitations, terms, conditions and covenants of this agreement or of said Schedule 'A,' and such party and any accusing party shall then have an opportunity

to be heard by such arbitrator with respect thereto; and the arbitrator is hereby given full power and authority to hear any and all of the parties and to determine whether or not any such party shall have violated any of the limitations, terms, conditions and covenants of this agreement or of said Schedule 'A' and to determine the amount of liquidated damages payable therefor as herein provided; and every finding and determination of such arbitrator in every such case shall be final and conclusive.

"Sixth. That each Licensee shall deposit with the Licensor a sum of money equal to one cent per barrel on all Portland Cement sold and shipped by such Licensee during the year 1907, and in case such sum is less than five thousand dollars, then the sum of five thousand dollars ($5,000), which amount shall be payable as fol lows:

"One-fifth thereof within ten days after the execution and de- [fol. 1566] livery of this agreement; one-fifth thereof on the first Monday of April, 1909; one-fifth thereof on the first Monday of July, 1909; one-fifth thereof on the first Monday of October, 1909, and the remaining one-fifth thereof on the first Monday of January, 1910.

"All sums of money which shall be so deposited with the Licensor shall be placed at interest by the Licensor with such Banks or Trust Companies as shall be selected by the Board of Managers of the Association of Licensed Cement Manufacturers; and the Licensor and the Association of Licensed Cement Manufacturers shall not be responsible for any loss arising by any failure or insolvency of any Bank or Trust Company which may be so selected.

"In the event that such arbitrator shall at any time find or determine that any Licensee shall have violated any of the limitations, terms, conditions and covenants of this agreement and of said Schedule 'A,' or shall have done any act or thing in violation thereof, and by reason thereof shall have become liable to pay any sum of money to the Licensor according to the terms of this agreement, then the Licensor may withdraw from the amount of the said deposit or deposits of such Licensee such sum of money as shall be sufficient for the payment of the amount which shall be so payable by such Licensee to the Licensor under the terms of this agreement; and within thirty days after the Licensor shall have notified such Licensee in writing of the withdrawal from any such [fol. 1567] deposit or deposits of such sum of money, such Licensee shall pay to the Licensor an amount sufficient to make up the total amount of the original deposit or deposits.

"In the event of the failure of such Licensee to make such payment to the Licensor within said thirty days the Licensor shall be entitled to forthwith appropriate to its own use, as liquidated damages and not as a penalty, the whole of the balance of such deposit or deposits of such Licensee, and may also, at its option, suspend all privileges of such Licensee under this agreement and under the original license of such Licensee until such Licensee shall make

good the full amount of its original deposit or deposits; and the Licensor shall also have and may pursue every other remedy available to it for the collection of the full amount of the required deposit or deposits and other sums of money payable by such Licensee to the Licensor under the terms of this agreement and for the protection or enforcement of the rights of the Licensor hereunder.

"The interest payable by any Bank or Trust Company on the deposits made by each Licensee as aforesaid shall be paid by the Licensor to such Licensee between the first and fifteenth days of January of each year, but the Licensor shall in no event be responsible for any greater amount of interest than it shall receive from such Bank or Trust Company. The deposits of each Licensee, however, shall be held by the Licensor during the existence of this [fol. 1568] agreement subject to the terms thereof, and upon the termination of this agreement shall, after the deduction therefrom of any sums of money which shall be payable to the Licensor from such Licensee, be forthwith repaid to such Licensee, together with the unpaid interest thereon payable by such Bank or Trust Company.

"Seventh. That if the Licensor should at any time enter upon the manufacture of Portland Cement under the above mentioned patents, it shall immediately thereupon deposit with a Trustee, who shall be elected by the vote of a majority of the representatives of all of the members of said Association of Licensed Cement Manufacturers, a sum of money equal to one cent per barrel of all Portland Cement proposed to be produced by the Licensor during the first year of its manufacture, and such sum of money shall be held by such Trustee upon the same terms and conditions in respect to the Licensor as the deposits above provided for are to be held by the Licensor in respect to the Licensees.

"And that the Licensor, if it shall enter upon the manufacture of Portland Cement under said patents, will comply with and be bound in all respects by all of the limitations, terms, conditions and covenants of this agreement and of said Schedule 'A,' with respect to such cement manufactured by it.

"And that any sums of money which shall be withdrawn by such Trustee from any deposit or deposits of the Licensor as aforesaid for [fol. 1569] any violation by the Licensor of any of the limitations, terms, conditions and covenants of this Agreement and of said Schedule 'A' shall be paid over by such Trustee to the then Licensees in good standing pro rata according to the amounts of their respective deposits with the Licensor as aforesaid.

"Eighth. That within the first fifteen days of each calendar month during the continuance of this Agreement, each Licensee shall render to the arbitrator, to be elected as aforesaid, a written report, in the form to be prescribed by such arbitrator, setting forth the total number of barrels of Portland Cement sold and shipped or otherwise disposed of by it during the preceding calendar month which shall have been manufactured by the use of any of the in-

ventions covered by the above mentioned patents; and every such written report shall be accompanied by an affidavit of some person having knowledge of the facts setting forth that such report is full, true and correct in every respect and that none of the Portland Cement sold and shipped or otherwise disposed of by such Licensee, during the preceding calendar month was sold and shipped or otherwise disposed of by it in violation of any of the limitations, terms, conditions and covenants of this Agreement and of said Schedule 'A.'

"And that in the event of the failure or refusal of any Licensee to file with such arbitrator any such report within the first fifteen days of any calendar month, the Licensee shall pay to the Licensor, as liquidated damages and not as a penalty, the sum of Twenty-five [fol. 1570] Dollars for each working day until such report is filed with such arbitrator, and the Licensor shall have the right to collect such damages out of any moneys of such Licensee on deposit with the Licensor, or to enforce such liability in any other lawful way, or by any other remedy available to the Licensor for that purpose, and the Licensor may also, at its option, suspend the privileges of such Licensee hereunder and under its original license until such report shall be filed with such arbitrator.

"And that all the transactions of the Licensees relating to the business covered by this agreement and said Schedule 'A' shall be subject to such investigation and audit as may be determined, from time to time, by the arbitrator aforesaid; and such arbitrator shall establish such rules of audit as shall insure a complete and perfect account of each and every transaction in connection with this agreement and said Schedule 'A' by such a system of thorough examination of the books and accounts of each Licensee, as shall insure to the fullest extent possible the strictest compliance with the limitations, terms, conditions and covenants of this agreement and of said Schedule 'A'; and each Licensee shall, for said purposes, produce or cause to be produced at the offices where the same are regularly kept all books, papers, correspondence and other original records of such Licensee, its branches, distributors and sales agents as may be called for by such arbitrator and shall assist such arbitrator or his accredited representative in every way possible for the favorable carrying out [fol. 1571] of the purposes of this agreement, and in case of its failure or refusal so to do shall pay to the Licensor, as liquidated damages and not as a penalty, the sum of Twenty-five Dollars for each working day during the continuance of such failure or refusal, which damages the Licensor may collect out of any deposit of such Licensee or in any other lawful way, and the Licensor may also, at its option, suspend the privileges of such Licensee hereunder and under its original license until the full compliance of such Licensee with the terms of this Clause Eighth.

"Ninth. Where the terms Portland Cement or Cement are used in reference to the subject matter hereof or of said Schedule 'A' reference is had only to Portland Cement produced by the use of the inventions of Patents set forth herein.

"The term Portland Cement as used herein and in the accompanying Schedule 'A' means the finely pulverized product resulting from the calcination to incipient fusion of an intimate mixture of properly proportioned argillaceous and calcareous materials to which no addition greater than three per cent (3%) has been made subsequent to calcination.

"No party hereto shall sell any cement under the name or designation 'Portland Cement' that does not comply with said definition. It is agreed that any violation of the provisions of this paragraph shall constitute a violation of this license and of Schedule 'A' and [fol. 1572] shall render the party committing such violation liable to the damages herein provided.

"For the purpose of this agreement and of said Schedule 'A' the term 'barrel' wherever used shall be construed to mean 376 pounds of cement exclusive of weight of package; the weight of all bags to be computed at not less than one pound each and of barrels at not less than twenty-four pounds each.

"Tenth. That all notices or requests to be given under this License Agreement or under Schedule 'A' by the Licensor, the arbitrator, or by any Licensee shall be in writing forwarded by registered mail. All notices or requests to be given by the Licensor or by the Arbitrator shall also be given by telegraphing the full notice or its substance or general purport.

"Each party hereto shall forthwith file with the Licensor and with the arbitrator a statement of its present post-office and telegraphic addresses which it desires notices to be sent to and shall from time to time file with the Licensor and with the arbitrator a statement of any changes in such addresses; and notices sent by registered mail and by telegram by the Licensor or by the arbitrator to such addresses last filed shall constitute full notice as required herein or by Schedule 'A.' The Licensor or the arbitrator may, however, serve additional written notice by personal delivery to any officer of the party for whom such notice is intended.

[fol. 1573] "Eleventh. That for the purpose of this agreement the territory covered by the aforesaid letters patent is divided as follows:

"Territory A shall embrace the New England States, New Jersey, Delaware, District of Columbia, North Carolina, and South Carolina, and all portions of New York, Pennsylvania, Maryland, Virginia (excluding West Virginia), lying east of a line running approximately north and south from Lake Ontario to the northern border of North Carolina and passing through the most westerly point of the boundary of Rochester, N. Y., and the most westerly point of the boundary of Hagerstown, Md., and through a point half way on an air line between the Lehigh Valley Mills at Northampton, Pa., and Pittsburgh, Pa., all as shown by the line marked on the map hereto annexed.

"Territory B shall embrace all territory covered by said patents not included in Territory A.

"The limitations, terms and provisions of this license agreement

and the accompanying Schedule A shall apply only to the aforesaid Territory A until either (a) the limitations, terms and provisions of this license agreement and the accompanying Schedule A shall have been extended and made applicable to Territory B or some portion thereof in the manner herein provided, or (b) the Licensor shall enter into another license agreement or other license agreements relating to Territory B or some portion thereof as hereinafter provided.

(a) The Licensor may at any time in the manner provided for by Paragraph Third hereof extend the limitations, terms and pro- [fol. 1574] visions hereof and of the accompanying Schedule A to Territory B or any portion thereof and upon notice of such extension given by the Licensor pursuant to Paragraph Tenth hereof, all the limitations, terms and provisions of this agreement and said Schedule A shall apply to Territory B, or such portion thereof as may be designated in said notice, with the same force and effect as if the limitations, terms and provisions of this license agreement and the accompanying Schedule A were herein expressly made to apply to said Territory B, or portion thereof so designated. In case of such extension the Licensor may subsequently cancel such extension as to such territory or any portion thereof, but not as to any part of Territory A.

(b) The Licensor may at any time enter into any other or independent license agreement or agreements with any party or parties hereto or any other person or persons and may include therein limitations, terms and provisions relating to prices, terms of sale and trade conditions and the right to grant sub-licenses—all in the discretion of the Licensor, subject, however, to the following limitations:

(1) Every such license agreement relating to the manufacture of cement by the practice of said inventions covered by the aforesaid letters patent or any of them in Territory B, or any portion thereof, shall provide that any Licensee hereunder shall have the right to take an additional license from the Licensor, or its licensees [fol. 1575] upon whom the right to grant sub-licenses for such territory has been conferred, to manufacture cement by the practice of any and all the inventions covered by the aforesaid letters patent in the territory covered by such license agreement and sell the cement so manufactured in such territory under the same and no other restrictions, terms, conditions or provisions as may be imposed upon other licensees or sub-licensees of the Licensor manufacturing cement in such territory; but the rate of royalty to be paid under such additional license agreement shall in no event exceed one-quarter of a cent per barrel on its cement manufactured in such territory and shall not be greater than the rate of royalty in excess of one cent per barrel fixed for such other licensees or sub-licensees.

(2) Every license agreement under the aforesaid letters patent or any of them shall provide that all licensees holding directly or

indirectly from the Licensor shall be governed by uniform restrictions and provisions as to what may be sold as Portland cement, weight of packages, purchase of bags, terms, discounts, and other trade conditions, and to that end every such license agreement shall contain, and require all sub-licenses under it to contain, the same provisions relative to such trade conditions as at the time of the execution thereof govern the licensees hereunder and provisions permitting the modification of such trade conditions only simultaneously as to all licensees by the Licensor in the manner provided [fol. 1576] in Paragraph Third hereof, or in case the Licensor shall have conferred upon another or others the right to grant sub-licenses then by joint action by the Licensor in the manner provided in Paragraph Third and such other or others applying simultaneously to all licensees and sub-licensees.

(3) No license agreement under the aforesaid letters patent or any of them shall apply to the sale or delivery of Portland cement in any territory or place to which the limitations, terms and provisions of this license agreement and Schedule A shall apply at the time of making such other license agreement or be in any other respect inconsistent with any of the terms and provisions hereof and of said Schedule A in respect to the sale and delivery of Portland cement in any territory or place to which the limitations, terms and provisions of this license agreement and Schedule A shall apply at the time of making such other license agreement and nothing herein or in any such license agreement contained shall in any way deprive any Licensee of or lessen its right to the advantage of any clause in its original license giving it the benefit of any reduction of royalty rate or special privilege granted to any other licensee, as set forth in such clause; provided, however, that (anything in this Clause 3 contained to the contrary notwithstanding) such other license agreement or agreements may establish different methods of fixing prices and different methods of securing the observance of the limitations, terms and conditions of the license in respect to [fol. 1577] cement manufactured in Territory B, or any portion thereof, covered by such license agreement and may provide for the payment of the reciprocal differentials hereinafter set forth.

[fol. 1577] "In the event of the Licensor making another license agreement affecting the sale of Portland cement in Territory B or any portion thereof as hereinabove provided, then upon notice being given by the Licensor to the Licensees, the Licensees shall during the continuance of such other license agreement be bound so far as concerns the sale or delivery of Portland cement in that portion of Territory B covered by such other license agreement by all the limitations, terms and provisions of such other license agreement relating to prices, terms of sale, including weight of packages, purchase of bags, discounts, what may be sold as Portland cement and other trade conditions to the same extent and with the same force and effect as if such provisions as to prices, terms of sale and trade conditions were embodied herein and made a part hereof; and upon

written notice to that effect from the Licensor to the Licensee no Portland cement made in Territory A shall be sold or delivered in such portion of Territory B as may be covered by such other license agreement except at a price which shall exceed the price or prices established under such other license agreement by a differential of not more than one cent (1c) a barrel on Portland cement sold in said portion of Territory B up to the point or points where the [fol. 1578] freight rate from the nearest mill situated in Territory B and owned by any Licensee of the Licensor is less than five cents per barrel below the freight rate from the nearest mill of a Licensee situated in territory A; not more than two cents a barrel where the difference in such freight rate is five cents and less than ten cents; not more than three cents where such difference is ten cents and less than fifteen cents; not more than four cents a barrel where such difference is fifteen cents and less than twenty cents; not more than five cents a barrel where such difference is twenty cents or more, as may be determined by the Licensor and stated in such notice; but no such notice of differential shall be given or shall have any effect unless the same differential shall be imposed on all Portland cement manufactured by licensees of the Licensor in the territory covered by such other license agreement and sold or delivered in Territory A.

"Any violation by any Licensee party hereto of any of the limitations, terms, conditions or provisions of such other license agreement or agreements relating to prices, terms of sale or trade conditions or the provisions hereof as to differentials based on the prices fixed by such other license agreement or agreements in connection with cement made in Territory A after notice that such other license agreement or agreements are in force and the prices, terms of sale and trade conditions governing the Licensee hereunder pursuant thereto, shall constitute a violation hereof and subject such Licensee [fol. 1579] to liability for the damages herein provided for exceeding the limitations of this license.

"In the event of the Licensor making another license agreement as hereinabove provided, relating to the practice of said inventions covered by the aforesaid letters patent or any of them in Territory B, or some portion thereof, then upon notice from the Licensor to that effect the Licensee shall have no right or license under this license agreement or under its original license agreement to manufacture Portland cement by the practice of said inventions or any of them in the portion of Territory B covered by such other license agreement during the continuance thereof until the License shall have taken an additional license to manufacture Portland cement by the practice of said inventions in said portion of Territory B, from the Licensor, or person upon whom the right to grant sub-licenses for such territory may have been conferred, but if such additional license is terminated in any manner (including the termination by a Licensee hereunder in the manner provided in such additional license) then this license and the original license of such Licensee shall again come into full force and effect; and upon taking such additional license

the Licensee shall pay to the Licensor upon each barrel of Portland cement made by the practice of said inventions or any of them in Territory A and Territory B the royalty due to the Licensor hereunder and under its original license and in addition thereto shall [fol. 1580] pay to the person from whom it holds an additional license in said Territory B upon each barrel of Portland cement produced by it by the practice of said inventions or any of them in Territory B the additional royalty fixed in said additional license pursuant to Clause 1 of this Paragraph Eleventh.

"In the event of the Licensor making another license agreement covering Territory B or some portion thereof as hereinabove provided and incorporating in such license agreement the right to grant sub-licenses and provisions for the determination of questions relating to breaches of the limitations, terms, conditions and provisions of such license agreement by an Arbitrator of equivalent Tribunal, and any Licensee hereunder taking a sub-license thereunder, then such Licensee shall be bound by the decision of the Arbitrator appointed pursuant to Paragraph Fifth hereof as therein provided concerning all questions arising in connection with the cement produced by the Licensee at a mill or mills located in Territory A and by the Arbitrator or Tribunal for which provision may be made in such other license agreement concerning all questions arising in connection with the cement produced by the Licensee in any mill of such Licensee located in Territory B or such portion thereof as may be covered by such license agreement; and in case of any dispute as to the jurisdiction of the respective Arbitrators in any case or other dispute between such Arbitrators on any question [fol. 1581] then such Arbitrators shall select a third person to whom the question involved shall be submitted and the Arbitrators and the Licensees hereunder shall be bound by the decision of such person in such case the same as if such decision were the decision of the Arbitrator appointed pursuant to Paragraph Fifth hereof according to the provisions of this agreement:

"Twelfth. That this agreement is supplemental to and confirmatory of the several license agreements heretofore entered into between the Licensor and the Licensee respectively which shall remain in full force and effect in all respects except in so far as said agreements are or may be altered or modified by this agreement. During the continuance of this agreement the Licenses heretofore granted to the respective Licensees under said patents shall be subject to the limitations, terms, conditions and covenants of this agreement and of said Schedule 'A,' to the same extent as if the same had been embodied in and made a part of such licenses. Upon the expiration of this agreement, or its termination in any manner whatsoever, the previous license agreement made by the Licensor with each Licensee as aforesaid shall continue in full force and effect as though this agreement had not been made.

"This License Agreement and the accompanying Schedule 'A' shall be read together and shall be deemed a single document; and wherever reference is made herein or in said Schedule 'A' to said

[fol. 1582] Schedule 'A' or to the terms and provisions thereof such reference includes said Schedule as it now exists and also as it may hereafter be modified, altered or added to as provided for herein or in the said Schedule.

"Thirteenth. That this agreement shall continue in force during the term for which each of the above mentioned patents was granted on its face, unless sooner terminated in the manner hereinafter provided:

"(1) Any Licensee hereunder may terminate this agreement as to all parties hereto on January 1, 1911, or on the first day of any January thereafter, by delivering to the Licensor on or before any such first day of January written notice of the intention of such Licensee to withdraw from this agreement on that date. Immediately on receipt of such notice the Licensor shall give notice to each Licensee that this agreement shall terminate on such first day of January.

"(2) In the event of the termination of the liability of the Licensees, or any of them, to pay royalty under the License Agreement heretofore made between the Licensor and such Licensee, then this License Agreement and Schedule 'A' shall terminate as to all parties hereto at the same time that the liability to pay royalty shall terminate as aforesaid.

"And no termination of this License Agreement and of Schedule 'A' in any manner aforesaid shall release or discharge any Licensee [fol. 1583] from the payment of any sum of money payable by such Licensee to the Licensor under the terms of this License Agreement or of Schedule 'A' by reason of any act or omission prior to the date of such termination. All quotations made prior to the expiration of this License Agreement and of Schedule 'A' for delivery of cement after such expiration shall be made in full compliance with and shall be subject to all of the price provisions and other terms and conditions hereof and of Schedule 'A.'

"Fourteenth. This Agreement and Schedule 'A' annexed hereto shall go into force and be binding upon the Licensor and the Licensee immediately upon the execution of this Agreement by the Licensor and all of the Licensees herein named, and not otherwise.

"In witness whereof the Licensor and the Licensees have caused their respective corporate seals to be hereunto affixed and duly attested and these presents to be signed by their respective duly authorized officers the day and year first above written."

"Schedule A

"(Attached to and forming part of a License Agreement between the North American Portland Cement Company, Licensor, and the Atlas Portland Cement Company and others, Licensees, dated January 13, 1909.)

"(1) Prices—All prices quoted for Portland cement covered by [fol. 1584] the License Agreement of which this schedule is part

made by any of the parties to said License Agreement shall be prices for delivery at the point required by the purchaser and no such cement shall be offered for sale and delivery at any point or in any section covered hereby or sold and delivered or otherwise disposed of at any such place at such prices less than the price set after the delivery point or section in the list of delivery points and sections contained in Paragraph 10 hereof, or, if such delivery point or section be not specifically contained in said list, at less than the prices hereinafter otherwise provided covering such place. Nothing in this paragraph (1) shall be construed as referring to or including the sale and shipment of any cement outside of the Territory A.

"(2). Discounts.—The following discounts, however, and no others, may be granted from the prices above provided for: (a) To dealers, as hereinafter defined, a discount of not more than five cents (5¢) on each barrel of such Portland cement that is sold by them to consumers in compliance with the price provisions hereof and (b) to distributors, as hereinafter defined, a discount of Ten cents (10¢) on each barrel of such Portland cement that is sold by them to dealers by whom such cement has been resold to consumers and the statements hereinafter required furnished and five cents (5¢) on each barrel of such Portland cement that is sold by them to [fol. 1585] dealers and not so resold or to consumers in compliance with the price provisions hereof.

"Dealers and distributors shall be allowed no discount on such cement consumed by them and shall be allowed the discount above provided on such cement sold to others only as follows: All such cement shall be billed to and paid for by such dealers and distributors at the full prices above provided for; at the end of each calendar month the dealer and distributor shall render to the licensee billing the cement a written statement (verified, if requested) setting forth the amount of such cement bought from such licensee and sold by such dealer or distributor during such month and also the amount of such cement used by the dealer or distributor himself; and the statement of the distributor shall also specify the portions of such amount sold by such distributor to dealers and consumers respectively, and shall be accompanied by written statements (verified, if requested) from dealers to whom such distributor has sold such cement setting forth that such cement has been resold by such dealer to consumers in full compliance with the price provisions hereof, all of which statements shall be preserved by the licensee and be open to the inspection of the Arbitrator provided for in the accompanying License Agreement; the licensee shall then be allowed to credit such dealer with, or pay to him said discount of not more than five cents (5¢) on each barrel of such cement that has been sold by him in full compliance with the price provisions hereof [fol. 1586] and to credit such distributor with or pay to him said discount of not more than Ten cents (10¢) on each barrel of such cement that has been sold by him to dealers whose statements are furnished showing that such cement has been resold to consumers in

full compliance with the price provisions hereof, and not more than five cents (5¢) on each barrel of such cement that has been sold by him to dealers and not so resold to consumers in full compliance with the price provisions hereof.

"(3). Terms.—Terms of payment shall not exceed thirty (30) days net from date of shipment; a discount of one cent per barrel may be allowed for cash within ten (10) days from date of shipment. No Licensee shall, directly or indirectly, sell or offer Portland cement as defined by the accompanying agreement on any terms more favorable than those herein prescribed, but the failure of any Licensee to institute suit or to collect at the end of thirty days, or to collect interest or discount deducted by the purchaser after ten days, shall not render the Licensee liable for the damages provided for breach of the accompanying agreement, provided the sale has been made by the Licensee in good faith on terms no more favorable than those herein prescribed and the Licensee has made due commercial efforts to enforce such terms.

"All quotations made by the parties hereto are to be good for any period not exceeding fifteen (15) days, deliverable within thirty (30) days after acceptance. On jobs specifically named delivery is [fol. 1587] to cover the job and terms of the contract, and the quotation is to so state and is to be good for acceptance until the contract is let or until the quotation is withdrawn.

Freight charges are to be paid by the purchaser except to prepaid stations, or on reshipments by water, or on Government, State and Municipal and Railroad contracts requiring prepayment of freight.

"4. Definitions.—

"Branch Offices, Dealers, Distributors, Exclusive Sales Agents, Salesmen

"A branch office is on office maintained by a party hereto in its own name, under its own control and subject to the directions of the home office, the profits of which branch belong to and the expenses and losses of which are borne by such party; or an office maintained by a corporation the entire capital stock of which is owned by a party hereto, which office is maintained in the name of such corporation under its control and subject to its directions, the profits of which office belong to, and the expenses and losses of which are borne by such corporation; or any office established as an office of a party hereto within the State of its incorporation prior to the first day of January, 1908, and since continuously conducted in the name of such party, whether or not such party controls or directs the same or owns the profits or bears the expenses or losses thereof.

"A dealer is a person, firm or corporation regularly carrying in store a stock of Portland cement for sale to others.

"A .distributor is a person, firm or corporation formally appointed a Distributor by a party hereto as hereinunder provided. Only those so appointed distributors and whose appointments are in full force

[fol. 1588] shall be distributors with the meaning hereof and as such entitled to the distributor's discount.

"The term Exclusive Sales Agent means a person or concern who has the exclusive handling of the entire or substantially the entire output of a Licensee.

"A Salesman is a person or concern who is regularly employed by any of the parties hereto to procure orders for cement to be filled by such party, and who has no direct or indirect title to or interest in such cement either as a dealer or consumer. Such salesman may be paid by salary, commission, or both.

"No party hereto shall employ as a salesman or shall constitute as a branch office or shall permit to be directly or indirectly connected with any branch office of such party, any person or concern who is either a dealer engaged in buying and selling cement or other building materials, a contractor buying cement or other building materials, or a consumer of cement; and no party hereto shall directly or indirectly grant or give any commission, salary, discount, credit, allowance, gratuity, sum of money or any reduction in price, to any person or concern who is such dealer, contractor or consumer either in connection with cement purchased by such person or concern, or in connection with orders for cement procured by such person or concern and to be filled by such party hereto; and any violation of these provisions shall render the party violating the same liable to liqui-[fol. 1589] dated damages at the rate provided in the accompanying license agreement. But nothing herein contained shall be construed to prevent a salesman or person or concern connected with or acting as a branch office being a stockholder in any cement company party hereto.

"(5). Distributors and Exclusive Sales Agents.—Each party hereto is entitled to appoint one distributor at each distributing point hereinafter specified by delivering to the Licensor a written statement setting forth the name of such distributor, the distributing point for which the appointment is made, and the agreement of the party making the appointment to be responsible for the full compliance with the price and other provisions hereof by such appointee to the same extent as if such appointee were the party making the appointment, and thereupon such distributor shall become the duly appointed distributor at such distributing point for the party making the appointment and shall remain such distributor until written notice of the revocation of such appointment is delivered to the Licensor by the party who appointed such distributor. Provided, however, that before any person or concern shall become a distributor and entitled to the distributor's discount, such person or concern shall enter into a contract with the party making the appointment (executed in duplicate, one copy of which shall be delivered to the Licensor with the statement of appointment of such person or con-[fol. 1590] cern as distributor) providing that while such person or concern continues as such distributor he or it will not sell any brand of American Portland cement not made under license from the Licensor and will sell the licensed brand only in full compliance

with the price and other conditions of the accompanying license agreement and of this schedule as now existing or hereafter modified and that in case of violation of the provisions of such contract the distributor will pay to the party making the appointment liquidated damages (equivalent at least to the sum for which the acts of such distributor may render the party appointing him liable hereunder) to be fixed in such contract.

"Upon receiving notice of the appointment of such distributor or the revocation of any such appointment, the Licensor shall give notice of the same to the various parties hereto. Any party hereto may at any time revoke the appointment of any of its distributors by written notice delivered to the Licensor and may thereafter appoint a new distributor for such distributing point in the manner above provided.

"The following cities are hereby established as distributing points and shall constitute the only points at which distributors be appointed until the number or location of such points is changed pursuant to Paragraph Third of the accompanying agreement:

"Boston, Massachusetts; Baltimore, Maryland; Syracuse, New York; Norfolk, Virginia; Binghamton, New York; Richmond, Virginia; Utica, New York; Charleston, South Carolina.

[fol. 1591] "Each party hereto desiring to appoint or to maintain an Exclusive Sales Agent shall procure the execution in duplicate by such Exclusive Sales Agent and such party of an agreement in form prepared by the Licensor providing that while such Exclusive Sales Agent continues as such he will not sell any brand of Portland cement, as defined in Paragraph Ninth of the foregoing agreement, not made under license from the Licensor and will sell the licensed brands only in full compliance with the price and other conditions of the accompanying license agreement and of this Schedule as now existing or hereafter modified, and that in case of violation of the terms of his agreement with his principal such Exclusive Sales Agent will pay such principal liquidated damages as fixed by said agreement; and shall deliver to the Licensor a copy of such agreement together with a written notice of the appointment of such Exclusive Sales Agent; and thereupon such Exclusive Sales Agent shall become the duly appointed Exclusive Sales Agent for the concern appointing the same and shall remain in said capacity until written notice of the revocation of such appointment is delivered to the Licensor by the party who appointed said Exclusive Sales Agent. Upon receiving notice of the appointment of any such Exclusive Sales Agent or the revocation of any such appointment, the Licensor shall give immediate notice of the same to the several parties hereto. Any party hereto may at any time revoke the appointment of its Exclu-
[fol. 1592] sive Sales Agent by written notice delivered to the Licensor and may thereafter appoint a new Exclusive Sales Agent in the manner above provided. No party hereto shall have more than one Exclusive Sales Agent at any one time. Only such persons as have been formally appointed Exclusive Sales Agents as above provided and whose appointments are in full force shall be Exclusive Sales Agents within the meaning hereof and as such entitled

to the benefit of the provisions relating to terms with Exclusive Sales Agents.

"(6) Terms as to Branch Offices, Sales Agents, etc., and as to Sales Between Parties Hereto.—Where any party hereto is maintaining a Branch Office or whose entire output of cement is handled by an Exclusive Sales Agent, it may deliver cement to said Branch Office or Exclusive Sales Agent, irrespective of the provisions hereof as to price and discounts; but in selling and delivering such cement to dealers, distributors or consumers, such Branch Office and such Exclusive Sales Agent shall be subject to and comply with all of the provisions hereof and of the accompanying License Agreement. Any party hereto now maintaining or hereafter establishing any such Branch Office as herein provided shall report the same in writing to the Licensor who shall forthwith report the same to each of the other parties hereto.

"Each party hereto shall be responsible for any violations of this Schedule or of the accompanying License Agreement by its Branch [fol. 1593] Offices, Exclusive Sales Agents, Salesmen, representatives, Distributors and every corporation at least a majority of whose capital stock is owned by the Licensee.

"Any party hereto may sell cement to any other party hereto at such prices as may be agreed upon between them, irrespective of the terms hereof; but such purchaser of such cement shall in selling or otherwise disposing of the same be subject to and comply with all of the provisions hereof and of the accompanying License Agreement; and the manufacturer of such cement shall include such cement in his reports to the Licensor and to the Arbitrator.

"(7). Amendment of List of Delivery Points and Sections.—The Licensor may at any time in the manner provided for by Paragraph Third of the foregoing agreement, add to the list of delivery points and sections contained in Paragraph 10 hereof new delivery points and sections anywhere in the United States and fix the selling price at such points or within such sections and may strike out any delivery point or section and otherwise alter or amend said list, and may establish minimum prices and discounts in any part of the United States, except as hereinafter provided, either by sections, states, counties, cities or other divisions, or by reference to the nearest delivery point in said list. Meanwhile, in case of quotation for delivery [fol. 1594] or of deliveries of Portland cement covered hereby at any point in Territory A, not specifically covered by the list of delivery points and sections, no quotations or deliveries shall be made at prices less than the minimum prices fixed for delivery at the nearest delivery point named in said list. Until the provisions hereof have been extended and made applicable as herein provided to any given portion or portions of the United States outside of the territory known as Territory A in the accompanying License Agreement or another License Agreement covering such other territory has been made pursuant to Paragraph Eleventh of the accompanying agreement, the parties hereto are not restricted as to prices, discounts or terms of delivery at such places. In case the Licensor as provided

in Paragraph Eleventh of the accompanying License Agreement shall have at any time made any License Agreement or Agreements establishing terms or restrictions as to prices, discounts or terms of delivery within any portion or portions of the United States not included in Territory A aforesaid of Portland cement made by use of the inventions of the patents herein referred to which said License Agreement or Agreements shall have gone into effect before the provisions hereof have been extended and made applicable as above provided to such portion or portions of the United States, then the power above given to extend the provisions hereof to the portion or portions of the United States covered by such other Agreement or Agreements [fol. 1595] shall cease, during the continuance of such other License Agreement or Agreements, anything hereinbefore contained to the contrary notwithstanding.

"In case of any change in or addition to the list of distributing points or of delivery points and sections or in prices or discounts or in the other terms of his Schedule the Licensor shall forthwith give written notice thereof to each of the parties hereto and shall forthwith send to each party hereto a copy of this Schedule in its then amended form, bearing the date of its issuance and certified by the Secretary of the Licensor to be a correct copy of the Schedule as then amended.

"(8) Purchase of Bags.—No party hereto shall allow any discount, rebate or commission or make any payment or give any credit for packages in which it has sold cement covered hereby, except as follows: any party hereto may purchase cotton bags bearing the brand of any party hereto that have been used in connection with the sale of such cement by said party or parties, and pay for the same at the rate of not exceeding seven and one-half (7½) cents per bag, provided always, however, that all such bags returned by the customers shall be subject to the count and inspection of said party and that payment shall be made only for bags that are capable of further use for shipment of cement and that freight on such bags from [fol. 1596] place of shipment to the mill shall be prepaid by or charged to the persons returning same. Each party hereto must keep a record of all used bags so purchased by it and must preserve all invoices covering such purchases; and said records and invoices shall at all reasonable times be open to the inspection of the arbitrator or his duly accredited representative.

"(9) Statements of Outstanding Quotations and Contracts.—Within fifteen days after the execution and delivery of this agreement by all of the parties hereto each of the parties hereto shall forward to the arbitrator provided for in the accompanying License Agreement a sworn statement of each of its outstanding and unfilled contracts, sales, orders for cement and offers to sell cement covered by this agreement and to be delivered at prices less than the minimum prices established herein at any of the points or within any territory to which the provisions of this Schedule apply, stating the name of the buyer, name and location of the job, and amount, date, price and terms; and within

fifteen days after any subsequent advance in price, as provided for in this Schedule and accompanying License Agreement, each of the parties hereto shall forward to the arbitrator a similar sworn statement of each of its outstanding and unfilled contracts, sales, orders for cement and offers to sell cement covered by this agreement and to be delivered at any point affected by such change in price at prices [fol. 1597] less than such new minimum prices. Failure to file any such statement within the period specified shall subject the party in default to the payment to the Licensor of liquidated damages at the rate of twenty-five dollars per day. All such bona fide contracts, sales, orders, and offers to sell may be filled at the agreed price, and shall not constitute violations hereof, provided same have been reported in statements as above provided.

"(10) List of Delivery Points and Sections and of Minimum Prices.—Until the Licensor shall give notice of the establishment of delivery points and sections and minimum prices therein, prices in Territory A shall be as follows:

"All prices given below are the minimum prices to consumers and subject to the discounts permitted to dealers and distributors by Paragraph (2) of this Schedule and no other discount.

"All prices shall be quoted and made delivered.

"Delivered prices for wood and cotton shall be the same and for paper 25 cents less, computing the freight at a weight of 400 lbs. for all packages.

"Prices in Territory A shall be not less than $1.20 in wood and cotton and 95 cents in paper plus the Northampton all-rail rate with the following exceptions:

"(1) Greater New York within Lighterage Limits: $1.53 in cotton and wood and $1.28 in paper.

[fols. 1598-1600] "(2) Long Island outside Lighterage Limits of Greater New York: $1.25 in cotton and wood, and $1.00 in paper plus the Northampton all-rail rate.

"(3) The States of Virginia, North Carolina and South Carolina: No minimum prices, until minimum prices have been established therefor and notice thereof given as above provided.

"(4) Any party hereto shall be entitled to deliver Portland Cement made by it at a mill located in the Counties of Warren, Washington, Saratoga, Rensselaer, Albany, Schenectady, Schoharie, Green, Columbia and Ulster, in the State of New York, at a price three cents (3¢) per barrel less than the prices fixed for other licensees but only when such cement is delivered at points within the New England States or the State of New York where the freight rate on cement from such mill is twenty-five cents (25¢) or more per ton less than the freight rate from the nearest mill of a Licensee located in the Lehigh District, including the portion of said District lying in New Jersey. Such permitted reduction in price shall not apply to any Portland cement not manufactured in said Counties of the State of New York."

[fol. 1601] Govt. Ex. No. 550

Schedule A, Paragraph 10, Subdivisions 5 & 7 to 21, Inclusive

No. 544

May 27th, 1910.

5. Steam Railroads

"The minimum price to Steam Railroads for cement for their own use, shall be as follows: These prices shall be governed by the following conditions as to deliveries and routing:

A.—To the nearest junction point from the mill of the Licensee to the road requesting prices, as determined by the routing instructions of the transportation road on which the mill of the Licensee is located.

B.—When the established tariff of a transportation line on which a mill of a Licensee is located authorizes a lower rate to a regular junction point other than the nearest junction point determined according to Clause "A" hereof, then the delivery [fol. 1601½] may be made at the junction point taking the lowest rate of transportation from the mill of the said Licensee.

In all other cases, i. e., junction points not specifically mentioned and Railroads not specifically mentioned, the minimum price shall be the price given in the list of Delivery Points and Minimum Prices at or to the nearest junction point with the said railroad from the mill of Licensee to the road requesting prices and via which the cement is to move except that it will be permissible for a Licensee to issue quotations or sell any railroad for delivery at any place of consumption on the line of the railroad requesting prices provided, however, that in all such cases the price to be quoted and the price at which the cement shall be sold and invoiced shall be not less than the price given in the list of Delivery Points and Minimum Prices at the said point or points of consumption.

[fol. 1602] Govt. Ex. No. 551

September 12, 1912.

Dear Mr. Beach: May I have the pleasure of your company at dinner at the Knickerbocker Hotel, Parlor B, Thursday evening, September 26th, at 7:30 o'clock.

For some time I have hoped for an opportunity to become better acquainted with the men who are interested in the welfare of the cement industry in the East, and I hope no previous engagement will prevent my having the pleasure of seeing you on the date above mentioned.

Yours very truly, John R. Morron.

P. S.—Please let me hear from you at your early convenience.

Mr. W. N. Beach, 29 Broadway, New York City.

[fol. 1602½] Govt. Ex. No. 552

Pennsylvania Cement Company,
29 Broadway, New York

September 16, 1912.

Mr. John R. Morron, Pres. Atlas Portland Cement Co., 30 Broad Street, New York City.

Dear Mr. Morron: I am in receipt of your letter of the 12th inst., and regret to advise you that I will be unable to accept your kind invitation, as I expect to leave town the end of this week on my vacation. Our Vice President, Mr. J. W. Alker, however, will be there.

Regretting my inability to be present, I am

Yours very truly, W. N. Beach, President.

[fol. 1603] Govt. Ex. No. 553

To save time, it is agreed, subject to all objections to materiality, relevancy and all other objections not expressly waived by the admission, as follows:

That the book produced herewith constitutes the minutes of the so-called Eastern Cement Association, the paper marked "A" is a copy of the plan referred to in the minutes of the first meeting, and the paper marked "B" is a copy of the Eddy Plan, prepared by Mr. Arthur J. Eddy and referred to in the minutes of subsequent meetings.

The opinion referred to in the minutes of the last meeting, was to the effect indicated by the following extracts therefrom: "During the three months or so of the existence of the Eastern Cement Asso-

ciation, its attention has been directed chiefly towards considering various plans or programs and it has actually done very little. * * * It is plainly desirable now to decide definitely what course is to be followed, and that is understood to be the purpose of this meeting. * * * If the Association prefers to look at the situation not from the point of view of what cannot lead to the trouble of a defense, but from the point of view of what can be vindicated in court, then it may go ahead and put in operation the best of the plans or programs that has been suggested." But the continuance [fol. 1603½] of the Association may result in "misconception followed perhaps by the trouble and expense of defending proceedings. My understanding is that the benefits of the Association are not sufficiently great to outweigh that, and I accordingly defer comment upon any of the plans or programs for the Association, until you consider and decide whether it is wise at present to have any Association at all."

April 22nd, 1922.

[fol. 1604] GOVT. EX. No. 554

Minutes

On Thursday, November 7th, 1912, at 11:00 o'clock A. M. at the Hotel Astor in New York City, the following gentlemen assembled for the purpose of deciding on the advisability of forming an Association of Cement Manufacturers having plants located in the East.

Call for this meeting having been sent out by John B. Lober, Esq., Chairman of a Committee, which had previously been appointed to determine the advisability of such a step.

There were present the following:

J. W. Fuller, R. S. Weaver representing the Allentown P. C. Co.
A. F. Gerstell, J. B. Wight representing the Alpha P. C. Co.
R. S. Sinclair, W. P. Corbett representing the Alsen's Am. P. C. Wks.
R. W. Lesley representing the American C. Co. of N. J.
John R. Morron, A. de Navarro, W. A. Holman, representing the Atlas P. C. Co.
B. F. Stradley representing the Bath P. C. Co.
M. E. Calkins representing the Cayuga Lake C. Co.
F. L. Loeb, C. H. Breerwood representing the Coplay C. Mfg. Co.
[fol. 1604½] Joseph Brobston, R. W. Hilles representing the Dexter P. C. Co.
W. S. Mallory representing the Edison P. C. Co.
George F. Bayle representing the Glens Falls P. C. Co.
T. H. Dumary representing the Helderberg C. Co.
S. H. Bassett representing the Knickerbocker P. C. Co.
M. S. Ackerman, L. V. Clark representing the Lawrence P. C. Co.
E. M. Young, H. C. Trexler representing the Lehigh P. C. Co.
A. W. Paige, J. A. Horner representing the Nazareth C. Co.

R. E. Griffith representing the Norfolk P. C. Cor.
W. E. Erdell representing the Penn-Allen C. Co.
W. N. Beach, J. W. Alker representing the Pennsylvania C. Co.
J. W. Walker, H. M. Fetter representing the Phœnix P. C. Co.
A. W. Paige, Charles Warner representing the Security C. & Lime Co.
E. R. Stapleton representing the Tidewater P. C. Co.
R. W. Kelley representing the Virginia P. C. Co.
J. B. Lober, Albert Moyer representing the Vulcanite P. C. Co.
W. H. Harding, W. C. Kent, C. P. Robinson representing the Whitehall C. Mfg. Co.

Col. Trexler nominated Mr. A. F. Gerstell as temporary Chairman of the meeting. Mr. Fuller nominated Joseph Brobston as tem- [fol. 1605] porary Secretary of the meeting. Col. Trexler put the motion and Messrs. Gerstell and Brobston were elected temporary Chairman and Secretary of the meeting.

The roll was then called and the gentlemen named above responded to the roll call. It was stated by the Chairman that all of the Companies who had been requested to attend the meeting were represented except the Northampton Portland Cement Company and the Wayland Portland Cement Company. The meeting was advised that the Wayland Portland Cement Company had gone out of business and that proceedings for the appointment of a Receiver had been started against the Northampton which probably accounted for their not being present.

The Chairman then requested Mr. Lober to present the report of the Committee. Mr. Lober briefly outlined the reasons for presenting the plan for the information of an Association and presented the report of his Committee, which was duly read.

The following changes were incorporated in the plan, on motion duly made and seconded. For Committee on Publicity it was decided to substitute "Uses and New Uses of Cement." The words "forms for" were inserted before the words "uniform contracts" in the first line under the paragraph headed "On Trade Conditions." The number of members in the Executive Committee, in addition to the officers, was increased from four to six.

It was provided that the Fiscal Year should start on the first of November instead of the first of January and that dues should be [fol. 1605½] payable quarterly in advance on the first day of November, February, May and August instead of the 1st day of January, April, July and October.

After incorporation of the changes outlined above in the report of the Committee, Mr. Bayle moved that the plan for the formation of the Association as presented and amended, and the Constitution and By-Laws as presented and amended by the Committee be adopted, this motion was duly seconded.

The Chair stated that in voting on this question the members should understand that in voting in favor of the adoption of the report they were voting for the formation of the Association and for the adoption of the Constitution and By-Laws presented, and that an affirmative vote would signify the intention of the Company

voting affirmatively to join the Association. A vote was then taken and all of the Companies represented votes in favor of the motion. The Chair stated that as the vote had been unanimously in favor of the formation of the Association, the next thing to be done was to appoint a nominating Committee for the purpose of selecting officers to serve for the ensuing year and he therefore appointed Messrs. Trexler, Fuller, and Erdell as a Committee to report nominations immediately after luncheon. On motion, duly made and seconded, the meeting then adjourned until 2:00 o'clock P. M.

At 2:00 o'clock P. M. the meeting reconvened and Col. Trexler presented the following list of nominations:

President, John R. Morron.

Vice-President, W. S. Mallory.

[fol. 1606] Treasurer, Joseph Brobston.

Executive Committee, Messrs. Gerstell, Lober, Harding, Young, Dumary and Paige.

There being no further nominations, the Secretary was, on motion duly made and seconded, directed to cast a ballot for the nominees. The Secretary reported having cast the ballot for the nominees and the Chairman announced that the following had been elected officers to serve for the ensuing year:

Mr. John R. Morron, President, Mr. W. S. Mallory, Vice-President, Mr. Joseph Brobston, Treasurer; and Messrs. Gerstell, Lober, Harding, Young, Dumary and Paige on the Executive Committee.

Mr. Morron then took the chair. The President made a short address on the subject of the purpose of the formation of the Association, and on motion duly made and seconded, the meeting adjourned.

—— ——, Sec'y pro Tem.

Minutes of the First Executive Committee Meeting

The first meeting of the Executive Committee of the Eastern Cement Association was held this 7th day of November, 1912, at 3:00 o'clock P. M. at the Hotel Astor. There were present all of the members of the Executive Committee. The President presided.

Mr. Mallory inquired whether Sales Companies handling the entire output of plants—members of the Association—were supposed [fol. 1606½] to be eligible to membership. It was the unanimous opinion of the Executive Committee that they were not and that the intention was to limit the membership to Manufacturing Companies only.

Mr. Brobston inquired whether if this were the case it would be the policy of the Association to have present at the meetings, the Sales Managers of the Sales Companies handling the entire output of members of the Association. After some discussion the Executive Committee decided that the representation at meetings of the Eastern Cement Association should be confined to Executive Officers only of the Companies who are members of the Association.

The President stated that he would prefer to defer the appointment of the Committees until he had an opportunity of going into the matter more thoroughly.

On motion duly made and seconded, the date for the next meeting was fixed for Tuesday, December 3rd, 1912, at 12:00 o'clock noon at the Hotel Astor, and the Secretary was instructed to send out notices promptly. The meeting of the Executive Committee was fixed at the same date and place but at 11:00 o'clock A. M.

The Secretary was directed to send to each member of the Executive Committee a list of the representatives of the various Companies present at the meeting to day and a list of the Committees to be appointed.

The Treasurer was instructed to issue bills for the first quarterly payment.

It was moved by Mr. Harding, seconded by Mr. Young, [fol. 1607] that the Nazareth National Bank be designated as the depository of the Eastern Cement Association.

The question of the appointment of a Secretary was brought before the Board and the various members of the Committee were requested to see if they could not, within a short time, suggest a suitable person for the office.

There being no further business the meeting adjourned.

—— ——, Sec'y pro tem.

The monthly meeting of the Executive Committee of the Eastern Cement Association was held this 3rd day of December, 1912, at 11:00 o'clock A. M. There were present Messrs. Morron, Mallory, Young, Gerstell, Dumary, Paige, Lober and Brobston of the Committee and Mr. Kent representing Mr. W. H. Harding.

Mr. Cox of Counsel was also present. Mr. Arthur J. Eddy was present by invitation and explained to members of the Committee the operation of the "Eddy Plan" and answered all questions put to him by members of the Committee and Mr. Cox on same.

It was decided to advise the members of the Association that the question of the adoption of the Eddy Plan, or one similar thereto, was being considered by the Executive Committee and would be taken up further.

A list of the Committees was presented by Mr. Morron.

There being no further business, the meeting adjourned at 1:00 o'clock P. M.

—— ——, Sec'y pro tem.

[1607½] Meeting of the Eastern Cement Association Held at the Hotel Astor December 3d, 1912, at 12 o'clock Noon

Present:

J. W. Fuller and R. S. Weaver, representing the Allentown;
A. F. Gerstell, representing the Alpha;
R. S. Sinclair and W. P. Corbett, representing the Alsen's;
R. W. Lesley, representing the American;
John R. Morron, W. A. Holman, representing the Atlas;
B. F. Stradley, representing the Bath;
M. E. Calkins, representing the Cayuga;

C. H. Breerwood, representing the Coplay;
John A. Miller and Joseph Brobston, representing the Dexter;
W. S. Mallory, representing the Edison;
Geo. F. Bayle, representing the Glens Falls;
T. Henry Dumary, representing the Helderberg;
E. M. Young, representing the Lehigh;
A. W. Paige and J. A. Horner, representing the Nazareth;
R. E. Griffith, representing the Norfolk;
W. E. Erdell, representing the Penn Allen;
W. N. Beach and J. W. Alker, representing the Penna;
Loring A. Cover, representing the Security;
E. R. Stapleton, representing the Tidewater;
[fol. 1608] H. M. Fetter, holding proxy for R. W. Kelley, representing the Virginia;
J. B. Lober, representing the Vulcanite;
W. C. Kent, representing the Whitehall;
J. W. Walker, representing the Phœnix.

The names of the Chairmen and members of the committees appointed by the Executive Committee were read.

The President stated that the Executive Committee had under consideration suggestions that had been made looking towards the adoption by the Association of a plan discussed in a recent book involving complete publicity of all dealings of manufacturers but were not ready to take any action or make any recommendation in that regard.

The meeting was then opened to general discussion and several members spoke concerning their experiences with, and views concerning the advantages and disadvantages of, different practices relating to making contracts for yearly requirements, allowing commissions to dealers under various circumstances, holding tested cement, making contracts guaranteeing purchasers against decline in the market, and specific job contracts taken through dealers.

At the close of this general discussion, the meeting adjourned.

A Special Meeting of the Executive Committee of the Eastern Cement Association was held at the Recess Club this 27th day of December, 1912, at 1 o'clock P. M.

[fol. 1608½] There were present Messrs. Morron, Young, Dumary, Paige, Harding, Mallory and Brobston of the Committee and Mr. Cox of counsel and Mr. Holman by invitation.

Various changes in Committees were authorized and the Secretary was instructed to send lists of Committees as they now stand to each Company.

Mr. Cox of counsel stated that he thought that there was some legal objection to the Eddy Plan in its entirety and some serious objections from a legal point of view to the present Constitution and By-Laws of the Association. He was requested to draw up a Constitution and By-Laws and a Reporting Plan, eliminating these objections, for submission to the next meeting of the Association.

Mr. Young read some suggestions as to report on the Trades Conditions Committee, which were discussed, and it was decided to pre-

sent same at the meeting of the Executive Committee on January 7th, 1913.

There being no further business, the meeting adjourned.

—— ——, Sec'y pro Tem.

A regular monthly meeting of the Executive Committee of the Eastern Cement Association was held this 7th day of January, 1913, at 11:00 o'clock A. M., at the Hotel Astor.

There were present, Messrs. Morron, Young, Dumary, Paige, Harding, Lober and Brobston of the Committee, and Messrs. Swett, Holman and Moyer by invitation.

[fol. 1609] Mr. Cox, counsel of the Association, was also present.

It was, on motion duly made, seconded and carried, it was:

Resolved, that Mr. J. W. Kittrell be employed to act as Secretary for the Association at a salary at the rate of $6,000.00 per year, with the understanding that the minimum period of employment was to be three months.

A proposed form of Constitution and By-Laws was presented which had been drawn up by Mr. Cox, and on motion duly made, seconded and carried, it was:

Resolved, that same be referred to the Association meeting with the recommendation that they be accepted instead of the present Constitution and By-Laws.

Two reports were presented by the Trades Conditions Committee, which were read and discussed, and it was, on motion duly made, seconded and carried:

Resolved, to submit them to the general meeting without any recommendation.

It was, on motion duly made, seconded and carried:

Resolved, that the President notify Mr. Eddy that it was decided not to adopt his proposed plan.

There being no further business, the Executive Committee adjourned at 1:30 P. M.

—— ——, Secretary pro Tem.

[fol. 1609½] Meeting of the Eastern Cement Association Held at the Hotel Astor January 7th, 1913, at 1:30 o'clock p. m.

Present:

J. W. Fuller and R. S. Weaver, representing the Allentown;
A. F. Gerstell, representing the Alpha;
W. P. Corbett, representing the Alsen's;
R. W. Lesley, representing the American;
John R. Morron, W. A. Holman, A. de Navarro, representing the Atlas;
B. F. Stradley, representing the Bath;
M. E. Calkins, representing the Cayuga;
C. H. Breerwood, representing the Coplay;
Joseph Brobston, representing the Dexter;

W. S. Mallory, representing the Edison;
George F. Bayle, representing the Glens Falls;
T. H. Dumary, representing the Helderberg;
E. M. Young and Mr. Swett, representing the Lehigh;
A. W. Paige and J. A. Horner, representing the Nazareth;
R. E. Griffith, representing the Norfolk;
W. E. Erdell and Mr. Yeager, representing the Penn-Allen;
W. N. Beach and J. W. Alker, representing the Pennsylvania;
Charles Warner and L. A. Cover, representing the Security;
R. W. Kelley, representing the Virginia;
[fol. 1610] John B. Lober and Albert Moyer, representing the Vulcanite;
W. H. Harding and W. C. Kent, representing the Whitehall;

The appointment by the Executive Committee of Mr. J. W. Kittrell as Secretary was reported.

A proposed form of Constitution and By-Laws was presented by the Executive Committee and read. After discussion, upon motion duly made, seconded and carried, it was:

Unanimously Resolved that the Constitution and by-Laws presented by the Executive Committee be and the same hereby are adopted as read in lieu of the present Constitution and By-Laws, which are hereby cancelled and annulled.

The Constitution and By-Laws thus adopted are as follows:

[fol. 1610½] Eastern Cement Association

Constitution

Article I

Name

The name of the association shall be Eastern Cement Association.

Article II

Members

Section 1. Any corporation, firm or individual engaged in the manufacture of Portland cement in the States of New Jersey, Eastern Pennsylvania, New York, Maryland and Virginia, is eligible for membership.

The geographical limits thus specified are designed to include the territory wherein are located those plants now in operation which are substantially similarly situated with respect to character of raw material used, certain freight rates, foreign markets and otherwise; and in the event of the construction hereafter of plants which, while not within the precise geographical limits specified, are so situated as to share in the common interests of the members, the manufacturers operating such plants shall be eligible for membership.

Section 2. Any corporation, firm or individual eligible for mem- [fol. 1611] bership may become a member of the Association upon being proposed by two members and elected by a majority of the Executive Committee.

Section 3. Any member may resign at any time upon first discharging any indebtedness to the Association.

Section 4. Applications for membership and resignations from membership must be transmitted in writing to the Secretary.

Section 5. Any member may be expelled for failure to pay any assessment within thirty days after payment is due or for failure to conform to the Constitution and By-Laws of the Association by the vote, expressed by secret or open ballot, of two-thirds of the members of the Association, provided two weeks' notice of the proposed action and an opportunity to be heard shall have first been given.

Article III

Objects

The objects of the Association are to foster, develop and increase the industry and safeguard and promote the common interests of the members by acting as a representative organization in matters affecting all in common and by obtaining and disseminating such increased knowledge and information concerning all things connected with the manufacture and sale of cement that each manufacturer, [fol. 1611½] while being absolutely free to conduct his business as he pleases in every respect and particular, may be enabled to conduct it more intelligently and efficiently and with greater satisfaction to himself and the public; and, in furtherance thereof:

(a) To investigate, study and deal with the many traffic questions which arise from time to time, including freight rates not only on cement but on supplies of coal, limestone and the like, by maintaining a traffic bureau, by representing the common interests of the members before Government Commissions and others having control over freight rates, or otherwise, as may from time to time appear desirable.

(b) To investigate, study and deal with questions affecting the industry presented by actual or proposed laws, ordinances, building codes, and regulations affecting the use of cement, and, when desirable, to represent the industry at hearings, conduct tests, and do all things necessary to protect the common interests in such matters.

(c) To investigate conditions in the market of countries which import cement, methods of shipments thereto, and means of introducing and popularizing American cement therein, to obtain and make available all information facilitating export shipments, and otherwise to promote the export trade, there being large markets

naturally within reach of members of the Association that have not been developed by American manufacturers because the burden of [fol. 1612] proper investigation and exploitation has been too great to be borne by any manufacturer alone.

(d) To promote the use of cement in new ways and for new purposes by studying and developing applications of the product and directing attention thereto by publications and otherwise, it being the belief of those engaged in the industry that immense new markets for the product can be thus created.

(e) To develop and investigate new processes, machines, inventions and patents applicable to any of the various stages of manufacture or packaging of cement or connected therewith with a view to perfecting the product and decreasing its cost.

(f) To investigate and study the various matters connected with the welfare and efficiency of employes, including insuring and pensioning employes, the introduction of sanitary and hygienic measures, the preventon of accidents and like matters, and to deal with such matters as may appear desirable by employing an expert inspector to visit the plants of the members and make proper recommendations and otherwise.

(g) To bring together for the benefit of each member, by papers, reports and discussions, the experiences of the other members in connection with matters and problems of common importance arising from time to time and to investigate and study such matters directly and through competent persons employed for the purpose,

[fol. 1612½] (h) To obtain and make available accurate and complete statistical information concerning the manufacture and sale of cement, including correct statistics regarding the capacities and outputs of all plants engaged in the manufacture of cement, together with periodical reports regarding outputs, shipments, orders and prices, and accurate information concerning labor conditions, material markets, supply markets and all conditions affecting the industry generally, to the end that each member may have in the most accurate and complete form possible all the data desirable for the most intelligent and efficient conduct of his business. In this connection it is one of the objects of the Association ultimately to make the information gathered official in character and publish statistical results for the information of the public generally.

(i) To investigate, study and endeavor to develop a scientific and accurate system of cost accounting, to the end that each member may know accurately the cost of his product and the particulars in which such cost may be reduced. It is not contemplated that the Association shall seek to have disclosed the actual cost of any member or to impose upon any member any cost system, the sole object being to obtain, if possible, a scientific and accurate system of cost

accounting which shall enable each manufacturer to learn for himself what his product actually costs him.

(j) To aid in the development and maintenance of high and uniform standards in the manufacture of cement and deal with the [fol. 1613] matter of the certification of cement, to the end that customers may be guaranteed the character and quality of cement purchased.

(k) To bring about, in so far as it can be accomplished by the educational influence of experience, investigation and study, the correction of unfair and pernicious practices in the trade and in this connection to work out, as far as practicable, standard forms of contracts with dealers and consumers which shall be fair and satisfactory to the trade and to the public and to devise and recommend to purchasers and customers more uniform methods of dealing with packages, particularly in connection with the return of sacks, to the end that all buyers may be placed upon a nearly equal footing in these respects and secret and demoralizing practises eliminated.

Article IV

Meetings

Section 1. The regular meetings of the Association shall be held on the first Tuesday after the first Monday of each month, or at such dates and places as the Executive Committee shall name.

Due notice of meetings shall be sent to each member at least ten days in advance.

Section 2. A majority of the members, when present at any meeting, shall constitute a quorum. Each membership shall have one vote.

[fol. 1613½] Section 3. The meeting held in the month of November of each year shall be the Annual Meeting of the Association.

Article V

Officers and Committees

Section 1. The officers shall be a President, Vice-President, Secretary, and Treasurer.

Section 2. All officers, except the Secretary, shall be elected at the Annual Meeting by the majority of the votes of those present and shall hold office for one year or until their successors have been duly elected.

The Secretary shall be appointed by the Executive Committee and may receive a salary, fixed by the Executive Committee.

Section 3. The Executive Committee shall consist of the President, Vice-President, and Treasurer, and six members, to be elected at

each Annual Meeting by the majority of the votes of those present. A majority of the Committee shall constitute a quorum.

Section 4. The Executive Committee shall have power to call meetings whenever deemed advisable, to fill any vacancy occurring in its number by death, resignation or otherwise, to appoint committees and additional officers, and to employ such persons, incur such [fol. 1614] other indebtedness, and fix such assessments as may appear to it necessary to carry out the objects of the Association.

Article VI

Amendments

This Constitution may be amended as follows: All proposed amendments must be in writing, signed by at least three members, and presented to the Executive Committee at least two weeks before the next meeting of the Association. In the notices of this meeting the proposed amendment or amendments shall be presented. At the meeting the proposed amendment or amendments may be discussed or amended. They shall then be sent out to letter-ballot. If two-thirds of the total membership shall by letter-ballot vote in favor of the amendment or amendments, it or they shall be adopted.

Article VII

Freedom of Trade.

No member of the Association shall enter into any arrangement, agreement or understanding of any nature or kind whatsoever the object of which is to restrain trade, limit competition, or accomplish any purpose contrary to the spirit or letter of the law or contrary to the objects of the Association as set forth in this Constitution.

[fol. 1614½]

Article VIII

Publicity

All records of the Association, its files, correspondence and papers and its meetings shall be open at all times to any public official who, in the performance of his duties, is legally authorized to investigate or inquire into the workings of the Association, a fundamental object of the Association being complete frankness and openness in all dealings among members and in all dealings with customers and the public.

By-Laws

Section 1. President.—It shall be the duty of the President to preside at all meetings of the Association and of the Executive Committee, to appoint all committees not otherwise provided for, and in

case of the equal division of the members on any question to cast the deciding vote. He shall also have power to call the Executive Committee together at such time and place as he may select and upon the written request of five members he shall be required to call a special meeting of the Association.

He shall see to the enforcement of the provisions of the Constitution and By-Laws and shall carry into execution all resolutions of the Association and of the Executive Committee.

[fol. 1615] Section 2. Vice-President.—It shall be the duty of the Vice-President to perform the duties of the President in the absence of the latter.

Section 3. Treasurer.—It shall be the duty of the Treasurer to collect and *and* receive all moneys of the Association and to deposit the same in a depository to be designated by the Executive Committee, to pay all orders for money when countersigned by the Secretary and approved by the President or Vice-President, and preserve vouchers for all payments so made. He shall keep proper books of account, which shall be open at all times to the inspection of the Executive Committee, and at the close of his term of office he shall deliver to his successor all moneys, books, papers, and other valuables belonging to the Association which shall be in his custody or possession.

Section 4. Secretary.—It shall be the duty of the Secretary to keep a careful record of all the transactions of the Association and of the Executive Committee, to give notice of all meetings of the Association and of the Executive Committee, to examine all bills and countersign all orders on the Treasurer, to conduct the correspondence of the Association, to collect statistics and information contemplated in the Constitution, and to perform such other duties as many be assigned to his office by the Executive Committee.

Section 5. Executive Committee.—The Executive Committee shall [fol. 1615½] have the management of the affairs of the Association. It shall fix the dates and amounts of assessments, the compensation and terms of employment of all persons performing services for the Association and provide for such other expenditures as may be necessary.

Section 6. Voting Power.—At all meetings, each membership shall have one vote. Members may be represented at any meeting by authorized delegates, who shall be entitled to full rights and privileges of the members they represent, but only one vote shall be cast on behalf of each member.

Section 7. Meetings.—The Association shall meet monthly, the time and place of each meeting to be fixed by the Executive Committee. Special meetings may be called whenever the Executive Committee shall deem it necessary or upon request of five members. A majority of all the members shall constitute a quorum. The order of business shall be as follows:

1. Roll call;
2. Reading of Minutes of last meeting;
3. Election of new members;
4. Reports;
5. Unfinished business;
6. New business;
7. Election of officers.

Section 8. Regular Committees.—The following committees will be appointed by the Executive Committee:
[fol. 1616] Committee on Statistics;
Committee on Use and New Uses;
Traffic Committee;
Committee on Trade Conditions;
Committee on Export Trade;
Committee on Packages and Standardization;
Committee on Welfare of Employes.

Section 9. Amendments to By-Laws.—Amendment to these By-Laws may be proposed at any regular or special meeting of the Association, provided it has been presented to the Executive Committee, signed by three members, and copies sent to each member of the Association in the notices of the meeting, and such proposed amendment may be discussed at such meeting and adopted by a two-thirds vote of those present.

A report setting forth statistical information was read by Mr. Mallory, who referred to difficulties in obtaining some old statistics, and upon motion duly made, second- and carried, it was:

Resolved, that the Secretary request each manufacturer (whether a member of the Association or not) to furnish the statistics needed by the Committee on Statistics.

A committee of seven was appointed to examine the matter of a reporting plan and to report to the Executive Committee. The committee appointed was as follows: Mr. Young, Mr. Gerstell, Mr. [fol. 1616½] Fuller, Mr. Beach, Mr. Brobston, Mr. Corbett, Mr. Holman.

The matter of concrete roads was taken up and considered, it being pointed out that the specifications in the Middle States were now being drawn up, and the advisability of action if those specifications are to permit the use of concrete roads was referred to. It was suggested that committees be appointed consisting of two members of the Association, two dealers in each State, and one concrete road expert, making committees of five, to take up the matter with the Highway Commissioners of the various States. After discussion, the matter was referred to the Committee on Uses and New Uses, with the understanding that the committees agreed upon by that Committee would be appointed. Two reports from the Committee

on Trade Practices were read, setting forth various practices which have been followed in reference to manufacturers giving commissions to dealers, and the matters covered by the report were discussed by various members.

At the close of this discussion, the meeting adjourned.

[fol. 1617] Meeting of the Executive Committee February 4, 1913

The regular monthly meeting of the Executive Committee was held at the Hotel Astor on February 4, 1913, at 11:00 A. M.

The Vice-President, Mr. Mallory, presided.

There were present Mr. Mallory, Mr. Brobston, Mr. Dumary, Mr. Paige, Mr. Lober, Mr. Holman representing Mr. Morron, Mr. Young, Mr. Gerstell and Mr. Cox of counsel.

The minutes of the last meeting were read and approved.

The Committee on Trade Conditions, Mr. Young, Chairman, made a report as to trade practices followed by different Cement manufacturers in selling dealers and consumers.

The Committee on Traffic, Mr. Gerstell, Chairman, reported the result of a traffic conference held at 143 Liberty Street January 28, regarding the rail and lake tariff and certain inequalities in rates from various districts to points in New England and Northern New York.

The Committee on Packages, Mr. Stapleton, Chairman, presented a report, dated February 4th, dealing with the practice of the United States government in refusing to allow the price of bags to be included in the invoices for Cement shipped on government contracts. The Secretary was instructed to send a copy of this report to each member of the Association.

The Committee on Uses and New Uses, Mr. Moyer, Chairman, [fol. 1617½] made a verbal report that this Committee was now concentrating on concrete road construction and gave the results of several recent meetings with the Highway Departments of several states. Mr Lober suggested that the Association employ a Road Engineer (or Engineers) to devote his whole time to this subject in the interest of the Eastern Cement Association. Mr Gerstell suggested that it might be advantageous to have the National Association deal with this question and employ as many additional engineers as seemed desirable. On motion of Mr. Young, it was decided that a committee of three be appointed to confer with the National Association and decide whether it seemed best to have this body or the Eastern Association employ the additional Engineers. The Chair appointed Mr. Holman, Mr. Young and Mr. Gerstell on this Committee with Mr. Holman as Chairman.

The Committee on Statistics, Mr. Mallory, Chairman, brought up the question whether statistics of production, shipments and stocks on hand should be issued in detail for each mill or whether totals only should be sent out as is done in the National Association. It was decided to divide the territory into three districts—No. 1, Eastern Pennsylvania and New Jersey; No. 2, New York State;

No. 3, Maryland and Virginia and that only totals should be reported, the details to be held by the Secretary in confidence and not to be divulged except by order of the Executive Committee.

Mr. Young, Chairman of the Special Committee of Seven, appointed at the last meeting to consider a Reporting Plan, made a [fol. 1618] verbal statement that the Committee had not yet been able to work out a satisfactory plan, but expected to be able to do so in time to recommend such a plan at the next meeting. Mr. Paige asked that this report, if possible, be sent to members of the Executive Committee in time for consideration before the next meeting so that members might come prepared to discuss it.

There were no other Committee reports. All of the above Committee reports were ordered presented to the next general meeting of the Association.

Mr. Mallory suggested that it might be well to consider inviting consumers of Cement to the meeting of the Association and in the discussion Mr. Cox pointed out that this could be done under the last clause of the Constitution relating to Publicity.

The Chairman requested that meetings of the various Committees be held as far as practicable and convenient in the office of the Secretary or that the Secretary should attend such meetings, if possible, when held elsewhere.

The Executive Committee approved the action of the Secretary in leasing Room 1413 Thirty Church Street until April 30th, at the rate of Three Hundred Sixty Dollars per annum and authorized the expenditure by the Secretary of not to exceed Two Hundred Seventy-five Dollars for office furniture. The Secretary was also authorized to sign a telephone contract for One Thousand calls per year at Sixty-six Dollars per year, this contract to be executed for three months only if possible.

[fol. 1618½] Meeting of Traffic Committee, January 28, 1913

On the above date Mr. Harding, Mr. Coogan, Mr. Paulsen and Mr. Morris of the Traffic Committee met with Mr. Koons, Mr. Blood, Mr. Hubbell and other Railroad Traffic Managers to consider the question of the rail and lake tariff from the Eastern territory to Lake and Western points.

Mr. Koons made the statement that pressure was being brought to bear on Eastern Railroads to raise this rate to off-set certain adjustments that had been made between Eastern and Western freight rates and he asked for the views of the shippers interested.

The Cement Traffic Committee made the proposition to eliminate Cement from lake and rail tariffs and put into effect proportional rates to Buffalo, or, if this could not be done, an alternate proposition to agree on an advance to $2.60 to Lake Michigan ports and $3.00 to Lake Superior ports, providing the New York State and New England tariffs were at the same time adjusted satisfactorily to the Cement Committee. The Railroad Traffic Managers thought there would be no trouble at all in the matter of New England rates, but

Mr. Hubbell, of the New York Central Railroad, seemed inclined to magnify the difficulties in the way of adjusting the Northern New York rates. The Cement Committee, however, made no concession from their proposition as outlined above and Mr. Koons said that the Railroads would try to arrange the matter as suggested by the Cement Committee.

[fol. 1619] February 4, 1913.

Eastern Cement Association, New York City, New York.

GENTLEMEN: At the last meeting your Committee on Trade Practices offered a brief report setting forth some of the practices followed by different cement manufacturers in dealing with the problem presented in preserving dealers' connections in various situations.

Since that report your Committee has made further investigations as to these practices and finds that certain manufacturers follow a practice which may be defined as follows:

Each of these manufacturers makes quotations to contractors for specific work requiring less than 7,500 barrels five cents above the manufacturer's minimum price.

On quantities of 7,500 barrels and over, where delivery can be made in carload lots, each of these manufacturers quotes direct to the contractor.

Manufacturers following this practice make the following exceptions where they quote direct:

United States Government,

Steam and electric railroads,

Manufacturing companies for construction work at their plants or for use in making the commodity which they manufacture where shipped in carload lots direct.

[fol. 1619½] Your Committee desires to supplement its earlier report by adding the practice above set forth.

Respectfully submitted, E. M. Young, Chairman Committee.

New York, February 4, 1913.

Mr. President and Members of the Eastern Portland Cement Mfgrs. Assn.

GENTLEMEN: Your Committee on returned bags begs to report as follows:

It is the practice of the several departments of our general Government in asking for tenders for Portland Cement to require bidders to submit prices for bulk cement only, declining to pay for the bags until the close, or completion of the contract and then pay only for such bags as have not been returned, or to permit the value of the bag to be made a part of the price that the Government agrees to pay. This practice is unfair to the manufacturers and dealers in Portland Cement and is an attitude that no other consumer as-

sumes. In the opinion of your Committee the Association should endeavor to have the Government conform to the common practice of the trade and as a first step in that direction that the matter should be taken up with the various departments and suitable representation should be made of the unfairness of their attitude in the hope that the desired change can be brought about without the [fol. 1620] manufacturers being obliged to come in conflict with the Government on the question. Your Committee has under serious consideration the handling of returned bags either through a Clearing House, or otherwise, and hopes to be able to submit a definite plan for your consideration at our next regular meeting. To that end and in order to facilitate matters your Committee would highly appreciate having each member of this Association submit in writing to said Committee at the earliest possible date any suggestions or their views concerning this subject, so as to assist the Committee in forming a suitable recommendation.

Respectfully submitted, E. R. Stapleton, Chairman Committee.

Meeting of Eastern Cement Association Held at Hotel Astor, New York City, on February 4th, 1913, at 2:30 p. m.

In the absence of the President, Mr. Mallory acted as Chairman throughout the meeting.

The following were present:

J. W. Fuller, R. S. Weaver, Mr. Cope representing the Allentown;
A. F. Gerstell representing the Alpha;
W. P. Corbett representing the Alsen's;
R. E. Griffith representing the American;
A. de Navarro, W. A. Holman representing the Atlas;
[fol. 1620½] B. F. Stradley representing the Bath;
M. E. Calkins representing the Cayuga Lake;
F. L. Leob, C. H. Breerwood representing the Coplay;
Joseph Brobston representing the Dexter;
W. S. Mallory representing the Edison;
T. H. Dumray representing the Helderberg;
E. M. Young, Mr. Swett representing the Lehigh;
A. W. Paige, J. A. Horner representing the Nazareth;
R. E. Griffith representing the Norfolk;
W. E. Erdell representing the Penn Allen;
W. N. Beach, J. W. Alker representing the Pennsylvania;
George W. Laub representing the Phoenix;
Charles Warner representing the Security;
E. R. Stapleton representing the Tidewater;
H. M. Fetter representing the Virginia;
John B. Lober, Albert Moyer representing the Vulcanite.

The Chairman reported that the Association had taken an office in the Hudson Terminal Building, No. 30 Church Street.

Mr. Moyer, of the Committee on Uses and New Uses, made an extended verbal report upon the work of the Committee in promot-

ing the use of concrete roads, giving the results of interviews with the Highway Commissions of Rhode Island, Connecticut, Maryland, Pennsylvania, New Jersey, and indicating the arrangements made as to similar work in Massachusetts, New Hampshire, Vermont and New York.

[fol. 1621] Mr. Gerstell made a statement concerning the work done in arranging with the officials of West Virginia to lay a concrete road at a prominent point in that State.

The report of the Committee on Packages, referring to the peculiar requirements of the United States Government in regard to packages, was read.

Mr. Young read a supplemental report from the Committee on Trade Practices.

The Chairman stated that the matter of statistics had been considered by the Executive Committee and it had been decided to deal with them merely as totals, as the National Association does, except that instead of making the totals in two districts, they would be made in three districts.

Mr. Gerstell, of the Committee on Traffic, made a statement concerning freight rates, pointing out that the rates from the Lehigh Valley to various points are very much higher than the rates from any other cement producing district and that some of the rates are one hundred and ninety per cent. per ton per mile higher than from the Universal Mills, and that the rates upon coal and limestone used by the cement mills in the Lehigh Valley are also unfair. This matter was discussed by several members, the views expressed being all to the effect that the matter is of the utmost importance and the Association should undertake to have these rates corrected.

There being no further business the meeting then adjourned.

—— ——, Secretary.

[fol. 1621½] Special Meeting of the Executive Committee Held February 28, 1913, at the Recess Club at 12:30 p. m.

The meeting was called to order by the President, Mr. John R. Morron; in addition to the President there were present Messrs. W. S. Mallory, Joseph Brobston, John B. Lober, W. H. Harding, E. M. Young, T. H. Dumary, A. W. Paige, W. A. Holman, Archibald Cox of Counsel and J. W. Kittrell, Secretary.

Mr. Cox read an opinion recommending that the Association proceed no further, and upon motion duly made, seconded and unanimously carried, it was

Resolved that the Executive Committee unanimously recommend to the Association that it proceed no further, in view of the recommendations of Counsel filed herewith.

The roll call on the above resolution resulted as follows:

John R. Morron voting Aye.
W. S. Mallory " "
Joseph Brobston " "
John B. Lober " "
W. H. Harding " "
E. M. Young " "
T. H. Dumary " "
A. W. Paige " "

The Treasurer and Secretary were instructed to prepare a full statement of the unpaid obligations of the Association to be presented to the Executive Committee at the next regular meeting on Tuesday, March 4th.

There being no further business the meeting adjourned.

—— ——, Secretary.

[fol. 1622] Regular Monthly Meeting of the Executive Committee held March 4, 1913, at the Railroad Club, 30 Church Street, New York City, at one p. m.

The meeting was called to order by the President, Mr. John R. Morron. The other members of the Committee present were Messrs. W. S. Mallory, Joseph Brobston, E. M. Young, W. H. Harding, John B. Lober, A. W. Paige, T. H. Dumary, Archibald Cox of Counsel and J. W. Kittrell, Secretary.

The minutes of the last meeting were read and approved.

The Treasurer reported that the total net liabilities of the Association on dissolution would be Three Thousand Dollars in excess of the amount on hand plus unpaid dues for current quarter.

On motion duly made, seconded and unanimously carried, the Treasurer was instructed to assess each Company of the Association One Hundred Seventy-five Dollars to liquidate all its obligations.

There being no further business the meeting then adjourned.

—— ——, Secretary.

[fol. 1622½] Regular Monthly Meeting of the Eastern Cement Association Held at the Railroad Club, 30 Church Street, New York City, on March 4, 1913, at 2:30 p. m.

The meeting was called to order by the President Mr. John R. Morron. The following were present:

R. S. Weaver representing the Allentown;
Mr. Hennessey representing the Alpha;
Robert S. Sinclair, W. P. Corbett representing the Alsen's;
John R. Morron, A. de Navarro, W. A. Holman representing the Atlas;
B. F. Stradley representing the Bath;
M. E. Calkins representing the Cayuga;

F. L. Loeb, C. H. Breerwood representing the Coplay;
Joseph Brobston representing the Dexter;
W. S. Mallory representing the Edison;
George F. Bayle representing the Glens Falls;
T. H. Dumary representing the Helderberg;
E. M. Young representing the Lehigh;
A. W. Paige, J. A. Horner representing the Nazareth;
R. E. Griffith representing the Norfolk;
W. E. Erdell representing the Penn-Allen;
W. N. Beach, J. W. Alker representing the Pennsylvania;
J. W. Walker representing the Phœnix;
Charles Warner, Charles Catlett representing the Security;
John B. Lober, Albert Moyer representing the Vulcanite;
[fol. 1623] W. H. Harding, W. C. Kent representing the Whitehall;
Archibal Cox of Counsel and J. W. Kittrell, Secretary.

By direction of the President the Secretary read the resolution adopted at the special meeting of the Executive Committee held February 28, 1913, as follows:

Resolved that the Executive Committee unanimously recommend to the Association that it proceed no further, in view of the recommendations of Counsel filed herewith.

Mr. Cox then read the opinion making the recommendations stated above.

On motion duly made, seconded and unanimously carried it was

Resolved that the Association be discontinued in accordance with the unanimous recommendation of the Executive Committee stated above.

There being no further business, the meeting adjourned.

—— ——, Secretary.

[fol. 1623½] Suggested Plan for the Organization of an Association of Cement Manufacturers

It having been suggested that the interests of those engaged in the manufacture of Portland Cement in the Eastern part of the United States can be best conserved by the organization of an Association, the undersigned respectfully submit the following suggestions:

That an Association be formed having for its object the discussion of the various questions of interest to the industry arising from time to time and to exchange views as to the best methods of manufacturing, extending, developing and conducting the business and to do all things incidental and conducive to the attainment of the above objects.

That the Association be composed of corporations, firms or individuals engaged in the manufacture of Portland Cement in the States of New York, Eastern Pennsylvania, New Jersey, Maryland and Virginia.

That the Association maintain a central office in charge of a Secretary or Manager, in which office all records pertaining to statistics, contracts, etc. shall be filed.

That the By-Laws shall provide for the appointment of active Committees, among which shall be the following:

Committee on Statistics.
Committee on Publicity.
[fol. 1624] Traffic Committee.
Committee on Trade Conditions.
Committee on Exports.
Committee on Packages.
Committee on Accident Prevention.

Committee on Statistics

This Committee to have charge of and arrange for complete records of production, shipments and stocks on hand, prepare estimates of the probable domestic and export consumption and keep the Executive Committee advised as to the probability of a surplus or shortage of Cement in the then immediate future.

Committee on Publicity

This Committee to have charge of a general publicity campaign for the purpose of developing the maximum demand in our home market for the product of our mills.. The work of this Committee shall also include a general campaign to develop new uses for Cement and to educate the public in the numerous applications of this product to useful, ornamental and utilitarian purposes.

One of the great advantages of co-operation in a general publicity campaign, directed from one source is the saving in duplicating publicity material, as is now done. Under existing conditions, there are dealers and contractors who receive the same literature from several companies,—a considerable waste of money, both for the literature itself and postage.

[fol. 1624½] This Committee should devote a large part of its time and effort to a campaign of education in connection with the construction of concrete roads. These roads are successfully built and used in Wayne County, Michigan and elsewhere. By following intelligently the lead thus open to us, we can develop an immense new market for our product. The need of substantial and cheap roads, requiring a minimum of expense for maintenance, was never greater than at the present time. This type of road requires from 2,000 to 3,000 barrels of Cement per mile. If 1% of all the roads constructed each year in the United States were constructed of concrete, the annual consumption of Cement for this purpose would amount to over 5,000,000 barrels.

It is stated by the Government Bureau of Roads that the average cost of maintenance per mile per year of the macadam roads in the United States is from $400 to $860. Four years' experience at Detroit shows maintenance cost of concrete roads to be about $10 a mile.

For this purpose the Association should maintain close relations

with the Association of American Portland Cement Manufacturers, employing the services of their engineers and using the valuable data on file in the office of that Association. This will greatly facilitate the work and minimize the expense.

Traffic Committee

This Committee to study and report upon the traffic problems of the home territory as compared with those of competitive dis-
[fol. 1625] tricts. It should also study and handle questions relating to local freights, not only on Cement, but supplies of coal, limestone, etc.

Committee on Trade Conditions

This Committee to arrange for forms for uniform contracts with dealers and consumers. This will tend to promote the interests of the Cement industry and of the public. There is probably no one department of our business into which so many pernicious practices have crept as this. For instance, it is a common occurrence for buyers who have received quotations from a number of mills on a specific job, to inform these mills that they have lower quotations from other mills, for the purpose of obtaining lower prices. Nine times out of ten these statements are false and it is suggested that if the members of this Association would file with the Secretary copies of their quotations on specific jobs, these false statements could be detected and the manufacturers protected from the consequences of this practice.

The practice of selling dealers unlimited quantities of Cement for delivery throughout the year is also one that should be eliminated. These so-called sales are not in reality sales, but merely options, as the dealer promptly repudiates the contract if the market price declines and if it advances, demands every barrel due him. Under existing conditions the manufacturer has no redress. It is in the power of such an Association as is here suggested, to put a stop to this practice.

[fol. 1625½] Committee on Exports

In what is known as the Lehigh District there is a capacity to produce largely in excess of the requirements of the natural market of that District and it is suggested that it would be wise to have this Committee devote its time and efforts to the building up of a larger export business by obtaining information regarding the requirements of the countries that are obliged to buy their supplies of Cement in foreign markets, the rates of freight and best methods of shipping, the most effective means of advertising our product in those countries and generally collecting and disseminating information that will enable us to successfully compete with England and Germany in the sales of our surplus.

1999

Committee on Packages

This Committee to have referred to it all questions relating to the purchase and handling of cotton sacks, paper bags and the manufacture of barrels. At the present time there is more or less demoralization and loss due to the methods in vogue in connection with the return of and purchase of empty sacks. A uniform method of dealing with this question should be adopted.

Committee on Accident Prevention

This Committee should take up and carefully consider the subject of prevention of accidents. Some of the States in which members of the proposed Association are now operating have already [fol. 1626] passed compulsory compensation laws and undoubtedly all states in our home district will pass such laws in the near future.

Experience in Germany and England shows that such laws increase the cost of accidents to the employer and that the real solution of the problem, from the standpoint of the employer, lies in taking the necessary steps to prevent accidents.

This Committee should study how to minimize the number and severity of accidents to employees and how to reduce the cost of same to a minimum under the employer's liability laws. It is suggested that in this connection an expert inspector might be employed by the proposed Association to inspect the plants of the members and make recommendations as to the best means of reducing accidents and their cost to a minimum.

Following these suggestions, the undersigned submit herewith a draft of Constitution and By-laws for such an Association as is here outlined.

[fol. 1626½] Constitution and By-laws of the Eastern Cement Association

Constitution

1. The name of the Association shall be Eastern Cement Association.

2. The Association is formed for the purpose of discussing the various questions of interest to the industry arising from time to time, and to exchange views as to the best method of manufacturing, extending, developing and conducting the business, and to do all things incidental and conducive to the attainment of the above objects.

3. The Association has no Capital Stock, and the members thereof shall be composed of the subscribers and their associates and of such persons as may from time to time be admitted by vote in such manner and upon such requirements as may be prescribed by the By-laws. The Association shall, nevertheless, have power to exclude, expel or suspend members for just or legal cause subversive of the best inter-

ests and morals of the business and in such legal manner as may be ordained and directed by the By-laws.

[fol. 1627] 4. The By-laws of the Association shall be admitted and taken to be its laws subordinate to this Constitution and the Constitution of the United States; they shall be altered and amended as provided for by the By-laws themselves, and shall prescribe the powers and functions of the Executive Committee herein mentioned and those to be hereafter elected, the times and places of meetings of the Committee and this Association, the number of members who shall constitute a quorum at the meetings of the Association and of the Committees, the qualifications and manner of electing members, the manner of electing officers, and the powers and duties of such officers, and all others concerned, and all internal arrangements of the said Association.

5. Proposed amendments to the Constitution signed by at least three (3) members must be presented in writing to the Executive Committee at least two (2) weeks before the next meeting of the Association. In the notices of this meeting the proposed amendment or amendments shall be presented. At the meeting, the proposed amendment or amendments may be discussed and amended. They shall then be sent out to letter ballot. If two-thirds of the total membership as signified by letter ballot are in favor of the amendment or amendments, it or they shall be adopted.

[fol. 1627½]

By-Laws

Article I

Members

Section 1. Any corporation, firm or individual engaged in the manufacture of Portland Cement in the States of New Jersey, Eastern Pennsylvania, New York, Maryland and Virginia, is eligible for membership.

Section 2. Any corporation, firm or individual as above limited, can become a member of the Association upon being proposed by two members of the Association and being elected by a majority of the Executive Committee.

Section 3. Applications for membership and resignations from membership must be transmitted in writing to the Secretary.

Article II

Officers and Their Election

Section 1. The officers shall be a President, Vice-President, Secretary and Treasurer.

Section 2. These officers except the Secretary, shall be elected at the annual meeting and shall hold office for one year. The Secretary shall be appointed by the Executive Committee.

[fol. 1628] Section 3. The Executive Committee shall consist of the President, Vice President, Treasurer and six members to be elected at each annual meeting. A majority of the Committee shall constitute a quorum.

Section 4. The Secretary may receive a salary to be fixed by the Executive Committee.

Section 5. The President, Vice-President, Treasurer and members of the Executive Committee, elected under these By-Laws, shall serve for their respective terms to which they have been duly elected, or until their successors have been duly elected.

Section 6. The Executive Committee shall have the power to fill any vacancies occurring in their number by death, resignation or otherwise, and to appoint such committees and such other officers and employees as may be necessary to carry out the objects of this Association. They shall also fill vacancies in the general offices.

Section 7. At all meetings each membership shall have one vote.

Section 8. Except the Secretary, the election of officers and members of the Executive Committee shall be by ballot. The Executive Committee, before each annual meeting, shall appoint a Nominating Committee of three from the members of the Association, not members of its own body, whose duty it shall be to nominate a full list of officers. The list of nominations so made shall be submitted to the [fol. 1628½] membership not more than six (6) weeks nor less than three (3) weeks before the coming annual meeting.

Further nominations signed by at least five members may be submitted to the Secretary in writing at least two (2) weeks before the annual meeting, and such nominations shall also be submitted to the membership on the official ballot.

Article III

Duties of Officers

President

Section 1. It shall be the duty of the President to preside at all meetings of the Association and of the Executive Committee. He shall himself be ex-officio a member of all committees. He shall sign all orders on the Treasurer for the payment of money; he shall see to the enforcement of the By-Laws, and shall carry into execution all resolutions of the Association and of the Executive Committee.

Vice-President

Section 2. The Vice-President shall, in the event of the death, resignation, disability or absence of the President, perform all the duties of said officer.

[fol. 1629] Secretary

Section 3. It shall be the duty of the Secretary to give notice of all meetings of the Association and of the Executive Committee; to keep a record of all proceedings had at such meetings; to preserve all communications received by him pertaining to the affiairs of the Association; to draw and attest all orders on the Treasurer; to keep a roll of the members of the Association; and to perform such other duties as usually pertain to the office of Secretary or as the Association or Executive Committee may require.

Treasurer

Section 4. The Treasurer shall receive and collect the dues of the members and al other moneys otherwise belonging to the Association, and shall deposit the same in a depository to be designated by the Executive Committee. He shall pay out such moneys only upon the order of the President, attested by the Secretary, and shall preserve the proper vouchers for all payments so made. He shall keep proper books of account, which shall be open at all times to the inspection of the Executive Committee, and at the close of his term of office, he shall deliver to his successor, all moneys, books, papers and other valuables belonging to the Association, which shall be in his custody or possession.

No obligation shall be incurred on behalf of the Association except by order of the Executive Committee.

[fol. 1629½] Article IV

Meetings

Section 1. The Association shall meet monthly, the time and place of meeting to be fixed by the Executive Committee.

Section 2. Special meetings may be called whenever the Executive Committee shall deem it necessary or upon request of three members.

Section 3. A majority of all the members shall constitute a quorum.

Section 4. Order of Business: Roll Call, Minutes of last meeting shall be read, Reports of Officers, Reports of Committees, Unfinished Business, New Business.

Article V

Dues

Section 1. The fiscal year shall begin on the first day of January and dues shall be payable quarterly in advance on the first day of January, April, July and October.

Section 2. The annual dues of each member shall be Two Hundred Dollars ($200).

[fol. 1630] Section 3. Any member of the Association whose dues shall remain unpaid for a period of three (3) months shall forfeit the privilege of membership. If such member neglects to pay the dues within thirty days thereafter and after notification from the Secretary, the name of such member may be stricken from the roll of membership by the Executive Committee.

Article VI

Discipline of Members

Any member may be suspended or expelled for causes, by a vote of three-fourths of all the members of the Association, as expressed by secret ballot, and upon charges preferred by the Executive Committee, one month's previous notice in writing having been given to the member with a copy of the charges preferred against him.

Article VII

Section 1. Proposed amendments to these By-Laws, signed by at least three (3) members, must be presented in writing to the Executive Committee at least two (2) weeks before the next meeting of the Association. In the notices of this meeting, the proposed amendment shall be printed. At meeting, the proposed amendment may be discussed and adopted by a two-thirds vote of those present.

Section 2. The Executive Committee is authorized to number articles and sections of the By-Laws to correspond with any changes that may be made.

[fol. 1630½] Eastern Cement Society

Constitution

Article I

Name

The name of the Society shall be Eastern Cement Society.

Article II

Objects

The objects of the Society are as follows:

A. To promote publicity in the transaction of business.

B. To promote cordial and friendly relations among members, by means of monthly and other stated meetings, thereby removing, so far as possible, misunderstandings and ill feelings due to the spread-

ing of false reports and baseless charges, and to ignorance of conditions prevailing in the industry.

C. To collect and disseminate accurate information concerning the manufacture and sale of cement, including correct statistics regarding the capacities and outputs of all plants engaged in the manufacture of cement, together with periodical reports regarding outputs, shipments, orders and prices; to gather and publish accurate [fol. 1631] information regarding labor conditions, material markets and all conditions affecting the industry generally, to the end that each member, however small his output, may be placed, in so far as data for the intelligent conduct of his business goes, on a footing of equality with other companies having larger facilities, it being one of the underlying convictions of the Society that intelligent competition is far better for the industry than ignorant. In this connection it is one of the objects of the Society to ultimately make the information gathered official in character and publish statistical results for the information of the public generally.

D. To maintain high and uniform standards in the manufacture of cement, to the end that customers may be guaranteed the character and quality of cement purchased.

E. To devise ways and means for promoting the use of cement, in new ways and for new purposes, it being the firm belief of those engaged in the industry that organized effort can very materially extend the use of cement.

F. To take up and intelligently discuss the many traffic questions which can be dealt with only by an organization.

G. To co-operate with customers in the correction of unfair and pernicious practices and customs, and in this connection to work out, so far as practicable, uniform contracts, which will be fair and satisfactory to the trade and to the public.

[fol. 1631½] H. To systematically investigate foreign markets with a view to promoting the export trade.

I. To devise and recommend to purchasers and customers more uniform methods in the handling of packages, especially in connection with the return and purchase of same, to the end that all buyers may be placed upon a more nearly equal footing in these respects, and secret practices, amounting to secret and unfair rebates, be brought out into the open.

J. To take up and carefully consider sanitary, hygienic and safety measures and appliances and, in this connection, the insurance and pensioning of employes and the welfare of employes generally.

K. To devise and recommend for general adoption a scientific system of cost accounting, to the end that each member may accurately know the cost of his product. In this connection, it is not the purpose of the Society to impose upon any member any cost system, or to use in any manner a cost system as a means for con-

trolling prices. The sole object is to secure, if possible, the adoption of a scientific system of cost accounting, without in any manner seeking to have disclosed the actual costs of a member.

L. The introduction of the open price policy, which simply means, as the phrase indicates, the bringing out into the open of all competitive conditions, without in any manner, directly or indirectly, restraining the freedom of any member to quote such prices as it [fol. 1632] pleases, each member being as free to compete, both with those within and with those without the Society, as if the Society did not exist.

Article III

Officers

Section 1. The officers shall be a President, Vice-President, Secretary, Treasurer and General Counsel.

Section 2. All officers, except Secretary and General Counsel, shall be elected at the annual meeting and shall hold office for one year, or until their successors have been duly elected.

The Secretary and General Counsel shall be appointed by the Executive Committee and shall receive such salaries as may be agreed upon.

Section 3. The Executive Committee shall consist of the President, Vice-President, Treasurer and four members, to be elected at each meeting.

A majority of the Committee shall constitute a quorum.

Section 4. The Executive Committee shall have power to call meetings whenever deemed advisable, to fill vacancies occurring in its number, to fill vacant offices until the next stated or special meeting, to employ such other officers and employes as may be necessary to carry out the objects of the Society, and to perform [fol. 1632½] such other acts and duties as shall be for the general interest of the Society and its members.

Article IV

Members

Section 1. Any corporation, firm or individual engaged in the manufacture of Portland Cement in the States of New Jersey, Eastern Pennsylvania, New York, Maryland and Virginia is eligible to membership and may become a member by being proposed by two members of the Society and being elected by a majority of the Executive Committee.

Section 2. Application for membership and resignations must be transmitted in writing to the Secretary.

Article V

Meetings

Section 1. The regular meetings of the Society shall be held on the first — after the 4th day of each month, or at such dates and places as the Executive Committee shall name.

Due notice of meetings shall be sent to each member at least ten days in advance.

Section 2. A majority of the members, when present at any meeting, shall constitute a quorum.

[fol. 1633] Section 3. The meeting held in the month of January of each year shall be the Annual Meeting of the Society.

Article VI

Election of Officers

The election of officers shall take place at the regular Annual Meeting in January. Those having the majority of the votes of those present shall be declared elected.

Article VII

Amendments

Amendments to these articles may be proposed at any regular or special meeting of the Society. Due notice of such amendments shall be given in writing to each member at least ten days in advance of the meeting at which such amendments are to be voted upon, and an amendment to be adopted must receive at least a two-third- vote of the members presents.

Article VIII

Freedom of Trade

No member of the Society shall enter into any agreement or understanding of any nature or kind whatsoever, the object of which is to restrain trade, limit competition or do any act which is contrary [fol. 1633½] to the spirit and letter of the law, or which is contrary to the objects of the Society as set forth in this constitution.

Article IX

Publicity

The records of the Society, its files and its correspondence, and its meetings, shall be open at all times to any public official who, in the performance of his duties, is legally authorized to investigate the

workings of the Society, the fundamental object of the Society being perfect frankness and openness in all dealings among members and in all dealings with customers and the public.

By-Laws

Section 1. President.—It shall be the duty of the President to preside at all meetings of the Society and of the Executive Committee, to appoint all committees not otherwise provided for, and, in case of the equal division of the members on any question, to cast the deciding vote. He shall also have power to call the Executive Committee together, at such time and place as he may select, and, upon the written request of five members, he shall be required to call a special meeting of the Society.

Section 2. Vice-President.—It shall be the duty of the Vice-President to perform the duties of the President in the absence of the latter.

[fol. 1634] Section 3. Treasurer.—It shall be the duty of the Treasurer to collect and receive all moneys of the Society, to pay all orders for money, when countersigned by the Secretary, and to keep a correct record of the receipts and disbursements, an abstract of which, together with the necessary vouchers, he shall exhibit at the regular January meeting, or whenever called upon by the Executive Committee.

Section 4. Secretary.—It shall be the duty of the Secretary to keep a careful record of the transactions of the Society and of the Executive Committee, to notify all members at least ten days in advance of the times and places of all meetings of the Society, to examine all bills and countersign all orders on the Treasurer, to conduct the correspondence of the Society, to collect statistics and information contemplated in the constitution, and to perform such other duties as may be assigned to his office.

He shall carefully collect all information regarding trade conditions and present same in a report at each regular meeting, and be then and there present to give the data upon which his report is based.

He shall combine the reports received from individual members into total monthly and annual figures which will be an indication of the state of the trade.

Section 5. Executive Committee.—The Executive Committee shall have the management of the affairs of the Society and fix the dates and amounts of assessments. They shall also fix, subject to the ap-
[fol. 1634½] proval of the Society, the compensation and terms of employment of the Secretary and the General Counsel, and provide for such other expenditures as may be necessary. They shall fix the time and place for their meetings and provide rules for their government.

Section 6. Membership.—Applications for membership in the Society may be acted upon at each monthly meeting, due notice of application having been given to the Secretary at least ten days before the meeting at which action shall be taken, so that the Secretary can notify the members of such application. All applications for membership shall be presented by a member of the Society.

Section 7. Voting Power.—Members may be represented at any meeting by authorized delegates, who shall be entitled to full rights and privileges of the members they represent, but only one vote shall be cast on behalf of each member.

Section 8. Dropping of Members.—By a two-thirds vote of the members present at any meeting, a member, providing he has been given ten days' notice of the proposed action and an opportunity to be heard, may be dropped for failure to pay any assessments within thirty days after same are made, or for failure to conform to the constitution and the by-laws of the Society.

Section 9. Regular Committees.—The following committees will be appointed by the Executive Committee:

[fol. 1635] Committee on Statistics.
Committee on Promoting the Use of Cement.
Committee on Traffic Conditions.
Committee on Trade Conditions.
Committee on Export Trade.
Committee on Packages and Standardization.
Committee on Welfare of Employes.

Section 10. Order of Business.—The order of business shall be as follows:

1. Calling of the roll.
2. Reading of the minutes.
3. Election of new members.
4. Reports of officers.
5. Reports of committees.
6. Receiving of communications.
7. Reports from members of conditions affecting the industry.
8. Unfinished business.
9. New business.
10. Election of officers.

Section 11. Amendments to By-Laws.—Amendments to by-laws may be proposed at any regular or special meeting of the Society. A copy of such proposed amendment must be sent to each member by the Secretary, in writing, at least ten days in advance of such meeting. To adopt any amendment it must receive a two-thirds vote of the members present.

[fol. 1635½] Reporting Plan

To carry out the open price policy of the Society, and bring all competitive conditions out into the open, the following reporting plan is adopted:

Each member will file with Secretary:

1. All price lists and terms upon which goods are sold. The lists must include rebates, discounts and concessions of every kind, together with any discretion allowed salesmen or agents in making prices or terms; also terms and conditions upon which sacks are returned or purchased—in short, prices and all inducements, direct and indirect, offered to secure trade.

Every change in prices or terms; every sale and every contract made at prices or terms other than the list filed.

2. Every specific contract for a specific job, and said report shall state the number of barrels covered by the contract, together with the name, location and description of the job, so that the Secretary's office may check up and report upon the amount contracted for and the amount actually used.

3. All orders booked each week and all cancellations of orders in whole or part with names of parties cancelling and amounts canceled.

4. All shipments each week.

5. Business ahead each month express in time.

6. Where bids are made upon specific jobs in response to inquiries, each bidder will file a carbon copy or correct abstract of his bid as made, together with all revisions and changes in same as same are made.

[fols. 1636 & 1637] Secretary will deal as follows with above information:

A. Interchange immediately all price lists and all revisions thereof and send out immediately all reports of sales and contracts made at prices and terms other than the prices and terms filed by the member, also reports of cancellations with names of parties cancelling and amounts cancelled.

B. Where bids upon specific jobs are filed, same shall be interchanged as follows:

The first bid filed will be kept strictly confidential in the Secretary's office until the second bid covering the same work comes in, whereupon a copy of the first bid shall be sent to the second bidder and a copy of the second bid to the first bidder, and so on as each successive bid comes in. No information regarding such bids is sent to any member who is not an actual bidder upon such specific job. In this connection, it is distinctly understood that each member is free at all times to revise and change his bid as he pleases, both before

and after he receives information concerning bids filed by others, but if any member learns through the operation of the open price plan that he is not a low bidder, and he revises his bid to quote lower than some other member, the spirit of the open price policy requires that the member who so changes his price shall, in all fairness, give the other member or members interested sufficient notice of his lower bid to enable such other member or members to come in and still further compete for the order. To this end, each member who revises his figures to make a lower price than that made by another member will, with the consent of the customer, postpone the actual closing of the ——.

[fol. 1637½] GOVT. Ex. No. 556

December 14, 1912.

Mr. E. Myer, Mgr. of Sales, New York, N. Y.

DEAR SIR: Confirming verbal instructions given you yesterday, please note that under no circumstances are any orders to be extended beyond the date of their expirations on Dec. 31st, 1912, and also in making quotations to dealers to apply after January 1st, 1913, to please arrange that every quotation shall be made for acceptance in seven days, and only cover deliveries for thirty days.

Do not fail to impress this matter upon all your salesmen, as I do not want anything to come up in the new Association which is going to embarrass me in any way.

Yours very truly, W. S. Mallory, President. WSM-RBS.

[fol. 1638] GOVT. Ex. No. 557

"2/10/13.

W. S. Mallory to E. Meyer

* * * It is my wish that our company absolutely stick to the 30 day delivery basis, so far as it relates to dealers, as I am firmly of the opinion that conditions are such that the greater demand for cement during this year, coupled with a shortage of labor, which in my judgment is going to interfere with manufacturing to the maxi-
[fol. 1638½] mum, is going to warrant an advance in price later in the year, and inasmuch as our company has already booked over 1,000,000 barrels, the average price of which today is about 80 cents, if we are going to accomplish what we hope to accomplish in the way of financial returns for the year, we cannot do it if we so handle our business as to permit the dealers to make the profit instead of our own company doing it * * * and it is my firm belief that all the companies of this section are adhering strictly to the plan of only quoting and shipping the dealers for their requirements for 30 days. In fact, I know several of the large companies who are having nearly all their specific contracts checked up and one com-

pany has already discharged seven salesmen for accepting specific contracts which upon investigation proved to be dealers' contracts."

[fol. 1639] Govt. Ex. No. 558

March 5, 1913.

Mr. E. Meyer, Mgr. of Sales, New York, N. Y.

Dear Sir: Confirming telephone message of yesterday, would state: "Because of a recent decision of the Court of Appeals in the State of New York, and the recent Wilson bills passed by the State of New Jersey, it has been deemed wise to discontinue the Eastern Cement Association, not because it is illegal, but to avoid the possibility of our action being misinterpreted. We will make no changes in our trade practice or prices."

I am writing this to you merely to have it a matter of record, and I understand that you have already issued a copy of the above to all our sales offices.

Yours very truly, W. S. Mallory, President. WSM-RBS.

[fol. 1639½] Govt. Ex. No. 559

Carbon Copy Letter E. Meyer to W. S. Mallory

"3/20/13.

Mr. Banker, Member of the firm of the Colonial Coal Co. at Tuckahoe, N. Y., informs us that the Lehigh Portland Cement Co. quoted direct to the East Chester Contracting Co., Tuckahoe, N. Y., 1.67 per barrel/ * * * this price is one cent under the dealers' price and six cents under the book price to contractors. * * * Can you not get the Lehigh to withdraw this quotation, or permit us to meet it?"

[fol. 1640] Govt. Ex. No. 560

Alpha Portland Cement Co.

Litherage

New York, N. Y., January 27, 1913.

Amsterdam Building Co., 43 West 27th Street, City.

Gentlemen: Referring to your inquiry of —— —, ——, we beg to quote you the following prices on Alpha Portland Cement delivered in Carload lots f. o. b. cars, Troy, N. Y.

Price, per Barrel.—Alpha Portland Cement, in Wood, including barrels, $—; in Cloth, including bags, $1.64; in Paper, including sacks, $—.

Bags.—If shipped in Cotton Bags we will purchase the empty bags, returned in good condition, subject to our count and inspection, at 10 cents each, delivered to our works, Alpha, N. J., freight prepaid.

Quantity.—These prices are on aquantity of—10,000—bbls. to be used in erection of Samaritan Hospital.

Deliveries.—Deliveries to be completed Dec. 31, '13.

Weight.—The weight of a barrel of cement in cotton or paper, including package, is 380 lbs. The weight of a barrel of cement in wood, including package, is 400 lbs.

[fol. 1640½] Demurrage Regulations

Consignee's Wharf.—Twenty-four hours will be allowed "free of charge" for unloading any one shipment of 500 barrels or less. For each additional 500 barrels or part thereof, 24 hours additional "free time" will be allowed. "Free time" begins at the hour lighter or barge reports for berth, weather permitting the unloading of the cargo.

A charge of $15.00 will be collected by the lighterman for each 24 hours or fraction thereof after "free time" has expired; which charge constitutes demurrage, due to failure on part of consignee to unload within the prescribed time.

Public Wharf.—When shipments are consigned to public wharf, the lighterage company or lighterman will assume delay incident to securing berth. As soon as lighter is in berth, which will enable consignee to unload cargo, the "free time" allowance begins, and the same conditions and charges as provided for under the head of "Consignee's Wharf" will apply.

Terms

First.—Shipments in paper are made only at consignee's risk.

Second.—Strikes, including coal strikes in either the Anthracite or Bituminous coal regions, differences with employees, accidents to machinery, fire, flood, car famine, or other contingencies beyond the control of either the Seller or Buyer shall during the existence of any of said causes, excuse either party from the performance of this con-
[fol. 1641] tract and operate as a proportionate rescission thereof, provided that prompt notice shall be given by the party suffering from such disability to the other party, in writing, specifying the cause; otherwise, this agreement shall remain in full force and effect. The purchaser shall not in any event, however, be entitled to demand or receive deliveries of cement from the Seller subsequent to the date herein specified for the expiration of the agreement.

Third. Terms of Payment.—On approved credit, 1 cent per barrel off for cash in ten days from date of invoice, or 30 days net from date

of invoice. If, during the life of this agreement, the financial responsibility of the purchaser becomes impaired or unsatisfactory to the Alpha Portland Cement Co., cash payments with above discount must be made or satisfactory security must be given by the purchaser.

This quotation shall not be binding upon this Company unless accepted by the purchaser on or before March 28, 1913, nor until approved at the home office at Easton, Pa., and a copy with such approval returned to the purchaser.

Awaiting the favor of your acceptance, we remain,

Yours very truly, Alpha Portland Cement Company, by John B. Wright.

[fol. 1641½] Acceptance.—The foregoing quotation is hereby accepted at the prices and upon the terms and conditions named therein, and constitutes a contract between us.

Approved at Easton, Penna., —— —, 191-.

Dated —— —, 191-.

In flat hoop wooden bbls., per bbl., including barrels; gross weight 400 lbs.	.....	....

Terms.—On approved credit, one (1) cent per bbl. discount will be allowed for cash in ten days from date of shipment or net cash thirty days from date of each shipment. Sacks positively to be paid for with the Cement. If during the life of this agreement the financial responsibility of the purchaser becomes impaired or unsatisfactory to this Company, it may require cash payments or satisfactory security.

Sacks.—Cotton Vulcanite sacks returned to this Company at Vulcanite, N. J., freight prepaid, within sixty days from delivery of the cement will be purchased by this Company at ten (10) Cents each, if in good condition, but only on the inspection and count of this Company at its works, which shall be conclusive.

[fols. 1644½ & 1645] Rejected sacks may be destroyed or otherwise disposed of by this Company without liability, unless removed by you within ten days after notice of rejection.

Useless sacks will not be purchased. Barrels and paper bags are not returnable.

We send you this proposition in duplicate; upon our receiving one of the copies accepted by you in writing, it shall constitute a contract between us.

This quotation is void unless accepted prior to January 20, 1913.

Lehigh Portland Cement Co.

New York

December 24th, 1912.

Amsterdam Bldg. Company, 43 West 27th St., New York City.

Gentlemen: On December 16th we quoted you on "Lehigh" Portland Cement, to be used for the construction of the Samaritan Hospital Bldg., Peoples Ave. to Jacobs Street, Troy, N. Y. The price mentioned was $1.64 per bbl. F. O. B. cars Troy, N. Y.

We regret to advise you that we are compelled to withdraw this price, but name you a price of $1.79 per bbl. delivered on site of job, which we think will be equally satisfactory.

If tested cement will be required an additional charge of 6¢ per bbl. will be added to the above price.

Your acceptance should be in our office prior to January 16th, 1913.

[fols. 1656-1659] We do not think you will object to our alteration in the price and trust our cement will be used on the job.

Very truly yours, Lehigh Portland Cement Co. H. A. Brocas, Manager New York Office. FP'FIL.

[fol. 1660] Govt. Ex. No. 571

Specific Work—Sales Contract

1. Agreement, made and entered into this — day of ——, 192-, by and between The Atlas Portland Cement Company, of Pennsylvania (General Office, 30 Broad Street, New York City, New York), hereinafter called the Cement Company, and —— ——, of ——, hereinafter called the purchaser.

2. Witnesseth: That the Cement Company agrees to sell and the Purchaser agrees to purchase and receive the full Portland Cement requirements of the following described work but not exceeding the estimated requirements of — barrels of "Atlas" Portland Cement.

3. No assignment of this contract shall be made by the Purchaser without the consent of the Cement Company. The Purchaser represents that the cement has been sold by him for the express purpose mentioned in the contract and to and for use by the party named as user in the contract. If said representation is untrue, or if any of the cement is used for any other work, or for any other purpose, or sold (without the written consent of the Cement Company) to, or for use by any other party, the Cement Company shall have the right to terminate this contract and to refuse further deliveries of cement under it.

4. Description of Work: ——.

5. User of Cement: ——.

6. Shipments.—The cement shall only be ordered and shipped as nearly as practicable to meet the necessities of the work as it progresses, but under no circumstances shall the Cement Company [fol. 1660½] be obligated to ship hereon more than — barrels during any thirty consecutive days or subsequent to ——.

7. Price.—(Including four (4) cloth sacks at —c. each.)

8. It is understood and agreed that in the event of any change in the rates of transportation or delivery charges, made effective during the term of this contract or agreement, the price shall be increased or decreased accordingly, effective the same date.

9. If at any time the cost of new cloth sacks increases or decreases to such an extent that the Cement Company deems it advisable to change the above charge for cloth sacks, the above price for all shipments thereafter shall, at the option of the Cement Company, be accordingly increased or decreased from time to time by a sum determined by the Cement Company not in excess of the amount of increase or decrease in such cost of sacks to the Cement Company. See back of this agreement regarding repurchase of cloth sacks.

10. If at any time the Cement Company shall experience such difficulty in securing cloth sacks as, in its opinion, makes shipment in cloth sacks impracticable, then upon — days notice to the Purchaser it may (until such difficulty is removed) ship in paper sacks at a price of $— per barrel, f. o. b. cars destination. Paper sacks will not be repurchased by the Cement Company.

11. Terms of Payment: ——.

12. Original paid freight bills to be sent to Cement Company promptly for comparison. If Purchaser fails to comply with terms of payment or with any of the other terms of this contract, the Cement Company reserves the right to cancel unfilled portion of any contract or order, Purchaser remaining liable for all unpaid accounts; [fol. 1661] and if at any time Purchaser's responsibility be or become, in Cement Company's opinion impaired or unsatisfactory,

the Cement Company reserves the right to require payment in advance or satisfactory assurance that bills will be promptly paid when due.

13. All conditions herein contained, together with the printed conditions on the back of this sheet which form a part of this Agreement are agreed to by the Cement Company and the Purchaser for themselves and their successors.

The Atlas Portland Cement Company, by —— ——. Purchaser's Signature: —— ——.

Witness: —— ——.

14. Cloth Bags.—The Cement Company will purchase at the price charged on its invoices, only from the Party to whom the sale was made, and not from any Assignee or Trustee, empty cloth bags bearing its brand and proper identification marks, purchased of the Cement Company, upon their receipt in serviceable condition at the Cement Company's mill if returned with- ninety (90) days after their purchase, freight prepaid, subject to the Cement Company's inspection and count. Cement Company does not purchase bags bearing brands other than its own, or bags that have been wet or are otherwise useless.

15. Freights.—The Cement Company reserves the right to prescribe the route by which shipments shall be forwarded and to make shipments prepaid or collect at its option. In making delivered prices, the Cement Company only guarantees cost at destination, and will not be responsible for shortage or damage occurring in transit.

[fol. 166½] 16. General.—The Purchaser shall not have the right to transfer or sublet this agreement in whole or in part, or sell or use any portion of the cement for other purpose than herein specified.

17. The Purchaser shall give the Cement Company shipping instructions in writing a reasonable time before shipments are to be made, and the Cement Company shall not be responsible for delays in manufacture or shipping cement, caused by Strikes, Accidents, Fires, Breakdowns, Failure of Machinery, Embargoes, Car Shortage, Labor Scarcity, Labor Agitation, Failure to Receive Coal from Mines from which the Cement Company secures its supplies of coal, Delays in Transportation, Acts of God, or other causes beyond its control. In any of such events the Cement Company may determine as nearly as practicable the pro rata share of cement of each of its customers after reserving the Cement Company's usual percentage of its shipments for its dealers' warehouse trade, and may limit and reduce shipments hereunder according to such pro rata share of the Purchaser. The Cement Company shall have the right to sell or agree to sell, from time to time, its cement under other agreements and orders, and in the event the Cement Company shall at any time for any cause whatsoever be unable to make and ship cement in accordance with its agreements and orders, the Cement Company may

determine as nearly as practicable the pro rata share of the cement of each of its customers under its agreements and orders after reserving the Cement Company's usual percentage of its shipments for its dealers' warehouse trade, and may limit and reduce shipments hereunder according to such pro rata share of the Purchaser. The Cement Company shall not be obligated to make up any such limitation or reduction and its determination as to the necessity [fol. 1662] for prorating and the pro rata share of the Purchaser shall be final.

18. The Purchaser shall, on or about the first day of each month, if requested by and on forms furnished by the Cement Company, correctly inform the Cement Company of the amount of Atlas Portland Cement delivered for or used on the work herein described during the preceding month or months since date hereof.

19. In case, while this contract is unfulfilled by either party, there shall be another contract between the same parties, for the sale and delivery of cement by the Cement Company, and under such other contract the Purchaser shall be in default, the Cement Company shall be under no obligation to make shipments under this contract while such default exists, and for such default the Cement Company shall have the right to demand cash payments hereunder or to cancel this contract without affecting the obligation of the Purchaser on any unpaid accounts.

20. "Atlas" Portland Cement to be furnished hereunder is when shipped to conform in every respect to specifications of United States Government, or Standard Specifications for Portland Cement as adopted by the American Society for Testing Materials when tested by methods of tseting recommended by the American Society of Civil Engineers, but the Cement Company cannot be responsible for improper use of cement, therefore Cement Company will not guarantee finished work.

[fol. 1662½] Govt. Ex. No. 572

Allentown Portland Cement Co.

Allentown, Pennsylvania

March 28, 1921.

Sales Contract (for Specific Work) No. —.

Allentown Portland Cement Company (hereinafter called the "Company"), hereby sells and agrees to ship to and B. F. Marsh Company, Worcester Mass. (hereinafter called the "Purchaser") hereby agrees to receive, accept, purchase and pay for 10,000 standard barrels of Allentown Portland Cement in the quantity and under and subject to the following terms and conditions:

1. Work or Job.—The cement hereby contracted is sold and purchased and intended for use exclusively and only in the construction of the following work:

The Pine Hill Reservoir Job.

Name of contractor: —— ——.

2. Shipping directors: ——.

3. Time and Manner of Delivery.—As Instructed to Dec. 31, 1921.

4. Price.—Per standard barrel, including four (4) cloth sacks, $3.81 f. o. b., Company's mill, Evansville, Pa., freight allowed to Holden, Mass. $— f. o. b., Company's mill Evansville, Pa., freight allowed to —— $— f. o. b., Company's mill, Evansville, Pa., freight allowed to —— Shipments in paper bags, if any, will be charged for at 75 cents a barrel less than price charged for shipment in cloth. [fol. 1663] The price herein named is based upon the freight rate in effect on the date of this contract, as furnished to the Company by the carrier, and is subject to carrier's advances, revisions, corrections and changes. Any and all sales, transportation and other tax or taxes, state or Federal; prepaid freight, and all demurrage, car-service, terminal and other transportation charges, not herein expressly allowed by the Company; shall be assumed and paid by the Purchaser, as part of the purchase price. If bin-tested cement is required, three (3) cents a barrel shall be added to the above price.

5. Package.—The Company will credit or pay to the Purchaser herein named 25 cts. each for empty cloth bags purchased from it and bearing its brand and proper identification marks, upon their receipt in serviceable condition, at the Company's mill, if returned in ninety (90) days after date of shipment of cement, freight prepaid, subject to Company's inspection, count and acceptance. The Company does not purchase sacks bearing brands other than its own, or sacks that have been wet or otherwise damaged or useless. Rejected sacks may be destroyed or disposed of by the Company without liability, unless removed by the original purchaser within thirty (30) days after notice of rejection.

If at any time the cost of new cloth sacks increases or decreases to such an extent that the Company deems it advisable to change the price at which empty sacks will be purchased, the price named in this contract will be advanced or reduced accordingly.

Should the Company experience such difficulty in securing cloth sacks as in its pinion would make shipment in cloth sacks impracticable, then it may, until such difficulty is removed, ship either in paper sacks or in bulk when practicable, at the net price in cloth [fol. 1663½] sacks. (The net price in cloth sacks is the price after deducting the repurchase price of empty cloth sacks.)

All shipments in paper bags are made at Purchaser's risk of breakage and resultant loss of cement.

6. Shipments.—This contract is made and entered into on the express condition that the cement herein mentioned is bought for use only on the specific job or work herein named, and not for stock or sale. Subject to delays in manufacturing, shipping or delivery, caused by strikes, accidents, delays of carriers, embargoes and other causes unavoidable and beyond its control, the Company shall be required to make shipments on this contract only as near as practicable to meet the necessities of the work, and it shall have the right from time to time prior to the date fixed in Paragraph 3 to prorate-deliveries of such cement as it may then be able to manufacture and ship to and among its customers, according to all of the unfilled orders then on its books, in the event of any of the delays or contingencies above mentioned.

Under no circumstances shall the Company be required to ship more than — barrels during any consecutive thirty days, or after the expiration date above mentioned, unless it should otherwise so elect, in writing.

The Purchaser agrees that not more than five (5) per cent of the whole quantity of cement hereby purchased shall be kept or placed in or ordered for stock or reserves at any time during the period of this contract. If the Purchaser fails to order said cement shipped within time provided, then the Company reserves the right to extend the time of delivery of said cement but shall not be obligated, except at its option, to ship any part of said cement after above date.

The Company shall have the right to direct the route by which all shipments hereunder shall be forwarded.

[fol. 1664] The Company will not be responsible for shortage or damage occurring in transit.

Carrier's Bill of Lading or Receipt shall be conclusive as to the quantity and good condition of both cement and package when loaded on car.

7. Settlement.—Terms of payment and due date of all invoices are 30 days net from date of invoice, in cash, at our office at Allentown, Pa. A discount of 10 cents a barrel will be allowed for payment in full within 10 days from date of invoice, accompanied by original paid freight bills, which shall be delivered and belong to us when payment is made. All orders are subject to our approval of Purchaser's credit. If, at any time, the Purchaser's credit or responsibility, in our opinion, shall be or become impaired or unsatisfactory, or if the Purchaser fails to comply with any of the terms of payment or with any other terms of this contract, we shall have the right, at our option (on one days' written notice) to suspend or cancel deliveries or to require cash payments in advance, or to require security satisfactory to us for all payments due or to become due from the purchase hereunder.

8. Warranty.—Allentown Portland Cement to be furnished hereunder shall, when shipped, conform in every respect to the specifications then prescribed or adopted by the United States Government, or to the Standard Specifications for Portland Cement of the American Society for Testing Materials, when tested by methods of testing

recommended by the American Society of Civil Engineers. We are not responsible for the improper use of our cement or for the finished work of for any damages resulting from its use, in any respect or to any extent whatsoever, any and all such claims being waived by the purchaser by the acceptance of this contract.

[fol. 1664½] 9. Miscellaneous.—If this contract is with a dealer for resale of cement for use in work described, it is subject to a written contract between such dealer and his customer in conformity herewith on our regular form furnished for dealers' use, a copy thereof to be filed with and approved by us, otherwise we shall not be required to make delivery hereunder.

Purchaser shall have no right to assign this contract. The material covered by it is sold to purchaser upon the representation that it is purchased for use only in the construction of work referred to. Use of the cement in any other work than that specified or disposition of it for any other purpose or resale of it for use in other than above described work shall give Cement Company the option to terminate this contract and to refuse to deliver any more cement under it.

This contract is void if not accepted within fifteen (15) days from date hereof. Upon the return of this contract, signed by you and an official of Cement Company, it is effective according to terms and conditions hereon.

Allentown Portland Cement Co., Manufacturer, By —— ——.

Accepted. (Place and Date.) —— ——, Purchaser.

[fol. 1665] Govt. Ex. No. 573

Memorandum of agreement made and entered into this — day of ——, 192-, by and between the Alpha Portland Cement Company, Easton, Pa., hereinafter called the Cement Company, and —— ——, of ——, hereinafter called the Buyer,

Witnesseth: That the Cement Company agrees to sell and the Buyer agrees to purchase Alpha Portland Cement as follows: — barrels in carloads f. o. b. cars ——.

In cloth sacks $— per standard barrel (376 lbs. net).

If shipped in paper sacks seventy-five (75c) cents per barrel less than cloth price.

If shipped in Bulk, one dollar five ($1.05) cents less than cloth price.

Cement Company will not be responsible for breakage and resultant loss when shipments are made in paper bags.

Shipments to be made according to contract requirements prior to —— —, ——.

Terms of Payment.—10 cents per barrel off for cash in ten days from date of invoice, or 30 days net from date of invoice.

If, during the life of this agreement, the financial responsibility of the Buyer becomes impaired or unsatisfactory to the Cement

Company, cash payments with above discount must be made before shipment, or satisfactory security must be given by the Buyer.

[1665½] The Cement Company reserves the right to prescribe the routing by which the shipments shall be forwarded.

The prices herein quoted are the prices on cement. If shipped in cloth sacks, the cloth sacks containing the cement are not sold, but remain the property of the Cement Company and must not be sold or used other than as containers of cement manufactured by the Alpha Portland Cement Company. The Purchaser agrees to return said sacks to the Cement Company within ninety (90) days of date of shipment of cement by the Cement Company. A rebate of twenty-five (25c) cents for each sack returned will be allowed by the Cement Company from the invoice price of the cement when the sacks are returned to the Cement Company in good condition, freight prepaid, subject to Cement Company's count and inspection. Cement Company will not accept for rebate sacks bearing brands other than its own or bags that have been wet or are otherwise worthless. Such sacks if received will be held at shipper's risk subject to his order for thirty days only. Should the Alpha Portland Cement Company change its cloth sack basis, the right is reserved to adjust the delivered price of the cement accordingly.

The price on cement stated herein is based on the transportation charges in effect at the present time and is subject to advance or reduction as the transportation charges may be advanced or reduced.

This contract shall not be fully completed and operative, nor binding upon the Cement Company, until the same shall have been approved at the home office, at Easton, Pa., and a copy with such approval returned to the Buyer.

In making delivered prices Cement Company only guarantees cost at destination and will not be responsible for shortage or damage [fol. 1666] occurring in transit. Cement Company's responsibility ceases when shipments are delivered to Railroad Company on cars at its Mill. Railroad Company's bills of lading shall be conclusive as to quantity and good condition of both cement and packages when loaded on cars.

The Purchaser shall give Cement Company shipping instructions in writing a re-sonable time before shipments are to be made. The Cement Company will not be responsible for delays in transit. All orders and contracts are accepted subject to governmental restrictions, strikes, including coal strikes in either the Anthracite or Bituminous coal regions, differences with employees, accidents to machinery, fire, flood, car famine, or other contingencies beyond the control of either the Cement Company or Buyer, and said causes shall, during their existence, excuse either party from the performance of this contract and operate as a proportionate rescission thereof. Provided, that prompt notice shall be given by the party suffering from such disability to the other party, in writing, specifying the cause, otherwise this agreement shall remain in full force and effect. The Buyer shall not in any event, however, be entitled to demand or receive deliveries of cement from the Cement Company

subsequent to the date herein specified for the expiration of the agreement.

Any decline in Cement Company's market price during the life of this agreement shall apply to shipments under this agreement made after date of reduction and during such period as the lower market price may be in effect.

The cement covered by this agreement is purchased and sold with the understanding that it will be used only and exclusively in the construction of the particular operation mentioned below and for shipment as the progress of the work may require.

[1666½] The quantity of Alpha Portland Cement mentioned is for use in the work described and if Buyer shall sell or otherwise dispose of any portion of said cement or use any portion thereof in any work other than that described herein, or fail to comply with terms of payment or any of the conditions and limitations in this agreement, the Cement Company may at its option decline to make further deliveries hereunder, the Buyer remaining liable for all unpaid accounts.

The terms, conditions, and limitations herein specified are not subject to change or alteration except as may be herein otherwise expressly stipulated, any agreement, oral or otherwise, with the salesman or any other person to the contrary notwithstanding; it being further understood and agreed that all conditions of the sale are herein wholly set out.

Alpha Portland Cement to be furnished hereunder is to conform in every respect to specifications of United States Government, or Standard Specifications for Portland Cement as adopted by the American Society for Testing Materials when tested by methods of testing recommended by the American Society of Civil Engineers, but Cement Company cannot be responsible for improper use of cement, therefore it will not guarantee finished work.

This contract shall be binding upon the heirs, executors, administrators, successors or assigns of the respective parties hereto, but shall not be assigned by Buyer without written consent of Cement Company.

[fol. 1667] In Witness whereof, the parties hereto have executed this agreement the day and year first above written.

Alpha Portland Cement Company, by ——— ———. ——— ———,
Buyer.

Witness as to Alpha Portland Cement Co.: ——— ———; as to buyer: ——— ———.

The above contract is this — day of ———, A. D. 192-, approved by the Alpha Portland Cement Company at its home office.

Alpha Portland Cement Company, by ——— ———.

[fol. 1667½] Govt. Ex. No. 574

Bath Portland Cement Company

Memorandum of agreement made and entered into this — day of ——, 192-, by and between the Bath Portland Cement Company, Phila., Pa., hereinafter called the Cement Company, and —— ——, of ——, hereinafter called the Buyer,

Witnesseth: That the Cement Company agrees to sell and the Buyer agrees to purchase Bath Portland Cement as follows: — Barrels ——,

In cloth sacks $— per standard barrel (376 lbs. net), including (4) sacks.

If shipped in paper sacks, — cents per barrel less than cloth price.

Cement Company will not be responsible for breakage and resultant loss when shipments are made in paper bags.

Shipments to be made according to contract requirements prior to —— —, ——.

Terms of Payment.—5 cents per barrel off for cash in ten days from date of invoice, or 30 days net from date of invoice.

If, during the life of this agreement, the financial responsibility of the Buyer becomes impaired or unsatisfactory to the Cement Company, cash payments with above discount must be made before shipment, or satisfactory security must be given by the Buyer.

The Cement Company reserves the right to prescribe the routing by which the shipments shall be forwarded.

Cement Company will pay original purchaser — cents each for [fol. 1668] empty cloth cement sacks purchased hereunder on their receipt in serviceable condition at its mill, freight prepaid, subject to its inspection and count. Cement Company will not purchase sacks bearing brands other than its own, or sacks that have been wet or are otherwise useless.

This agreement shall not be binding on the Cement Company until same shall have been approved by the General Sales Manager, signed by one of its executive officers, and a copy thereof so signed and mailed or otherwise delivered to the Buyer.

In making delivered prices, Cement Company will not be responsible for shortage or damage occurring in transit. Cement Company's responsibility ceases when shipments are delivered to Railroad Company on cars at its mill. Railroad Company bills of lading shall be conclusive as to quantity and good condition of both Cement and Packages when loaded on cars. The Buyer to have the benefit of any reduction and be liable for any advance in freight rates.

The Purchaser shall give Cement Company shipping instructions in writing a reasonable time before shipments are to be made. The Cement Company will not be responsible for delays in transit. All orders and contracts are accepted subject to strikes, including coal strikes in either the Anthracite or Bituminous coal regions, differences with employees, accidents to machinery, fire, flood, car famine or other contingencies beyond the control of either the Cement Com-

pany or Buyer, and said causes shall, during their existence, excuse either party from the performance of this contract and operate as a proportionate rescission thereof. Provided that prompt notice shall be given by the party suffering from such disability to the other party in writing, specifying the cause, otherwise this agreement shall re-[fol. 1668½] main in full force and effect. The Buyer shall not in any event, however, be entitled to demand or receive deliveries of cement from the Cement Company subsequent to the date herein specified for the expiration of the agreement.

The cement covered by this agreement is purchased and sold with the understanding that it will be used only and exclusively in the construction of the particular operation mentioned below, and it is a condition of this contract that the Buyer and user of the cement covered by this agreement have heretofore contracted for the work in question.

. . . . . .

. . . . . .

The quantity of Bath Portland Cement mentioned is for use in the work described, and if Buyer shall sell or otherwise dispose of any portion of said cement or use portion thereof in any work other than described herein, or fail to comply with terms of payment or any of the conditions and limitations in this agreement, the Cement Company may at its option decline to make further deliveries hereunder, the Buyer remaining liable for all unpaid accounts.

The terms, conditions and limitations herein specified are not subject to change or alteration except as may be herein otherwise expressly stipulated, any agreement, oral or otherwise, with the salesman or any other person to the contrary notwithstanding; it being further understood and agreed that all conditions of the sale are herein wholly set out.

Bath Portland Cement to be furnished hereunder is to conform in [fol. 1669] every respect to specifications of United States Government, or Standard Specifications for Portland Cement as adopted by the America Society for Testing Materials when tested by methods of testing recommended by the American Society of Civil Engineers, but Cement Company cannot be responsible for improper use of cement, therefore it will not guarantee finished work.

This contract shall be binding upon the heirs, executors, administrators, successors or assigns of the respective parties hereto, but shall not be assigned by Buyer without written consent of Cement Company.

In Witness whereof, the parties hereto have executed this agreement the day and year first above written.

Bath Portland Cement Company, by —— ——. —— ——,
Buyer.

Contract No. 2008

Memorandum of agreement made and entered into this 14th day of November, 1919, by and between the Coplay Cement Manufacturing Company, Coplay, Pa., hereinafter called the Cement Company, and Windsor Cement Company, Inc., of Hartford, Conn., hereinafter called the Buyer.

Witnesseth: That the Cement Company agrees to sell and the Buyer agrees to purchase Saylor's Portland Cement as follows: Two Thousand (2,000) barrels f. o. b. car, Hartford, Conn., in carload lots.

In cloth sacks $2.94, per standard barrel (376 lbs. net), including (4) sacks.

If shipped in paper sacks, thirty-five (35c) cents per barrel less than cloth price.

Cement Company will not be responsible for breakage and resultant loss when shipments are made in paper bags.

Shipments to be made according to contract requirements prior to December 31st, 1920.

Terms of Payment: 5 cents per barrel off for cash in ten days from date of invoice, or 30 days net from date of invoice.

If, during the life of this agreement, the financial responsibility of the Buyer becomes impaired or unsatisfactory to the Cement Company, cash payments with above discount must be made before shipment, or satisfactory security must be given by the Buyer.

[fol. 1670] The Cement Company reserves the right to prescribe the routing by which the shipments shall be forwarded.

Cement Company will pay original purchaser 15 cents each for empty cloth cement sacks purchased hereunder on their receipt in serviceable condition at its mill, freight prepaid, subject to its inspection and count. Cement Company will not purchase sacks bearing brands other than its own, or sacks that have been wet or are otherwise useless.

If shipments should be required from bins set aside for the storage of specially tested cement, a charge of three cents per barrel will be made for storage service in addition to the price named in this contract.

This agreement shall not be binding on the Cement Company until same shall have been approved by the General Sales Manager, siged by one of its executive officers, and a copy thereof so signed and mailed or otherwise delivered to the Buyer.

In making delivered prices, Cement Company will not be responsible for shortage or damage occurring in transit. Cement Company's responsibility ceases when shipments are delivered to Railroad Com-

pany on cars at its mill. Railroad Company's bills of lading shall be conclusive as to quantity and good condition of both Cement and Packages when loaded on cars. The Buyer to have the benefit of any reduction and be liable for any advance in freight rates.

The Purchaser shall give Cement Company shipping instructions in writing a reasonable time before shipments are to be made. The Cement Company will not be responsible for delays in transit. All orders and contracts are accepted subject to strikes, including coal strikes in either the Anthracite or Bituminous coal regions, differences with employes, accidents to machinery, fire, flood, car famine [fol. 1670½] or other contingencies beyond the control of either the Cement Company or Buyer, and said causes shall, during their existence, excuse either party from the performance of this contract and operate as a proportionate rescission thereof. Provided that prompt notice shal be given by the party suffering from such disability to the other party in writing, specifying the cause, otherwise this agreement shall remain in full force and effect. The Buyer shall not in any event, however, be entitled to demand or receive deliveries of cement from the Cement Company subsequent to the date herein specified for the expiration of this agreement.

The cement covered by this agreement is purchased and sold with the understanding that it will be used only and exclusively in the construction of the particular operation mentioned below, and it is a condition of this contract that the Buyer and user of the cement covered by this agreement have heretofore contracted for the work in question.

Gasoline station for Atlantic Refining Company, Hartford, Conn. Contractor: Metzger & Fisher, Philadelphia, Pa. Attention is called to the paragraph on the back of this sheet which is a part of this contract.

The price named herein is subject to change in the price of cloth bags. The change, however, will not affect the net price of cement, as we will repurchase cloth bags at the same price charged for them.

The price mentioned herein will be advanced to the extent of any additional War Taxes on transportation charges on cement imposed by the U. S. Government.

The quantity of Saylor's Portland Cement mentioned is for use in the work described, and if Buyer shall sell or otherwise dispose of any portion of said cement or use portion thereof in any work other [fol. 1671] than described herein, or fail to comply with terms of payment or any of the conditions and limitations in this agreement, the Cement Company may at its option decline to make further deliveries hereunder, the Buyer remaining liable for all unpaid accounts.

The terms, conditions and limitations herein specified are not subject to change or alteration except as may be herein otherwise expressly stipulated, any agreement, oral or otherwise, with the salesman or any other person to the contrary notwithstanding; it being further understood and agreed that all conditions of the sale are herein wholly set out.

Saylor's Portland Cement to be furnished hereunder is to conform in every respect to specifications of United States Government or Standard Specifications for Portland Cement as adopted by the American Society for Testing Materials when tested by methods of testing recommended by the American Society of Civil Engineers, but Cement Company cannot be responsible for improper use of cement, therefore it will not guarantee finished work.

This contract shall be binding upon the heirs, executors, administrators, successors or assigns of the respective parties hereto, but shall not be assigned by Buyer without written consent of Cement Company.

In Witness whereof, the parties hereto have executed this agreemnt the day and year first above written.

Coplay Cement Manufacturing Company, by Emil Loeb, 1st Vice-Pres. A. A. Jackson, Vice-Pres. Windsor Cement Co., Inc., Buyer.

[fol. 1671½] Witness: E. J. Dongan, as to cement company.
Witness: R. H. Seguine, as to buyer.

The above contract is this seventeenth day of November, A. D., 1919, approved.

J. F. Twamley, General Sales Man-ger.

Should the market price of Saylor's Portland Cement decline during the life of this contract, we shall apply to shipments on account of it, the market price of Saylor's Portland Cement in effect the day shipments move.

Coplay Cement Manufacturing Co., By J. F. Twamley, General Sales Manager.

[fol. 1672] GOVT. EX. No. 576

Dexter Portland Cement Company

Nazareth, Pa.

Specific Work—Sales Contract, No. 1066

This Agreement, and a duplicate hereof, made this 31st day of August, 1918, by and between Dexter Portland Cement Company (a corporation), Nazareth, Pa., hereinafter called "Seller," and Ruffin & Payne, of Richmond, Va., hereinafter called "Buyer," Witnesseth:

That in consideration of the price and subject to all the terms, conditions and limitations set forth on this and the reverse side hereof, which it is hereby mutually understood and expressly agreed are a part hereof, Seller hereby sells and agrees to deliver, and the Buyer hereby purchases and agrees to receive and pay for 900 barrels

of "Dexter" Portland Cement, at a price of $2.67 per standard bbl., in 4 cloth bags, in carload lots, f. o. b. cars South Richmond, Va., to be used in the following described work, and shipped between the date hereof and December 31, 1918.

Description of work.—Virginia Baking Company's new building, South Richmond, Va. (9th & Perry Sts.). Contractor E. L. Bass & Bros., South Richmond, Va.

"If at any time during the life of this contract the Seller advances or reduces the repurchase price of cloth bags in accordance with terms on back hereof, the price named herein shall be advanced or reduced accordingly."

The price stated herein is based on the freight rates in effect at the present time, and is subject to advance or reduction, as the freight [fol. 1672½] rates may be advanced or reduced, and will also be advanced to the extent of any additional war taxes imposed by the Government on transportation charges.

This contract is intended to, and does, within the limitations hereof, cover the entire quantity of Portland Cement which Buyer shall, during the time herein specified, furnish or use in the work above described.

The amount of Portland Cement required for the said work is estimated by Buyer at 900 barrels, but nothing herein contained shall obligate Seller to furnish hereunder more than the quantity of "Dexter" Portland Cement actually furnished by Buyer for, and used in, said work. Said cement is to be shipped as nearly as practicable to meet the necessities of the work; it being understood, however, that under no circumstances shall Seller be obligated to ship hereon more than — barrels during any one calendar month; or during any 30 day period; it being further provided, however, that Buyer shall in any event receive and pay for in accordance with price and terms hereof, all cement shipped hereunder.

This contract shall be binding upon the heirs, executors, administrators, successors, or assigns of the respective parties hereto, but shall not be assigned by Buyer without written consent of Seller.

Entered into and signed, subject to official written approval of an Executive Officer of Seller at its General Office, Nazareth, Pa., the day and year first above written.

Dexter Portland Cement Company, Seller, By H. P. Yeisley.
Ruffin & Payne, Buyer.

Approved Sept. 9th, 1918, by R. W. Hilles, at Nazareth, Pa.

[fol. 1673] Other Terms, Conditions, and Limitations Governing This Contract

The quantity of "Dexter" Cement mentioned on reverse side hereof is for use in the work described, and if Buyer shall sell or otherwise dispose of any portion of said cement, or use any portion thereof in any work other than above described or assign this contract or any part thereof, or fail to comply with terms of payment, or any of

the conditions and limitations in this agreement set out, or if in the opinion of Seller the Buyer's credit be or become impaired, then, in any such event or events, Seller may, at his option, decline to make further deliveries hereunder, Buyer remaining liable for all unpaid accounts.

Buyer, when ordering cement to be shipped hereon, shall refer to this contract by its number and date, and the Buyer shall, on or about the first day of each month, if requested by and on forms furnished by Seller, correctly inform the Seller of the amount of "Dexter" Cement delivered or used by him on the above described work during the preceding month or months since date hereof.

The terms of payment shall be as follows, viz.: 30 days net, or, if invoice is Paid in Full within 10 days from date of shipment, 5 cents per barrel discount will be allowed, provided the Purchaser has satisfied all past due prior indebtedness to us; payments to be made in cash or equivalent at Seller's Office, Nazareth, Pa. Freight charges per tariff applying, from Nazareth, Pa., to point of delivery specified, shall be paid by Buyer for account of Seller, and the original paid freight bills sent to Seller promptly for proper credit.

The price herein provided includes the packages in which the cement shall be shipped, and is based upon the present freight rate and is subject to advance or reduction as the freight rate may be advanced or reduced.

Seller will pay original purchaser 10 cents each for empty cloth cement bags purchased hereunder bearing its brand, on their re-
[fol. 1673½] ceipt in serviceable condition at Seller's Mill, if returned within 90 days after their purchase, freight prepaid to Nazareth, Pa., subject to Seller's inspection and count. Seller will not purchase bags bearing brands other than its own, or bags that have been wet or are otherwise useless.

All railroad demurrage, car service, and terminal charges imposed at destination shall be settled for, and borne by, Buyer.

The price specified on the reverse side hereof is a firm price, and not subject to change or alteration except as may be herein otherwise expressly stipulated, any agreement, oral or otherwise, with the salesman or any other person to the contrary notwithstanding; it being further understood and agreed that all conditions of the sale are herein wholly set out.

Seller reserves the right to determine and direct the route by which shipmnts hereunder shall be forwarded.

Buyer shall give Seller shipping instructions in writing a reasonable time before shipments are to be made. All orders and contracts are accepted subject to contingencies of manufacturing and shipping, and other causes beyond Seller's control and Seller will not be responsible for delays in transit.

The "Dexter" Portland Cement to be shipped hereunder is when shipped to conform in every respect to Specifications of United States Government, or Standard Specifications for Portland Cement as adopted by the American Society for Testing Materials when tested by methods of testing recommended by the American Society

of Civil Engineers, but Seller cannot be responsible for improper use of Cement therefore will not guarantee finished work.

A test sheet signed by our chemist will be sent to each purchaser as evidence of our compliance with the above guarantee.

Time is the essence of this contract.

[fol. 1674] GOVT. EX. No. 577

Duplicate

The Edison Portland Cement Co.

Boston, Mass.; New York, N. Y.; Philadelphia, Pa.

The Edison Portland Cement Company, a corporation of New Jersey (hereinafter called the "Cement Company") sells, and Watertown Coal Company, Watertown, Mass. (hereinafter called the "Purchaser") purchases, Edison Portland Cement on the following terms and conditions:

The purchaser does hereby represent to Cement Company that Thirteen Hundred Ninety-two (1392) barrels of cement are to be used in the construction of Drainage Work, Watertown, Mass. Owner—Town of Watertown, Mass. (day work by owners). Name of street and number of barrels to be used for each street work as specified on rider. Boylston St., 90 bbls.; Chauncy St., 54 bbls.; Adams Ave., 54 lbs.; California St., 102 bbls.; Concord Rd., 39 bbls.; Dartmouth St., 24 bbls.; Fairfield St., 27 bbls.; Porter St., 36 bbls.; Putnam St., East, 33 bbls.; Putnam St., West, 48 bbls.; Beechwood Ave., 51 bbls.; Hardy Ave., 57 bbls.; Hillside Rd., 63 bbls.; Maplewood St., 96 bbls.; Pleasant St., 84 bbls.; Summer St., 36 bbls.; Crawford St., 45 bbls.; Stewart St., 84 bbls.; Summit Rd., 36 bbls.; Maplewood Rd., 96 bbls.; Arlington St., 156 bbls.; Kimball Rd., 30 bbls.; Templeton Park, 24 bbls.; Edgecliff St., 27 bbls.; and that he hereby purchases the full Portland Cement requirements of the work herein described, and that no portion thereof [fol. 1674½] will be used for any other purposes, whatsoever.

Place of delivery: Union Market, Mass.

Time of delivery: As advised prior to December 31st, 1920.

The Purchaser shall give the Cement Company shipping instructions, in writing, a reasonable time before shipments are to be made; the Cement Company shall not be obliged, except at its option, to make deliveries after December 31st, 1920. The Cement Company shall have the right to direct the route by which all shipments hereunder shall be forwarded. The price in cloth is based on a cloth sack basis of 15 cents and should we change our cloth sack basis during the life of this contract the right is reserved to adjust the delivered price of cement accordingly.

The Cement Company shall not be responsible for delays in manu-

facture or shipping, due to strikes, differences with employees, scarcity of labor, accident, inability to secure cars, coal or material, fire, flood, warfare, or other causes not under its control, nor for any delay in transportation. All railroad and lighterage demurrage, car service and terminal charges at destination shall be settled for and borne by the purchaser.

Price: Per standard barrel, including package, (376 lbs. net). $2.94 in cloth sacks, carload lots. $2.59 in paper bags, carload lots.

Price includes freight from mill to destination and will be increased at the option of the Cement Company to cover any advance in freight rates or taxes thereon at any time during the life of this contract.

The Cement Company will not be responsible for loss or damage to cement or packages in transit. The Railway Company's bills of lading shall be conclusive as to quantity and good condition of [fol. 1675] cement when loaded on cars, at the Cement Company's plant.

Payment: Five cents (5c) per barrel discount for cash in ten (10) days from date of invoice, or net cash in thirty (30) days.

Sacks must be paid for at the same time as cement.

If, at any time, the financial responsibility of Purchaser is unsatisfactory to the Cement Company, it reserves the right to require payments in advance, or satisfactory security or guarantee that invoices will be promptly paid when due.

If Purchaser fails to comply with terms of payment, the Cement Company reserves the right to cancel unfilled portion of any contract or order, Purchaser remaining liable for all unpaid accounts.

Package: The value of the packages are included in the herein stated prices. Shipments made in paper bags are at the Purchaser's risk of breakage and resultant loss of cement. If cement is shipped in cloth sacks, the Cement Company will repurchase from the original Purchaser, at fifteen cents (15c) each, the empty cloth sacks bearing the "Edison" brand, which are received by it in good condition, freight prepaid, at its works at New Village, N. J., within ninety (90) days from date of shipment of cement.

Claims for loss or damage will not be considered unless supported by seal record and railroad agent's acknowledgment on freight bill. Freight over-charge claims must be accompanied by original receipted freight bill.

Cancellation: It is understood and agreed by the parties hereto, that if any of the representations made by said Purchaser to Cement Company in and about securing the execution of this contract by Cement Company, are untrue, or, if any of the cement delivered [fol. 1675½] hereunder is used for any purpose other than as represented, that then, and in such case, upon learning thereof, the Cement Company may cancel this contract, or the undelivered portion thereof, or any other order given to the Cement Company by said Purchaser, and such cancellation shall in no wise release said Purchaser from unpaid accounts, or from liability to said Cement Company at the contract price for cement delivered prior to such cancellation.

Specifications: The cement delivered under this contract is, when shipped, to conform in every respect to specifications of the United States Government for Portland Cement as adopted by the American Society for Testing Materials when tested by methods of testing recommended by the American Society of Civil Engineers. The Cement Company cannot be responsible for improper use of cement and, therefore, will not guarantee finished work.

Assignment of Contract: This contract shall not be assigned by the Purchaser, except upon written assent thereto by the Cement Company.

Executed by the parties hereto, this 12th day of April, 1920, at Watertown, Mass.

The Edison Portland Cement Company, By A. C. Bruff, Vice President & New England District Sales Manager. (Purchaser's Signature:) Watertown Coal Co., by P. T. Sprague.

The above contract is this the 14th day of April, 1920, approved for The Edison Portland Cement Company at its General Office, New York, N. Y.

The Edison Portland Cement Co., by J. C. La Rue, Secretary. (Seal.) W. D. C.

Glens Falls Portland Cement Co., Manufacturers "Iron Clad" Portland Cement

Glens Falls, N. Y.

Boston Office: 18 Tremont St. Telephone: 2830-Main

Boston, Mass.

Specific Work—Sales Contract, No. —

This agreement, and a duplicate hereof, made this — day of ——, 19—, by and between Glens Falls Portland Cement Company (a Corporation, of Glens Falls, N. Y.,) hereinafter called "Seller," and —— ——, of ——, hereinafter called "Buyer," witnesseth:

That in consideration of the price and subject to all the terms, conditions and limitations set forth on this and the reverse side hereof, which it is hereby mutually understood and expressly agreed are a part hereof, Seller hereby sells and agrees to deliver, and the Buyer hereby purchases and agrees to receive and pay for approximately — barrels of Iron Clad Portland Cement, at a price of $— per standard bbl. in 4 cloth bags, — 4 paper bags.

The prices on cement stated herein are based on the freight rates in effect at the present time and are subject to advance or reduction as the freight rates may be advanced or reduced. These prices will

be advanced to the extent of any additional war taxes, on transportation charges on cement, imposed by the Government.

If bin-tested cement is required 3 cents per barrel must be added to the above price.

[fol. 1676½] In carload lots, f. o. b. cars — to be used in the following described work, and shipped between the date hereof and —.

Any decline in Seller's market price during the life of this agreement shall apply to shipments under this agreement made after date of reduction, and during such period as the lower market price may be in effect.

Description of Work

This contract is intended to, and does, within the limitations hereof, cover the entire quantity of Portland Cement which Buyer shall, during the time herein specified, furnish or use in the work above described.

The amount of Portland Cement required for the said work is estimated by Buyer at — barrels, but nothing herein contained shall obligate Seller to furnish hereunder more than the quantity of Iron Clad Cement actually furnished by Buyer for, and used in, said work. Said cement is to be shipped as nearly as practicable to meet the necessities of the work; it being understood, however, that under no circumstances shall Seller be obliged to ship hereon more than — barrels during any one calendar month; or during any 30 day period; it being further provided, however, that Buyer shall in any event receive and pay for in accordance with price and terms hereof, all cement shipped hereunder.

Buyer shall have no right to assign this contract. The material covered by it is sold to Buyer upon the representation that it is purchased for use in the construction of work referred to. Use of the cement in any other work than that specified or disposition of it for any other purpose or resale of it for use in other than above described work shall give Seller the option to terminate this contract and to refuse to deliver any more cement under it.

[fol. 1677] This contract shall be binding upon the heirs, executors, administrators, successors, or assigns of the respective parties hereto, but shall not be assigned by Buyer without written consent of Seller.

Entered into and signed, subject to official written approval of an Executive Officer of Seller at its General Office, Glens Falls, N. Y., the day and year first above written.

Glens Falls Portland Cement Company, Seller, by —— ——.
—— ——, Buyer.

Approved —— —, 19—, by —— ——, at Glens Falls, N. Y.

Other Terms, Conditions, and Limitations Governing This Contract

Buyer, when ordering cement to be shipped hereon, shall refer to this contract by its number and date, and the Buyer shall, on or about the first day of each month, if requested by and on forms

furnished by Seller, correctly inform the Seller of the amount of Iron Clad Cement delivered or used by him on the work described during the preceding month or months since date hereof.

The terms of payment shall be as follows, viz.: 30 days net, or, if invoice is Paid in Full within 10 days from date of shipment, 10 cents per barrel discount will be allowed, payments to be made in cash or equivalent at Seller's Office, Glens Falls, N. Y. Freight [fol. 1677½] charges per tariff applying, from Glens Falls, N. Y., to point of delivery specified, shall be paid by Buyer for account of Seller, and the original paid freight bills sent to Seller promptly for proper comparison.

If at any time the financial responsibility of Buyer becomes impaired or unsatisfactory to Seller it reserves the right to require payments in advance or satisfactory security or guarantee that invoices will be promptly paid when due. If Buyer fails to comply with terms of payment, Seller reserves the right to cancel unfilled portion of any contract or order, Buyer remaining liable for all unpaid accounts.

The price herein provided includes the packages in which the cement shall be shipped.

Seller will pay original purchaser, and not any assignee, or trustee, 10 cents each for empty cloth cement bags purchased hereunder bearing its brand, on their receipt in serviceable condition at Seller's mill, if returned within 90 days after their purchase, freight prepaid, subject to Seller's inspection and count. Seller will not purchase bags bearing brands other than its own, or bags that have been wet or otherwise made useless.

Buyer shall report to Seller all claims for shortage or damage within five (5) days after receipt of shipment. Claims must be accompanied by the shipping card which is sent in each car, and must be verified by notation, on the paid Freight Voucher, by the Freight Agent at the receiving station.

The price specified on the reverse side hereof is a firm price and not subject to change or alteration except as may be herein otherwise expressly stipulated, any agreement, oral or otherwise, with the salesman or any other person to the contrary notwithstanding; it being further understood and agreed that all conditions of the sale are herein wholly set out.

[fol. 1678] Seller reserves the right to determine and direct the route by which shipments hereunder shall be forwarded. All railroad demurrage car service and terminal charges at destination shall be settled for and borne by purchaser.

Buyer shall give seller shipping instructions in writing a reasonable time before shipments are to be made. All orders and contracts are accepted subject to contingencies of manufacturing and shipping, and other causes beyond Seller's control, and Seller will not be responsible for delays in transit. Should any contingency at any time arise, whereby production or shipments are curtailed or delayed, Seller reserves the right to prorate its shipment of cement to all purchasers of record at such time. In addition to orders or contracts accepted hereunder Seller may have accepted and may from time to time accept, other orders and contracts so as to have a market for its

entire estimated output of cement under normal conditions; therefore in the event Seller shall at any time, because of any such contingency, be unable to deliver to all its customers the entire quantity of cement required and called for by all its contracts then in force, the total of Seller's production then available shall be applied pro rata on all of said contracts according to their requirements respectively, and the amount deliverable on each contract may be reduced accordingly and there shall be no liability on Seller's part for the reduction so made.

The Iron Clad Portland Cement to be shipped hereunder is, when shipped, to conform in every respect to Specifications of United States Government, or Standard Specifications for Portland Cement adopted by the American Society for Testing Materials when tested by methods of testing recommended by the American Society of Civil Engineers, but Seller cannot be responsible for improper use of cement, therefore will not guarantee finished work.

Time is the essence of this contract.

Duplicate

Giant Portland Cement Company

Main Office 603-610 Pennsylvania Building, Philadelphia, Pa.; New York Office: 30 Church Street

Specific Work—Sales Contract No. P-1130

This agreement, in triplicate, made this fourth day of February, 1921, by and between Giant Portland Cement Company (a corporation) of Delaware, U. S. A., hereinafter called "Seller" and E. M. Rodrock Company, Paterson, N. J., hereinafter called "Buyer," witnesseth:

That in consideration of the price and subject to all the terms, conditions and limitations set forth on this and the reverse side hereof, which it is hereby mutually understood and expressly agreed are a part hereof, Seller hereby sells and agrees to deliver, and the Buyer hereby purchases and agrees to receive and pay for 2,500 barrels of Giant Portland Cement at a price of $3.53 per standard barrel in 4 cloth sacks, in carload lots f. o. b. cars Paterson, New Jersey, to be used in the following described work, and shipped between the date hereof and Dec. 31st, 1921, under Buyer's contract dated ——, 192-.

Price in cloth sacks includes sacks at 25 cents each.

If at any time the Seller shall experience such difficulty in securing cloth sacks as, in its opinion, makes shipment in cloth sacks impracticable (of which difficulty and impracticability it shall be the [fol. 1679] sole judge), then upon 30 days' notice to the Buyer, it

may (until such difficulty is removed), ship either in paper sacks at a price of $2.78 per barrel, or at the option of the Buyer in bulk where practicable, at a price of $2.48 per barrel f. o. b. cars destination above specified.

Price is based on present rate of freight and is subject to advance or reduction in present rate from the Seller's mills to point of delivery specified above. Price for water delivery is based on present rail rate and cost of water transportation and is subject to advance or reduction in the present rates.

Description of Work: Repairs at Crew SF Co. plant. New building and addition to plant- National Silk Dyeing Company—F. G. Pittet Constr. Co., contrs. Any shipments made on this contract will be at the current price of "Giant" Portland Cement if such price is below contract price herein mentioned.

This contract is intended to, and does, within the limitations hereof, cover the entire quantity of Portland Cement which Buyer shall, during the time herein specified, furnish or use in the work above described.

The amount of Portland Cement required for the said work is estimated by Buyer at 2,500 barrels, but nothing herein contained shall obligate Seller to furnish hereunder more than a maximum quantity of 2,750 barrels (said maximum quantity being 110% of estimated requirements). Said cement is to be shipped as nearly as practicable to meet the necessities of the work; it being understood, however, that under no circumstances shall Seller be obligated to ship hereon more than 500 barrels during any one calendar month, or during any 30 day period; it being further provided, however, that Buyer shall in any event receive and pay for in accordance with price and terms hereof, all cement shipped hereunder.

[fol. 1679½] This contract shall be binding upon the heirs, executors, administrators, successors, or assigns of the respective parties hereto, but shall not be assigned by Buyer without written consent of Seller.

Entered into and signed, subject to official written approval of an Executive Officer of Seller at its general office, Philadelphia, Pa., the day and year first above written. This contract must be returned within ten (10) days from date or it becomes null and void at our option.

Giant Portland Cement Company, Seller, by Charles F. Conn, President.

Accepted February 7, 1921, by E. M. Rodrock Co.

Other Terms, Conditions, and Limitations Governing This Contract

The quantity of Giant Portland Cement mentioned on reverse side hereof is for use in the work described, and if Buyer shall sell or otherwise dispose of any portion of said cement, or use any portion thereof in any work other than within described or assign this contract or any part thereof, or fail to comply with any of the conditions and limitations in this agreement set out, Seller may, a its option, decline

to make further deliveries, Buyer remaining liable for all unpaid accounts.

The terms of payment shall be as follows, viz.: 30 days net, or, if invoice is paid full, within ten (10) days from date of shipment and there are no past due bills outstanding for prior shipments, 10 [fol. 1680] cents per barrel discount will be allowed, payments to be made in cash or equivalent at Seller's office, Philadelphia, Pa.

Freight charges per Tariff applying from Seller's mill from which shipment is made to point of delivery specified, shall be paid by Buyer for account of Seller, and the original paid freight bills sent to Seller promptly for proper credit.

Seller reserves the right to prescribe the route by which shipments shall be forwarded. All railroad demurrage, car service and terminal charges imposed at destination shall be settled for, and borne by, Buyer.

Orders are subject to approved credit and if the Buyer fails to fulfill the terms of payment under this or other existing contracts between the Buyer and the Seller, the Seller may defer further shipments until such payments are made, or may, at its option, terminate the contract. The Seller reserves the right, even after partial shipments on account of this contract, to require from the Buyer satisfactory security for performance of the Buyer's obligations; and refusal to furnish such security, will entitle the Seller to suspend such shipments until such security is furnished or to terminate this contract. Termination of the contract under any of these conditions, shall not prejudice any claim for damages that the Seller may be entitled to make.

Buyer, when ordering cement to be shipped hereon, shall refer to this contract by its number and date, and the Buyer shall, on or about the first of each month, if requested by and on forms furnished by the Seller, correctly inform the Seller of the amount of Giant Cement delivered or used by him on the above described work during the preceding month or months since date hereof.

Seller will pay original Buyer the amount per cloth sack included in price invoiced for sacks purchased hereunder, bearing its brand on [fol. 1680½] their receipt in serviceable condition at Seller's mill, Egypt (Lehigh County), Pa., Ironton Railroad delivery, freight prepaid, if returned within 90 days after their purchase, subject to Seller's inspection and count. Seller will not purchase sacks bearing brands other than its own, or sacks that have been wet or are otherwise useless.

If at any time during the life of this Contract, the Seller should make a general advance or reduction in price of cloth sacks in its quotations, such advance or reduction shall apply to any unfilled portion of this contract, and such sacks will be repurchased by Seller at the same price at which they are billed to the original Buyer, under terms as outlined hereon in the clause governing the return of cloth sacks.

Seller's invoice quantities shall be the basis for settlement, and Buyer shall not hold Seller responsible for shortage of, or damage to, either cement or packages occurring in transit. Railroad Company's

bills of lading at the point of shipment shall be conclusive as to quantity and good condition of cement and packages when loaded on cars at Seller's mill.

The price specified on the reverse side hereof is a firm price, and not subject to change or alteration except as may be herein otherwise expressly stipulated, any agreement, oral or otherwise, with the salesman or any other person to the contrary notwithstanding; it being further understood and agreed that all conditions of the sale are herein wholly set out.

Delays.—The Buyer shall give shipping instructions in writing a reasonable time before shipments are to be made. The Seller shall not be responsible for delays in manufacture or shipping, due to strikes, differences with empolyees, scarcity of labor, accident, ina- [fol. 1681] bility to secure cars, coal or material, fire, flood, warfare, acts of the public enemy, regulation or control of any State or of the United States, or of any public authority or agency thereof, or other causes not under its control, nor for any delay in transportation.

Should any contingency at any time arise whereby production or shipments are curtailed or delayed, Seller reserves the right to prorate shipments of cement to all buyers of record at such time. In addition to orders or contracts accepted hereunder, Seller may have accepted and shall from time to time accept other orders and contracts, so as to have a market for its entire estimated output of cement under normal conditions. Therefore in the event Seller shall at any time or for any cause be unable to deliver to all customers the entire quantity of cement required and called for by all its contracts then in force, the total of its production then available shall be applied pro rata on all said contracts, according to their requirements respectively, and the amount deliverable on each contract may be reduced accordingly and there shall be no liability on Seller's part for the reduction so made.

Specifications.—Giant Portland Cement is guaranteed to meet the requirements of the standard specifications adopted by the American Society for Testing Materials. We cannot be responsible for improper use of cement and therefore will not guarantee finished work.

Under this contract Seller will not provide bins for the storage of specially tested cement, unless otherwise expressly agreed.

[fol. 1681½] GOVT. EX. No. 580

Hercules Cement Corporation

Executive Office: Finance Building, Philadelphia, Pa.; General Sales Office: 23 West 43d Street, New York City

Contract No. —

Hercules Cement Corporation hereinafter called Seller, hereby agrees to sell and —— ——, hereinafter called Purchaser, agrees to

purchase Hercules Portland Cement on the following terms and conditions:

Place of Delivery: F. O. B. ——.

Time of Delivery: ——.

Seller shall not be obliged to ship hereunder more than — bbls. during any one calendar month or during any 30-day period.

Seller shall not be liable for delays in manufacture or shipping, caused by strikes, scarcity of labor, accident to plant or machinery, inability to secure cars, coal or material, fire, flood, warfare, acts of God, or other causes not under Seller's control; neither shall Seller be liable for delays in transportation.

Description of Work.—Purchaser hereby agrees that all of the cement purchased hereunder shall be used in the following described work, to wit: ——, and that no portion hereof will be resold by the Purchaser for use on any other work, or used for any purpose or for any work other than above described.

[fol. 1682] Quantity: —.

Additional Quantity: In case the quantity herein specified proves insufficient for the needs of the Purchaser for Portland Cement within the time limit of delivery herein on the above-described work, Purchaser agrees to purchase and Seller agrees to sell a reasonable additional quantity of Hercules Cement at the same price and on same terms and conditions as herein specified, to meet the said reasonable additional needs of Purchaser for said work within said time limit.

Price: — per standard barrel including package, in carload lots, to be packed in —.

Price includes freight at present rates, and will be increased to cover any advance in freight rates, and any additional Government tax on freight, at any time during the life of this contract. Purchaser shall pay all freight charges for account of Seller.

Terms of Payment: Net cash in 30 days or 5c. per bbl. discount for payment in full within 10 days from date of invoice, provided all then prior existing indebtedness shall have been satisfied. Sacks must be paid for at same time as cement.

If at any time the financial responsibility of Purchaser becomes impaired or unsatisfactory to Seller, the latter reserves the right to require payments in advance or satisfactory security or guarantee that invoices will be promptly paid when due.

Shipping Instructions: Purchaser shall give to Seller shipping instructions in writing a reasonable time in each instance before shipments are to be made.

Routing and Terminal Charges: Seller shall have the right to direct the route by which all shipments hereunder shall be forwarded. All demurrage, car service and terminal charges imposed at destination shall be settled for and borne by Purchaser. Claims for [fol. 1682½] loss or damage will not be considered unless presented within 60 days from date of shipment, supported by seal record and railroad agent's acknowledgment thereof on original paid freight bill. Freight over-charge claims must be supported by original paid freight bill.

Sacks: Seller will re-purchase from the Purchaser at 25c. each the empty cloth sacks bearing the Hercules brand which are received by it in good condition, freight prepaid, at its works at Hercules, Penna., within 90 days from date of shipment of cement.

Specifications: The Hercules Cement to be shipped hereunder is to conform in every respect to "Standard Specifications and Tests for Portland Cement" C9-17 of the American Society for Testing Materials.

Assignment of Contract: This contract shall not be assigned by Purchaser except with written prior consent of the Seller.

The seller reserves the right to increase the repurchase price of its sacks and upon notice to this effect the Price mentioned above shall be advanced proportionately per barrel on all deliveries thereafter.

If Purchaser at any time fails to comply with any of the terms or conditions of this contract, Seller reserves the right to cancel the then unfilled portion of this and/or other then existing contracts (and orders) between the parties, Purchaser remaining liable for all then unpaid accounts.

Executed by the parties hereto, this — day of ——, 191-.

(Purchaser's Signature:) —— ——. Hercules Cement Corporation, by —— ——, Sales Manager.

Approved —— —, ——.

Form 47-1M-2-19.

Special Sale Contract

The Knickerbocker Portland Cement Company, Inc., hereinafter called the Seller, sells and agrees to furnish and deliver; and Manchester & Hudson Company, Providence, R. I., hereinafter called the Buyer, purchases and agrees to receive and pay for Five Thousand (5000) barrels, more or less, of Knickerbocker Portland Cement, on the terms and conditions hereinafter expressed. The variance shall not in any case exceed Ten (10) per cent.

The purchase covers the entire quantity of Portland Cement required by the Buyer on the following described work: Building for Indian Packing Company, Providence, R. I.

Seller will not be required to deliver more than One Thousand Five Hundred (1500) barrels in any one calendar month.

Price per barrel in cloth packages, in carload lots, $2.94 f. o. b. cars Providence, R. I.

When shipped in cloth sacks, it is agreed that the empties may be returned, subject to Seller's count and inspection, and for all received in good condition at Seller's factory, Hudson Upper, N. Y., with carrying charges prepaid by the Buyer, credit will be allowed at the rate of fifteen cents (15c.) each. A barrel of Knickerbocker Portland Cement, when packed in wood, weighs four hundred (400) pounds gross. When packed in cloth or paper sacks there are

four to the barrel, each weighing ninety-five (95) pounds gross. Shipments in paper sacks will be made only at Buyer's risk of [fol. 1683½] breakage and resultant loss of cement.

Terms of Payment: Thirty (30) days net on approved credit; five cents (5c.) per barrel discount will be allowed for payment in full within ten (10) days from date of invoice; all bills payable at 30 East 42nd Street, N. Y., in New York or Boston exchange.

If, during the life of this contract, the financial responsibility of the Buyer becomes impaired or unsatisfactory to the Seller, it reserves the right to require the Buyer to make payment in advance, or to give satisfactory security or guarantee that invoices will be promptly paid when due.

Transportation: Seller reserves the right to control the routing of all shipments under this contract. Buyer agrees to give Seller shipping instructions a reasonable time before shipments are to be made. Seller or Buyer shall not be responsible for delays due to the existence of war, strikes, lockouts, scarcity of labor, accidents, inability to secure cars, coal or material, transportation delays, fire, flood, acts of God, or other causes beyond the control of either the Seller or Buyer, preventing or interfering with the production, shipment or use of all or any part of the cement herein referred to.

Seller shall not be held responsible for shortage or damage to cement or packages occurring in transit. Transportation Company's Bill of Lading shall be conclusive as to quantity, also as to cement and packages being in good condition when loaded at Seller's factory.

Freight Rates: In case freight rates affecting transportation of any part of the cement covered hereby shall be increased or decreased during the life of this contract, the price hereinbefore set forth shall be advanced or decreased accordingly.

[fol. 1684] Specifications: Knickerbocker Portland Cement is guaranteed to meet the requirements of the Standard Specifications for Portland Cement adopted by the American Society for Testing Materials. Seller will not be responsible for the improper use of cement, therefore will not guarantee finished work.

It is understood and agreed that the cement sold and to be delivered under this contract is not to be used for any other purpose than for the work specified herein, nor may this agrement be transferred or sublet by Buyer without written consent of the Seller being obtained.

Executed by the parties hereto, this 30th day of December, 1919.

Knickerbocker Portland Cement Company, Inc., by A. D. Naylor, Vice-President. Manchester & Hudson Co. E. D. Allen, Treas.

Deliveries under this contract will be made subject to decline in the market on any unfilled portion thereof.

Shipments to be made prior to December 31st, 1920.

[fol. 1684½] GOVT. EX. No. 582

Contract No. —

This agreement, made this — day of ——, 19—, between The Lawrence Cement Company of New York, party of the first part, hereinafter called the Cement Company, and —— ——, party of the second part, hereinafter called the Buyer, Witnesseth:

That the Buyer agrees to purchase and receive and the Cement Company agrees to sell Dragon Portland Cement for the full Portland Cement requirements of the hereinafter described work estimated at — barrels.

Price (per Standard Barrel, Including Package)

In four (4) cloth sacks	$....	per bbl.
In four (4) paper sacks	....	" "
In cargo, In carload, In truckload lots f. o. b.	....	" "

Description of Work: ——.

Special Provisions: The price mentioned in this contract is our present price for Dragon cement. Should we fix a lower price to the general trade prior to the date of the expiration of this contract, we will bill all cement shipped on account of this contract after such reduction in price at our prevailing price for Dragon Cement on the day of actual shipment by us; but should the price of our cement subsequently rise to or higher than the price mentioned in this contract, then the contract price mentioned herein shall govern.

Payments for cement, including sacks, to be made within thirty (30) days from date of shipment, subject to discount of 10c per [fol. 1685] barrel if paid within ten days of the date of invoice, provided all past due indebtedness shall have been paid. If amount of any invoice under this contract shall not be paid when due, the Cement Company may, at its option, cancel all further deliveries under this agreement, and the Buyer shall remain liable for all unpaid accounts. If in the Cement Company's opinion, the Buyer's credit becomes impaired or unsatisfactory, it reserves the right to require payment in advance.

Sacks: The price named herein for shipments in cotton sacks includes a charge of — cents each for cotton sacks. The Cement Company will repurchase from the original Buyer each cotton sack shipped on this contract at the price charged for it if returned within ninety (90) days from date of invoice, in good condition, freight prepaid, subject to Cement Company's inspection and count. The right is reserved to increase the price at which sacks are charged and repurchased at any time without notice, but the change will not affect the net price of the cement. Paper bags are not return-

able. The Cement Company will not purchase sacks bearing other brands, nor sacks that have been wet or are not otherwise in serviceable condition. Rejected sacks will be held at owner's risk for thirty (30) days only.

Time of Delivery: The Buyer shall give the Cement Company shipping instructions in writing a reasonable time before shipments are to be made; and the Cement Company shall not be obliged to supply cement for the work at a faster rate than the job requires, nor to make deliveries, except at its option, after —— —, 192-.

Transportation: This contract is based on the present cost of transportation, including railroad freight rates and rates by automobile or boat. Buyer is to have the benefit of any reduction and [fol. 1685½] be liable for any advance in rates, or other charge imposed by the Government or any State or Municipality.

The Cement Company reserves the right to prescribe the route by which shipments shall be forwarded. In making delivered prices the Cement Company only guarantees cost at destination; its responsibility ceases when shipments are delivered to railway company on cars; and it is not responsible for shortage or damage occurring in transit or thereafter. The Railroad Company's bill of lading shall be conclusive as to quantity and good condition of both cement and packages when delivered on cars.

Specifications: The cement sold under this contract is guaranteed to meet the requirements of the standard specifications for Portland Cement of the American Society for Testing Materials. The Cement Company is not responsible for improper use of cement, and shall be free from any responsibility for finished work.

Exceptions: It is agreed that in the event of any strike, labor trouble, fire, breakdown, failure of machinery or other cause resulting in stoppage or partial stoppage of the production of the Cement Company's cement or in the destruction of or damage to cement manufactured or in course of manufacture, or deficient transportation preventing the shipment of cement or inability to procure containers, or the normal supplies of coal or raw materials used in the manufacture of cement, shipments under this contract may be suspended or partially suspended as the case may be. In the event of such interruption, the Cement Company may prorate or discontinue shipments on all existing contracts, including those with other parties, during such interruptions.

Cancellations: It is understood and agreed that if any statement or representation made by the Buyer concerning the use to be made [fol. 1686] of the cement or other matter involved in this contract is untrue, the Cement Company may cancel this contract and if any cement delivered under this contract is used for work other than that mentioned in the contract, the undelivered balance shall be cancelled, and such cancellation shall not release Buyer from any unpaid account. In addition thereto, all cement so diverted may be billed at the price prevailing for "Dragon" cement on the day of shipment.

This agreement shall not be binding on the Cement Company until the same shall have been signed by one of its officers or by its Sales Manager and delivered to the Buyer.

The terms and conditions of this agreement shall extend to and be binding upon the legal representatives, successors and assigns of the parties hereto; but this contract is not assignable by the Buyer without the consent in writing of the Cement Company.

In Witness Whereof the parties hereto have duly executed this agreement in duplicate the day and year first above written.

The Lawrence Cement Company, by —— ——. (Buyer's signature:) —— ——.

Witnesses: —— ——.

[fol. 1686½] GOVT. EX. NO. 583

Lehigh Portland Cement Co.

Chicago, Ill.; Allentown, Pa.; Spokane, Wash.

The Lehigh Portland Cement Company, a corporation of Pennsylvania (hereinafter called the "Cement Company") sells, and E. M. Rodrock Co., Paterson, N. J. (hereinafter called the "Purchaser") purchases, Lehigh Portland Cement on the following terms and conditions:

The Purchaser does hereby represent to Cement Company that 3,000 barrels of cement are to be used in the construction of a silk mill for the Alco Silk Co. at Paterson, N. J. (J. W. Ferguson, Paterson, N. J., contractor) and that he hereby purchases 3,000 barrels of Lehigh Portland Cement from the Cement Company, for use in such work; and that no portion thereof will be used for any other purposes, whatsoever.

Place of Delivery: In carload lots f. o. b. cars Patterson, N. J.

Time of Delivery: Prior to Dec. 31st, 1920.

The Purchaser shall give the Cement Company shipping instructions, in writing, a reasonable time before shipments are to be made; the Cement Company shall not be obliged, except at its option, to make deliveries after Dec. 31st, 1920. The Cement Company shall have the right to direct the route by which all shipments hereunder shall be forwarded.

The Cement Company shall not be responsible for delays in man- [fol. 1687] ufacture or shipping, due to strikes, differences with employes, scarcity of labor, accident, inability to secure cars, coal or material, fire, flood, warfare, or other causes not under its control, nor for any delay in transportation.

Price: Per standard barrel, including package, $2.72 f. o. b. cars Paterson, N. J., subject to future fluctuations in prices quoted by Cement Co., but not to exceed price named herein except by reason of an advance in freight rates.

This price is based on present freight rates and is subject to variation in proportion as the freight rates may be advanced or reduced; it is also subject to advance to the extent of any additional war taxes on transportation charges on cement which may in the future be imposed by the government.

This price, which is special, has been given the Purchaser, by the Cement Company, because of the Purchaser's representations as to the use of the cement.

Payment: Net cash in thirty (30) days, or five cents (5c) per barrel discount for cash in ten (10) days from date of invoice. Payable in New York or Chicago Exchange.

Sacks must be paid for at the same time as cement.

If, at any time, the financial responsibility of Purchaser becomes impaired or unsatisfactory to the Cement Company, it reserves the right to require payments in advance, or satisfactory security or guarantee that invoices will be promptly paid when due.

If Purchaser fails to comply with terms of payment, the Cement Company reserves the right to cancel unfilled portion of any contract or order, Purchaser remaining liable for all unpaid accounts.

[fol. 1687½] Package: Cement to be packed in cloth. If cement is shipped in cloth sacks, the Cement Company will repurchase from the original Purchaser, at fifteen cents each, the empty cloth sacks bearing the Lehigh Brand, which are received by it in good condition, freight prepaid, at its works at West Coplay, Penna., or New Castle, Penna., within ninety (90) days from date of shipment of cement.

Claims for loss or damage will not be considered unless supported by seal record and Railroad agent's acknowledgment on freight bill. Freight over-charge claims must be accompanied by original receipted freight bill.

Cancellation: It is understood and agreed by the parties hereto, that if any of the representations made by said Purchaser to Cement Company in and about securing the execution of this contract by Cement Company, are untrue, or, if any of the cement delivered hereunder is used for any purpose other than as represented, then, and in such case, upon learning thereof, the Cement Company may cancel this contract, or the undelivered portion thereof, or any other order given to the Cement Company by said Purchaser, and such cancellation shall in no wise release said Purchaser from unpaid accounts, or from liability to said Cement Company at the contract price for cement delivered prior to such cancellation.

Specifications: The cement delivered under this contract is to conform to standard specifications for Portland Cement adopted August 16, 1909, by the American Society for Testing Materials with methods of testing recommended January 17, 1912, as amended by the American Society of Civil Engineers, or to U. S. Government specifications for Portland Cement, as set forth in Circular of the Bureau of Standards, No. 33.

[fol. 1688] Assignment of Contract: This contract shall not be assigned by the Purchaser, except upon written assent thereto by the Cement Company.

Executed by the parties hereto, this 31st day of December, 1919, at New York.

Lehigh Portland Cement Co. by F. W. Douglass, Eastern Sales Manager. (Purchaser's signature:) E. M. Rodrock Co., by E. M. Rodrock, Prest.

Approved: Geo. G. Sykes, Secretary.

Specific Job Quotation

Nazareth Cement Company

Main Office and Works: Nazareth, Pa.; Sales Offices: New York, Boston, Philadelphia; Boston Office: 161 Devonshire Street

Phone: Fort Hill 425

John W. Ramsay, New England Sales Manager

In reply refer to File No. —.

Boston, Mass., April 1, 1920.

Messrs. The C. H. Spring Company, Newton Falls, Mass.

Gentlemen: We quote you on Nazareth Portland Cement for shipment according to contract requirements, between date hereof and 12/31/20, subject to all the terms, conditions and limitations on both sides hereof. Quantity to be shipped not to exceed, however, — bbls. within any one month.

Nazareth Portland Cement in 4 cloth sacks at $2.94 per standard bbl., including the sacks.

Nazareth Portland Cement in 4 paper bags, at $— per standard bbl., including the bags.

[fol. 1689] Nazareth Portland Cement in Wood at $— per standard bbl.

F. O. B. Lowell, Mass.

The prices on cement stated herein are based on the freight rates in effect at the present time, and are subject to advance or reduction, as the freight rates may be advanced or reduced. These prices will be advanced to the extent of any additional War Taxes on transportation charges on cement, imposed by the Government.

This quotation covers the entire and actual quantity (estimated at 6,000 barrels) of Portland Cement which buyer shall furnish or use in the following described work. The estimated quantity is more or less within 10 per cent.

Description of Work: Ansonia Hotel Building, Lowell, Mass., E. A. Abbott Company, 9 Park St., Boston, Mass., Contractors.

This quotation is for acceptance within 5 days of formal award

of contract for work described, but is void if not accepted within 15 days from date hereof.

We send you this proposition in duplicate; upon our receiving one of the copies accepted by you in writing, it shall constitute a contract between us.

Remarks: It is agreed that if between now and the termination of this contract the market price of Nazareth Cement should be less than that indicated above, we are to give you the benefit of that lower price or prices on shipments following such reductions and applying on this contract.

Respectfully yours, Nazareth Cement Co. John W. Ramsay.

Accepted 4/2 day of ——, at ——. (Signature:) M. C. S.
For other clauses which are part of this quotation see other side.

[fol. 1689½] Terms, Agreements and Limitations

Thirty days net; 5 cents per barrel discount for Payment in Full within 10 days from date of invoice. Payments to be made in cash or equivalent at our office, Nazareth, Pa.

If Purchaser fails to comply with terms of payment or with any of the other terms of sale, we reserve the right to cancel unfilled portion of any contract or order, Purchaser remaining liable for all unpaid accounts.

Orders are subject to approved credit, and if at any time Purchaser's financial responsibility be or becomes, in our opinion, impaired or unsatisfactory, we reserve the right to require payment in advance or satisfactory assurance that bills will be promptly paid when due.

Loss or Damage: In making delivered prices we only guarantee cost at destination, and we will not be responsible for shortage or damage occurring in transit. Railroad Company's bill of lading shall be conclusive as to quantity and good condition of both cement and packages when loaded on cars.

Sacks: We will pay to original purchaser 15 cents each for empty cloth cement sacks purchased of us, bearing our brand, on their receipt in serviceable condition at our mill, if returned within 90 days after their purchase, freight prepaid, subject to our inspection and count. We do not purchase sacks bearing brands other than our own, or sacks that have been wet or are otherwise useless.

Rejected sacks may be destroyed or otherwise disposed of by this Company without liability unless they are removed by original purchaser within ten days after notice of rejection. Paper bags and wooden barrels are not returnable. Shipments in paper bags are made at Purchaser's risk of breakage and resultant loss of cement.

[fol. 1690] Quantity: Unless otherwise agreed, the quotation on reverse side is limited to One Carload of Cement and applies only on shipments billed to and unloaded at point of delivery specified.

Orders entered for shipment on a specific date will, at our option, be shipped on that date unless sooner ordered out by Purchaser.

We reserve the right to prescribe the route by which shipments shall be forwarded. All railroad demurrage, car service and terminal charges at destination shall be settled for and borne by Purchaser.

Strikes, etc.: The Purchaser shall give us shipping instructions in writing a reasonable time before shipments are to be made. All orders and contracts are accepted subject to contingencies of manufacturing and shipping, and other causes beyond our control, and we will not be responsible for delays in transit. Should any contingency at any time arise, whereby production or shipments are curtailed or delayed, we reserve the right to prorate our shipments of cement to all purchasers of record at such time.

Specifications: "Nazareth" Portland Cement to be furnished hereunder is, when shipped, to conform in every respect to specifications of the United States Government or Standard Specifications for Portland Cement as adopted by the American Society for Testing Materials when tested by methods of testing recommended by the American Society of Civil Engineers, but we cannot be responsible for improper use of cement, therefore we will not guarantee finished work.

Nazareth Cement Company.

[fol. 1690½] GOVT. EX. No. 585

Penn-Allen Cement Company

Commonwealth Building, Allentown, Pa.; General Sales Office: Widener Building

Philadelphia, Pa., 2/17/20.

B. F. Marsh Company, 22 Garden Street, Worcester, Mass.

GENTLEMEN: We quote you on Penn-Allen Portland Cement for the requirements of the work herein described, subject to all terms, conditions and limitations on both sides hereof, for delivery in carload lots f. o. b. Worcester, Mass. The price named in this quotation is subject to change in freight rates, and any additional war tax on freight on cement that may be imposed by the Government.

In cloth sacks $2.92 per standard barrel including four (4) sacks. In paper sacks $— per standard barrel including four (4) sacks.

Quantity.—This quotation covers the entire and actual quantity (estimated at 1,250 barrels) of Portland Cement which Buyer shall furnish or use solely in the following described work.

Work.—Riley Industrial Plant, Worcester, Mass. E. J. Cross Company, contrs. (The price named in this quotation is subject to any change in the price of bags that may become effective during the life of the job.)

[fol. 1691] Shipments.—As required during progress of work to be completed prior to July 1st, 1920. If shipments are required from bins set aside for the storage of specially tested cement, an additional charge of three (3) cents per barrel will be made for storage service.

Acceptance.—This quotation is for acceptance within five (5) days of formal award of contract for work described, but is void if not accepted within fifteen (15) days from date hereof. We send you this proposition in duplicate; upon our receiving one of the copies accepted by you in writing it shall constitute a contract between us, subject to the approval of Cement Company.

Yours respectfully, Penn-Allen Cement Company. T. O. Bretherton, General Sales Manager. TOB/T.

Accepted — day of ——, 19—, at ——. (Signature:) —— ——.

For other clauses which are part of this quotation, see other side.

Terms: On approved credit, net thirty days, or five (5) cents per barrel discount for payment in full including sacks within ten days from date of invoice.

If Purchaser fails to comply with terms of payment or with any of the other terms of sale, we reserve the right to cancel unfilled portions of any contract or order, Purchaser remaining liable for all unpaid accounts.

[fol. 1691½] Orders are subject to approved credit, and if at any time the Purchaser's financial responsibility be or becomes, in our opinion, impaired or unsatisfactory, we reserve the right to require payment in advance, and pending the same may withhold shipment and if within a reasonable time in the judgment of this Company such cash or approved credit has not been furnished, we may declare the order or contract cancelled.

Loss or Damage: In making delivered prices we only guarantee cost at destination and will not be responsible for shortage or damage occurring in transit. Our responsibility ceases when shipments are delivered to railroad company on cars or at mill. Railroad Company's bill of lading shall be conclusive as to the quantity and good condition of both cement and packages when loaded in the cars.

Sacks: Price of cloth sacks is included in invoice, which must be paid without deduction. We will pay to the original purchaser 15 cents each for empty cloth sacks bearing our brand, on their receipt in serviceable condition at our mill, if returned within ninety days after their purchase, freight prepaid, subject to our inspection and count. We do not purchase sacks bearing brands other than our own or sacks that have been wet or are otherwise useless. Rejected or foreign sacks will be held at owner's risk, subject to his order, for thirty days only. Shipments in paper bags will be made at Purchaser's risk of breakage and resultant loss.

Routing: We reserve the right to prescribe routing by which the shipment shall be forwarded. All railroad demurrage, car service and terminal charges at destination shall be settled for by the Purchaser.

Delays: The Purchaser shall give us shipping instructions in writing a reasonable time before shipments are to be made. We will [fol. 1692] not be responsible for delays in transit. All orders and contracts are accepted subject to strikes, including coal strikes in either the anthracite or bituminous coal regions, differences with em-

ployees, accidents to machinery, fire, flood, car famine or other contingencies beyond control of either Buyer or Seller. Therefore, in the event we shall at any time or for any cause be unable to deliver to our customers the entire quantity of cement required and called for by all our contracts then in force, the total of our production then available shall be applied pro rata on all of said contracts according to their requirements respectively and the amount delivered on each contract may be reduced accordingly and there shall be no liability on our part for the reduction so made.

Specifications: Penn-Allen Portland Cement is guaranteed to meet the requirements of the Standard Specifications for cement of the American Society for Testing Materials, serial designation C-9-17. We cannot be responsible for improper use of cement and therefore will not guarantee finished work.

[fol. 1692½] Govt. Ex. No. 586

Sales Office Pennsylvania Cement Company, Manufacturers
"Pennsylvania" Portland Cement

42nd St. Building, New York

L. D. Telephone: Murray Hill 6347

(May 1, 1919.)

This quotation is void unless accepted in writing by the Purchaser and approved by the Seller as hereinafter provided within — days from date.

Quotation No. —.

Dear Sir: We submit quotations on "Pennsylvania" Portland Cement as follows: —— F. O. B. ——, all cement covered by this quotation is to be used only in the construction of ——.

In Barrels..... $— per bbl. including barrels.
In Duck Bags..... $— " " including bags, which includes a charge of —¢ for each bag.
In Paper Bags..... $— " " including bags.

This price is based upon the present freight rate and tax on same and is subject to advance or reduction as the freight rate or tax may be advanced or reduced. The price named is subject to change in [fol. 1693] the price of bags, as may become the custom of the trade. Freight charges are to be paid by you and will be deducted from the face of the invoices when rendered. The quantity of cement required under this quotation is not to exceed — barrels.

If the expression "more or less" should be used as to quantities, it is understood to imply a leeway of not more than 15%. Any cement furnished under this quotation is to be used solely for the purpose and upon the work particularly specified above, and to be furnished in about equal monthly proportions.

The Seller may require the Purchaser to furnish evidence satisfactory to the Seller that the cement is being used in the construction of the work specified, and if there shall be any diversion the Seller may thereupon, at its option, terminate this agreement.

All cement furnished under this quotation must be ordered out prior to —— —, ——, unless the time is extended in writing by the Seller.

Shipments in paper bags are made at Purchaser's risk of breakage and resultant loss of cement.

Specifications.—The cement delivered under this contract is to comply with the requirements of the Standard Specifications for Portland Cement as adopted by the American Society for Testing Materials, when tested in accordance with the methods of test recommended by the American Society of Civil Engineers. If you desire to have the cement tested for your account and stored for that purpose in bins at our mill, there will be a charge of — cents per barrel additional for such service.

If the cement is delivered in bags, the bags are not sold, but remain [fol. 1693½] the property of the Cement Company. The Purchaser agrees to return all such bags within 90 days from receiving same.

The charge of — made for each bag shipped, will be credited by the Company to the Purchaser's account or paid in cash if nothing is due from the Purchaser when such bags are returned to the Cement Company within such time in good condition, freight prepaid. The Company's count and inspection to be final. No credit will be given for worthless bags or for bags other than those shipped by this Company.

Terms of Payment.—30 days net from date of invoice or — per barrel discount allowed for cash in 10 days from date of invoice. Export shipments are cash f. a. s.

If during the life of this agreement the financial responsibility of the Purchaser shall become unsatisfactory to the Seller, it may require cash payments or security satisfactory to it, in default of which this agreement may be thereupon terminated by the Seller.

Failure to comply with any of the provisions of this agreement shall be sufficient reason for forthwith terminating the same by the Seller, and waiver of such right shall not be implied from any failure to exercise the same.

All agreements are contingent upon Government restrictions, regulations or requirements, fire, floods, strikes, accidents, delays of carriers or failure of transportation lines to furnish the necessary service and equipment in transporting the commodity, or other delays unavoidable or beyond our control.

It is mutually understood and agreed that the terms and stipulations of the within agreement are to apply to and bind the heirs, executors, administrators, successors and assigns of the respective parties to these presents.

[fol. 1694] This contract shall not become operative or binding upon the Seller, the Pennsylvania Cement Company, until it has been approved by one of the Executive Officers of said Company, and a copy with such approval forwarded to the Purchaser.

It is understood and agreed that any and all oral, verbal or implied agreements are superseded by this quotation.

Respectfully, Pennsylvania Cement Company, by —— ——.

Acceptance.—The undersigned hereby accepts the above proposition and agrees to buy on the terms and conditions above set forth.

Dated —— —, 19—.

(Purchaser sign here:) —— ——.

The above contract is this — day of ——, 19—, approved by the Pennsylvania Cement Company, at its New York Office, by —— ——.

———

Specific Work Quotation

Phœnix Portland Cement Company

Real Estate Trust Building, Philadelphia, Pa.

March 8, 1918.

Mr. Fred Kilgus, Newark, N. J.

DEAR SIR: We quote you on Phœnix Portland Cement for shipment according to contract requirements, between date hereof and September 1st, 1918, subject to all the terms, conditions and limitations on both sides hereof. Quantity to be shipped not to exceed, however, — bbls. within any one month.

Phœnix Portland Cement in 4 cloth sacks at $2.18 per standard bbl. including sacks.

Phœnix Portland Cement in 4 paper bags at $— per standard bbl. including bags.

F. O. B. Irvington, N. J.

This quotation covers the entire and actual quantity (estimated at 500 barrels) of Portland Cement which Buyer shall furnish or use in the following described work.

Description of Work.—For use in full requirements of small concrete building for industrial plant. Owner:—Irvington Smelting & Refining Co. Contractor:—Fred. Kilgus. Architect:—Fred Phelps. [fo. 1695] This quotation is for acceptance within 5 days of formal award of contract for work described, but is void if not accepted within 15 days from date hereof. We send you this proposition in duplicate. Please return both copies to us, and after same are approved by an officer of this Company, it will constitute a contract between us. We will then return one copy for your files.

For other clauses which are part of this quotation, see other side.

Respectfully yours, Phœnix Portland Cement Co., by Lindley C. Morton, General Sales Manager.

Newark, N. J.

Accepted 21st day of March, at Irvington, N. J., delivery. (Signature) Frederick Kilgus, Inc., per H. M. Coleman.

The above contract is this — day of ——, A. D. ——, approved.
Phœnix Portland Cement Co., Lindley C. Morton.

Concrete for Permanence

Terms, Conditions, and Limitations

Payment: Thirty days net; 5 cents per barrel discount for Payment in Full within 10 days from date of invoice. Payments to be made in cash or equivalent at our office, Philadelphia. Original paid freight bills to be sent us promptly for comparison.

[fol. 1695½] If Purchaser fails to comply with terms of payment or with any of the other terms of sale, we reserve the right to cancel unfilled portions of any contract or order, Purchaser remaining liable for all unpaid accounts.

Orders are subject to approved credit, and if at any time Purchaser's financial responsibility be or becomes, in our opinion, impaired or unsatisfactory, we reserve the right to require payment in advance or satisfactory assurance that bills will be promptly paid when due.

Loss or Damage: In making delivered prices we only guarantee cost at destination and we will not be responsible for shortage or damage occurring in transit. Railroad Company's bill of lading shall be conclusive as to quantity and good condition of both cement and packages when loaded on cars.

Sacks: We will pay to original purchaser 10 cents each for empty cloth cement sacks purchased of us, bearing our brand, on their receipt in serviceable condition at our Mill, if returned within 90 days after their purchase, freight prepaid, subject to our inspection and count, and Cement Company's Credit Memorandum mailed to the Buyer to be conclusive as to the number and quality of sacks repurchased. We do not purchase sacks bearing brands other than our own, or sacks that have been wet or are otherwise useless.

Rejected sacks may be destroyed or otherwise disposed of by this Company without liability unless they are removed by original purchaser within ten days after notice of rejection. Paper bags and wooden barrels are not returnable. Shipments in paper bags are made at Purchaser's risk of breakage and resultant loss of cement.

Quantity: Unless otherwise agreed, the quotations on reverse side are limited to one carload of cement and applies only on shipments billed to and unloaded at point of delivery specified.

[fol. 1696] Orders entered for shipment on a specific date will, at our option, be shipped on that date unless sooner ordered out by Purchaser.

We reserve the right to prescribe the route by which shipments shall be forwarded. All railroad demurrage, car service and terminal charges at destination shall be settled for and borne by Purchaser.

Strikes, etc.: The Purchaser shall give us shipping instructions in writing a reasonable time before shipments are to be made. All orders and contracts are accepted subject to contingencies of manufacturing and shipping, and other causes beyond our control, and we will not be responsible for delays in transit. Should any contingency at any time arise, whereby production or shipments are curtailed or delayed, we reserve the right to prorate our shipments of cement to all purchasers of record at such time.

Specifications: Phœnix Portland Cement to be furnished hereunder is, when shipped, to conform in every respect to specifications of the United States Government or Standard Specifications for Portland Cement as adopted by the American Society for Testing Materials when tested by methods recommended by the American Society of Civil Engineers, but we cannot be responsible for improper use of Cement, therefore we will not guarantee finished work.

Price includes freight at present rates and will be increased to cover any advance in freight rates at any time during the life of this contract, or any tax charge upon them.

Phœnix Portland Cement Company.

This proposition is submitted in duplicate; upon our receiving one of the copies accepted by you in writing, it shall constitute a contract between us.

Remarks: The prices named in this quotation are subject to changes in transportation charges.

Very truly, Security Cement & Lime Company, by J. S. J. Clark, District Manager.

Accepted 2nd day of Jan. 1920, at —. (Signature) T. W. Perry.

For other clauses which are part of the quotation, see other side.

Terms, Conditions, and Limitations

Terms: Thirty days net or five (5) cents per barrel discount for Payment in Full within 10 days from date of invoice. Payments to be made in cash or equivalent at our office, Hagerstown, Md. Original paid freight bills to be sent us promptly for credit.

Credit: If Purchaser fails to comply with terms of payment or with any of the other terms of sale, we reserve the right to cancel unfilled portion of any contract or order, Purchaser remaining liable for all unpaid accounts.

If at any time Purchaser's financial responsibility be or becomes, in our opinion, impaired or unsatisfactory, we reserve the right to [fol. 1697½] require payment in advance or satisfactory assurance that bills will be promptly paid when due. If such assurance is not forthcoming within a reasonable time, we reserve the right to cancel this quotation and contract.

Loss or Damage: In making delivered prices we only guarantee cost at destination, and we will not be responsible for shortage or damage occurring in transit. Railroad Company's bill of lading shall be conclusive as to quantity and good condition of both cement and packages when loaded on cars. Loading cards inside each car properly filled out as indicated, endorsed and returned to us will greatly facilitate quick handling of damage claims.

Sacks: We will pay to original purchaser fifteen (15c) cents each for empty cloth cement sacks purchased of us, bearing our brand, on their receipt in serviceable condition at our mill, Security, Md., if returned within 90 days after their purchase, freight prepaid, subject to our inspection and count. We do not purchase sacks bearing brands other than our own, or sacks that have been wet or are otherwise useless.

Rejected sacks will be held at owner's risk, subject to his order, for thirty days after notice of rejection only.

Paper bags are not returnable. Shipments in paper bags are made at Purchaser's risk of breakage and resultant loss of cement.

Quantity: The quotation on reverse side is limited to the quantity and delivery stipulated and work described.

Routing: We reserve the right to prescribe the route by which shipments shall be forwarded. All railroad demurrage, car service and terminal charges at destination shall be settled for and borne by Purchaser.

[fol. 1698] Delays: The Purchaser shall give us shipping instructions in writing a reasonable time before shipments are to be made. All orders and contracts are accepted subject to contingencies of manufacturing and shipping, and other causes beyond our control, and we will not be responsible for delays in transit. Should any contingency at any time arise, whereby production or shipments are curtailed or delayed, we reserve the right to prorate our shipments of cement to all purchasers of record at such time on basis of tonnage available, and our liability will be reduced accordingly.

Specifications: Security Portland Cement to be furnished hereunder is, when shipped, to conform in every respect to specifications of the United States Government, or Standard Specifications for Portland Cement as adopted by the American Society for Testing Materials. We cannot be responsible for improper use of cement, therefore we will not guarantee finished work.

Security Cement & Lime Co.

[fol. 1698½] Govt. Ex. No. 589

Vulcanite Portland Cement Company

Specific Job Quotation

Quo. No. —. Job. No. 7270

Main Office: Land Title Bldg., Philadelphia; Works Office: ——; P. O. Address: Easton, Pa.; Main Sales Office: 8 W. 40th St., New York; New England Office: 161 Devonshire St., Boston.

Albert Moyer, Manager of Sales

New York, December 10, 1919.

Messrs. E. M. Rodrock Company, Paterson, New Jersey:

We quote you on Vulcanite Portland Cement for shipment according to contract requirements, subject to all terms, conditions and limitations on both sides hereof. Quantity to be shipped not to exceed, however, 1000 bbls. within any one month. Price below quoted is based on present conditions and is for shipment to be made before December 31st, 1920, when this contract shall expire. No order under this contract will be received after that date, unless the date of expiration shall have been extended by express agreement in writing.

Vulcanite Portland Cement in 4 cloth sacks, at $2.72 per standard bbl., including the sacks.

Vulcanite Portland Cement in 4 paper bags, at $2.37 per standard [fol. 1699] bbl., including the bags.

Vulvanite Portland Cement in bulk, at $2.07 for 376 lbs.

F. O. B. cars, Paterson, N. J., in carload lots.

The Buyer to have the benefit of any reduction and to be liable for any advance in freight rates. Any tax on freight bills is to be paid by the Buyer. In the event of prepayment of freight or other railroad or terminal charges the Buyer shall settle these in cash on presentation of invoice by the Seller.

This quotation is intended to cover the entire and actual quantity not to exceed 1500 barrels of Vulcanite Portland Cement which buyer shall be required to, in fact shall furnish or use in the following described work. If upon investigation it is found that the work described will not require the number of barrels stated above we will reduce this quantity to accord with the requirements of the job.

Description of Work: Thirty houses, East 34th St., between 18th and 19th Ave. Contractors—Collier & Sprang.

Charge for Bin Test: If cement is held in bins at our works awaiting result of tests, a charge of 3c. per barrel will be made. We, however, will not agree to hold cement in such bins for a period longer than 45 days except by special arrangement.

Buyer shall have no right to assign this contract. The material covered by it is sold to the Buyer upon the representation that it is purchased for use in the construction of work referred to. Use of the cement in any other work than that specified, or disposition of it for any other purpose, or resale of it for use in other than above described work, shall give the Seller the option to terminate this contract and to refuse to deliver any more cement under it.

[fol. 1699½] This quotation is void unless accepted within fifteen days from this date.

We send you this proposition in duplicate; upon our receiving one of the copies accepted by you in writing, it shall constitute a contract between us, subject to execution in writing by this Company.

Remarks: If at any time during the life of this contract the Vulcanite Portland Cement Company reduces its price at above destination the price named in this contract will be reduced accordingly on all unshipped balances at date reduction is made.

Respectfully yours, Vulcanite Portland Cement Co. ——
——, Manager of Sales.

Accepted — day of ——, at ——. (Signature:) —— ——.

For other clauses which are part of this quotation, see other side.

[fol. 1700] Terms, Conditions, and Limitations

Payment: Thirty days net; 5 cents per barrel discount for Payment in Full within 10 days from date of invoice. Pawments to

be made in cash or equivalent at our office, Philadelphia, U. S. A. Original paid freight bills to be sent us promptly for comparison.

If Purchaser fails to comply with terms of payment or within any of the other terms of sale, we reserve the right to cancel unfilled portion of any contract or order, Purchaser remaining liable for all unpaid accounts.

If at any time Purchaser's financial responsibility be or becomes, in our opinion, impaired or unsatisfactory, we reserve the right to require payment in advance or satisfactory assurance that bills will be promptly paid when due.

Loss or Damage: In making delivered prices we only guarantee cost at destination, and we will not be responsible for shortage or damage occurring in transit. Railroad Company's bill of lading shall be conclusive as to quantity and good condition of both cement and packages when loaded on cars.

Sacks: Sacks bearing our brand, or trade mark, properly bundled, and so marked as to insure complete identification, received by us in serviceable condition at our mill will be purchased from the original purchaser at 15 cents each, if purchased of us containing "Vulcanite" portland Cement, which cement was used in the work described on front of this contract, provided these sacks are shipped within ten days after being emptied, freight prepaid, subject to our inspection and count. We do not purchase sacks bearing brands other than our own or sacks that have been wet or otherwise useless. [fol. 1700½] Rejected sacks, or sacks bearing other brands, may be destroyed or otherwise disposed of by this Company without liability, unless they are removed by original purchaser within ten days after notice of rejection. Paper bags and wooden barrels are not returnable. Shipments in paper bags are made at Purchaser's risk of breakage and a resultant loss of cement.

Quantity, Delivery and Job: The quotation on reverse side is limited to the quantity and delivery stipulated and work described.

Route and Terminal Charges: We reserve the right to prescribe the route by which shipments shall be forwarded. All railroad demurrage, car service and terminal charges at destination shall be settled for and borne by Purchaser.

Strikes, etc.: The Purchaser shall give us shipping instructions in writing a reasonable time before shipments are to be made. All orders and contracts are accepted subject to contingencies of manufacturing and shipping and other causes beyond our control; we will not be responsible for delays in transit, delays in manufacturing or in shipping, caused by strikes, differences with workmen, accidents at our plant, inability to procure cars, coal or other material, or for orders, rules or regulations received by us from the United States Government which would prevent our carrying out all the terms and conditions of this contract. Should any such contingencies or other contingencies arise at any time during the period covered by this contract, whereby production or shipments are curtailed or delayed, we reserve the right to prorate our shipments of cement to all purchasers of record at such time.

Cancellation: If the Buyer shall fail to comply with any of the terms and conditions or limitations of this contract, or if any of the [fol. 1701] Buyer's representations herein are untrue the Seller may cancel this contract for the unfilled portion thereof or any other order given to the Seller by the Buyer. Any cancellation herein provided shall in nowise release the Buyer from unpaid account or from liability to the Seller at the contract price for cement delivered prior to such cancellation.

Specifications: "Vulcanite" Portland Cement to be furnished hereunder is when shipped to conform in every respect to specifications of the United States Government, or Standard Specifications for Portland Cement as adopted by the American Society for Testing Materials when tested by methods of testing recommended by the American Society of Civil Engineers, but we cannot be responsible for improper use of cement, therefore we will not guarantee finished work.

Water Deliveries: Purchaser is responsible for demurrage at prevailing rates.

Vulcanite Portland Cement Company. Albert Moyer, Manager of Sales.

[fol. 1701½] Govt. Ex. No. 590

Index of Subject to Which Specific Contract Clauses Set Out on the Attached Form Relate

I. Contract subject to cancellation if the cement is used in any other work than that specified in the contract or if disposed of for any other purpose.

II. Price subject to advance or reduction in freight rates. Other miscellaneous provisions.

III. Repurchase or acceptance of sacks, subject to cement company's count and inspection.

IV. Impairment of buyer's credit, in cement company's opinion, to authorize cancellation of contract, unless satisfactory security is given.

V. Cement company to have right to pro rate or apportion, its supply amongst all buyers, in named contingencies.

VI. Specifications: U. S. Government or Standard Specifications for Portland Cement of the American Society for Testing Materials, when tested by methods recommended by American Society of Civil Engineers.

VII. Discount: Ten days, thirty days net.

[fol. 1702] Atlas Portland Cement Co.

I

The purchaser represents that the cement has been sold by him for the express purpose mentioned in the contract and to and for use by the party named as user in the contract. If said representation is untrue, or if any of the cement is used for any other work, or for any other purpose, or sold (without the written consent of the Cement Company) to, or for use by any other party, the Cement Company shall have the right to terminate this contract and to refuse further deliveries of cement under it.

II

It is understood and agreed that in the event of any change in the rates of transportation or delivery charges, made effective during the term of this contract or agreement, the price shall be increased or decreased accordingly, effective the same date.

The Cement Company reserves the right to prescribe the route by which shipments shall be forwarded and to make shipments prepaid or collect at its option. In making delivered prices, the Cement Company only guarantees cost at destination, and will not be responsible for shortage or damage occurring in transit.

III

If at any time the cost of new cloth sacks increases or decreases to such an extent that the Cement Company deems it advisable to change [fol. 1702½] the above charge for cloth sacks, the above price for all shipments thereafter shall, at the option of the Cement Company, be accordingly increased or decreased from time to time by a sum determined by the Cement Company not in excess of the amount of increase or decrease in such cost of sacks to the Cement Company.

The Cement Company will purchase at the price charged on its invoices, only from the party to whom the sale was made, and not from any assignee or trustee, empty cloth bags bearing its brand and proper identification marks, purchased of the Cement Company, upon their receipt in serviceable condition at the Cement Company's mill if returned with- ninety days after their purchase, freight prepaid, subject to the Cement Company's inspection and count.

IV

If at any time purchaser's responsibility be or become, in cement company's opinion, impaired or unsatisfactory, the cement company reserves the right to require payment in advance or satisfactory assurance that bills will be promptly paid when due.

V

The purchaser shall give the cement company shipping instructions in writing a reasonable time before shipments are to be made, and

the cement company shall not be responsible for delays in manu-
[fol. 1703] facture or shipping cement, caused by strikes, accidents, fires, breakdowns, failure of machinery, embargoes, car shortage, labor scarcity, labor agitation, failure to receive coal from mines from which the cement company secures its supplies of coal, delays in transportation, acts of God, or other causes beyond its control. In any of such events the cement company may determine as nearly as practicable the prorata share of cement of each of its customers after reserving the cement company's usual percentage of shipments for its dealers' warehouse trade, and may limit and reduce shipments hereunder according to such prorata share of the purchaser. The cement company shall have the right to sell or agree to sell, from time to time, its cement under other agreements and orders, and in the event the cement company shall at any time for any cause whatsoever be unable to make and ship cement in accordance with its agreements and orders, the cement company may determine as nearly as practicable the pro rata share of the cement of each of its customers under its agreements and orders after reserving the cement company's usual percentage of its shipments for its dealer's warehouse trade, and may limit and reduce shipments hereunder according to such prorata share of the purchaser. The cement company shall not be obligated to make up any such limitation or reduction and its determination as to the necessity for pro rating and the pro rata share of the purchaser shall be final.

[fol. 1703½] VI

Atlas Portland Cement to be furnished hereunder is when shipped to conform in every respect to specifications of United States Government, or Standard Specifications for Portland Cement as adopted by the American Society for Testing Materials when tested by methods of testing recommended by the American Society of Civil Engineers, but the cement company cannot be responsible for improper use of cement, therefore cement company will not guarantee finished work.

VII

(In the specific job contract a blank is provided for the specification of terms of payment. The quotation, which precedes and is subject to the execution of the formal contract, however, contains the following:)

Terms of payment: On approved credit 30 days net or 10 cents per barrel discount for payment in full within 10 days from date of invoice, payment to be made to the office from which invoice is dated in funds payable in that city, provided there are no overdue accounts unpaid.

[fol. 1704] Allentown Portland Cement Co.

I

The material covered by it is sold to purchaser upon the representation that it is purchased for use only in the construction of work referred to. Use of the cement in any other work than that specified or disposition of it for any other purpose or resale of it for use in other than above described work shall give Cement Company the option to terminate this contract and to refuse to deliver any more cement under it.

II

The price herein named is based upon the freight rate in effect on the date of this contract, as furnished to the company by the carrier, and is subject to carrier's advances, revisions, corrections and changes. Any and all sales, transportation and other tax or taxes, state or Federal; prepaid freight, and all demurrage, car-service, terminal and other transportation charges, not herein expressly allowed by the Company; shall be assumed and paid by the purchaser, as part of the purchase price.

The Company will not be responsible for shortage or damage occurring in transit.

Carriers' Bill of Lading or Receipt shall be conclusive as to the quantity and good condition of both cement and package when loaded on car.

[fol. 1704½] The company shall have the right to direct the route by which all shipments hereunder shall be forwarded.

III

If at any time the cost of new cloth sacks incerases or decerases to such an extent that the Company deems it advisable to change the price at which empty sacks will be purchased, the price named in this contract will be advanced or reduced accordingly.

The Company will credit or pay to the purchaser herein named — cents each for empty cloth bags purchased from it and bearing its brand and proper identification marks, upon their receipt in serviceable condition, at the company's mill, if returned in ninety days after date of shipment of cement, freight prepaid, subject to company's inspection, count and acceptance. The company does not purchase sacks bearing brands other than its own, or sacks that have been wet or otherwise damaged or useless. Rejected sacks may be destroyed or disposed of by the Company without liability, unless removed by the original purchaser within thirty days after notice of rejection.

IV

All orders are subject to our approval of purchaser's credit. If, at any time, the purchaser's credit or responsibility, in our opinion,

shall be or become impaired or unsatisfactory, or if the purchaser fails to comply with any of the terms of payment, or with any [fol. 1705] other terms of this contract, we shall have the right at our option (on one day's written notice) to suspend or cancel deliveries or to require cash payments in advance, or to require security satisfactory to us for all payments due or to become due from the purchaser hereunder.

V

Subject to delays in manufacturing, shipping or delivery, caused by strikes, accidents, delays of carriers, embargoes and other causes unavoidable and beyond its control, the company shall be required to make shipments on this contract only as near as practicable to meet the necessities of the work, and it shall have the right from time to time prior to the date fixed in Paragraph 3 to pro rate deliveries of such cement as it may then be able to manufacture and ship to and among its customers, according to all of the unfilled orders then on its books, in the event of any of the delays or contingencies above mentioned.

VI

Allentown Portland Cement furnished hereunder shall, when shipped, conform in every respect to the specifications then prescribed or adopted by the United States Government, or to the Standard specifications for portland cement of the American Society for Testing Materials, when tested by methods of testing recommended by the American Society of Civil Engineers. We are not responsible for the improper use of our cement or for the finished [fol. 1705½] work or for any damages resulting from its use, in any respect or to any extent whatsoever, and all such claims being waived by the purchaser by the acceptance of this contract.

VII

Terms of payment and due date of all invoices are 30 days net from date of invoice, in cash, at our office at Allentown, Pa. A discount of 10 cents a barrel will be allowed for payment in full within ten days from date of invoice, accompanied by original paid freight bills, which shall be delivered and belong to us when payment is made.

[fol. 1706] Alpha Portland Cement Co

I

The quantity of Alpha Portland Cement mentioned is for use in the work described and if Buyer shall sell or otherwise dispose of any portion of said cement or use any portion thereof in any work other than that described herein, or fail to comply with terms of payment or any of the conditions and limitations in this agree-

ment, the Cement Company may at its option decline to make further deliveries hereunder. * * *

II

The price on cement stated herein is based on the transportation charges in effect at the present time and is subject to advance or reduction as the transportation charges may be advanced or reduced.

In making delivered prices Cement Company only guarantees cost at destination and will not be responsible for shortage or damage occurring in transit. Cement Company's responsibility ceases when shipments are delivered to Railroad Company on cars at its Mill. Railroad Company's bills of lading shall be conclusive as to quantity and good condition of both Cement and packages when loaded on cars.

The Cement Company reserves the right to prescribe the routing by which the shipment shall be forwarded.

III

The prices herein quoted are the prices on cement. If shipped [fol. 1706½] in cloth sacks, the cloth sacks containing the cement are not sold, but remain the property of the Cement Company and must not be sold or used other than as containers of cement manufactured by the Alpha Portland Cement Company. The purchaser agrees to return said sacks to the Cement Company within ninety days of date of shipment of cement by the Cement Company. A rebate of twenty-five cents for each sack returned will be allowed by the Cement Company from the invoice price of the cement when the sacks are returned to the cement company in good condition, freight prepaid, subject to cement company's count and inspection. Cement company will not accept for rebate sacks bearing brands other than its own or bags that have been wet or are otherwise worthless. Such sacks if received will be held at shipper's risk subject to his order for thirty days only. Should the Alpha Portland Cement Company change its cloth sacks basis, the right is reserved to adjust the delivered price of the cement accordingly.

IV

If, during the life of this agreement, the financial responsibility of the buyer becomes impaired or unsatisfactory to the cement company, cash payments with above discounts must be made before shipment, or satisfactory security must be given by the buyer.

V

The purchaser shall give cement company shipping instructions in writing a reasonable time before shipments are to be made. The cement company will not be responsible for delays in transit. All [fol. 1707] orders and contracts are accepted subject to governmental

restrictions, strikes, including coal strikes in either the Anthracite or Bituminous coal regions, differences with employees, accidents to machinery, fire, flood, car famine, or other contingencies beyond the control of either the Cement Company or buyer, and said causes shall, during their existence, excuse either party from the performance of this contract and operate as a proportionate rescission thereof. Provided, that prompt notice shall be given by the party suffering from such disability to the other party, in writing, specifying the cause, otherwise this agreement shall remain in full force and effect. The buyer shall not in any event, however, be entitled to demand or receive deliveries of cement from the cement company subsequent to the date herein specified for the expiration of the agreement.

VI

Alpha Portland Cement to be furnished hereunder is to conform in every respect to specifications of United States Government, or standard specifications for portland cement as adopted by the American Society for Testing Materials when tested by methods of testing recommended by the American Society of Civil Engineers, but cement company can not be responsible for improper use of cement, therefore it will not guarantee finished work.

VII

Terms of payment: 10 cents per barrel off for cash in ten days from date of invoice, or 30 days net from date of invoice.

[fol. 1707½] Bath Portland Cement Co.

I

The quantity of Bath Portland cement mentioned is for use in the work described, and if Buyer shall sell or otherwise dispose of any portion thereof in any work than described herein, or fail to comply with terms of payment or any of the conditions and limitations in this agreement, the Cement Company may at its option decline to make further deliveries hereunder, the buyer remaining liable for all unpaid accounts.

II

In making delivered prices, Cement Company will not be responsible for shortage or damage occurring in transit. Cement Company's responsibility ceases when shipments are delivered to Railroad Company on cars at its Mill. Railroad Company bills of lading shall be conclusive as to quantity and good condition of both Cement and packages when loaded on cars. The Buyer to have the benefit of any reduction and be liable for any advance in freight rates.

The Cement Company reserves the right to prescribe the routing by which the shipments shall be forwarded.

III

Cement Company will pay original purchaser — cents each for empty cloth cement sacks purchased hereunder on their receipt in [fol. 1708] serviceable condition at its mills, freight prepaid, subject to its inspection and count. Cement company will not purchase sacks bearing brands other than its own, or sacks that have been wet or are otherwise useless.

IV

If, during the life of this agreement, the financial responsibility of the buyer becomes impaired or unsatisfactory to the cement company, cash payments with above discounts must be made before shipment, or satisfactory security must be given by the buyer.

V

The purchaser shall give cement company shipping instructions in writing a reasonable time before shipments are to be made. The cement company will not be responsible for delays in transit. All orders and contracts are accepted subject to strikes, including coal strikes in either the anthracite or bituminous coal regions, differences with employees, accidents to machinery, fire, flood, car famine or other contingencies beyond the control of either the cement company or buyer, and said causes shall, during their existence, excuse either party from the performance of this contract, and operate as a proportionate rescission thereof. Provided that prompt notice shall be given by the party suffering from such disadvantage to the other party in writing, specifying the cause, otherwise this agreement shall remain in full force and effect. The buyer shall not in any [fol. 1708½] event, however, be entitled to demand or receive deliveries of cement from the cement company subsequent to the date herein specified for the expiration of the agreement.

VI

Bath portland cement to be furnished hereunder is to conform in every respect to specifications of United States Government or standard specifications for portland cement as adopted by the American Society for Testing Materials when tested by methods of testing recommended by the American Society of Civil Engineers, but cement company cannot be responsible for improper use of cement, therefore it will not guarantee finished work.

VII

Terms of Payment: 5 cents per barrel off in ten days from date of invoice, or 30 days net from date of invoice.

[fol. 1709] Coplay Cement Mfg Co.

I

The quantity of Saylor's Portland Cement mentioned is for use in the work described, and if buyer shall sell or otherwise dispose of any portion of said cement or use portion thereof in any work other than described herein or fail to comply with the terms of payment or any of the conditions and limitations in this agreement, the cement company may at its option decline to make further deliveries hereunder. * * *

II

The price mentioned herein will be advanced to the extent of any additional war taxes or transportation charges on cement imposed by the U. S. Government.

In making delivered prices, cement company will not be responsible for shortage or damage occurring in transit. Cement company's responsibility ceases when shipments are delivered to railroad company on cars at its mill. Railroad company's bills of lading shall be conclusive as to quantity and good condition of both cement and packages when loaded on cars. The buyer to have the benefit of any reductions and to be liable for any advance in freight rates.

The cement company reserves the right to prescribe the routing by which the shipments shall be forwarded.

[fol. 1709½] III

The price named herein is subject to change in the price of cloth bags. The change, however, will not affect the net price of cement, as we will repurchase cloth bags at the same price charged for them.

The cement company will pay the original purchaser 15 cents each for empty cloth cement sacks purchased hereunder on their receipt in serviceable condition at its mill, freight prepaid, subject to its inspection and count. Cement company will not purchase sacks bearing brands other than its own, or sacks that have been wet or are otherwise useless.

IV

If, during the life of this agreement, the financial responsibility of the buyer becomes impaired or unsatisfactory to the cement company, cash payment with above discount must be made before shipment, or satisfactory security must be given by the buyer.

V

The purchaser shall give Cement Company shipping instructions in writing a reasonable time before shipments are to be made. The Cement Company will not be responsible for delays in transit. All orders and contracts are accepted subject to strikes, including coal

strikes in either the Anthracite or Bituminous coal regions, differ-
[fol. 1710] ences with employees, accidents to machinery, fire, flood, car famine or other contingencies beyond the control of either the Cement Company or Buyer, and said causes shall, during their existence, excuse either party from the performance of this contract and operate as a proportionate rescission thereof. Provided that prompt notice shall be given by the party suffering from such disability to the other party in writing, specifying the cause, otherwise this agreement shall remain in full force and effect. The Buyer shall not in any event, however, be entitled to demand or receive deliveries of cement from the Cement Company subsequent to the date herein specified for the expiration of this agreement.

VI

Saylor's Portland Cement to be furnished hereunder is to conform in every respect to specifications of United States Government or Standard Specifications for Portland Cement as adopted by the American Society for Testing Materials when tested by methods of testing recommended by the American Society of Civil Engineers, but Cement Company cannot be responsible for improper use of cement, therefore, it will not guarantee finished work.

VII

Terms of Payment: 5 cents per barrel off for cash in ten days from date of invoice, or 30 days net from date of invoice.

[fol. 1710½] Dexter Portland Cement Co.

I

The quantity of Dexter Cement mentioned on the reverse side hereof is for use in the work described, and if buyer shall sell or otherwise dispose of any portion of said cement, or use any portion thereof in any work other than above described or assign this contract or any part thereof, or fail to comply with terms of payment, or any of the conditions and limitations in this agreement set out, or if in the opinion of the seller the buyer's credit * * * etc. * * * then in any such event or events, seller may at his option decline to make further deliveries hereunder, buyer remaining liable for all unpaid accounts.

II

The price stated herein is based on the freight rates in effect at the present time, and is subject to advance or reduction as the freight rates may be advanced or reduced, and will also be advanced to the extent of any additional war taxes imposed by the government on transportation charges.

All railroad demurrage, car service, and terminal charges imposed at destination shall be settled for, and borne by, buyer.

Seller reserves the right to determine and direct the route by which shipments hereunder shall be forwarded.

[fol. 1711]

III

If at any time during the life of this contract the seller advances or reduces the purchase price of cloth bags in accordance with terms on back hereof, the price named herein shall be advanced or reduced accordingly.

Seller will pay original purchaser ten cents each for empty cloth cement bags purchased hereunder bearing its brand, on their receipt in serviceable * * * at seller's mill, if returned within ninety days after their purchase, freight prepaid to Nazareth, Pennsylvania, subject to seller's inspection and count. Seller will not purchase bags bearing brands other than its own, or bags that have been wet or are otherwise useless.

IV

If in the opinion of seller the buyer's credit be or become impaired, then, in any such event or events, seller may, at his option, decline to make further deliveries hereunder, buyer remaining liable for all unpaid accounts.

V

Buyer shall give seller shipping instructions in writing a reasonable time before shipments are to be made. All orders and contracts are accepted subject to contingencies of manufacturing and shipping, [fol. 1711½] and other causes beyond seller's control and seller will not be responsible for delays in transit.

VI

The "Dexter" Portland Cement to be shipped hereunder is when shipped to conform in every respect to Specifications of United States Government, or Standard Specifications for Portland Cement as adopted by the American Society for Testing Materials when tested by methods of testing recommended by the American Society of Civil Engineers, but seller cannot be responsible for improper use of Cement, therefore will not guarantee finished work.

VII

The terms of payment shall be as follows, viz.: 30 days net, or, if invoice is paid in full within 10 days from date of shipment, 5 cents per barrel discount will be allowed, provided the purchaser has satisfied all past due prior indebtedness to us; payments to be made in cash or equivalent at Seller's Office, Nazareth, Pa.

[fol. 1712] Edison Portland Cement Co.

I

It is understood and agreed by the parties hereto, that if any of the representations made by said purchaser to cement company in and

about securing the execution of this contract by cement company, are untrue, or, if any of the cement delivered hereunder is used for any purpose other than as represented, that then, and in such case, upon learning thereof, the cement company may cancel this contract, or the undelivered portion thereof, or any other order given to the cement company by said purchaser.

II

Price includes freight from mill to destination and will be increased at the option of the cement company to cover any advance in freight rates or taxes thereon at any time during the life of this contract.

The cement company will not be responsible for loss or damage to cement or packages in transit. The railway company's bills of lading shall be conclusive as to quantity and good condition of cement when loaded on cars at the cement company's plant.

All railroad and lighterage demurrage, car service and terminal charges at destination shall be settled for and borne by the purchaser. [fol. 1712½] The Cement company shall have the right to direct the route by which all shipments hereunder shall be forwarded.

III

The value of the packages *are* included in the herein stated prices. Shipments made in paper bags are at the purchaser's risk of breakage and resultant loss of cement. If cement is shipped in cloth sacks, the cement company will repurchase from the original purchaser at 15 cents each, the empty cloth sacks bearing the Edison brand, which are received by it in good condition, freight prepaid, at its works at New Village, N. J., within ninety days from date of shipment of cement.

The price in cloth is based on a cloth sack basis of 15 cents and should we change our cloth sack basis during the life of this contract, the right is reserved to adjust the delivered price accordingly.

IV

If, at any time, the financial responsibility of purchaser is unsatisfactory to the cement company, it reserves the right to require payments in advance or satisfactory security, or guarantee that invoices will be promptly paid when due.

If purchaser fails to comply with terms of payment, the cement company reserves the right to cancel unfilled portions of any contract or order, purchaser remaining liable for all unpaid accounts.

[fol. 1713]

V

The Cement Company shall not be responsible for delays in manufacture or shipping, due to strikes, differences with employees, scarcity of labor, accident, inability to secure cars, coal or material, fire,

flood, warfare, or other causes not under its control, nor for any delay in transportation.

VI

Specifications: The Cement delivered under this contract is, when shipped to conform in every respect to specifications of the United States Government for Portland cement as adopted by the American Society for Testing Materials when tested by methods of testing recommended by the American Society of Civil Engineers. The Cement Company cannot be responsible for improper use of cement and, therefore, will not guarantee finished work.

VII

Payment: Five Cents (5¢) per barrel discount for cash in ten (10) days from date of invoice, or net cash in thirty (30) days.

[fol. 1713½] Giant Portland Cement Co.

I

The quantity of Portland cement mentioned on the reverse side hereof is for use in the work described, and if buyer shall sell or otherwise dispose of any portion of said cement, or use any portion thereof in any work other than within described or assign this contract or any part thereof, or fail to comply with any of the conditions and limitations in this agreement set out seller may, at his option, decline to make further deliveries. * * *

II

Price is based on present rate of freight and is subject to advance or reduction in present rate from the seller's mills to point of delivery specified above. Price for water delivery is based on present rail rates and cost of water transportation and is subject to advance or reduction in the present rates. Seller reserves the right to prescribe the route by which shipments shall be forwarded. All railroad demurrage, car service and terminal charges imposed at destination shall be settled for, and be borne by, buyer.

Seller's invoice quantities shall be the basis of settlement and buyer shall not hold seller responsible for shortage of, or damage to, either cement or packages occurring in transit. Railroad company's bills of lading at the point of shipment shall be conclusive [fol. 1714] as to quantity and good condition of cement and packages when loaded on cars at seller's mill.

III

Seller will pay original buyer the amount per cloth sack included in price invoice for sacks purchased hereunder, bearing its brand on

their receipt in serviceable condition at seller's mill, Egypt, Lehigh County, Pa., Ironton Railroad Delivery, freight prepaid, if returned within ninety days after their purchase, subject to seller's inspection and count. Seller will not purchase sacks bearing brands other than its own, or sacks that have been wet or are otherwise useless.

If at any time during the life of this contract, the seller should make a general advance or reduction in price of cloth sacks in its quotations, such advance or reduction shall apply to any unfilled portion of this contract, and such sacks will be repurchased by seller at the same price at which they are billed to the original buyer, under terms as outlined hereon in the clause governing the return of cloth sacks.

IV

Orders are subject to approved credit and if the buyer fails to fulfill the terms of payment under this or other existing contracts between the buyer and the seller, the seller may defer further shipments until such payments are made, or may, at its option, terminate the contract. The seller reserves the right, even after partial shipments on [fol. 1714½] account of this contract, to require from the buyer satisfactory security for performance of the buyer's obligations; and refusal to furnish such security, will entitle the seller to suspend such shipments until such security is furnished or to terminate this contract. Termination of this contract under any of these conditions, shall not prejudice any claim for damages that the seller may be entitled to make.

V

Should any contingency at any time arise whereby production or shipments are curtailed or delayed, seller reserves the right to prorate shipments of cement to all buyers of record at such time. In addition to orders or contracts accepted hereunder, seller may have accepted and shall from time to time accept other orders and contracts, so as to have a market for its entire estimated output of cement under normal conditions. Therefore in the event seller shall at any time or for any cause be unable to deliver to all customers the entire quantity of cement required and called for by all its contracts then in force, the total of its production then available shall be applied pro rata on all said contracts, according to their requirements respectively, and the amount deliverable on each contract may be reduced accordingly and there shall be no liability on seller's part for the reduction so made.

[fol. 1715] VI

Specifications: Giant Portland Cement is guaranteed to meet the requirements of the standard specifications adopted by the American Society for Testing Materials. We cannot be responsible for improper use of cement and therefore will not guarantee finished work.

VII

The terms of payment shall be as follows; viz: 30 days net, or, if invoice is paid in full, within (10) days from date of shipment and there are no past due bills outstanding for prior shipments, 10 cents per barrel discount will be allowed, payments to be made in cash or equivalent at seller's office, Philadelphia, Pa.

[fol. 1715½] Glens Falls P. C. Co.

I

Buyer shall have no right to assign this contract. The material covered by it is sold to buyer upon the representation that it is purchased for use in the construction of work referred to. Use of the cement in any other work than that specified or disposition of it for any other purpose or resale of it for use in other than above described work shall give seller the option to terminate this contract and to refuse to deliver any more cement under it.

II

The prices on cement herein are based on the freight rates in effect at the present time and are subject to advance or reduction as the freight rates may be advanced or reduced. These prices will be advanced to the extent of any additional war taxes, on transportation charges on cement, imposed by the Government.

Seller reserves the right to determine and direct the route by which shipments hereunder shall be forwarded. All railroad demurrage car service and terminal charges at destination shall be settled for and borne by purchaser.

[fol. 1716] III

Seller will pay original purchased and not any assignee, or trustee, 10 cents each for empty cloth cement bags purchased hereunder bearing its brand, on their receipt in serviceable condition at Seller's mill, if returned within 90 days after their purchase, freight prepaid, subject to seller's inspection and count. Seller will not purchase bags bearing brands other than its own, or bags that have been wet or otherwise made useless.

IV

If at any time the financial responsibility of buyer becomes impaired or unsatisfactory to seller it reserves the right to require payments in advance or satisfactory security or guarantee that invoices will be promptly paid when due. If buyer fails to comply with terms of payment, seller reserves the right to cancel unfilled portion of any contract or order, buyer remaining liable for all unpaid accounts.

V

Buyer shall give seller shipping instructions in writing a reasonable time before shipments are to be made. All orders and contracts are accepted subject to contingencies of manufacturing and shipping, and other causes beyond seller's control, and seller will not be responsible for delays in transit. Should any contingency [fol. 1716½] at any time arise, whereby production or shipments are curtailed or delayed, seller reserves the right to prorate its shipment of cement to all purchasers of record at such time. In addition to orders or contracts accepted hereunder seller may have accepted and may from time to time accept, other orders and contracts so as to have a market for its entire estimated output of cement under normal conditions; therefore in the event seller shall at any time because of any such contingency be unable to deliver to all its customers the entire quantity of cement required and called for by all its contracts then in force, the total of Seller's production then available shall be applied pro rata on all of said contracts according to their requirements respectively, and the amount deliverable on each contract may be reduced accordingly and there shall be no liability on seller's part for the reduction so made.

VI

The Iron Clad Portland Cement to be shipped hereunder is, when shipped, to conform in every respect to Specifications of United States Government, or Standard Specifications for Portland Cement adopted by the American Society for Testing Materials when tested by methods of testing recommended by the American Society of Civil Engineers, but seller cannot be responsible for improper use of cement, therefore will not guarantee finished work.

[fol. 1717]

VII

The terms of payment shall be as follows, viz.: 30 days net, or, if invoice is paid in full within 10 days from date of shipment, 10 cents per barrel discount will be allowed, payments to be made in cash or equivalent at seller's office, Glens Falls, N. Y. Freight charges per tariff applying, from Glens Falls, N. Y., to point of delivery specified, shall be paid by buyer for account of seller, and the original paid freight bills sent to seller promptly for proper comparison.

[fol. 1717½] Hercules Cement Corp.

I

Purchaser hereby agrees that all of the cement purchased hereunder shall be used in the following described work and that no portion thereof will be resold by the purchaser for use on any work other than above described.

If purchaser at any time fails to comply with any of the terms or conditions of this contract, seller reserves the right to cancel the then unfilled portion of this and/or other then existing contracts (and orders) between the parties, purchaser remaining liable for all then unpaid accounts.

II

Price includes freight at present rates ,and will be increased to cover any advance in freight rates, and any additional Government tax on freight, at any time during the life of this contract. Purchaser shall pay all freight charges for account of Seller.

Seller shall have the right to direct the route by which all shipments hereunder shall be forwarded. All demurrage, car service and terminal charges imposed at destination shall be settled for and borne by Purchaser.

[fol. 1718] III

Sacks: Seller will repurchase from the Purchaser at 25¢ each the empty cloth sacks bearing the Hercules brand which are received by it in good condition, freight prepaid, at its works at Hercules, Penna., within 90 days from date of shipment of cement.

The seller reserves the right to increase the repurchase price of its sacks and upon notice to this effect the price mentioned above shall be advanced proportionately per barrel on all deliveries thereafter.

IV

If at any time the financial responsibility of Purchaser becomes impaired or unsatisfactory to Seller, the latter reserves the right to require payments in advance or satisfactory security or guarantee that invoices will be promptly paid when due.

V

Seller shall not be liable for delays in manufacture or shipping, caused by strikes, scarcity of labor, accident to plant or machinery, inability to secure cars, coal or material, fire, flood, warfare, acts of God, or other causes not under Seller's control; neither shall Seller be liable for delays in transportation.

[fol. 1718½] VI

The Hercules Cement to be shipped hereunder is to conform in every respect to "Standard Specifications and Tests for Portland Cement" c9-17 of the American Society for Testing Materials.

VII

Net cash in 30 days or 5c. per bbl. discount for payment in full within 10 days from date of invoice, provided all then prior existing indebtedness shall have been satisfied.

[fol. 1719] Knickerbocker P. C. Co.

I

It is understood and agreed that the Cement sold and to be delivered under this contract is not to be used for any other purpose than for the work specified herein, nor may this agreement be transferred or sublet by Buyer without written consent of the Seller being obtained.

II

In case freight rates affecting transportation of any part of the cement covered hereby shall be increased or decreased during the life of this contract, the price hereinbefore set forth shall be advanced or decreased accordingly.

Seller reserves the right to control the routing of all shipments under this contract.

Seller shall not be held responsible for shortage or damage to cement or packages occurring in transit. Transportation company's bill of lading shall be conclusive as to quantity, also as to cement and packages being in good condition when loaded at Seller's factory.

III

When shipped in cloth sacks, it is agreed that the empties may be returned, subject to Seller's count and inspection, and for all received [fol. 1719½] in good condition at Seller's factory, Hudson Upper, N. Y., with carrying charges prepaid by the Buyer, credit will be allowed at the rate Fifteen (15¢) cents each.

IV

If, during the life of this contract, the financial responsibility of the Buyer becomes impaired or unsatisfactory to the Seller, it reserves the right to require the Buyer to make payment in advance, or to give satisfactory security or guarantee that invoices will be promptly paid when due.

V

Seller or Buyer shall not be responsible for delays due to the existence of war, strikes, lockouts, scarcity of labor, accidents, inability to secure cars, coal or material, transportation delays, fire, flood, acts of God, or other causes beyond the control of either the Seller or Buyer, preventing or interfering with the production, shipment or use of all or any part of the cement herein referred to.

VI

Knickerbocker Portland Cement is guaranteed to meet the requirements of the Standard Specifications for Portland Cement adopted by the American Society for Testing Materials. Seller will [fol. 1720] not be responsible for the improper use of cement, therefore will not guarantee finished work.

VII

Thirty (30) days net on approved credit; five cents (5¢) per barrel discount will be allowed for payment in full within ten (10) days from date of invoice; all bills payable at 30 East 42nd Street, N. Y., in New York or Boston exchange.

[fol. 1720½] Lawrence Cement Co.

I

It is understood and agreed that if any statement or representation made by the buyer concerning the use to be made of the cement or other matter involved in this contract is untrue, the Cement Company may cancel this contract and if any cement delivered under this contract is used for work other than that mentioned in the contract, the undelivered balance shall be cancelled, and such cancellation shall not release Buyer from any unpaid account.

II

This contract is based on the present cost of transportation, including railroad freight rates and rates by automobile or boat. Buyer is to have the benefit of any reduction and be liable for any advance in rates, or other charge imposed by the Government or any State or Municipality.

The Cement Company reserves the right to prescribe the route by which shipments shall be forwarded. In making delivered prices the Cement Company only guarantees cost at destination; its responsibility ceases when shipments are delivered to railway company on cars; and it is not responsible for shortage or damage occurring in transit or thereafter. The railroad company's bill of lading shall be conclusive as to quantity and good condition of both cement and [fol. 1721] packages when delivered on cars.

III

The price named herein for shipments in cotton sacks includes a charges of — cents each for cotton sacks. The Cement Company will repurchase from the original Buyer each cotton sack shipped on this contract at the price charged for it if returned within Ninety (90) days from date of invoice, in good condition, freight prepaid, subject to Cement Company's inspection and count. The right is reserved to increase the price at which sacks are charged and repurchased at any time without notice, but the change will not affect the net price of the cement. Paper bags are not returnable. The Cement Company will not purchase sacks bearing other brands, nor sacks that have been wet or are not otherwise in serviceable condition. Rejected sacks will be held at owner's risk for thirty (30) days only.

IV

If in the Cement Company's opinion, the Buyer's credit becomes impaired or unsatisfactory, it reserves the right to require payment in advance.

V

It is agreed that in the event of any strike, labor trouble, fire, breakdown, failure of machinery or other cause resulting in stop-
[fol. 1721½] page or partial stoppage of the production of the Cement Company's cement or in the destruction of or damage to cement manufactured or in course of manufacture, or deficient transportation preventing the shipment of cement or inability to procure containers, or the normal supplies of coal or raw materials used in the manufacture of cement, shipments under this contract may be suspended or partially suspended as the case may be. In the event of such interruption, the Cement Company may prorate or discontinue shipments on all existing contracts, including those with other parties, during such interruptions.

VI

The Cement sold under this contract is guaranteed to meet the requirements of the standard specifications for Portland Cement of the American Society for Testing Materials. The Cement Company is not responsible for improper use of cement, and shall be free from any responsibility for finished work.

VII

Payments for cement, including sacks, to be made within thirty (30) days from date of shipment, subject to discount of 10¢ per barrel if paid within ten days of the date of invoice, provided all past due indebtedness shall have been paid. If amount of any invoice under this contract shall not be paid when due, the Cement Company may at its option, cancel all further deliveries under this agreement, and the Buyer shall remain liable for all unpaid accounts.

[fol. 1722] Lehigh Portland Cement Co.

I

It is understood and agreed by the parties hereto, that if any of the representations made by said Purchaser to Cement Company in and about securing the execution of this contract by Cement Company, are untrue, or, if any of the cement delivered hereunder is used for any purpose other than as represented, then, and in such case, upon learning thereof, the Cement Company may cancel this contract, or the undelivered portion thereof, or any other order

given to the Cement Company by said Purchaser, and such cancellation shall in no wise release said Purchaser from unpaid accounts, or from liability to said Cement Company at the contract price for cement delivered prior to such cancellation.

II

This price is based on present freight rates and is subject to variation in proportion as the freight rates may be advanced or reduced; it is also subject to advance to the extent of any additional war taxes on transportation charges on cement which may be in the future *be* imposed by the Government.

The cement company shall have the right to direct the route by which all shipments hereunder shall be forwarded.

[fol. 1722½] III

Cement to be packed in cloth. If cement is shipped in cloth sacks, the Cement Company will repurchase from the original Purchaser, at Fifteen cents each, the empty cloth sacks bearing the Lehigh brand, which are received by it in good condition, freight prepaid, at its works at West Coplay, Penna., or New Castle, Penna., within ninety (90) days from date of shipment of cement.

IV

If, at any time, the financial responsibility of Purchaser becomes impaired or unsatisfactory to the Cement Company, it reserves the right to require payments in advance, or satisfactory security or guarantee that invoices will be promptly paid when due.

If Purchaser fails to comply with terms of payment the Cement Company reserves the right to cancel unfilled portion of any contract or order, Purchaser remaining liable for all unpaid accounts.

V

The Cement Company shall not be responsible for delays in manufacture or shipping, due to strikes, differences with employees, scarcity of labor, accident, inability to secure cars, coal or material, fire, flood, warfare, or other causes not under its control, nor for any delay in transportation.

[fol. 1723] VI

Specifications: The cement delivered under this contract is to conform to standard specifications for Portland Cement adopted August 16, 1909, by the American Society for Testing Materials with methods of testing recommended January 17, 1912, as amended by the American Society of Civil Engineers, or to U. S. Government specifications for Portland Cement, as set forth in Circular of the Bureau of Standards, No. 33.

VII

Payment: Net cash in thirty (30) days, or five cents (5¢) per barrel discount for cash in ten (10) days from date of invoice. Payable in New York or Chicago Exchange.

[fol. 1723½] Nazareth Cement Co.

I

(The Specific Job Quotation becomes the Specific Job Contract when accepted.)

This quotation covers the entire and actual quantity (estimated at * * * barrels) of Portland Cement which buyer shall furnish or use in the following described work.

* * * * * * *

If purchaser fails to comply with terms of payment or with any of the other terms of sale, we reserve the right to cancel unfilled portion of any contract or order, purchaser remaining liable for all unpaid accounts.

II

The prices on cement stated herein are based on the freight rates in effect at the present time, and are subject to advance or reduction, as the freight rates may be advanced or reduced. These prices will be advanced to the extent of any additional war taxes on transportation charges on cement, imposed by the Government.

In making delivered prices we only guarantee cost at destination, and we will not be responsible for shortage or damage occurring in transit. Railroad company's bill of lading shall be conclusive as to quantity and good condition of both Cement and packages when loaded on cars.

We reserve the right to prescribe the route by which shipments [fol. 1724] shall be forwarded. All railroad demurrage, car service and terminal charges at destination shall be settled for and borne by purchaser.

III

We will pay to original purchaser 15 cents each for empty cloth cement sacks purchased of us, bearing our brand, on their receipt in serviceable condition at our mill, if returned within 90 days after their purchase, freight prepaid, subject to our inspection and count. We do not purchase sacks bearing brands other than our own, or sacks that have been wet or are otherwise useless.

Rejected sacks may be destroyed or otherwise disposed of by this Company without liability unless they are removed by original purchaser within ten days after notice of rejection.

IV

Orders are subject to approved credit, and if — any time purchaser's financial responsibility be or becomes, in our opinion, impaired or unsatisfactory, we reserve the right to require payment in advance or satisfactory assurance that bills will be promptly paid when due.

V

The purchaser shall give us shipping instructions in writing a reasonable time before shipments are to be made. All orders and [fol. 1724½] contracts are accepted subject to contingencies of manufacturing and shipping, and other causes beyond our control, and we will not be responsible for delays in transit. Should any contingency at any time arise, whereby production or shipments are curtailed or delayed, we reserve the right to prorate our shipments of cement to all purchasers of record at such time.

VI

"Nazareth" Portland Cement to be furnished hereunder is, when shipped, to conform in every respect to specifications of the United States Government, or Standard Specifications for Portland Cement as adopted by the American Society for Testing Materials when tested by methods of testing recommended by the American Society of Civil Engineers, but we cannot be responsible for improper use of cement, therefore we will not guarantee finished work.

VII

Thirty days net; 5 cents per barrel discount for payment in full within 10 days from date of invoice. Payments to be made in cash or equivalent at our office, Nazareth, Pa.

[fol. 1725] Penn-Allen Cement Co.

I

(The Specific Job Quotation becomes the Specific Job Contract when accepted.)

This quotation covers the entire and actual quantity (estimated at — barrels) of Portland Cement which buyer shall furnish or use solely in the following described work.

* * * * * * *

If purchaser fails to comply with terms of payment or with any of the other terms of sale, we reserve the right to cancel unfilled portions of any contract or order, purchaser remaining liable for all unpaid accounts.

II

The price named in this quotation is subject to change in freight rates and any additional war tax on freight on cement that may be imposed by the Government.

In making delivered prices we only guarantee cost at destination and will not be responsible for shortage or damage occurring in transit. Our responsiblity ceases when shipments are delivered to Railroad Company on cars or at mill. Railroad Company's bill of lading shall be conclusive as to the quantity and good condition of both cement and packages when loaded in the cars.

We reserve the right to prescribe routing by which the shipment shall be forwarded. All railroad demurrage, car service and terminal [fol. 1725½] charges at destination shall be settled for by the purchaser.

III

Price of cloth sacks is included in invoice, which must be paid without deduction. We will pay to the original purchaser 15 cents each for empty cloth sacks bearing our brand, on their receipt in serviceable condition at our mill, if returned within ninety days after their purchase, freight prepaid, subject to our inspection and count. We do not purchase sacks bearing brands other than our own or sacks that have been wet or are otherwise useless. Rejected or foreign sacks will be held at owner's risk, subject to his order, for thirty days only.

IV

Orders are subject to approved credit, and if at any time the purchaser's financial responsibility be or becomes, in our opinion, impaired or unsatisfactory, we reserve the right to require payment in advance, and pending the same may withhold shipment and if within a reasonable time in the judgment of this Company such cash or approved credit has not been furnished, we may declare the order or contract cancelled.

V

The purchaser shall give us shipping instructions in writing a reasonable time before shipments are to be made. We will not be [fol. 1726] responsible for delays in transit. All orders and contracts are accepted subject to strikes, including coal strikes in either the anthracite or bituminous coal regions, differences with employees, accidents to machinery, fire, flood, car famine or other contingencies beyond control of either buyer or seller. Therefore, in the event we shall at any time or for any cause be unable to deliver to our customers the entire quantity of cement required and called for by all our contracts then in force, the total of our production then available shall be applied pro rata on all of said contracts, according to their

requirements respectively and the amount delivered on each contract may be reduced accordingly and there shall be no liability on our part for the reduction so made.

VII

Penn-Allen Portland Cement is guaranteed to meet the requirements of the Standard Specifications for cement of the American Society for Testing Materials, serial designation C-9-17. We cannot be responsible for improper use of cement and therefore will not guarantee finished work.

VII

On approved credit, net thirty days, or five (5) cents per barrel discount for payment in full including sacks within ten days from date of invoice.

[fol. 1726½] Pennsylvania Cement Co.

I

(The Specific Job Quotation when accepted becomes the Specific Job Contract.)

Any cement furnished under this quotation is to be used solely for the purpose and upon the work particularly specified above, and to be furnished in about equal monthly proportions.

The Seller may require the Purchaser to furnish evidence satisfactory to the seller that the cement is being used in the construction of the work specified, and if there shall be any diversion the seller may thereupon, at its option, terminate this agreement.

II

This price is based upon the present freight rate and tax on same and is subject to advance or reduction as the freight rate or tax may be advanced or reduced. Freight charges are to be paid by you and will be deducted from the face of the invoice when rendered.

III

Freight charges are to be paid by you and will be deducted from the face of the invoices when rendered.

[fol. 1727] The charge of * * * made for each bag shipped, will be credited by the company to the purchaser's account or paid in cash if nothing is due from the purchaser when such bags are returned to the cement company within such time in good condition, freight prepaid. The company's count and inspection to be final. No credit will be given for worthless bags or for bags other than those shipped by this company.

IV

If during the life of this agreement the financial responsibility of the purchaser shall become unsatisfactory to the seller, it may require cash payments or security satisfactory to it, in default of which this agreement may be thereupon terminated by the seller.

V

All agreements are contingent upon Government restrictions, regulations or requirements, fire, floods, strikes, accidents, delays of carriers or failure of transportation lines to furnish the necessary service and equipment in transporting the commodity, or other delays unavoidable or beyond our control.

VI

Specifications: The cement delivered under this contract is to com-
[fol. 1727½] ply with the requirements of the Standard Specifications for Portland cement as adopted by the American Society for Testing Materials, when tested in accordance with the methods of test re-ommended by the American Society of Civil Engineers.

VII

Terms of Payment: 30 days net from date of invoice or — per barrel discount allowed for cash in 10 days from date of invoice. Export shipments are cash f. a. s.

[fol. 1728] Phœnix Portland Cement Co.

I

(The Specific Work Quotation when accepted becomes the Specific Job Contract.)

This quotation covers the entire and actual quantity (estimated at — barrels) of Portland Cement which buyer shall furnish or use in the following described work.

* * * * * * *

If purchaser fails to comply with terms of payment or with any of the other terms of sale, we reserve the right to cancel unfilled portions of any contract or order, purchaser remaining liable for all unpaid accounts.

II

Price includes freight at present rates and will be increased to cover any advance in freight rates at any time during the life of this contract or any tax charge upon them.

In making delivered prices we only guarantee cost at destination, and we will not be responsible for shortage or damage occurring in

transit. Railroad company's bill of lading shall be conclusive as to quantity and good condition of both cement and packages when loaded on cars.

We reserve the right to prescribe the route by which shipments [fol. 1728½] shall be forwarded. All railroad demurrage, car service and terminal charges at destination shall be settled for and borne by purchaser.

III

We will pay to original purchaser 10 cents each for empty cloth cement sacks purchased of us, bearing our brand on their receipt in serviceable condition at our Mill, if returned within 90 days after their purchase, freight prepaid, subject to our inspection and count, and Cement Company's Credit Memorandum mailed to the buyer to be conclusive as to the number and quality of sacks repurchased. We do not purchase sacks bearing brands other than our own, or sacks that have been wet or are otherwise useless.

Rejected sacks may be destroyed or otherwise disposed of by this Company without liability unless they are removed by original purchaser within ten days after notice of rejection.

IV

Orders are subject to approved credit, and if at any time purchaser's financial responsibility be or becomes in our opinion, impaired or unsatisfactory, we reserve the right to require payment in advance or satisfactory assurance that bills will be promptly paid when due.

[fol. 1729]

V

The purchaser shall give us shipping instructions in writing a reasonable time before shipments are to be made. All orders and contracts are accepted subject to contingencies of manufacturing and shipping, and other causes beyond our control, and we will not be responsible for delays in transit. Should any contingency at any time arise, whereby production or shipments are curtailed or delayed, we reserve the right to prorate our shipments of Cement to all purchasers of record at such time.

VI

Phœnix Portland Cement to be furnished hereunder is, when shipped, to conform in every respect to specifications of the United States Government or Standard Specifications for Portland Cement as adopted by the American Society for Testing Materials when tested by methods recommended by the American Society of Civil Engineers, but we cannot be responsible for improper use of Cement, therefore we will not guarantee finished work.

VII

Thirty days net; 5 cents per barrel discount for payment in full within 10 days from date of invoice. Payments to be made in cash or equivalent at our office, Philadelphia. Original paid freight bills to be sent us promptly for comparison.

[fol. 1729½] Security Cement & Lime Co.

I

(The Specific Job Quotation when accepted becomes the Specific Job contract.)

This quotation covers the entire and actual quantity (estimated at — barrels) of Portland Cement which buyer shall furnish or use in the following described work.

* * * * * * *

If purchaser fails to comply with terms of payment or with any of the other terms of sale, we reserve the right to cancel unfilled portions of any contract or order, purchaser remaining liable for all unpaid accounts.

II

The prices named in this quotation are subject to changes in transportation charges.

In making delivered prices we only guarantee cost at destination, and we will not be responsible for shortage or damage occurring in transit. Railroad company's bill of lading shall be conclusive as to quantity and good condition of both cement and packages when loaded on cars.

We reserve the right to prescribe the route by which shipments shall be forwarded. All railroad demurrage, car service and terminal charges at destination shall be settled for and borne by purchaser.

[fol. 1730] III

We will pay to original purchaser fifteen cents each for empty cloth cement sacks purchased of us, bearing our brand, on their receipt in serviceable condition at our mill, Security, Md., if returned within 90 days after their purchase, freight prepaid, subject to our inspection and count. We do not purchase sacks bearing brands other than our own, or sacks that have been wet or are otherwise useless.

Rejected sacks will be held at owner's risk, subject to his order, for thirty days after notice of rejection only.

IV

If at any time purchaser's financial responsibility be or becomes, in our opinion, impaired or unsatisfactory, we reserve the right to re-

quire payment in advance or satisfactory assurance that bills will be promptly paid when due. If such assurance is not forthcoming within a reasonable time, we reserve the right to cancel this quotation and contract.

V

The purchaser shall give us shipping instructions in writing a reasonable time before shipments are to be made. All orders and contracts are accepted to contingencies of manufacturing and shipping, and other causes beyond our control, and we will not be responsible [fol. 1730½] for delays in transit. Should any contingency at any time arise, whereby production or shipments are curtailed or delayed, we reserve the right to prorate our shipments of Cement to all purchasers of record at such time on basis of tonnage available, and our liability will be reduced accordaingly.

VI

Security Portland Cement to be furnished hereunder is, when shipped, to conform in every respect to specifications of the United States Government, or Standard Specifications for Portland Cement as adopted by the American Society for Testing Materials. We cannot be responsible for improper use of Cement, therefore we will not guarantee finished work.

VII

Thirty net or five (5) cents per barrel discount for payment in full within 10 days from date of invoice. Payments to be made in cash or equivalent at our office, Hagerstown, Md. Original paid freight bills to be sent us promptly for credit.

[fol. 1731] Vulcanite P. C. Co.

I

(The Specific Job Quotation when accepted becomes the Specific Job Contract.)

The material covered by it is sold to the buyer upon the representation that it is purchased for use in the construction of work referred to. Use of the cement in any other work than that specified, or disposition of it for any other purpose, or resale of it for use in other than above described work, shall give the seller the option to terminate this contract and to refuse to deliver any more cement under it.

II

The buyer to have the benefit of any reduction and to be liable for any advance in freight rates. Any tax on freight bills is to be paid by the buyer. In the event of prepayment of freight or other

railroad or terminal charges the buyer shall settle these in cash on presentation of invoice by the seller.

In making delivered prices we only guarantee cost at destination, and we will not be responsible for shortage or damage occurring in transit. Railroad company's bill of lading shall be conclusive as to quantity and good condition of both cement and package when loaded on cars.

We reserve the right to prescribe the route by which shipments [fol. 1731½] shall be forwarded. All railroad demurrage, car service and terminal charges at destination shall be settled for and borne by purchaser.

III

Sacks bearing our brand, or trade mark, properly bundled, and so marked as to insure complete identification, received by us in serviceable condition at our Mill will be purchased from the original purchaser at 15 cents each, if purchased of us containing "Vulcanite" Portland Cement, which cement was used in the work described on front of this contract, provided these sacks are shipped within ten days after being emptied, freight prepaid, subject to our inspection and count. We do not purchase sacks bearing brands other than our own or sacks that have been wet or otherwise useless. Rejected sacks, or sacks bearing other brands, may be destroyed or otherwise disposed of by this company without liability, unless they are removed by original purchaser within ten days after notice of rejection.

IV

If at any time purchaser's financial responsibility be or becomes, in our opinion, impaired or unsatisfactory, we reserve the right to require payment in advance or satisfactory assurance that bills will be promptly paid when due.

[fol. 1732] V

The purchaser shall give us shipping instructions in writing a reasonable time before shipments are to be made. All orders and contracts are accepted subject to contingencies of manufacturing and shipping and other causes beyond our control; we will not be responsible for delays in transit, delays in manufacturing or in shipping, caused by strikes, differences with workmen, accidents at our plant, inability to procure cars, coal or other material, or for orders, rules or regulations received by us from the United States Government which would prevent our carrying out all the terms and conditions of this contract. Should any such contingencies or other contingencies arise at any time during the period covered by this contract, whereby production or shipments are curtailed or delayed, we reserve the right to prorate our shipments of Cement to all purchasers of record at such time.

VI

"Vulcanite" Portland Cement to be furnished hereunder is when shipped to conform in every respect to specifications of the United States Government, or Standard Specifications for Portland Cement as adopted by the American Society for Testing Materials when tested by methods of testing recommended by the American Society [fol. 1732½] of Civil Engineers, but we cannot be responsible for improper use of Cement, therefore we will not guarantee finished work.

VII

Thirty days net; 5 cents per barrel discount for payment in full within 10 days from date of invoice. Payments to be made in cash or equivalent at our office, Philadelphia, U. S. A. Original paid freight bills to be sent us promptly for comparison.

[fol. 1733] GOVT. EX. No. 591

"The Standard by which all other makes are measured"

The Atlas Portland Cement Company

New York, Boston, Philadelphia, Birmingham, Dayton, St. Louis, Des Moines, Chicago

Specific Job Quotation No. —

We quote you on "Atlas" Portland Cement for shipment prior to —— — ——, $— per barrel in 4 cloth sacks; $— per barrel in 4 paper sacks; $— per barrel in bulk, all in car load lots, f. o. b. cars.

Description of Work: ——.

This quotation is intended to cover the full Portland Cement requirements of the work herein described, but not exceeding the estimated requirements of — barrels of "Atlas" Portland Cement.

Any shipments made on a contract accepted under this quotation, will be at the current destination price on "Atlas" Portland Cement on the date of shipment, if such price is below the destination price herein mentioned.

The above price includes a charge of — c. each for cloth sacks. [fol. 1733½] If at any time the cost of new cloth sacks to us shall be in excess of — c. each, the above price for deliveries thereafter shall, at our option, be increased from time to time, by a sum determined by us not exceeding such excess. Cloth sacks will be repurchased at the same price at which they are charged out.

If at any time we shall experience such difficulty in securing cloth sacks as, in our opinion, makes shipment in cloth sacks impracticable,

then upon 5 days' notice to you, we may (until such difficulty is removed) ship in paper sacks or at your option in bulk at the prices shown above. Paper sacks will not be repurchased by us.

Prices herein quoted are subject to any increase or decrease in transportation charges from those now in effect.

Terms of payment: On approved credit 30 days net or 10 cents per barrel discount for payment in full within 10 days from date of invoice, payment to be made to the office from which invoice is dated in funds payable in that city, provided there are no overdue accounts unpaid.

The terms, conditions, and limitations printed on the reverse of this quotation are made a part hereof as fully as if written here.

This quotation is for acceptance prior to —— —, ——.

We hope to be favored with your order.

Yours very truly, The Atlas Portland Cement Company, by —— ——.

[fol. 1734] Acceptance: Please enter my (our) order in accordance with this quotation, as I (we) have sold the cement for the work described. I (we) hereby accept the price and all the conditions of the above specified job quotation and agree, at your option, to execute promptly a contract therefor on your regular Specific Work Sales form, covering Portland Cement required to be used for the work described.

—— ——, Purchaser.

NOTE.—Quotation is made in duplicate; if accepted, please sign and return one copy and retain the other.

Terms, Conditions, and Limitations

Cloth Sacks: The Cement Company will purchase at the price charged on its invoices, only from the Party to whom the sale was made, and not from any Assignee or Trustee, empty cloth sacks bearing its brand and proper identification marks, purchased of the Cement Company, upon their receipt in serviceable condition at the Cement Company's mill if returned within ninety (90) days after their purchase freight prepaid, subject to the Cement Company's inspection and count. Cement Company does not purchase sacks bearing brands other than its own, or sacks that have been wet or are otherwise useless.

Freights: The Cement Company reserves the right to prescribe the route by which shipments shall be forwarded and to make shipments prepaid or collect at its option. In making delivered prices, the [fol. 1734½] Cement Company only guarantees cost at destination, and will not be responsible for shortage or damage occurring in transit.

General: The Purchaser shall not have the right to transfer or sublet this Agreement in whole or in part.

The Purchaser shall give the Cement Company shipping instructions in writing a reasonable time before shipments are to be made, and the Cement Company shall not be responsible for delays in manufacture or shipping cement, caused by Strikes, Accidents, Fires, Breakdowns, Failure of Mechinery, Embargoes, Car Shortage, Labor Scarcity, Labor Agitation, Failure to receive Coal from Mines from which the Cement Company secures its supplies of coal, Delays in Transportation, Acts of God, or other causes beyond its control. In any of such events the Cement Company may determine as nearly as practicable the pro rata share of cement of each of its customers after reserving the Cement Company's usual percentage of its shipments for its dealers' warehouse trade, and may limit and reduce shipments hereunder according to such pro rata share of the Purchaser. The Cement Company shall have the right to sell or agree to sell, from time to time, its cement under other agreements and orders, and in the event the Cement Company shall at any time for any cause whatsoever be unable to make and ship cement in accordance with its agreements and orders, the Cement Company may determine as nearly as practicable the pro rata share of the cement of each of its customers under its agreements and orders after reserving the Cement Company's usual percentage of its shipments for its dealers' warehouse trade, and may limit and reduce [fol. 1735] shipments hereunder according to such pro rata share of the Purchaser. The Cement Company shall not be obligated to make up any such limitation or reduction and its determination as to the necessity for pro rating and the prorata share of the purchaser shall be final.

The Purchaser shall, on or about the first day of each month, if requested by and on forms furnished by the Cement Company, correctly inform the Cement Company of the amount of Atlas Portland Cement delivered for or used on the work herein described during the preceding month or months since date hereof.

In case, while this contract is unfulfilled by either party, there shall be another contract between the same parties, for the sale and delivery of cement by the Cement Company, and under such other contract the Purchaser shall be in default, the Cement Company shall be under no obligation to make shipments under this contract while such default exists, and for such default the Cement Company shall have the right to demand cash payments hereunder or to cancel this contract without affecting the obligation of the Purchaser on any unpaid accounts. "Atlas" Portland Cement to be furnished hereunder is when shipped to conform in every respect to specifications of United States Government, or Standard Specifications for Portland Cement as adopted by the American Society for Testing Materials when tested by methods of testing recommended by the American Society of Civil Engineers, but the Cement Company cannot be responsible for improper use of cement, therefore Cement Company will not guarantee finished work.

The Allentown Portland Cement Co.

Allentown, Pennsylvania

Special Quotation for Specific Work

Allentown Portland Cement

We quote you, subject to all the terms, conditions and limitations on both sides hereof, on Allentown Portland Cement for work herein described; and for shipment according to contract requirements, between date hereof and — not to exceed, however, — bbls. in any one month:

Allentown Portland Cement in 4 Cloth Sacks at — per Standard Bbl.; in 4 Paper Bags at — per Standard Bbl.; in carloads, f. o. b. cars, Evansville, Berks Co., Pa., freight allowed to: ——.

This price includes the package in which the Cement is to be shipped.

This quotation is intended to cover the entire and actual quantity (estimated at — barrels) of Portland Cement which buyer shall be required to, and in fact shall, furnish or use in the following described work, but not in any event to exceed the estimated quantity above stated by more than 10%.

[fol. 1736] Description of Work: ——.

The price named is subject to change in the price of bags, as may become the custom of the trade. The change, however, affecting this quotation will not affect the net price as we will repurchase bags at the same price as we charge for them.

This quotation, if to a dealer for resale of Cement for use in the work described, is subject to the execution of a written contract between such dealer and his customer in conformity herewith on our regular form furnished for dealers' use, the original or a duplicate thereof to be filed with us.

This quotation is for acceptance within 5 days of formal award of contract for work described, but is void if not accepted within 15 days from date hereof. We send you this proposition in duplicate; upon our receiving one of the copies signed by you it shall constitute a contract between us.

All contracts must be approved by Manager of Sales or Official of the Company.

Yours very truly, The Allentown Portland Cement Co.

Approved: —— ——, Manager of Sales.

Accepted this — day of ——, ——, at ——. (Signature:) —— ——, Purchaser.

[fol. 1736½] Terms, Conditions, and Limitations

Payment: 30 days net; 5 cents per barrel discount for Payment in Full within 10 days from date of invoice. Payments to be made in cash or equivalent at our Office, Allentown, Pa. Original paid freight bills to be sent us promptly for credit.

If purchaser fails to comply with terms of payment or with any of the other terms of sale, we reserve the right to cancel unfilled portion of any contract or order, purchaser remaining liable for all unpaid accounts.

Orders are subject to approved credit, and if at any time purchaser's financial responsibility be or become, in our opinion, impaired or unsatisfactory, we reserve the right to require payment in advance or satisfactory assurance that bills will be promptly paid when due.

In making delivered prices we guarantee only cost at destination, and we will not be responsible for shortage or damage occurring in transit. Our responsibility ceases when shipments are delivered to Railroad Company on cars at our Mill. Railroad Company's bills of lading shall be conclusive as to quantity and good condition of both Cement and packages when loaded on cars.

We will pay to original purchaser — cents each for empty cloth cement sacks purchased of us, bearing our brand, on their receipt in serviceable condition at our Mill, if returned within 90 days after their purchase, freight prepaid, subject to our inspection and count. [fol. 1737] We do not purchase sacks bearing brands other than our own, or sacks that have been wet or are otherwise useless.

Unless otherwise agreed, the quotation on reverse side is limited to One Carload of Cement and applies only on shipments billed to and unloaded at point of delivery specified.

Orders entered for shipment on a specific date will, at our option, be shipped on that date unless sooner ordered out by purchaser.

We reserve the right to prescribe the route by which shipments shall be forwarded. All railroad demurrage, car service and terminal charges at destination shall be settled for and borne by purchaser.

The purchaser shall give us shipping instructions in writing a reasonable time before shipments are to be made. All orders and contracts are accepted subject to contingencies of manufacturing and shipping, and other causes beyond our control and *and* we will not be responsible for delays in transit. Should any contingency at any time arise, whereby production or shipments are curtailed or delayed, we reserve the right to prorate our shipments of Cement to all purchasers of record at such time.

Allentown Portland Cement to be furnished hereunder is, when shipped, to conform in every respect to specifications of United States Government, or Standard Specifications for Portland Cement as adopted by the American Society for Testing Materials, when tested by methods of testing recommended by the American Society [fol. 1737½] of Civil Engineers, but we cannot be responsible for

improper use of Cement, therefore we will not guarantee finished work.

Prices herein are subject to any increase or decrease in freight rates from those now in effect.

These prices will be advanced to the extent of any additional war taxes, on transportation charges on cement, imposed by the Government.

The Allentown Portland Cement Company.

[fol. 1738] Govt. Ex. No. 593

Alpha Portland Cement Co.

Office: Easton, Pa.; Chicago, Ill.

Easton, Pa.

We quote you subject to all the terms, conditions and limitations on both sides hereof on Alpha Portland Cement for work herein described; and for shipment according to contract requirements.

In carload lots, f. o. b. cars.

In cloth sacks $— per standard barrel (376 lbs. net).

If shipped in paper sacks twenty-five (25c.) cents per barrel less than cloth price.

If shipped in bulk forty-five (45c.) cents per barrel less than cloth price.

The price of cement stated herein is based on the transportation charges in effect at the present time and is subject to advance or reduction as the transportation charges may be advanced or reduced.

Contract made under this quotation will include the following provision: "Any decline in Cement Company's market price during the life of this agreement shall apply to shipments under this agreement made after date of reduction and during such period as the lower market price may be in effect."

[fol. 1738½] This quotation is intended to cover the actual quantity (estimated at — barrels) of Alpha Portland Cement for use in the following described work.

Description of Work: ——.

Terms of Payment: On approved credit, 10 cents per barrel off for cash in ten days from date of invoice, or 30 days net from date of invoice. If, during the performance of the work, the financial responsibility of the purchaser becomes impaired or unsatisfactory to the Alpha Portland Cement Company, cash payments with above discount must be made before shipment, or satisfactory security must be given by the purchaser.

This quotation shall not be binding upon this Company unless accepted in writing by the purchaser on or before —— —, ——.

Awaiting the favor of your acceptance, we remain,

Yours very truly, Alpha Portland Cement Company, by

—— ——.

Acceptance: I (we) hereby accept the price, terms and all conditions and limitations of the above special quotation and agree to execute promptly a contract therefor on your regular Memorandum of Agreement form, covering Portland Cement required and used for the work described.

Dated —— —, ——.

—— ——, Purchaser.

[fol. 1739] Terms, Conditions, and Limitations

If purchaser fails to comply with terms of payment or with any of the other terms of sale, we reserve the right to cancel unfilled portion of any contract or order, purchaser remaining liable for all unpaid accounts.

In making delivered prices we only guarantee cost at destination and we will not be responsible for shortage or damage occurring in transit; our responsibility ceases when shipments are delivered to Railroad Company on cars at our mill. Railroad Company's bills of lading shall be conclusive as to quantity and good condition of both cement and package when loaded in cars.

The prices herein quoted are the prices on cement. If shipped in cloth sacks, the cloth sacks containing the cement are not sold, but remain the property of the Cement Company and must not be sold or used other than as containers of cement manufactured by the Alpha Portland Cement Company. The purchaser agrees to return said sacks to the Cement Company within ninety (90) days of date of shipment of cement by the Cement Company. A rebate of ten (10c.) cents for each sack returned will be allowed by the Cement Company from the invoice price of the cement when the sacks are returned to the Cement Company in good condition, freight prepaid, subject to Cement Company's count and inspection. Cement Company will not accept for rebate sacks bearing brands other than its own or bags that have been wet or are other-
[fol. 1739½] wise worthless. Such sacks if received will be held at shipper's risk subject to his order for thirty days only. Should the Alpha Portland Cement Company change its cloth sack basis, the right is reserved to adjust the delivered price of the cement accordingly.

Shipments in paper bags will be made at purchaser's risk of breakage and resultant loss.

The quotation on reverse side is limited to the quantity and delivery stipulated and work described.

The Cement Company reserves the right to prescribe the routing by which the shipment shall be forwarded.

The purchaser shall give us shipping instructions in writing a reasonable time before shipments are to be made. We will not be responsible for delays in transit. All orders and contracts are accepted subject to government restrictions, strikes, including coal strikes in either the Anthracite or Bituminous coal regions, differences with employees, accidents to machinery, fire, flood, car

famine, or other contingencies beyond the control of either Buyer or Seller.

Alpha Portland Cement to be furnished hereunder is to conform in every respect to specifications of United States Government, or standard Specifications for Portland Cement as adopted by the American Society for Testing Materials when tested by methods of testing recommended by American Society of Civil Engineers, but we cannot be responsible for improper use of Cement, therefore we will not guarantee finished work.

[fol. 1740] GOVT. Ex. No. 594

Original

Quotation No. 299

Bath Portland Cement Co.

June 29th, 1918.

Messrs. Amos E. Stover, Palmyra, Pa.:

We quote you on Bath Portland Cement for shipment according to contract requirements, between date hereof and Oct. 1st, 1918, subject to all the terms, conditions and limitations on both sides hereof. It shall, however, be optional with us to ship a greater quantity than — bbls. within any one month.

Bath Portland Cement in 4 cloth sacks at $2.83 per standard bbl., including the sacks.

Bath Portland Cement in 4 paper bags, 30 cents per bbl. less, including the bags.

If Cement has to be tested and held in bins, a charge of 3 cents per bbl. will be made.

F. O. B. Suedeburg, Pa.

This quotation covers the entire and actual quantity, viz: 170 barrels of Portland Cement which buyer shall furnish or use in the following described work only. The quantity stated is more or less within 10 per cent.

[fol. 1740½] Description of Work: One bridge at Pine Grove Township. Owners' State Highway Commission. State of Pennsylvania.

This quotation is for acceptance within 5 days of formal award of contract for work described, but is void if not accepted within 5 days from date hereof.

The above price is based on the present freight rates. The buyer to pay any advance over present rates and to be given the benefit of any reduction. The buyer to pay any tax imposed by the U. S. Government on freight bills.

We send you this quotation in duplicate. If you decide to accept same, return to us one of the copies properly executed, together with

the second copy for our signature. We will then officially execute same and return it to you, which will constitute a contract between us.

Remarks: ——.

Bath Portland Cement Co. J. F. Twamley, 2nd Vice-Pres.

Accepted 1st day of July, 1918, at Palmyra, Pa. (Signature) Amos E. Stover.

This Quotation is subject to terms and conditions on both sides hereof.

[fol. 1741] Terms, Conditions, and Limitations

Terms: Upon approved credit, thirty days net; 5 cents per barrel discount for cash payment in full within 10 days from date of invoice. Payments to be made in cash or equivalent at our office, Newark, N. J. Original paid freight bills to be sent us promptly for credit.

If purchaser fails to comply with terms of payment or with any of the other terms of sale, we reserve the right to cancel unfilled portion of any contract or order without notice, purchaser remaining liable for all unpaid accounts.

If at any time purchaser's financial responsibility be or becomes, in our opinion, impaired or unsatisfactory, we reserve the right to require payments in advance or satisfactory assurance that bills will be promptly paid when due.

Loss or Damage: In making delivered prices we guarantee only cost at destination, and we will not be responsible for shortage or damage occurring in transit. Railroad company's bill of lading shall be conclusive as to quantity and good condition of both cement and packages when loaded on cars.

Sacks: We will pay to original purchaser 10 cents each for empty cloth cement sacks purchased of us, bearing our brand, on their [fol. 1741½] receipt in serviceable condition at our mill, if returned within 90 days after their purchase, freight prepaid, subject to our inspection and count. We do not purchase sacks bearing brands other than our own, or sacks that have been wet or are otherwise useless.

Rejected sacks may be destroyed or otherwise disposed of by this Company without liability unless they are removed by original purchaser within ten days after notice of rejection. Paper bags are not returnable. Shipments in paper bags are made at purchaser's risk of breakage and resultant loss of cement.

Quantity: The quotation on reverse side is limited to the quantity and delivery stipulated and work described.

Route and Terminal Charges: We reserve the right to prescribe the route by which shipments shall be forwarded. All railroad demurrage, car service and terminal charges at destination shall be settled for and borne by purchaser.

Freight Charges: Freight charges will be deducted from all invoices, and are to be paid by the purchaser at destination, excepting on shipments to prepaid points.

Strikes, etc.: The purchaser shall give us shipping instructions in writing a reasonable time before shipments are to be made. All orders and contracts are accepted subject to contingencies of manufacturing and shipping, and other causes beyond our control, and we [fol. 1742] will not be responsible for delays in transit. Should any contingency at any time arise, whereby production or shipments are curtailed or delayed, we reserve the right to prorate our shipments of Cement to all purchasers of record at such time.

Specifications: Bath Portland Cement is guaranteed to meet the requirements of the Standard Specifications for Portland Cement as adopted by the American Society for Testing Materials when tested by methods of testing recommended by the American Society of Civil Engineers, but we cannot be responsible for improper use of Cement, therefore, we will not guarantee finished work.

Bath Portland Cement Company.

[fol. 1742½] GOVT. EX. No. 595

Bath Portland Cement Co.

Works: Bath, Pa.; General Offices: Finance Building, Philadelphia

Terms of Payment: Thirty days net from date of invoice, or ten cents per barrel discount for cash in full within ten days from date of invoice. Orders accepted subject to approved credit. Payments to be made in cash or equivalent at our office, Philadelphia, Pa. If the financial responsibility of the buyer is or becoms impaird or unsatisfactory to us, security must be given by the buyer or cash payments with the above discount allowed must be made before shipment. If the buyer fails to comply with the terms of payment or with any of the other terms of sale, we reserve the right to cancel any unfilled portion of any contract or order without notice, the buyer remaining liable for all unpaid accounts.

Shortage or Damage: In making delivered prices we will not be responsible for shortage or damage occurring in transit. Our responsibility ceases when shipments are delivered to the railroad company in cars at our mill. The railroad company's bill of lading shall be [fol. 1743] conclusive as to quantity and good condition of both cement and packages when loaded on cars. We will not be responsible for breakage and resultant loss when shipments are made in paper sacks.

Freight Charges: When cement is sold at a delivered price freight charges will be deducted from all invoices, and are to be paid by the buyer at destination, excepting on shipments to prepaid points. This quotation is based on present freight rates: the buyer to have the benefit of any reduction and be liable for any advance in freight rates. We reserve the right to prescribe the routing by which shipments shall be forwarded. We are not responsible for delays in transit; railroad demurrage, car service and terminal charges at destination shall be settled for and borne by purchaser.

Sacks: We will pay the original purchaser ten cents each for empty cloth sacks purchased from us bearing our brand on their receipt in serviceable condition at our mill if returned within ninety days after their purchase; freight charges prepaid, subject to our count and inspection. Rejected sacks may be destroyed or otherwise disposed of by this Company without liability, unless they are removed by original purchaser within ten days after notice of rejection. There is no return value for paper sacks.

[fol. 1743½] Strikes: All orders and contracts are accepted subject to strikes, including coal strikes in either the anthracite or bituminous coal regions, differences with employees, accidents to machinery, fire, flood, car famine or other contingencies beyond the control of either ourselves or the buyer, and said causes shall, during their existence, excuse either party from the performance of an order or a contract, and operate as a proportionate rescission thereof, provided prompt notice shall be given by the party suffering from such disability to the other party in writing specifying the cause, otherwise this agreement shall remain in full force and effect.

Specifications: Bath Portland Cement to be furnished hereunder is to conform in every respect to specifications of the United States Government or Standard Specifications for Portland cement as adopted by the American Society for Testing Materials when tested by methods of testing recommended by the American Society of Civil Engineers, but we cannot be responsible for improper use of cement, therefore we will not guarantee finished work.

Specific Work Quotation

Saylor's Portland Cement

Coplay Cement Manufacturing Co.

Mills: Coplay, Lehigh County, Pa.

The First Portland Cement Manufactured in America

New York, March 17, 1919.

Windsor Cement Co., Hartford, Conn.

Gentlemen: We quote you subject to all the terms, conditions and limitations on both sides hereof on Saylor's Portland Cement for work herein described; and for shipment according to contract requirements.

In carload lots, f. o. b. cars at Hartford, Conn.

In cloth sacks $3.49 per standard barrel (376 lbs. net) including four (4) sacks.

If shipped in paper sacks seventy (70) cents per barrel less than cloth price.

If shipments are required from bins set aside for the storage of specially tested cement, an additional charge of three (3) cents per barrel will be made for storage service.

[fol. 1744½] Quantity: Approximately 32,000 barrels.

Description of work: New Filtration Plant.

Terms of Payment: On approved credit, 5 cents per barrel off for cash in ten days from date of invoice, or 30 days net from date of invoice. If, during the performance of the work, the financial responsibility of the purchaser becomes impaired or unsatisfactory to the Coplay Cement Manufacturing Company, cash payments with above discount must be made before shipment, or satisfactory security must be given by the purchaser.

This quotation is for acceptance within 5 days of formal award of contract for work described, but in any event is void if not accepted within 15 days from date hereof; it is further subject to the execution of our regular form of Contract.

Yours respectfully, Coplay Cement Manufacturing Company.
J. F. Twamley, General Sales Manager.

The price named herein is subject to change in the price of cloth bags. The change, however, will not affect the net price of cement, as we will repurchase cloth bags at the same price charged for them.

The price mentioned herein will be advanced to the extent of any [fol. 1745] additional war taxes on transportation charges on cement imposed by the U. S. Government.

☞Note change on reverse side hereof in price of cloth bags.

Terms, Conditions and Limitations

Payment: Thirty days net; 5 cents per barrel discount for Payment in Full within 10 days from date of invoice. Payments to be made in cash or equivalent at our office, Coplay, Pa., U. S. A. Original paid freight bills to be sent us promptly for credit.

—— ——, Purchaser.

(Note.—Two copies are enclosed. Please accept and return one and retain the other.)

[fol. 1747½] Terms, Conditions, and Limitations

Payment: 1. Ten Cents (10¢) per barrel discount for full payment in cash or equivalent at our office, Nazareth, Pa., within ten days from date of invoice, provided the purchaser has satisfied all past due prior indebtedness to us.

2. In cash or equivalent at our office, Nazareth, Pa., within 30 days from date of invoice less credits issued.

If purchaser fails to comply with terms of payment or with any of the other terms of sale, we reserve the right to cancel unfilled portion of any contract or order, purchaser remaining liable for all unpaid accounts.

Orders are subject to approved credit, and if at any time purchaser's financial responsibility be or becomes, in our opinion, im-

paired or unsatisfactory, we reserve the right to require payment in advance or satisfactory assurance that bills will be promptly paid when due.

Bags: We will pay to original purchaser 10 cents each for empty cloth cement bags purchased of us, bearing the brand of the Dexter Portland Cement Co., on their receipt in serviceable condition at the Mill, if returned within 90 days after their purchase, freight prepaid to Nazareth, Pa., subject to mill inspection and count. We do not purchase bags bearing other brands or bags that have been wet or are otherwise useless.

Rejected bags may be destroyed or otherwise disposed of by the Dexter Portland Cement Company without liability unless they are removed by original purchaser within ten days after notice of rejection.

Paper bags and wooden barrels are not returnable. Shipments in paper bags are made at purchaser's risk of breakage and resultant loss of cement.

[fol. 1748] Quantity and Routing: The quotation on reverse side is limited to the quantity and delivery stipulated and work described.

Orders entered for shipment on a specific date will, at our option, be shipped on that date unless sooner ordered out by purchaser.

We reserve the right to prescribe the route by which shipments shall be forwarded.

All railroad demurrage, car service and terminal charges at destination shall be settled for and borne by purchaser.

Shipping Instructions: The purchaser shall give us shipping instructions in writing a reasonable time before shipments are to be made.

Strikes, etc: All orders and contracts are accepted subject to contingencies of manufacturing and shipping, and other causes beyond our control, and we will not be responsible for delays in transit.

Specifications: "Dexter" Portland Cement to be furnished hereunder is, when shipped, to conform in every respect to specifications of the United States Government, or Standard Specifications for Portland Cement as adopted by the American Society for Testing Materials when tested by methods of testing recommended by the American Society of Civil Engineers, but we cannot be responsible for improper use of Cement, therefore we will not guarantee finished work.

Guarantee: A test sheet signed by our chemist will be sent to each purchaser as evidence of our compliance with the above guarantee.

Dexter Portland Cement Company.

[fol. 1748½] GOVT. EX. No. 598

Edison Portland Cement Co.

79 Milk Street, Boston, Mass.

January Eighteenth, Nineteen Hundred Nineteen.

The City Coal Company, 1095 Main St., Hartford, Conn.

Attention of Mr. G. W. Kierstead, Treas.

GENTLEMEN: For your information would advise that bids are to close January 27th for the Branch House, owner, Libby-McNeil & Libby, your City, same to be reinforced concrete three story,—112 x 48—, and we are therefore pleased to quote you on 2,000 barrels of Edison Cement, as follows:

Prices: $3.49 per bbl. f. o. b. Hartford, Conn., Shipment in cloth; 2.79 per bbl. f. o. b. Hartford, Conn., Shipment in paper.

If shipments are required from bins set aside for the storage of especially tested cement an additional charge of three cents per barrel will be made for storage service.

[fol. 1749] Shipments: As advised prior to April 1st, 1919.

Acceptance: Within fifteen days from date hereof.

Prices shown on this quotation are subject to any increase or decrease that may become effective in current freight rates before shipment is made.

For other terms and conditions of this quotation see reverse side.

The Ellison Construction Company, James H. Grozier and Wilbur A. Wilcox all of your City are figuring this work, and we certainly trust that whoever is successful in securing the contract, that you will be fortunate enough to furnish them Edison Cement for same.

Thanking you in advance for the attention we know you will give this matter, and asking your advice should any information on this project come to you, also awaiting the award of contract with much interest, we are,

Yours very truly, Edison Portland Cement Company. A. C. Bruff, New England Sales Manager. ACB/K.

Terms: On approved credit, net thirty days, or five cents (5c.) per barrel discount for payment in full including sacks within ten days from date of invoice.

Credit. If purchaser fails to comply with terms of payment or with any of the other terms of sale, we reserve the right to cancel unfilled portion of any contract or order, purchaser remaining liable for all [fol. 1749½] unpaid accounts. Orders are approvable as to credit at Home Office of the Cement Company, New Village, N. J., and if at any time the purchaser's financial responsibility shall be deemed unsatisfactory to the Cement Company, it may require approved security or demand cash payment, and pending same may withhold shipment, and if within a reasonable time, in the judgment of the

Cement Company, such cash or approved security has not been furnished, the Cement Company may declare the order or contract cancelled.

Delivery: In making delivered prices we only guarantee cost at destination and we will not be responsible for shortage or damage occurring in transit, our responsibility ceases when shipments are delivered to Railroad Company on cars at our mill. Railroad Company's bills of lading shall be conclusive as to quantity and good condition of both cement and package when loaded in cars.

Sacks: Price of cloth sacks is included in invoice, which must be paid without deduction. We will pay to orginal purchaser ten cents each for empty cloth cement sacks, bearing "Edison" brand, on their receipt in serviceable condition at our mill, New Village, N. J., freight prepaid, subject to our inspection and count. We do not purchase sacks bearing brands other than our own or sacks that have been wet or otherwise useless. Rejected or Foreign sacks will be held at owner's risk, subject to his order, for thirty days only. Shipments in paper bags will be made at purchaser's risk of breakage and resultant loss.

[fol. 1750] Claims for loss or damage will not be considered, unless supported by seal record and railroad agent's acknowledgment on freight bill. Freight over-charge claims must be accompanied by original receipted freight bill.

Date of Shipment: Orders entered for shipment on a specific date will at our option be shipped on that date unless sooner ordered out by purchaser. However, purchaser shall give the Cement Company shipping instructions a reasonable time before shipments are to be made and the Cement Company shall not be responsible for delays in manufacturing or shipping cement caused by strikes, differences with workmen, accidents at its works, inability to secure cars, coal or other material or other contingencies not under its control, nor for any delays in transportation.

Specifications: The cement is to conform to standard specifications for Portland cement adopted August 16, 1909, by the American Society for Testing Materials, with methods of testing recommended January 17, 1912, by the American Society of Civil Engineers; or to U. S. Government Specifications for Portland cement as set forth in Circular No. 33 of the Bureau of Standards.

All agreements contingent upon strikes, accidents or other causes beyond our control.

Giant Portland Cement Company

Main Office: 603-610 Pennsylvania Building, Philadelphia, Pa.

Special Quotation for Specific Work

May 27, 1919.

E. M. Rodrock Company, Paterson, N. J.

DEAR SIR: We quote you, subject to all the terms, conditions and limitations on both sides hereof, on "Giant" Portland Cement for work herein described; and for shipment according to contract requirements, between date hereof and December 31st 1919, not to exceed, however, — bbls. in any one month: "Giant" Portland Cement in 4 cloth sacks, 2.72, 4 paper sacks, — per Standard Bbl. in carloads, f. o. b. cars. Pequannock, N. J.

This price includes the sacks in which the Cement is to be shipped. [fol. 1751] This quotation is intended to cover the entire and actual quantity (estimated at 10,000 barrels) of Portland Cement which buyer shall be required to, and in fact shall, furnish or use in the following described work, but not in any event to exceed 110% of the estimated quantity above stated.

Description of Work: State Road work—Route No. 8 between Pequannock and Butler.

Any shipments made in 1919 on a contract placed under this quotation will be at the current price on Giant Portland Cement if such price is below the price herein mentioned.

Price as noted is based upon present rate of freight and is subject to any advance over present rate from our mills to point of delivery specified above. Also to any additional tax that may be imposed by the Government.

If shipments are required from bins set aside for the storage of specially tested cement, an additional charge of three cents (3¢) per barrel will be made for storage service.

This quotation is for acceptance within 5 days from this date, but is void if not accepted within 15 days from date hereof, and is subject to the execution of our regular form Specific Work Sales Contract.

Yours respectfully, Giant Portland Cement Company. R. E. Griffith, Vice-President. N.

[fol. 1751½] Terms, Conditions, and Limitations

Payment: 30 days net; 5 cents per barrel discount for payment in full, within 10 days from date of invoice. Payments to be made in cash or equivalent at our office, Philadelphia, Pa. Original paid freight bills to be sent us promptly for credit.

If purchaser fails to comply with terms of payment or with any of the other terms of sale, we reserve the right to cancel unfilled portion of any contract or order, purchaser remaining liable for all unpaid accounts.

If at any time purchaser's financial responsibility be or become impaired or unsatisfactory, we reserve the right to require payment

in advance or satisfactory assurance that bills will be promptly paid when due.

In making delivered prices we only guarantee cost at destination, and we will not be responsible for shortage or damage occuring in transit. Our responsibility ceases when shipments are delivered to Railroad Company on cars at our Mill. Railroad Company's bills of lading shall be conclusive as to quantity and good condition of both cement and packages when loaded on cars.

We will pay to original purchaser 15¢ each for empty cloth cement sacks purchased of us, bearing our brand, on their receipt in serviceable condition at our Mill, Egypt (Lehigh County, Pa.), via Lehigh Valley Railroad and Ironton Railroad, freight prepaid, if returned within 90 days after their purchase, subject to our inspection and count. We do not purchase sacks bearing brands other than our own, or sacks that have been wet or are otherwise useless.

[fol. 1752] The quotation on reverse side is limited to the quantity and delivery stipulated and work described.

Orders entered for shipment on a specific date will, at our option, be shipped on that date unless sooner ordered out by purchaser.

We reserve the right to prescribe the route by which shipments shall be forwarded. All railroad demurrage, car service and terminal charges at destination shall be settled for and borne by purchaser.

The purchaser shall give us shipping instructions in writing a reasonable time before shipments are to be made. All deliveries are subject to unavoidable delays, whether caused by lack of transportation, strikes at works on the railroads or in the coal regions, accidents, casualties or any cause beyond our control. Any such cause shall, during its continuance, excuse performance on our part, and shall operate as a proportionate rescission of this agreement, unless otherwise expressly agreed; provided that prompt notice be given to the buyer, of the fact and cause of delay.

"Giant" Portland Cement to be furnished hereunder is, when shipped, to conform in every respect to specifications of United States Government, or Standard Specifications for Portland Cement as adopted by the American Society for Testing Materials when tested by methods of testing recommended by the American Society of Civil Engineers, but we cannot be responsible for improper use of Cement, therefore we will not guarantee finished work.

Giant Portland Cement Company.

[fol. 1752½] Govt. Ex. No. 600

Hercules Cement Corporation

Philadelphia

Quotation No. —

Gentlemen: We quote you on — Barrels Hercules Portland Cement, for the requirements of the work herein described, subject to

all of the terms set forth below and in the contract form printed on the reverse side hereof, $— per standard barrel, including package, to be packed in —, F. O. B., —.

Description of Work: "Any shipments made during 1922 on a contract placed under this quotation will be at the current destination price on Hercules Portland cement on the date of shipment, if such price is below the destination price herein mentioned."

Shipment between this date and —— — ——, not more than — barrels during any 30-day period.

This quotation is for acceptance prior to —— — ——.

Hoping that we may be favored with your order, we remain,

Yours very truly, Hercules Cement Corporation, by —— ——.

[fol. 1753] Acceptance: I (we) hereby accept the price and all the conditions of the above quotation and agree, at your option, to execute promptly the contract printed on the reverse side hereof, after inserting in the blanks thereof the above terms as to place and time of delivery, description of work, quantity, price and package.

—— ——, Purchaser.

—— —, 191-.

(Note.)—Quotation is made in duplicate and if accepted please sign and return one copy.

Hercules Cement Corporation, hereinafter called Seller, hereby agrees to sell and —— ——, hereinafter called Purchaser, agrees to purchase Hercules Portland cement on the following terms and conditions:

Place of Delivery, F. O. B.: ——.

Time of Delivery: ——.

Seller shall not be obliged to ship hereunder more than — bbls. during any one calendar month or during any 30-day period.

Seller shall not be liable for delays in manufacture or shipping, caused by strikes, scarcity of labor, accident to plant or machinery, inability to secure cars, coal or material, fire, flood, warfare, acts of God, or other causes not under Seller's control; neither shall Seller be liable for delays in transportation.

[fol. 1753½] Description of Work: Purchaser hereby agrees that all of the cement purchased hereunder shall be used in the following described work, to wit: ——, and that no portion hereof will be resold by the Purchaser for use on any other work, or used for any purpose or for any work other than above described.

Quantity: ——.

Additional Quantity: In case the quantity herein specified proves insufficient for the needs of the Purchaser for Portland Cement within the time limit of delivery herein on the above-described work, Purchaser agrees to purchase and Seller agrees to sell a reasonable additional quantity of Hercules Cement at the same price and on same terms and conditions as herein specified, to meet the said

reasonable additional needs of Purchaser for said work within said time limit.

Price: — per standard barrel including package, in carload lots, to be packed in —.

Price includes freight at present rates, and will be increased to cover any advance in freight rates, and any additional Government tax on freight, at any time during the life of this contract. Purchaser shall pay all freight charges for account of Seller.

Terms of Payment: Net cash in 30 days or 10c per bbl. discount for payment in full within 10 days from date of invoice, provided all then prior existing indebtedness shall have been satisfied. Sacks must be paid for at same time as cement.

If at any time the financial responsibility of Purchaser becomes [fol. 1754] impaired or unsatisfactory to Seller, the latter reserves the right to require payments in advance or satisfactory security or guarantee that invoices will be promptly paid when due.

Shipping Instructions: Purchaser shall give to Seller shipping instructions in writing a reasonable time in each instance before shipments are to be made.

Routing and Terminal Charges: Seller shall have the right to direct the route by which all shipments hereunder shall be forwarded. All demurrage, car service and terminal charges imposed at destination shall be settled for and borne by Purchaser. Claims for loss or damage will not be considered unless presented within 60 days from date of shipment, supported by seal record and railroad agent's acknowledgment thereof on original paid freight bill. Freight over-charge claims must be supported by original paid freight bill.

Sacks: Seller will re-purchase from the Purchaser at 10c each the empty cloth sacks bearing the Hercules brand which are received by it in good condition, freight prepaid, at its works at Hercules, Penna., within 90 days from date of shipment of cement.

Specifications: The Hercules Cement to be shipped hereunder is to conform in every respect to "Standard Specifications and Tests for Portland Cement" C9-17 of the American Society for Testing Materials.

Assignment of Contract: This contract shall not be assigned by Purchaser except with written prior consent of the Seller.

[fols. 1754½ & 1755] The seller reserves the right to increase the repurchase price of its sacks and upon notice to this effect the price mentioned above shall be advanced proportionately per barrel on all deliveries thereafter.

If Purchaser at any time fails to comply with any of the terms or conditions of this contract, Seller reserves the right to cancel the then unfilled portion of this and/or other then existing contracts (and orders) between the parties, Purchaser remaining liable for all then unpaid accounts.

Hercules Cement Corporation, by —— ——, Sales Manager

Approved —— —, ——. (Purchaser's signature:) —— ——.

Executed by the parties hereto, this — day of ——, 191-.

The Lawrence Cement Company

Business Established 1832

Selling Agents for Dragon Portland Cement

In Use Since 1889

Sales Office: No. 1 Broadway, New York

Frank H. Smith, Sales Manager

Nov. 15, 1919.

Windsor Cement Company, Hartford, Conn.

Gentlemen: The fulfillment of any agreement herein expressed must be contingent upon strikes, accidents, delays of carriers, and other delays beyond our control; and quotations not limited by date of option, may be Revised by us without notice.

Replying to your letter of Nov. 14th, we take pleasure in quoting you on "Dragon" Portland Cement for work of the Aberthaw Conts. Co. $2.94 per barrel, in cotton sacks, f. o. b. cars Elmwood, Conn. [fol. 1756] This quotation is subject to 5c. per barrel discount for cash in 10 days or net 30 days.

This quotation is based on the present railroad freight rates and war taxes on transportation charges, and the buyer is to have the benefit of any reduction and be liable for any advance in these rates.

The price named herein includes a charge of fifteen cents each for cotton sacks. We will repurchase serviceable cotton sacks of our brand from the original purchaser at the price charged, when returned to our mill, freight prepaid, subject to our count and inspection.

Unless withdrawn by us, this quotation must be accepted by you within fifteen days. Upon receipt of your acceptance we will draw up a contract effective and binding only when signed by you and one of our officers, or the Sales Manager.

Soliciting the favor of your acceptance, we are,

Very truly yours, Frank H. Smith, Sales Manager.

[fol. 1756½] Govt. Ex. No. 603

Lehigh Portland Cement Co.

6 Beacon Street, Boston, Mass.

Nov. 24, 1920.

Messers. Manchester & Hudson Co., Providence, R. I.

Gentlemen: We quote you on Lehigh Portland Cement for the requirements of the work herein described, for delivery in carload

lots, F. O. B. cars Providence, R. I., $4.32 per barrel in cotton, including sacks; $3.62 per barrel in paper, including sacks.

If shipments are required from bins set aside for the storage of specially tested cement, an additional charge of three cents (3c.) per barrel will be made for storage service.

Work: Providence-Biltmore Hotel, Thompson-Starrett Co., Contractors.

Quantity: To be named on acceptance of quotation.

Shipments: During life of work, prior to December 31st, 1921.

Terms: Ten (10) cents per barrel discount for full payment within ten days from date of invoice; thirty days net.

[fol. 1757] Acceptance: This quotation is for your acceptance within five (5) days from date hereof.

Yours respectfully, Lehigh Portland Cement Company. J. A. Gray, District Sales Manager. B.

The prices mentioned in this quotation are subject to future fluctuations in prices quoted by the Cement Company, but not to exceed prices named herein except by reason of an advance in freight rates; and if during the life of the contract, Cement Company increases or decreases the charge and repurchase price of cloth sacks, it is understood that prices named herein will be increased or decreased accordingly.

For other clauses which are a part of this quotation, see other side.

If, at any time, the financial responsibility of Purchaser becomes impaired or unsatisfactory to the Cement Company it reserves the right to require payments in advance, or satisfactory security or guarantee that invoices will be promptly paid when due. If Purchaser fails to comply with terms of payment, the Cement Company reserves the right to cancel unfilled portion of any contract or order. Purchaser remaining liable for all unpaid accounts.

The Cement Company shall not be responsible for delays in manufacture or shipping, due to strikes, differences with employees, [fol. 1757½] scarcity of labor, accident, inability to secure cars, coal or material, fire, flood, warfare or other causes not under its control nor for any delay in transportation.

Sacks must be paid for at the same time as cement.

If cement is shipped in cloth sacks, the Cement Company will repurchase from the original Purchaser, at 25¢ each, the empty cloth sacks bearing the "Lehigh" brand, which are received by it in good condition, freight prepaid at its works at West Coplay, Pennsylvania, New Castle, Pennsylvania, within ninety (90) days from date of shipment of cement. Claims for loss or damage will not be considered unless supported by seal record and railroad agent's acknowledgement on freight bill. Freight over-charge claims must be accompanied by original receipted freight bill.

Specifications: The cement delivered under this contract is to conform to standard specifications for Portland Cement adopted August 16, 1909, by the American Society for Testing Materials with methods of testing recommended January 17, 1912, as amended by the American Society of Civil Engineers; or to U. S. Government specifications

for Portland Cement, as set forth in Circular of the Bureau of Standards No. 33.

[fol. 1758] Govt. Ex. No. 604

Specific Work Quotation

Phœnix Portland Cement Company

Real Estate Trust Building, Philadelphia, Pa.

Works: Nazareth, Pa.

Charles H. Cox, General Sales Manager:

We quote you on the full Portland Cement requirements of the following described work, estimated at — barrels of "Phœnix" Portland Cement.

It is understood that under no circumstances shall the Cement Company be obligated to ship hereon more than — barrels during any thirty (30) consecutive days nor to make any shipments on this contract subsequent to

Price: Phœnix Portland Cement in 4 cloth sacks, at $— per standard bbl., including the sacks; Phœnix Portland Cement in 4 paper bags, at $— per standard bbl., including the bag; Phœnix Portland Cement in bulk, at $— for 376 lbs., equivalent to one (1) barrel net weight. F. O. B.

[fol. 1758½] Description of Work: ——.

Terms of Payment: Thirty days net or ten (10) cents per barrel discount for payment in full within ten days from date of invoice.

This quotation is void unless accepted within — days from date.

Acceptance of this quotation, in writing, will, if approved by this Company, cause us to send you a regular form contract for your signature.

Remarks: ——.

Respectfully, Phœnix Portland Cement Company. —— ——, General Sales Manager.

For other clauses which are part of this quotation see other side.

Cloth Sacks: Sacks bearing the Phœnix brand or trade-mark, properly bundled and so marked as to insure complete identification, received by us in serviceable condition at our Mill, Nazareth, Pa., will be purchased from the original purchaser at Ten (10c.) cents each, if purchased of us containing "Phœnix" Portland Cement which cement was used in the work described, provided these sacks are shipped within ten days after being emptied, freight prepaid, subject to our inspection and count. Shipments in paper bags are made at purchaser's risk of breakage and resultant loss of Cement. If, at any [fol. 1759] time, the cost of new cloth sacks increases or decreases to such an extent that the Cement Company deems it advisable to change the price at which empty sacks will be purchased, the price

named in this contract will be advanced or reduced accordingly. If, at any time, the Cement Company shall experience such difficulty in securing cloth sacks, as in its opinion would make shipment in cloth sacks impracticable, then upon ten days' notice to the purchaser it may until such difficulty is removed ship either in paper sacks at a price of Fifteen cents (15c.) per barrel more than the net price in cloth sacks, or in bulk when practicable at the net price in cloth sacks. The net price in cloth sacks is a price after deducting the repurchase price of empty sacks.

In making delivery prices the Cement Company only guarantees cost at destination and will not be responsible for shortage or damage occurring in transit. All railroad demurrage, car service and terminal charges at destination shall be settled for and borne by the Purchaser. The Cement Company shall not be responsible for delays in manufacture or shipping cement caused by Strikes, Accidents, Fires, Breakdowns, Failure of Machinery, Embargoes, Car Shortage, Labor Scarcity, Labor Agitations, Strikes in coal mines from which the Cement Company secures its coal supply, Acts of God or any other causes beyond its control or for any delay in transportation whereby shipments are curtailed or entirely suspended.

"Phœnix" Portland Cement to be furnished hereunder is when shipped to conform in every respect to the specifications of the United [fol. 1759½] States Government as of this date or Standard Specifications for Portland Cement as adopted by the American Society for Testing Materials.

Freight Rates: The purchaser to have the benefit of any reduction and to be liable for any advance in freight rates. Any tax on freight bills is to be paid by the purchaser. In the event of prepayment of freight or other railroad or terminal charges the purchaser shall settle these in cash on presentation of invoice by the seller.

[fol. 1760] GOVT. EX. No. 605

Specific Job Quotation

Nazareth Cement Company

Main Office and Works: Nazareth, Pa., 1202 Wilson Bldg.

1270 Broadway, New York, N. Y.

In reply refer to file No. —.

Messrs. —— ——:

We quote you on Nazareth Portland Cement for shipment according to contract requirements, between date hereof and —— —, ——, subject to all the terms, conditions and limitations on both sides hereof. Quantity to be shipped not to exceed, however, — bbls., within any one month.

Nazareth Portland Cement in 4 cloth sacks at $— per standard bbl. (376 lbs. net); Nazareth Portland Cement in 4 paper bags, at $— per standard bbl., including the bags; Nazareth Portland Cement in bulk, 45¢ per barrel less than cloth price. F. O. B.

The prices on cement stated herein are based on the freight rates and transportation charges to destination named in effect at the [fol. 1760½] present time, and are subject to advance or reduction, as said charges may be advanced or reduced. These prices will be advanced to the extent of any additional War Taxes imposed by the Government on transportation charges or otherwise.

This quotation covers the entire and actual quantity (estimated at — barrels) of Portland Cement which buyer shall furnish or use in the following described work. The estimated quantity is more or less within 10 per cent.

Description of Work: ——.

This quotation is for acceptance within 5 days of formal award of contract for work described, but is void if not accepted within — days from date hereof.

We send you this proposition in duplicate; upon our receiving one of the copies accepted by you in writing, it shall constitute a contract between us.

Remarks: ——.

Respectfully yours, Nazareth Cement Co.

Accepted — day of ——, ——, at ——. (Signature:) —— ——.

For other clauses which are a part of this Quotation see other side.

[fol. 1761] Terms, Agreements, and Limitations

Thirty days net; 5 cents per barrel discount for payment in full within 10 days from date of invoice. Payment to be made in cash or equivalent at our office, Nazareth, Pa.

If purchaser fails to comply with terms of payment or with any of the other terms of sale, we reserve the right to cancel unfilled portion of any contract or order, purchaser remaining liable for all unpaid accounts.

Orders are subject to approved credit, and if at any time purchaser's financial responsibility be or becomes, in our opinion, impaired or unsatisfactory, we reserve the right to require payment in advance or satisfactory assurance that bills will be promptly paid when due.

Loss or Damage: In making delivered prices we only guarantee cost at destination, and we will not be responsible for shortage or damage occurring in transit. Railroad company's bill of lading shall be conclusive as to quantity and good condition of both cement and packages when loaded on cars.

Sacks: When shipped in cloth sacks, the sacks are not sold but remain the property of the Nazareth Cement Company as the prices

quoted herein are on cement only. These sacks must not be sold or used other than as containers of Nazareth Portland Cement. The [fol. 1761½] purchaser agrees to return said sacks to us, freight charges prepaid, within ninety (90) days from date of shipment of the cement by us. Upon their receipt at our mill and after our inspection and count a rebate of 10¢ for each serviceable sack will be allowed by us from the invoice price of the cement. We will not accept for rebate sacks bearing brand other than our own or sacks that have been wet or are otherwise useless. Such sacks may be destroyed or otherwise disposed of by this company without liability unless they are removed by the shipper within (30) days after notice of rejection. Paper bags are not returnable for rebate. Shipments in paper bags are made at purchaser's risk of breakage and resultant loss of cement.

Quantity: Unless otherwise agreed, the quotation on the reverse side is limited to the quantity named and applies only on shipments billed to and unloaded at point of delivery specified and for the work described.

Orders entered for shipment on a specific date will, at our option, be shipped on that date unless sooner ordered out by purchaser.

We reserve the right to prescribe the route by which shipments shall be forwarded. All railroad demurrage, car service and terminal charges at destination shall be settled for and borne by purchaser.

Strikes, etc.: The purchaser shall give us shipping instructions in writing a reasonable time before shipments are to be made. All orders and contracts are accepted subject to contingencies of manu- [fol. 1762] facturing and shipping, and other causes beyond our control, and we will not be responsible for delays in transit. Should any contingency at any time arise, whereby production or shipments are curtailed or delayed, we reserve the right to prorate our shipments of cement to all purchasers of record at such time.

Specifications: "Nazareth" Portland Cement to be furnished hereunder is, when shipped, to conform in every respect to specifications of the United States Government, or Standard Specifications for Portland Cement as adopted by the American Society for Testing Materials when tested by methods of testing recommended by the American Society of Civil Engineers, but we cannot be responsible for improper use of Cement, therefore we will not guarantee finished work.

Nazareth Cement Company.

[fol. 1762½] GOVT. EX. NO. 606

Penn-Allen Cement Company

Commonwealth Building, Allentown, Pa.

General Sales Office: Widener Building

Form in use after change of July 15, 1920

Philadelphia, Pa.

We quote you on Penn-Allen Portland Cement for the requirements of the work herein described, subject to all terms, conditions and limitations on both sides hereof, for delivery in carload lots f. o. b.

The price named in this quotation is subject to change in freight rates and any additional war tax on freight on cement that may be imposed by the Government.

In cloth sacks, $— per standard barrel, including four (4) sacks; in paper sacks, $— per standard barrel, including four (4) sacks.

Quantity: This quotation covers the entire and actual quantity (estimated at — barrels) of portland cement which buyer shall furnish or use solely in the following described work.

Work: ——.

Shipments: As required during progress of work to be completed [fol. 1763] prior to —— —, ——. If shipments are required from bins set aside for the storage of specially tested cement, an additional charge of three (3) cents per barrel will be made for storage service.

Acceptance: This quotation is for acceptance within five (5) days of formal award of contract for work described, but is void if not accepted within fifteen (15) days from date hereof. We send you this proposition in duplicate; upon our receiving one of the copies accepted by you in writing it shall constitute a contract between us, subject to the approval of Cement Company.

Yours respectfully, Penn-Allen Cement Company, —— ——,
General Sales Manager.

Accepted — day of ——, 19—, at ——. (Signature:) —— ——.

For other clauses which are part of this quotation see other side.

Terms: On approved credit, net thirty days, or ten cents per barrel discount for payment in full including sacks within ten days from date of invoice.

If purchaser fails to comply with terms of payment or with any of the other terms of sale, we reserve the right to cancel unfilled portions of any contract or order, purchaser remaining liable for all unpaid accounts.

[fol. 1763½] Orders are subject to approved credit, and if at any time the purchaser's financial responsibility be or becomes, in our opinion, impaired or unsatisfactory, we reserve the right to require

payment in advance, and pending the same may withhold shipment and if within a reasonable time in the judgment of this Company such cash or approved credit has not been furnished, we may declare the order or contract cancelled.

Loss or Damage: In making delivered prices we only guarantee cost at destination and will not be responsible for shortage or damage occurring in transit. Our responsibility ceases when shipments are delivered to Railroad Company on cars or at mill. Railroad Company's bill of lading shall be conclusive as to the quantity and good condition of both cement and packages when loaded in the cars.

Sacks: Price of cloth sacks is included in invoice, which must be paid without deduction. We will pay to the original purchaser 25 cents each for empty cloth sacks bearing our brand, on their receipt in serviceable condition at our mill, if returned within ninety days after their purchase, freight prepaid, subject to our inspection and count. We do not purchase sacks bearing brands other than our own or sacks that have been wet or are otherwise useless. Rejected or foreign sacks will be held at owner's risk, subject to his order, for thirty days only. Shipments in paper bags will be made at purchaser's risk of breakage and resultant loss.

[fols. 1764-1766] Routing: We reserve the right to prescribe routing by which the shipment shall be forwarded. All railroad demurrage, car service and terminal charges at destination shall be settled for by the purchaser.

Delays: The purchaser shall give us shipping instructions in writing a reasonable time before shipments are to be made. We will not be responsible for delays in transit. All orders and contracts are accepted subject to strikes including coal strikes in either the Anthracite or Bituminous coal regions, differences with employees, accidents to machinery, fire, flood, car famine or other contingencies beyond control of either buyer or seller. Therefore, in the event we shall at any time or for any cause be unable to deliver to our customers the entire quantity of cement required and called for by all our contracts then in force, the total of our production then available shall be applied pro rata on all of said contracts according to their requirements respectively and the amount delivered on each contract may be reduced accordingly and there shall be no liability on our part for the reduction so made.

Specifications: Penn-Allen portland cement is guaranteed to meet the requirements of the Standard Specifications for cement of the American Society for Testing Materials, serial designation C-9-17. We cannot be responsible for improper use of cement and therefore will not guarantee finished work.

[fol. 1766½] GOVT. EX. No. 608

Security Cement & Lime Company

Hagerstown, Baltimore, Washington

Specific Job Quotation

One Million Barrels Security Portland Cement Annual Capacity

Contract No. —

—— —, 192—.

Price: Subject to all the terms, conditions and limitations stated on both sides hereof, we, as Sellers, quote you, as Buyer, $— for Security Portland Cement, per standard barrel, in 4 cloth sacks bearing "Security" copyrighted trademark; $— for Security Portland Cement, per standard barrel, in 4 paper bags bearing "Security" copyrighted trademark; $— for Security Portland Cement, per standard barrel of 376 lbs., in bulk without any package or trademark.

Place of Delivery: F. O. B. cars, via ——.

Terms of Payment: Net cash thirty (30) days; or ten (10) cents per barrel discount for payment of invoice in full within ten (10) days from date of shipment, provided there are no overdue accounts [fol. 1767] unpaid; payments to be made in cash funds at Seller's office, Hagerstown, Md., without any deductions for package or other allowances unless Buyer has Seller's credit memorandum for same.

Time of Delivery: Shipments to be made in carloads, according to the reqquirements of the work, between —— —, ——, and —— —, ——, but not in excess of — barrels in any one month.

Freight: This price includes freight and taxes thereon at present rates, and will vary, up or down with any change in freight rates, taxes, or other charges affecting cost of transportation or delivery at any time during the life of this contract.

Quantity: This quotation covers the entire and actual quantity (estimated by the Buyer to be — barrels) of Portland Cement which Buyer shall furnish or use exclusively for the following described work:

Descrip'n of Work:——.

Time Limit: This quotation is for acceptance within five (5) days after formal award of contract for work described, but is void if not accepted within fifteen (15) days from date hereof.

Remarks: ——.

Acceptance: This quotation is submitted in duplicate; upon Seller receiving at its main office Hagerstown, Md., within time limits aforesaid, one of the duplicates with Buyer's acceptance in writing on the first page thereof, it shall constitute a contract between you, as Buyer, and us, as Sellers obligating us to sell, and you to buy, receive and pay for, the full estimated Portland Cement

[fol. 1767½] requirements of the above described work, provided you then have actual need for, or bona fide order or contract binding you to furnish, the same; and your said acceptance shall constitute notice to us that you have such need, order or contract, and also your acquiescence in all the other provisions set forth on the reverse side of this sheet, which are a part of this quotation and contract just as though above written.

Very truly yours, Security Cement & Lime Company, by —— ——, General Sales Manager.

Accepted — day of ——. (Signature:) —— ——, by —— ——.

For other clauses, which are part of this quotation, see other side.

Other Terms, Conditions, and Limitations Covering This Quotation and Contract

Time Option: Seller may, at its option, extend the period for delivery beyond date specified on first page hereof if work is not then completed.

Quantity and Orders: Buyer shall give Seller shipping instructions, in writing, at a reasonable time before shipments are to be made, and Seller shall not be responsible for delays in transit.

In addition to orders and contracts accepted hereunder, Seller [fol. 1768] may have accepted, and may from time to time continue to accept, other orders and contracts so as to furnish it with a market for its entire estimated output.

This contract and orders hereunder are subject to contingencies of manufacturing and shipping, including strikes, lockouts, labor disputes (whether at Seller's mills or at the mills or mines of persons or corporations who are furnishing Seller with materials necessary in the manufacture of cement), delays or deficiency in transportation facilities, floods, fires, warfare, acts of public enemy, governmental restrictions, inability to secure sufficient labor, scarcity of coal, packages, or other materials, and any cause or causes beyond the control of either Buyer or Seller, and said cause or causes shall during their existence excuse either party from the performance of this contract and shall operate as a proportionate rescission thereof. Should production or shipments be curtailed or delayed at any time, due to such contingencies or causes, Sellers reserve the right to prorate shipments to all purchasers of record at such time on the basis of tonnage available, or which it may have on hand or produce, and the amount deliverable to each may be reduced accordingly, and there shall be no liability on Seller's part for the reduction so made. Seller may, at its option, supply said cement requirements from other sources, but shall not be obligated to do so.

The quotation on the reverse side hereof is limited to the quantity and deliveries stipulated for the work described and if it becomes a contract by acceptance by Buyer, Seller may cancel this contract [1768½] or any unfilled portion thereof by written notice to Buyer in case any cement shipped hereunder shall be used in any other

work or for any other purpose, or when said work is completed, or in case of any misstatement of fact relative thereto by Buyer to Seller influencing the execution of this contract. Such cancellation shall in no wise release Buyer from unpaid accounts or from liability to Seller at the contract price for cement delivered prior to such cancellation.

Routing: Seller reserves the right, at its option, to change and direct the route via which shipments hereunder shall be forwarded, and to make shipments prepaid or collect.

Loss or Damage: In making a delivered price at destination, Seller only guarantees cost to Buyer at destination and will not be responsible for shortage of, or damage to, either cement or packages occurring in transit.

Seller's invoiced quantities supported by railroad company's bill of lading shall be the basis for settlement by Buyer and conclusive as to the quantity and good condition of cement and package when loaded on cars at Seller's plant.

All railroad demurrage, car service and other terminal charges imposed at destination shall be borne and paid for by Buyer.

While assuming no responsibility for loss or damage after delivery of cement to carrier f. o. b. cars Seller's plant, Seller agrees to assist Buyer, so far as is reasonable, in securing payment from the transportation companies of all proper claims for such loss or damage.

[fol. 1769] Claims: All claims of either of the parties hereto against the other in any manner growing out of his contract shall be made in writing and filed by the party aggrieved with the other party hereto within ten (10) days after acquiring the knowledge upon which the claim is based, and, in any event, within thirty (30) days after the final date fixed for delivery of cement hereunder, and failure to so file said claim within said time limits shall be regarded as a complete waiver and release thereof.

Package: If the cement is shipped in cloth sacks, the cloth sacks are not sold to Buyer, but remain the property of Seller and must not be sold or used other than as containers of cement manufactured by Seller. Buyer agrees to return said sacks to Seller within ninety (90) days from date of shipment of the cement by Seller. An allowance to Buyer only of twenty-five (25) cents for each good sack will be made by Seller when returned in good condition, freight prepaid, to the mill of Seller, at Security, Md., subject to Seller's count and inspection. No allowance will be made for useless sacks or sacks which have been wet. Should any sacks bearing other than Security brand be received by Seller from Buyer, same will be held by Seller, at Buyer's risk and subject to his order, for thirty (30) days only after notice to Buyer from Seller of receipt of the same, after which time they may be destroyed or otherwise disposed of by Seller without liability.

The price herein named for cement in cloth sacks is based on a cloth sack basis of twenty-five (25) cents. Should Seller find it necessary in its general business to change its cloth sack basis, the

[fol. 1769½] right is reserved to adjust the delivered price of the cement accordingly, and the allowance for each of these sacks returned, as aforesaid, will be increased or decreased in accordance with said change in cloth sack basis.

The price herein named for cement in paper bags is based on a paper bag basis of thirty (30) cents per barrel. Should Seller during the life of this contract find it necessary in its general business to change the paper bag basis, the right is reserved to adjust the delivered price of the cement accordingly.

Paper bags are not returnable, and shipments therein are made at Buyer's risk of breakage and resultant loss of cement.

Specifications: The cement as shipped hereunder is to conform in all respects to the "Standard Specifications and Tests for Portland Cement" as adopted by the American Society for Testing Materials, September 1, 1916.

Seller is not responsible for the use of cement, nor workmanship therewith, and does not guarantee the resultant work.

Financial Credit: Terms of payment are of the essence of this contract.

If Buyer fails to comply with terms of payment, or with any of the other terms of sale, Seller reserves the right to cancel unfilled portion of this contract, Buyer remaining liable for all unpaid accounts.

If at any time Buyer's financial responsibility be, or become, in [fol. 1770] opinion of Seller, impaired or unsatisfactory, Seller reserves the right to require payment in advance, or satisfactory assurance that bills will be promptly paid when due. If such assurance is not forthcoming within a reasonable time, Seller reserves the right to cancel this contract.

Assignment of Contract: This quotation and contract shall be binding upon the heirs, executors, administrators, or assigns of the respective parties hereto, but shall not be assigned by Buyer except upon written prior consent of Seller.

[fol. 1770½] Govt. Ex. No. 609

Vulcanite Portland Cement Company

Main Office: Land Title Bldg., Philadelphia

Quo. No. —. Job No. —.

Albert Moyer, Manager of Sales

Specific Job Quotation

Messrs. —— ——:

We quote you on the full Portland Cement requirements of the following described work but not exceeding the estimated requirements of — barrels of Vulcanite Portland Cement. The cement

shall only be ordered and shipped, as nearly as practicable to meet the necessities of the work, it being understood, however, that under no circumstances shall the Cement Company be obligated to ship hereon more than — barrels during any 30 consecutive days nor subsequent to —— — ——.

Price: Vulcanite Portland Cement, in 4 cloth sacks, at $— per standard bbl., including the sacks; Vulcanite Portland Cement, in 4 paper bags, at $— per standard bbl., including the bags; Vulcanite [fol. 1771] Portland Cement in bulk, at $— for 376 lbs., equivalent to one (1) barrel net weight. f.o.b.

Description of work: ——.

Terms of Payment: Thirty days net or — per barrel discount for payment in full within ten days from date of invoice.

This quotation is void unless accepted within — days from date.

The acceptance of this quotation, verbally, or in writing, will not form a contract or obligate the Cement Company. Should the Purchaser wish to place orders under this quotation for the work herein specified, the acceptance of such orders by the Cement Company shall be at its option and subject to execution of formal contract covering the quantity and date of shipments required for the work specified, subject to all limitations as set forth in the contract.

Respectfully, Vulcanite Portland Cement Company. Albert Moyer, Manager of Sales.

Note change in price of cotton sacks from 25¢ to 10¢ each.

For other clauses which are part of this quotation see other side. [fol. 1771½] Cloth Sacks: Sacks bearing the Vulcanite brand or trade mark, properly bundled and so marked as to insure complete identification, received by us in serviceable condition at our Mill, Vulcanite, New Jersey, will be purchased from the original purchaser at ten (10) cents each, if purchased of us containing "Vulcanite" Portland Cement which Cement was used in the work described, provided these sacks are shipped within ten days after being emptied, freight prepaid, subject to our inspection and count. Shipments in paper bags are made at purchaser's risk of breakage and resultant loss of Cement. If, at any time, the cost of new cloth sacks increases or decreases to such an extent that the Cement Company deems it advisable to change the price at which empty sacks will be purchased, the price named in this contract will be advanced or reduced accordingly. If, at any time, the Cement Company shall experience such difficulty in securing cloth sacks, as in its opinion would make shipment in cloth sacks impracticable, then upon ten days' notice to the purchaser it may until such difficulty is removed, ship either in paper sacks at a price of twenty-five (25) cents per barrel more than the net price in cloth sacks, or in bulk when practicable at the net price in cloth sacks. The net price in cloth sacks is a price after deducting the repurchase price of empty sacks.

In making delivery prices, the Cement Company only guarantees cost at destination and will not be responsible for shortage or damage occurring in transit. All railroad demurrage, car service and terminal charges at destination shall be settled for and borne by the Purchaser. The Cement Company shall not be responsible for [fol. 1772] delays in manufacture or shipping cement caused by Strikes, Accidents, Fires, Break-downs, Failure of Machinery, Embargoes, Car Shortage, Labor Scarcity, Labor Agitation, Strikes in coal mines from which the Cement Company secures its coal supply, Acts of God or any other causes beyond its control, or for any delay in transportation whereby shipments are curtailed or entirely suspended.

"Vulcanite" Portland Cement to be furnished hereunder is, when shipped, to conform in every respect to the specifications of the United States Government as of this date or Standard Specifications for Portland Cement as adopted by the American Society for Testing Materials.

[fol. 1772½] Govt. Ex. No. 610

Alpha Portland Cement Co.

Easton, Pa.

We take pleasure in quoting you on Alpha Portland Cement delivered in carload lots F. O. B. cars station named above as follows:

In cloth sacks, $— per standard barrel (376 lbs. net); in paper bags, twenty-five (25) cents per barrel less than cloth price; in bulk, forty-five (45) cents per barrel less than cloth.

Price for immediate acceptance.

This price is on a quantity to be mutually agreed upon for shipment within fifteen days from date of your order.

Terms of Payment: On approved credit, 10 cents per barrel off for cash in ten days from date of invoice, or 30 days net from date of invoice.

This quotation is subject to terms, conditions and limitations on both sides hereof.

Yours very truly, Alpha Portland Cement Company.

If purchaser fails to comply with terms of payment or with any of the other terms of sale, we reserve the right to cancel unfilled [fol. 1773] portion of any contract or order, purchaser remaining liable for all unpaid accounts.

Orders are approvable as to credit, and if at any time the purchaser's financial responsibility shall be deemed unsatisfactory to the Cement Company, it may require approved security or demand cash payment, and pending same may withhold shipment, and if within a reasonable time, in the judgment of the Cement Company, such cash or approved security has not been furnished, the Cement Company may declare the order or contract cancelled.

In making delivered prices we only guarantee cost at destination and we will not be responsible for shortage or damage occurring in transit; our responsibility ceases when shipments are delivered to Railroad Company on cars at our mill. Railroad Company's bills of lading shall be conclusive as to quantity and good condition of both cement and package when loaded in cars.

The prices herein quoted are the prices on cement. If shipped in cloth sacks, the cloth sacks containing the cement are not sold, but remain the property of the Cement Company and must not be sold or used other than as containers of cement manufactured by the Alpha Portland Cement Company. The purchaser agrees to return said sacks to the Cement Company within ninety (90) days of date of shipment of cement by the Cement Company. A rebate of ten cents (10¢) for each sack returned will be allowed by the Cement Company from the invoice price of cement when the sacks are returned to the Cement Company in good condition, freight prepaid, [fol. 1773½] subject to Cement Company's count and inspection. Cement Company will not accept for rebate sacks bearing brands other than its own or bags that have been wet or are otherwise worthless. Such sacks if received will be held at shipper's risk subject to his order for thirty days only.

Shipments in paper bags will be made at purchaser's risk of breakage and resultant loss.

The Cement Company reserves the right to prescribe the routing by which the shipment shall be forwarded.

This quotation is subject to change without notice and is not binding until orders have been accepted by this Company in writing.

All orders and contracts are accepted subject to governmental restrictions, contingencies of manufacturing and shipping and other causes beyond the control of either Buyer or Seller. We will not be responsible for delays in transit.

The price of cement stated herein is based on the transportation charges in effect at the present time and is subject to advance or reduction as the transportation charges may be advanced or reduced.

Alpha Portland Cement to be furnished hereunder is to conform in every respect to Specifications of United States Government, or Standard Specifications for Portland Cement as adopted by the American Society for Testing Materials when tested by methods of testing recommended by American Society of Civil Engineers, but we cannot be responsible for improper use of Cement, therefore we will not guarantee finished work.

[fol. 1774] GOVT. EX. NO. 611

"The Standard by which all other makes are measured"

The Atlas Portland Cement Co.

New York, Boston, Philadelphia, Birmingham, Dayton, St. Louis, Des Moines, Chicago

Trade Quotation No. —

We quote you on "Atlas" Portland Cement in carload lots for shipment within fifteen (15) days from date of order, subject to change without notice and to terms, conditions and limitations on reverse hereof:

$— per barrel (bags included) in 4 cloth bags (return value 10c. each) f. o. b. cars destination named above.

Price on "Atlas" in paper bags, Twenty-five (25) cents per barrel less.

We also quote on "Atlas White" Portland Cement (shipped in paperlined cloth sacks) in mixed carloads with "Atlas."

$— per barrel in 4 cloth bags f. o. b. cars same destination.

We shall be glad to quote you a price f. o. b. destination on carloads of "Atlas White."

[fol. 1774½] It is understood and agreed that in the event of any change in the rates of transportation or delivery charges made effective during the term of this contract or agreement, the price on all shipments thereafter shall be increased or decreased accordingly; provided, however, that the price shall at no time be reduced below that at which the Cement Company at the time of the respective shipments hereunder offers to make current sales at the point of delivery herein specified.

Unless otherwise specified in this quotation, orders tendered in excess of a carload are subject to our acceptance.

This quotation is our present price and will apply only to immediate orders.

Prices for specific work requiring delivery beyond the period covered by this quotation will be quoted you on application. When writing us for price please state the name of the job, location, quantity required and period over which deliveries are wanted.

We hope to be favored with your order.

Yours very truly, The Atlas Portland Cement Company.

Terms, Conditions, and Limitations

Payment: On approved credit 30 days net or 10 cents per barrel discount for payment in full within 10 days from date of invoice, provided there are no overdue accounts unpaid. Payments to be [fol. 1775] made to the office from which invoice is dated in funds payable in that city at par. Original paid freight bills to be sent us promptly for comparison. If purchaser fails to comply with terms

of payment or with any of the other terms of sale, we reserve the right to cancel unfilled portion of any contract or order, purchaser remaining liable for all unpaid accounts. The credit to be extended under this contract shall be subject to the credit limit placed on the Purchaser's account from time to time by the Cement Company, and if at any time the Purchaser's responsibility shall be or become (in the Cement Company's opinion) impaired or unsatisfactory the Cement Company reserves the right to require payment in advance of shipment, or assurances satisfactory to the Cement Company that bills will be promptly paid when due. It is understood and agreed that payment for each shipment is due and payable separately, in accordance with the terms of sale named in this contract.

Cloth Sacks: The Cement Company will purchase at the price charged on its invoices, only from the Party to whom the sale was made, and not from any Assignee or Trustee, empty cloth sacks bearing its brand and proper identification marks, purchased of the Cement Company, upon their receipt in serviceable condition at the Cement Company's mill if returned within ninety (90) days after their purchase freight prepaid, subject to the Cement Company's inspection and count. Cement Company does not purchase sacks bearing brands other than its own, or sacks that have been wet or are otherwise useless.

[fol. 1775½] Freights: The Cement Company reserves the right to prescribe the route by which shipments shall be forwarded and to make shipments prepaid or collect at its option. In making delivered prices, the Cement Company only guarantees cost at destination, and will not be responsible for shortage or damage occurring in transit.

General: The Purchaser shall not have the right to transfer or sublet this Agreement in whole or in part.

The Purchaser shall give the Cement Company shipping instructions in writing a reasonable time before shipments are to be made, and the Cement Company shall not be responsible for delays in manufacture or shipping cement, caused by Strikes, Accidents, Fires, Breakdowns, Failure of Machinery, Embargoes, Car Shortage, Labor Scarcity, Labor Agitation, Failure to receive Coal from Mines from which the Cement Company secures its supplies of coal, Delays in Transportation, Acts of God, or other causes beyond its control. In any of such events the Cement Company may determine as nearly as practicable the pro rata share of cement of each of its customers after reserving the Cement Company's usual percentage of its shipments for its dealers' warehouse trade, and may limit and reduce shipments hereunder according to such pro rata share of the Purchaser. The Cement Company shall have the right to sell or agree to sell, from time to time, its cement under other agreements and orders, and in the event the Cement Company shall at any time for any cause what-[fol. 1776] soever be unable to make and ship cement in accordance with its agreements and orders, the Cement Company may determine as nearly as practicable the pro rata share of the cement of each of its customers under its agreements and orders after reserving the

Cement Company's usual percentage of its shipments for its dealers' warehouse trade, and may limit and reduce shipments hereunder according to such pro rata share of the Purchaser. The Cement Company shall not be obligated to make up any such limitation or reduction and its determination as to the necessity for prorating and the pro rata share of the purchaser shall be final.

The Purchaser shall, on or about the first day of each month, if requested by and on forms furnished by the Cement Company, correctly inform the Cement Company of the amount of Atlas Portland Cement delivered for or used on the work herein described during the preceding month or months since date hereof.

In case, while this contract is unfulfilled by either party, there shall be another contract between the same parties, for the sale and delivery of cement by the Cement Company, and under such other contract the Purchaser shall be in default, the Cement Company shall be under no obligation to make shipments under this contract while such default exists, and for such default the Cement Company shall have the right to demand cash payments hereunder or to cancel this contract without affecting the obligation of the Purchaser on any unpaid accounts. "Atlas" Portland Cement to be furnished hereunder is when shipped to conform in every respect to [fol. 1776½] specifications of United States Government, or Standard Specifications for Portland Cement as adopted by the American Society for Testing Materials when tested by methods of testing recommended by the American Society of Civil Engineers, but the Cement Company cannot be responsible for improper use of cement, therefore Cement Company will not guarantee finished work.

[fol. 1777] GOVT. EX. No. 612

Allentown Portland Cement Co.

Allentown, Pennsylvania

Allentown, Pa.

Trade Quotation Used Since Jan. 1, 1921

To —— ——:

Subject to the terms and conditions named below and on the reverse side of this sheet, all of which are hereby declared to have been read and assented to by the purchaser, and to be a part of any contract resulting from this Quotation, the same as if they had been fully expressed therein, we quote, f. o. b. cars, our work's siding, Evansville, Berks Co., Pa., with wreight allowed to ——, Allentown Portland Cement in 4 cloth sacks at $— per standard barrel; in 4 paper sacks at $— per standard barrel, including packages in which the cement is shipped.

This Quotation shall be null and void unless written acceptance is made by you immediately, and is subject to our prior withdrawal or

[fol. 1777½] change as to price, quantity, delivery or otherwise. It does not contemplate and is not intended to cover delivery for any specific work. Prices for specific work requiring deliveries beyond 15 days will be quoted on application. Unless otherwise agreed, this Quotation is limited to one carload of cement and applies only on shipments billed to and unloaded at destination specified, for shipment within 15 days from even date.

The price named is subject to change in the price of bags, as may become the custom of the trade. The change, however, affecting this Quotation will not affect the net price, as we will re-purchase bags at the same price as we charge for them.

We will credit or pay to original purchaser — cents each for empty cloth cement sacks purchased of us, bearing our brand or proper identification mark, on their receipt in serviceable condition at our Mill, if returned within 90 days after their purchase, freight prepaid, subject to our inspection, count and acceptance. We do not purchase sacks bearing brands other than our own, or sacks that have been wet or are otherwise damaged or useless; all such bags received by us will be returned to you, at your expense, or held only for a rasonable time, subject to your order.

Allentown Portland Cement Company. Sales Department.

1. Warranty.—Allentown Portland Cement to be furnished hereunder shall, when shipped, conform in every respect to the specifi- [fol. 1778] cations then prescribed or adopted by the United States Government, or to the Standard Specifications for Portland Cement of the American Society for Testing Materials, when tested by methods of testing recommended by the American Society of Civil Engineers. We are not responsible for the improper use of our cement or for the finished work or for any damages resulting from its use, in any respect or to any extent whatsoever, any and all such claims being waived by the purchaser by the acceptance of this Quotation.

II. Settlements.—Terms of payment and due date of invoices are 30 days net from date of invoice, in cash, at our office at Allentown, Pa. A discount of 10 cents a barrel will be allowed for payment in full within 10 days from date of invoice, accompanied by original paid freight bills, which shall be delivered and belong to us when payment is made. All orders are subject to our approval of purchaser's credit. If, at any time, the purchaser's credit or responsibility, in our opinion, shall be or become impaired or unsatisfactory, or if the purchaser fails to comply with any of the terms of payment or with any other terms of this contract, we shall have the right, at our option (on one day's written notice) to suspend or cancel deliveries or to require cash payments in advance, or to require security satisfactory to us for all payments due or to become [fol. 1778½] due from the purchaser hereunder.

III. Deliveries.—We reserve the right to direct the route by which all shipments shall be forwarded. All railroad demurrage, car serv-

ice and terminal charges at destination, shall be settled for and borne by purchaser.

In making delivered prices, we guarantee only cost at destination, and we will not be responsible for shortage or damage occurring in transit. Our responsibility ceases when shipments are delivered to the Railroad Company on cars at our mill. Railroad Company's bills of lading or receipt shall be conclusive as to quantity and good condition of both cement and package when loaded on car.

We shall not be liable for any delays in manufacturing, shipping or delivery, caused by strikes, accidents, delays of carriers, embargoes and other causes unavoidable or beyond our control. In the event of any such contingency, we shall have the right to pro-rate or apportion shipments to and among our customers, according to unfilled orders then on our books, such cement as we may then be able to manufacture and ship.

IV. Miscellaneous.—Prices herein quoted are subject to any increase or decrease in freight rates from those now in effect, and also to any advances equal to any taxes assessed against the cost of transportation, the sale of the goods, or otherwise, all of which shall be assumed and paid by the purchaser as part of the purchase price.

Allentown Portland Cement Company.

[fol. 1779] GOVT. Ex. No. 613

Bath Portland Cement Co.

Works: Bath, Pa.; General Offices: Finance Building, Philadelphia

New York Office: 50 E. 42nd Street

We take pleasure in quoting you on Bath Portland Cement delivered in carload lots F. O. B. cars, in cloth sacks, $— per standard barrel, including four (4) sacks; in paper bags, — cents per barrel less than cloth price. Paper bags are not returnable.

We take pleasure in quoting you on Medusa White Portland Cement, delivered in mixed carload lots F. O. B. cars same destination as specified above, in cloth sacks, $— per standard barrel, including four (4) sacks.

Prices quoted are for immediate acceptance; shipment to be made within fifteen days from date of order.

Quantity not to exceed one car unless otherwise agreed to.

This quotation is subject to change without notice, and is not binding until orders have been accepted in writing by this Company.

[fol. 1779½] Prices for specific work, requiring delivery beyond fifteen days, will be quoted *on* upon request.

This quotation is subject to terms and conditions on both sides hereof.

Yours very truly, Bath Portland Cement Co.

(Reverse)

Terms of Payment.—Thirty days net from date of invoice, or — cents per barrel discount for cash in ten days in full from date of invoice. Orders accepted subject to approved credit. Payments to be made in cash or equivalent at our office, Philadelphia, Pa. If the financial responsibility of the buyer is or becomes impaired or unsatisfactory to us, security must be given by the buyer or cash payments with the above discount allowed must be made before shipment. If the buyer fails to comply with the terms of payment or with any of the other terms of sale, we reserve the right to cancel any unfilled portion of any contract or order without notice, the buyer remaining liable for all unpaid accounts.

Shortage or Damage.—In making delivered prices we will not be responsible for shortage or damage occurring in transit. Our responsibility ceases when shipments are delivered to the railroad company in cars at our mills. The railroad company's bill of lading shall be conclusive as to quantity and good condition of both cement and packages when loaded on cars. We will not be responsible for breakage and resultant loss when shipments are made in paper sacks.

[fol. 1780] Freight Charges: When cement is sold at a delivered price freight charges will be deducted from all invoices, and are to be paid by the buyer at destination, excepting on shipments to prepaid points. This quotation is based on present freight rates; the buyer to have the benefit of any reduction and be liable for any advance in freight rates. We reserve the right to prescribe the routing by which shiments shall be forwarded. We are not responsible for delays in transit, railroad demurrage, car service and terminal charges at destination shall be settled for and borne by purchaser.

Sacks: We will pay the original purchaser — cents each for empty cloth sacks purchased from us bearing our brand on their receipt in serviceable condition at our mill if returned within ninety days after their purchase, freight charges prepaid, subject to our count and inspection. Rejected sacks may be destroyed or otherwise disposed of by this Company without liability, unless they are removed by original purchaser within ten days after notice of rejection. There is no return value for paper sacks.

Strikes: All orders and contracts are accepted subject to strikes, including coal strikes in either the anthracite or bituminous coal regions, differences with employees, accidents to machinery, fire, flood, car famine or other contingencies beyond the control of either ourselves or the buyer, and said causes shall, during their existence excuse either party from the performance of an order or a contract, and operate as a proportionate rescission thereof, provided prompt [fol. 1780½] notice shall be given by the party suffering from such disability to the other party in writing, specifying the cause, otherwise this agreement shall remain in full force and effect.

Specifications: Bath Portland Cement to be furnished hereunder is to conform in every respect to specifications of the United States Government or Standard Specifications for Portland Cement as adopted by the American Society for Testing Materials when tested by methods of testing recommended by the American Society of Civil Engineers, but we cannot be responsible for improper use of cement, therefore we will not guarantee finished work.

Periodical Quotation

Saylor's Portland Cement

Coplay Cement Manufacturing Co.

Mills: Coplay, Lehigh County, Pa.

General Sales Office: 200 Fifth Avenue, New York, New York

Widener Building, Philadelphia

We quote, for shipment within fifteen (15) days from date of order, subject to change without notice, and to terms, conditions and limitations on reverse side hereof, on "Saylor's" Portland Cement:

In carload lots, f. o. b. cars —; in cloth sacks, $— per standard barrel (376 lbs. net), including four (4) sacks; in paper sacks, — cents less than cloth price; in boat lots of —, —; in cloth sacks, $— per standard barrel (376 lbs. net), including four (4) sacks.

Price on White Portland Cement will be quoted upon application.

[fol. 1781½] This quotation is our present price and applies only to immediate orders for one carload of cement, unless otherwise agreed in the foregoing.

Prices for specific work requiring deliveries beyond the period covered by this quotation will be quoted you on application, which should state the operation, the location and the actual quantity required.

Yours respectfully, Coplay Cement Manufacturing Co.

First Portland Cement Manufactured in America.

Terms, Conditions, and Limitations

Payment: Thirty days net; 10 cents per barrel discount for payment in full within 10 days from date of invoice. Payments to be made in cash or equivalent at our office, Coplay, Pa. When delivered prices are made and shipments are forwarded freight collect, original paid freight bills are to be sent us promptly for credit.

Orders are subject to approved credit, and if at any time pur-

chaser's financial responsibility be or becomes, in our opinion, impaired or unsatisfactory, we reserve the right to require payment in advance or satisfactory assurance that bills will be promptly paid when due.

Shipments, Demurrage, etc.: In making delivered prices, we only guarantee cost at destination and we will not be responsible for shortage, damage or delay occurring in transit. Our responsibility [fol. 1782] ceases when shipments are delivered to Railroad Company on cars at our Mill. Railroad Company's bill of lading shall be conclusive as to quantity and good condition of both cement and packages when loaded on cars.

We reserve the right to prescribe routing by which shipments shall be forwarded. The purchaser to have the benefit of any reduction and be liable for any increase in freight rates or taxes.

The purchaser shall give us shipping instructions in writing a reasonable time before shipments are to be made. While we will endeavor to make shipment on date specified by customer, we do not guarantee to ship on such date. All demurrage, car service and terminal charges at destination shall be settled for and borne by purchaser.

Sacks: We will pay to original purchaser 10 cents each for empty cloth cement bags purchased of us, bearing our brand, on their receipt in serviceable condition at our Mill, if returned within 90 days after their purchase, freight prepaid, subject to our inspection and count. We do not purchase sacks bearing brands other than our own, or sacks that have been wet or are otherwise useless.

Rejected sacks may be destroyed or otherwise disposed of by this Company without liability unless they are removed by original purchaser within ten days after notice of rejection. Paper bags and wooden barrels are not returnable. Shipments in paper bags are made at purchaser's risk of breakage and resultant loss of cement.

Strikes, etc.: All orders and contracts are accepted subject to con- [fol. 1782½] tingencies of manufacturing and shipping and to strikes, including coal strikes in either the Anthracite or Bituminous coal regions, differences with employees, accidents to machinery, fire, flood, car shortage, embargoes or other contingencies beyond our control.

Specification: "Saylor's" Portland Cement to be furnished hereunder is to conform in every respect to specifications of the United States Government, or Standard Specifications for Portland Cement as adopted by the American Society for Testing materials when tested by methods of testing recommended by the American Society for Civil Engineers, but we cannot be responsible for improper use of cement, therefore we will not guarantee finished work.

Price in paper bags 25¢ per bbl. less than in cloth bags.

Price in bulk 40¢ per bbl. less than in cloth bags.

White—Dexter Portland Cement in cloth bags at — per bbl., loaded in cars with Dexter so as to make full carload.

This quotation is our present price and applies only to immediate orders.

Prices for Specific work requiring deliveries beyond 15 days should [fol. 1783½] be applied for with description of the job, location and number of barrels required to complete the work.

Yours respectfully, Dexter Portland Cement Company.
—— ——, Manager of Sales.

[Over.]

Terms, Conditions and Limitations

Payment

1. Ten Cents (10¢) per barrel discount for full payment in cash or equivalent at our office, Nazareth, Pa., within ten days from date of invoice, provided the purchaser has satisfied all past due prior indebtedness to us.

2. In cash or equivalent at our office, Nazareth, Pa., within 30 days from date of invoice less credits issued.

If purchaser fails to comply with terms of payment or with any of the other terms of sale, we reserve the right to cancel unfilled portion of any contract or order, purchaser remaining liable for all unpaid accounts.

Orders are subject to approved credit, and if at any time purchaser's financial responsibility be or becomes, in our opinion, impaired or unsatisfactory, we reserve the right to require payment in advance or satisfactory assurance that bill will be promptly paid when due.

[fol. 1784] Bags

We will repurchase from the original purchaser at 10¢ each Dexter cloth cement bags on their receipt in serviceable condition at

our Mill, if returned within 60 days after their purchase, freight prepaid to Nazareth, Pa., subject to our inspection and count. We do not purchase bags bearing brands other than our own, or bags that have been wet or are otherwise useless.

Paper bags and wooden barrels are not returnable. Shipments in paper bags are made at purchaser's risk of breakage and resultant loss of cement.

Quantity

Unless otherwise agreed, the quotation on reverse side is limited to One Carload of Cement and applies only on shipments billed to and unloaded at point of delivery specified.

Orders entered for shipment on a specific date will, at our option, be shipped on that date unless sooner ordered out by purchaser.

All railroad demurrage, car service and terminal charges at destination shall be settled for and borne by purchaser.

Shipping Instructions

The purchaser shall give us shipping instructions in writing a reasonable time before shipments are to be made.

Contingencies

[fol. 1784½] All orders and contracts are accepted subject to contingencies of manufacturing and shipping, and other causes beyond our control, and we will not be responsible for delays in transit.

Specifications

"Dexter" Portland Cement to be furnished hereunder is, when shipped, to conform in every respect to specifications of the United States Government, or Standard Specifications for Portland Cement as adopted by the American Society for Testing Materials when tested by methods of testing recommended by the American Society of Civil Engineers, but we cannot be responsible for improper use of Cement, therefore we will not guarantee finished work.

Guarantee

A test sheet signed by our chemist will be sent to each purchaser as evidence of our compliance with the above guarantee.

Dexter Portland Cement Company.

[fol. 1785] GOVT. EX. NO. 616

Edison Portland Cement Co.

Annual Capacity Over 2,000,000 Barrels

8 West 40th St., New York City

We quote you on Edison Portland Cement, delivered in carload lots f. o. b. cars station named above, as follows:

In cloth sacks $— per standard barrel (376 lbs. net), including four (4) sacks; in paper bags — cents per barrel less than cloth price.

Terms of Payment: On approved credit, net thirty days, or ten cents (10¢) per barrel discount for payment in full, including sack deposit, within ten days from date of invoice.

This quotation is subject to the terms and conditions appearing on both sides hereof.

This quotation is for immediate acceptance.

Shipments to be made within 15 days from date of order.

The quantity is limited to one carload, unless otherwise agreed to.

Should you desire prices for specific work requiring delivery beyond 15 days, we shall quote you on receipt of detailed information.

Yours very truly, Edison Portland Cement Co.

[fol. 1785½] (Reverse Side)

Credit: If purchaser fails to comply with terms of payment or with any of the other terms of sale, we reserve the right to cancel unfilled portion of any contract or order, purchaser remaining liable for all unpaid accounts. Orders are approvable as to credit at Home Office of the Cement Company, New York, N. Y., and if at any time the purchaser's financial responsibility shall be deemed unsatisfactory to the Cement Company, it may require approved security or demand cash payment, and pending same may withhold shipment, and if within a reasonable time, in the judgment of the Cement Company, such cash or approved security has not been furnished, the Cement Company may declare the order or contract cancelled.

Delivery: In making delivered prices we only guarantee cost at destination and we will not be responsible for shortage or damage occurring in transit; our responsibility ceases when shipments are delivered to Railroad Company on cars at our mill. Railroad Company's bills of lading shall be conclusive as to quantity and good condition of both cement and package when loaded in cars. All railroad and lighterage demurrage, car service and terminal charges at destination shall be settled for and borne by purchaser.

Package: Cloth sacks bearing "Edison" brand, in which cement is packed, are the property of Cement Company, and are for a period of ninety (90) days from the delivery by Cement Company of the [fol. 1786] said cement, leased by it to Purchaser at a charge of ten (10) cents each, which charge is included in price for cement packed

in cloth sacks and which charge Purchaser agrees to pay at same time and on same terms as payment for cement is made.

Purchaser agrees within ninety (90) days of delivery of the cement, to deliver to Cement Company, the owner, at its plant at New Village, New Jersey, freight prepaid, properly bundled and so marked as to insure complete identification, the sacks bearing "Edison" brand in which the said cement is packed, and Cement Company agrees to refund to Purchaser ten (10) cents for each said sack so delivered in good condition subject to its count and inspection.

For useless sacks, or sacks which have been wet, no refund will be made. Foreign sacks will be held by Cement Company for thirty (30) days subject to Purchaser's order.

In the event that any of the said empty sacks bearing "Edison" brand are sold or otherwise disposed of to any person other than Cement Company, the owner, Purchaser agrees to pay Cement Company, as liquidated damages, five (5) cents for each sack so sold or disposed of.

Price on cement packed in paper bags includes the paper bags, which are not returnable.

Shipments in paper bags are made at Purchaser's risk of breakage and resultant loss of cement.

Claims for loss or damage will not be considered unless supported by seal record and railroad agent's acknowledgment on freight bill. [fol. 1786½] Freight over-charge claims must be accompanied by original receipted freight bill.

Date of Shipment: Orders entered for shipment on a specific date will at our option be shipped on that date unless sooner ordered out by Puschaser. Purchaser shall give the Cement Company shipping instructions a reasonable time before shipments are to be made, and the Cement Company shall not be responsible for delays in manufacturing or shipping cement caused by strikes, differences with workmen, accidents at its works, inability to secure cars, coal or other material or other contingencies not under its control, nor for any delays in transportation.

Specifications: The cement is, when shipped, to conform in every respect to specification of the United States Government for Portland Cement as adopted by the American Society for Testing Materials when tested by methods of testing recommended by the American Society of Civil Engineers. This Company cannot be responsible for improper use of cement and, therefore, will not guarantee finished work.

Giant Portland Cement Company

Main Office: 603-610 Pennsylvania Building, Philadelphia, Pa.

New York Office: 30 Church Street

Trade Quotation

December 2, 1920.

E. M. Rodrock Co., Paterson, N. J.

Dear Sir: We quote, based upon present freight rate, subject to change without notice, shipment within fifteen (15) days from date of order, acceptance of order in writing by this Company, and to terms, conditions and limitations on the reverse side hereof, in carloads F. O. B. Station named above:

Giant Portland Cement in 4 paper sacks $3.13; 4 cloth sacks, 3.83 per standard bbl.

Price in cloth sacks includes sacks at 25¢ *cents* each.

[fol. 1787½] Prices for specific work requiring deliveries beyond 15 days will be quoted upon application accompanied by full information and description of work.

Yours respectfully, Giant Portland Cement Company. S. N. Peters, General Sales Manager. B.

Terms, Conditions, and Limitations

Payment: 30 days net: 10 cents per barrel discount for payment in full within 10 days from date of invoice. Payments to be made in cash or equivalent at our office, Philadelphia, Pa. Original paid freight bills to be sent us promptly for credit.

Orders are subject to approved credit, and if at any time purchaser's financial responsibility be or becomes impaired or unsatisfactory to us, we reserve the right to require payment in advance or satisfactory guarantee that bills will be promptly paid when due.

In making delivered prices we only guarantee cost at destination, and we will not be responsible for shortage or damage occurring in transit. Our responsibility ceases when shipments are delivered to Railroad Company on cars at our Mill. Railroad Company's bills of lading shall be conclusive as to quantity and good condition of both cement and packages when loaded on cars.

We will pay to original purchaser the amount per cloth sack [fol. 1788] included in price invoiced for sacks purchased of us under this quotation, bearing our brand, on their receipt in serviceable condition at our mill, Egypt, Lehigh County, Penna., Ironton Railroad delivery, freight prepaid, if returned within 90 days after their purchase, subject to our inspection and count. We do not purchase sacks bearing brands other than our own, or sacks that have been wet or are otherwise useless.

Unless otherwise agreed, the quotation on reverse side is limited

to one carload of Cement and applies only on shipments billed to and unloaded at point of delivery specified.

Orders entered for shipment on a specific date will, at our option, be shipped on that date unless ordered out earlier by purchaser.

We reserve the right to prescribe the route by which shipments shall be forwarded. All railroad demurrage, car service and terminal charges at destination shall be settled for and borne by purchaser.

All deliveries are subject to unavoidable delays in manufacture or shipping, due to strikes, differences with employees, scarcity of labor, accidents, inability to secure cars, coal or material, fire, flood, warfare, acts of the public enemy, regulation or control of any State or of the United States, or of any public authority or agency thereof, or any cause beyond our control. Any such cause shall, during its continuance, excuse performance on our part, and shall operate as a proportionate rescission of this agreement, unless otherwise expressly agreed; provided that prompt notice be given to the buyer, of the fact and cause of delay.

[fol. 1788½] Giant Portland Cement to be furnished hereunder is, when shipped, to conform in every respect to specifications of United States Government, or Standard Specifications for Portland Cement as adopted by the American Society for Testing Materials when tested by methods of testing recommended by the American Society of Civil Engineers, but we cannot be responsible for improper use of Cement, therefore we will not guarantee finished work.

Giant Portland Cement Company.

[fol. 1789] Govt. Ex. No. 618

Glens Falls Portland Cement Co.,

Manufacturers "Iron Clad" Portland Cement

Glens Falls, N. Y.

We quote for immediate acceptance, subject to change without notice, shipment within fifteen (15) days from date of order, acceptance of order in writing by this Company, and to terms, conditions and limitations on the reverse side hereof, in carloads, f. o. b. station named above, Iron Clad Portland cement in 4 cloth bags at — per standard bbl.; in paper bags twenty-five cents per barrel less than cloth price.

The prices on cement stated herein are based on the freight rates in effect at the present time and are subject to advance or reduction as the freight rates may be advanced or reduced. These prices will be advanced to the extent of any additional war taxes, on transportation charges on cement, imposed by the Government.

Unless otherwise agreed, this quotation is limited to one carload of cement and applies only on shipments billed to and unloaded at point of delivery specified.

[fol. 1789½] This quotation is based upon today's market and is applicable to immediate orders only

Prices for specific work requiring deliveries beyond 15 days will be quoted upon application accompanied by full information and description of the work.

Yours respectfully, Glens Falls Portland Cement Company, by —— ——.

Terms, Conditions, and Limitations

Terms of Payment: 30 days net; 10 cents per barrel discount for payment in full within 10 days from date of invoice. Payments to be made in cash or equivalent at our office, Glens Falls, N. Y. Original paid freight bills to be sent us promptly for comparison.

Bags must be paid for at same time as cement.

If purchaser fails to comply with terms of payment or with any of the other terms of sale, we reserve the right to cancel unfilled portion of any contract or order, purchaser remaining liable for all unpaid accounts.

Orders are subject to approved credit, and if at any time purchaser's financial responsibility be or become, in our opinion, impaired or unsatisfactory, we reserve the right to require payment in advance or satisfactory assurance that bills will be promptly paid when due.

Claims: All claims for shortage or damage must be made within five (5) days after receipt of shipment. Claims must be accom- [fol. 1790] panied by the shipping card which is sent in each car, and must be verified by notation, on the paid Freight Voucher, by the Freight Agent at the receiving station.

Bags: Cement Company will purchase empty cloth bags bearing "Iron Clad" brand, from the original purchaser only, and not from any assignee or trustee, at 10 cents each upon their receipt at its Works, in good condition, subject to its count and inspection. Empty bags must be returned within 90 days to the Glens Falls Portland Cement Company, Glens Falls, N. Y., freight prepaid, and must be properly packed and so marked as to insure complete identification.

The Cement Company does not purchase useless bags, or bags that have been wet.

Shipments in paper bags are made at purchaser's risk of breakage and resultant loss of cement.

Shipments: Order entered for shipment on a specific date will at our option, be shipped on that date unless sooner ordered out by purchaser.

We reserve the right to prescribe the route by which shipments shall be forwarded. All railroad demurrage, car service and terminal charges at destination shall be settled for and borne by purchaser.

The purchaser shall give us shipping instructions in writing a reasonable time before shipments are to be made. All orders and contracts are accepted subject to contingencies of manufacturing and shipping, and other causes beyond our control, and we will

not be responsible for delays in transit. Should any contingency at any time arise whereby production or shipments are curtailed [fols. 1790½-1792] or delayed, we reserve the right to prorate our shipments of cement to all purchasers of record at such time. In addition to orders or contracts accepted hereunder, we may have accepted and shall from time to time accept, other orders and contracts so as to have a market for our estimated output of cement under normal conditions; therefore, in the event we shall at any time, because of any such contingency, be unable to deliver to all our customers the entire quantity of cement required and called for by all of our contracts then in force, the total of our production then available shall be applied pro rata on all of said contracts according to their requirements respectively, and the amount deliverable on each contract may be reduced accordingly, and there shall be no liability on our part for the reduction so made.

Specifications: "Iron Clad" Portland Cement to be furnished hereunder is, when shipped, to conform in every respect to specifications of United States Government, or Standard Specifications for Portland Cement as adopted by the American Society for Testing Materials when tested by methods of testing recommended by the American Society of Civil Engineers, but we cannot be responsible for improper use of cement, therefore we will not guarantee finished work.

Glens Falls Portland Cement Company.

[fol. 1793] Govt. Ex. No. 619

Hercules Cement Corporation

New York

Dear Sir: We are pleased to quote you for shipment within fifteen (15) days from date of order, in carloads f. o. b. ——, subject to terms, conditions and limitations on the reverse side hereof, Hercules Portland Cement in cloth sacks at $— per standard bbl., including package, which price is subject to change without notice and for immediate acceptance only.

Price in paper sacks — cents per barrel less than in cloth.

Price for specific work requiring deliveries beyond the period covered by this quotation will be quoted you on application, which should state the name of the job, location and estimated quantity required to complete work.

Yours respectfully, Hercules Cement Corporation, by ——
——, Sales Manager.

[fol. 1793½] Terms, Conditions, and Limitations

Terms of Payment: On approved credit, net cash in 30 days, or 10 cents per barrel discount for payment in full within 10 days from

date of invoice, provided all then prior existing indebtedness shall have been satisfied. Sacks must be paid for at the same time as Cement.

Sacks: We will re-purchase at — cents each the empty cloth sacks bearing Hercules brand which are received by us in good condition, freight prepaid, at our Works at Hercules, Pa., within 90 days from date of shipment of Cement.

Quantity: Unless otherwise agreed the quotation on reverse side is limited to one carload of Cement—applying only on shipments billed to and unloaded at point of delivery specified.

Routing and Terminals: We shall have the right to direct the route by which shipments under this quotation shall be forwarded. The demurrage, car service and terminal charges imposed at destination shall be settled for and borne by consignee.

Contingencies: We shall not be liable for delays in manufacture or shipping caused by strikes, scarcity of labor, accident to plant or machinery, inability to secure cars, coal or material, fire, flood, warfare, acts of God, or other causes not under our control; neither [fol. 1794] shall we be liable for delays in transportation.

Specifications: The Hercules Cement to be furnished under this quotation is guaranteed to conform in every respect to standard specifications for Portland Cement, C 9-17 of the American Society for Testing Material.

Hercules Cement Corporation.

[fol. 1794½] Govt. Ex. No. 620

Knickerbocker Portland Cement Company, Inc.

New York City

August 12, 1919.

Windsor Cement Company, Hartford, Conn.

Gentlemen: Replying to your favor of August 7th we quote you $2.94 per barrel on Knickerbocker Portland Cement in cloth sacks, carload lots, delivered f. o. b. cars Hartford, Conn.

The price quoted is subject to terms and other conditions noted on the reverse of this sheet, with the exception that empty cloth sacks will be redeemed at 15¢ each instead of 10¢ as mentioned, and covers the Cement requirements of the new store for the Albert Teiger Co.

We sincerely trust you will be able to furnish Knickerbocker for this work, and await your further pleasure in the matter.

Very truly yours, Knickerbocker Portland Cement Company Inc. W. M. Floring, Sales Department. WMF:CMB.

[fol. 1795] Terms of Payment: Net cash in 30 days, or five cents (5c.) per barrel discount for cash in ten days from date of invoice, not from date of delivery, on approved credit. Freight charges are

to be paid by purchaser and when delivered price is made, original paid expense bill mailed to Cement Company promptly for credit. All bills payable in New York or Boston exchange, at 30 East 42nd Street, N. Y. City.

If at any time the financial responsibility of the purchaser becomes impaired or unsatisfactory, Cement Company reserves the right to require payments in advance or satisfactory security or guarantee that invoices will be promptly paid when due.

If Purchaser fails to comply with terms of payment or with any of the other terms of sale, Cement Company reserves the right to cancel unfilled portion of any contract or order, Purchaser remaining liable for all unpaid accounts.

Packages: A barrel of Knickerbocker Portland Cement when packed in wood weighs 400 pounds gross. When packed in cloth or paper sacks, there are four to barrel, each weighing 94 pounds net.

Shipments in paper bags are made at purchaser's risk of breakage and resultant loss of cement.

Cement Company will purchase empty cloth sacks bearing Knickerbocker Portland Cement Company's brand, from original Purchaser only, at ten cents (10c.) each, on receipt at its works in good condition subject to its count and inspection. Empty sacks must be returned within ninety (90) days to the Knickerbocker [fol. 1795½] Portland Cement Company, Hudson Upper, N. Y., freight prepaid, properly packed and so marked as to insure complete identification.

Transportation: Cement Company reserves the right to control the routing of all shipments. Purchaser agrees to give the Cement Company shipping instructions a reasonable time before shipments are to be made. Cement Company or Purchaser shall not be responsible for delays due to the existence of war, strikes, lockouts, scarcity of labor, accidents, inability to secure cars, coal or material, transportation delays, fire, flood, acts of God, or other causes beyond the control of either the Cement Company or the Purchaser, preventing or interfering with the production, shipment or use of all or any part of the cement herein referred to.

Cement Company shall not be held responsible for shortage or damage to cement or packages occurring in transit. Transportation Company's Bill of Lading shall be conclusive as to quantity, also as to cement and packages being in good condition when loaded at Cement Company's factory.

Freight Rates: In case freight rates affecting transportation of any part of the cement covered hereby shall be increased or decreased, the price named shall be advanced or decreased accordingly.

Specifications: Knickerbocker Portland Cement is guaranteed to meet the requirements of the Standard Specifications for Portland Cement adopted by the American Society for Testing Materials. Cement Company will not be responsible for the improper use of cement, therefore will not guarantee finished work.

[fol. 1796] Govt. Ex. No. 621

The Lawrence Cement Company

Dragon Portland Cement

No. 1 Broadway, New York

March 27, 1917.

James P. Hall, Inc., Jersey City, N. J.

Dear Sirs: The fulfillment of any agreement herein expressed must be contingent upon Strikes, Accidents, Delays of Carriers, and other delays beyond our control; and quotations not limited by date of option may be revised by us without notice.

For immediate acceptance and shipment within fifteen days we quote you on carload of "Dragon" Portland Cement $2.06 per barrel in cotton sacks f. o. b. Jersey City, N. J.

[fol. 1796½] Shipment in paper bags twenty-five cents per barrel less than the price in cotton.

This quotation is subject to 5c per barrel discount for cash in 10 days or net 30 days. Usual allowance of 10c each for good cotton sacks returned to our mill, freight prepaid.

Soliciting the favor of your acceptance, we are

Very truly yours, F. H. Smith, Sales Manager.

[fol. 1797] Govt. Ex. No. 622

Lehigh Portland Cement Co.

Allentown, Pa.

Annual Capacity Over 15,000,000 Barrels

We take pleasure in quoting you on Lehigh Portland Cement, delivered in carload lots F. O. B. cars your station, in cloth sacks, $— per standard barrel, including four (4) sacks; in paper bags, — cents per barrel less than cloth.

Prices for immediate acceptance.

These shipments to be made within fifteen (15) days from date of order.

Quantity not to exceed one car unless otherwise agreed to.

This quotation is subject to change without notice and is not binding until orders have been accepted in writing by this Company.

Prices for specific work, requiring delivery beyond fifteen days, will be quoted upon application accompanied by full information and detailed description of work.

Terms: On approved credit, net thirty days, or ten cents (10c) per barrel discount for payment in full including sacks within ten days from date of invoice.

[fol. 1797½] This quotation is subject to terms, conditions and limitations on both sides hereof.

Yours very truly, Lehigh Portland Cement Co. B. L. Swett, Eastern Sales Manager.

Terms: If purchaser fails to comply with terms of payment or with any of the other terms of sale we reserve the right to cancel unfilled portion of any contract or order, purchaser remaining liable for all unpaid accounts.

Credit: Orders are approvable as to credit and if at any time the purchaser's financial responsibility shall be deemed unsatisfactory to the Cement Company, it may require approved security or demand cash payment, and pending same may withhold shipment, and if within a reasonable time, in the judgment of the Cement Company, such cash or approved security has not been furnished, the Cement Company may declare the order or contract cancelled.

Delivery: In making delivered prices we only guarantee cost at destination and we will not be responsible for shortage or damage occuring in transit. Our responsibility ceases when shipments are delivered to Railroad Company on cars at our mill. Railroad Company's bill of lading shall be conclusive as to quantity and good condition of both cement and package when loaded in cars.

[fol. 1798] Sacks: Price of cloth sacks is included in invoice, which must be paid without deduction. We will pay to original purchaser 10 cents each for empty cloth cement sacks bearing our brand, on their receipt in serviceable condition at our mills at West Coplay or New Castle, Penna., or Fordwick, Va., if returned within ninety days after their purchase, freight prepaid, subject to our inspection and count. We do not purchase sacks bearing brands other than our own, or sacks that have been wet or are otherwise useless. Rejected or foreign sacks will be held at owner's risk, subject to his order, for thirty days only.

Shipments in paper bags will be made at purchaser's risk of breakage and resultant loss.

Date of Shipment: Orders entered for shipment on a specific date will at our option be shipped on that date unless sooner ordered out by purchaser.

Routing: We reserve the right to prescribe the route by which shipments shall be forwarded. All railroad demurrage, car service and terminal charges at destination shall be settled for and borne by purchaser.

Delays: The purchaser shall give us shipping instructions in writing a reasonable time before shipments are to be made. All orders and contracts are accepted subject to contingencies of manufacturing and shipping and other causes beyond our control, and we will not be responsible for delays in transit. Should any contingency at any time arise whereby production or shipments are curtailed or delayed, [fol. 1798½] we reserve the right to prorate our shipments of cement to all purchasers of record at such time. In addition to orders or contracts accepted hereunder, we may have accepted and shall from

time arise whereby production or shipments are curtailed or delayed, for our entire estimated output of cement under normal conditions. Therefore, in the event we shall at any time or for any cause be unable to deliver to all our customers the entire quantity of cement required and called for by all of our contracts then in force, the total of our production then available shall be applied prorata on all of said contracts, according to their requirements respectively, and the amount deliverable on each contract may be reduced accordingly and there shall be no liability on our part for the reduction so made.

Specifications: Lehigh Portland Cement is guaranteed to meet the requirements of the standard specifications adopted by the American Society for Testing Materials. We cannot be responsible for improper use of cement and therefore will not guarantee finished work.

[fol. 1799] Govt. Ex. No. 623

Periodical Quotation

Nazareth Cement Company

1270 Broadway, New York, N. Y.

Messrs. —— ——:

We quote, for shipment within fifteen (15) days from date of order, in carloads, f. o. b., subject to change without notice, and to terms, conditions and limitations on reverse side hereof, Nazareth Portland Cement in 4 cloth sacks at $— per standard bbl. (376 lbs. net); Nazareth Portland Cement in 4 paper bags, $— per standard bbl., including the bags; Nazareth Portland Cement in bulk, $.45 per barrel less than cloth price.

This quotation is our present price and applies only to immediate orders.

[fol. 1799½] The prices on cement stated herein are based on the freight rates and transportation charges to destination named in effect at the present time, and are subject to advance or reduction as said charges may be advanced or reduced. These prices will be advanced to the extent of any additional war taxes imposed by the Government on transportation charges or otherwise.

Prices for specific work requiring deliveries beyond the period covered by this quotation will be quoted you on application, which should state the name of the job, location and actual quantity (more or less within 10 per cent) required to complete such specified job.

Payment.

Respectfully yours, Nazareth Cement Co.

Terms, Agreements and Limitations

Thirty days net; 5 cents per barrel discount for payment in full within 10 days from date of invoice. Payment to be made in cash or equivalent at our office, Nazareth, Pa.

If purchaser fails to comply with terms of payment or with any of the other terms of sale, we reserve the right to cancel unfilled portion of any contract or order, purchaser remaining liable for [fol. 1800] all unpaid accounts.

Orders are subject to approved credit, and if at any time purchaser's financial responsibility be or becomes, in our opinion, impaired or unsatisfactory, we reserve the right to require payment in advance or satisfactory assurance that bills will be promptly paid when due.

Loss or Damage: In making delivered prices we only guarantee cost at destination, and we will not be responsible for shortage or damage occurring in transit. Railroad company's bill of lading shall be conclusive as to quantity and good condition of both Cement and packages when loaded on cars.

Sacks: When shipped in cloth sacks, the sacks are not sold but remain the property of the Nazareth Cement Company as the prices quoted herein are on cement only. These sacks must not be sold or used other than as containers of Nazareth Portland Cement. The purchaser agrees to return said sacks to us, freight charges prepaid, within ninety (90) days from date of shipment of the cement by us. Upon their receipt at our mill and after our inspection and count a rebate of 10c for each serviceable sack will be allowed by us from the invoice price of the cement. We will not accept for rebate sacks bearing brand other than our own or sacks that have [fol. 1800½] been wet or are otherwise useless. Such sacks may be destroyed or otherwise disposed of by this company without liability unless they are removed by the shipper within thirty (30) days after notice of rejection. Paper bags are not returnable for rebate. Shipments in paper bags are made at Purchaser's risk of breakage and resultant loss of cement.

Quantity: Unless otherwise agreed the quotations on reverse side is limited to One Carload of Cement and applies only on shipments billed to and unloaded at point of delivery specified.

Orders entered for shipment on a specific date will, at our option, be shipped on that date unless sooner ordered by purchaser.

We reserve the right to prescribe the route by which shipments shall be forwarded. All railroad demurrage, car service and terminal charges at destination shall be settled for and borne by purchaser.

Strikes, etc.: The purchaser shall give us shipping instructions in writing a reasonable time before shipments are to be made. All orders and contracts are accepted subject to contingencies of manufacturing and shipping, and other causes beyond our control, and we will not be responsible for delays in transit. Should any contingency at any time arise, whereby production or shipments are curtailed or delayed we reserve the right to prorate our shipments of Cement to all purchasers of record at such time.

[fol. 1801] Specifications: "Nazareth" Portland Cement to be furnished hereunder is, when shipped, to conform in every respect to specifications of the United States Government, or Standard Specifications for Portland Cement as adopted by the American Society for

Testing Materials when tested by methods of testing recommended by the American Society of Civil Engineers, but we cannot be responsible for improper use of Cement, therefore we will not guarantee finished work.

Nazareth Cement Company.

[fol. 1801½] Govt. Ex. No. 624

Penn-Allen Cement Company

Allentown, Pa.

We take pleasure in quoting you on Penn-Allen Portland Cement, delivered in carload lots, f. o. b. cars ——, shipments to be made within fifteen (15) days from date of order, in cloth sacks, $— per standard barrel, including four (4) sacks; in paper sacks, $— per standard barrel, including four (4) sacks.

Prices for immediate acceptance.

Quantity not to exceed one car unless otherwise agreed to.

This quotation is subject to change without notice and to terms, conditions and limitations on both sides hereof.

Terms: On approved credit, net thirty days, or ten (10) cents per barrel discount for payment in full including sacks within ten days from date of invoice.

Prices for specific work requiring delivery beyond fifteen days will be quoted upon application accompanied by full information and detailed description of work.

Very truly yours, Penn-Allen Cement Company. T. O. Bretherton, General Sales Manager.

[fol. 1802] Terms: If purchaser fails to comply with terms of payment or with any of the other terms of sale, we reserve the right to cancel unfilled portion of any contract or order, purchaser remaining liable for all unpaid accounts.

Credit: Orders are subject to approved credit, and if at any time the purchaser's financial responsibility be or becomes, in our opinion, impaired or unsatisfactory, we reserve the right to require payment in advance, and pending the same may withhold shipment and if within a reasonable time in the judgment of this Company such cash or approved credit has not been furnished, we may declare the order or contract cancelled.

Loss or Damage: In making delivered prices we only guarantee cost at destination and will not be responsible for shortage or damage occurring in transit. Our responsibility ceases when shipments are delivered to Railroad Company on cars at our mill. Railroad Company's bill of lading shall be conclusive as to quantity and good condition of both cement and packages when loaded in the cars.

Sacks: Price of cloth sacks is included in invoice, which must be paid without deduction. We will pay to the original purchaser 10

cents each for empty cloth sacks bearing our brand, on their receipt [fol. 1802½] in serviceable condition at our mill, if returned within ninety days after their purchase, freight prepaid, subject to our inspection and count. We do not purchase sacks bearing brands other than our own or sacks that have been wet or are otherwise useless. Rejected or foreign sacks will be held at owner's risk, subject to his order for thirty days only. Shipments in paper bags will be made at purchaser's risk of breakage and resultant loss.

Routing: We reserve the right to prescribe routing by which the shipment shall be forwarded. All railroad demurrage, car service and terminal charges at destination shall be settled and borne by the purchaser.

Delays: The purchaser shall give us shipping instructions in writing a reasonable time before shipments are to be made. We will not be responsible for delays in transit. All orders and contracts are accepted subject to strikes, including coal strikes in either the Anthracite or Bituminous coal regions, differences with employees, accidents to machinery, fire, flood, car famine or other contingencies beyond control of etiher buyer or seller. Therefore, in the event we shall at any time or for any cause be unable to deliver to our customers the entire quantity of cement required and called for by all our contracts then in force, the total of our production then available shall be applied pro rata on all of said contracts according to their require- [fol. 1803] ments respectively and the amount deliverable on each contract may be reduced accordingly and there shall be no liability on our part for the reduction so made.

Specification: Penn-Allen Portland cement is guaranteed to meet the requirements of the Standard Specifications for cement of the American Society for Testing Materials, serial designation C-9-17. We cannot be responsible for improper use of cement and therefore will not guarantee finished work.

[fol. 1803½] Govt. Ex. No. 625

Periodical Quotation

Phœnix Portland Cement Company

Philadelphia, Pa.

Charles H. Cox, General Sales Manager

We quote for shipment within fifteen (15) days from date of order, in carloads, F. O. B., subject to terms, conditions, and limitations on reverse side hereof; Phœnix Portland Cement, in 4 cloth sacks, at — per standard bbl., including sacks; Phœnix Portland Cement, in 4 paper bags, at — per standard bbl., including bags.

This quotation is our present price and applies only to immediate orders.

Prices for specific work requiring deliveries beyond the period cov-

ered by this quotation will be quoted you on application, which should state the name of the job, location and actual quantity (more or less within 10 per cent) required to complete such specified job.

Yours respectfully, Phœnix Portland Cement Company, by —— ——, General Sales Manager.

[fol. 1804] Terms, Conditions, and Limitations

Payment: Thirty days net; 10 cents per barrel discount for payment in full within 10 days from date of invoice. Payments to be made in cash or equivalent at our office, Philadelphia. Original paid freight bills to be sent us promptly for comparison.

If purchaser fails to comply with terms of payment or with any of the other terms of sale, we reserve the right to cancel unfilled portions of any contract or order, purchaser remaining liable for all unpaid accounts.

Orders are subject to approved credit, and if at any time purchaser's financial responsibility be or becomes, in our opinion, impaired or unsatisfactory, we reserve the right to require payment in advance or satisfactory assurance that bills will be promptly paid when due.

Loss or Damage: In making delivered prices we only guarantee cost at destination, and we will not be responsible for shortage or damage occurring in transit. Railroad company's bill of lading shall be conclusive as to quantity and good condition of both Cement and packages when loaded on cars.

Sacks: We will pay to original purchaser 10 cents each for empty cloth cement sacks purchased of us, bearing our brand, on their receipt in serviceable condition at our Mill, if returned within 90 [fol. 1804½] days after their purchase, freight prepaid, subject to our inspection and count, and Cement Company's Credit Memorandum mailed to the buyer to be conclusive as to the number and quality of sacks repurchased. We do not purchase sacks bearing brands other than our own, or sacks that have been wet or are otherwise useless.

Rejected sacks may be destroyed or otherwise disposed of by this Company without liability unless they are removed by original purchaser within ten days after notice of rejection. Paper bags and wooden barrels are not returnable. Shipments in paper bags are made at purchaser's risk of breakage and resultant loss of cement.

Quantity: Unless otherwise agreed, the quotations on reverve side is limited to One Carload of Cement and applies only on shipments billed to and unloaded at point of delivery specified.

Orders entered for shipment on a specific date will, at our option, be shipped on that date unless sooner ordered out by purchaser.

We reserve the right to prescribe the route by which shipments shall be forwarded. All railroad demurrage, car service and terminal charges at destination shall be settled for and borne by purchaser.

Strikes, etc: The purchaser shall give us shipping instructions in

writing a reasonable time before shipments are to be made. All [fol. 1805] orders and contracts are accepted subject to contingencies of manufacturing and shipping, and other causes beyond our control, and we will not be responsible for delays in transit. Should any contingency at any time arise, whereby production or shipments are curtailed or delayed, we reserve the right to prorate our shipments of Cement to all purchasers of record at such time.

Specifications: Phœnix Portland Cement to be furnished hereunder is, when shipped, to conform in every respect to specifications of the United States Government or Standard Specifications for Portland Cement as adopted by the American Society for Testing Materials when tested by methods recommended by the American Society of Civil Engineers, but we cannot be responsible for improper use of Cement, therefore we will not guarantee finished work.

Price includes freight at present rates and will be increased to cover any advance in freight rates at any time during the life of this contract, or any tax charge upon them.

Phœnix Portland Cement Company.

[fol. 1805½] Govt. Ex. No. 626

Security Cement & Lime Company

Hagerstown, Md.

Periodical Quotation

Canceling prior quotations, for immediate acceptance and shipment within fifteen (15) days from this date f.o.b. car your station, subject to change without notice, and to terms, conditions and limitations on both sides hereof, we quote you on one (1) car-load of—

Price

$—for Security Portland Cement, per standard barrel, in 4 cloth sacks bearing "Security" copyrighted trademark.

$— for Security Portland Cement, per standard barrel, in 4 paper bags bearing "Security" copyrighted trademark.

$— for Security Portland Cement, per standard barrel of 376lbs., in bulk without any package or trademark.

Terms of Payment: Net cash in thirty (30) days; or ten (10) cents per barrel discount for payment of invoice in full within ten [fol. 1806] (10) days from date of shipment, provided there are no overdue accounts unpaid; payments to be made in cash funds at Seller's office, Hagerstown, Md., without any deductions for package or other allowances unless Buyer has Seller's credit memorandum for same.

Freight: This price includes freight and taxes thereon at present rates, and will vary, up or down with any change in freight rates,

taxes, or other charges affecting cost of transportation or delivery at any time during the life of this contract.

Prices for specific work requiring deliveries beyond fifteen (15) days from this date will be quoted you upon application, accompanied by detailed information regarding quantity and time of delivery.

Very truly, Security Cement & Lime Company.

For other clauses, which are part of this quotation, see other side.

Other Terms, Conditions, and Limitations Covering This Quotation

Quantity and Orders: In addition to order accepted hereunder, Seller may have accepted, and may from time to time continue to [fol. 1806½] accept, other orders and contracts so as to have a market for Seller's entire estimated output of cement under normal conditions.

This quotation is subject to contingencies of manufacturing and shipping, including strikes, lockouts, labor disputes (whether at Seller's mills or at the mills or mines of persons or corporations who are furnishing Seller with materials necessary in the manufacture of cement), delays or deficiency in transportation facilities, floods, fires, warfare, acts of public enemy, governmental restrictions, inability to secure sufficient labor, scarcity of coal, packages, or other materials, and any cause or causes beyond the control of either Buyer or Seller, and said cause or causes shall during their existence excuse either party from the performance of this contract and shall operate as a proportionate rescission thereof. Should production or shipments be curtailed or delayed at any time, due to such contingencies or causes, Seller reserves the right to prorate shipments to all purchasers of record at such time on the basis of tonnage available, or which it may have on hand or produce, and the amount deliverable to each may be reduced accordingly, and there shall be no liability on Seller's part for the reduction so made. Seller may, at its option, supply said cement requirements from other sources, but shall not be obligated to do so.

Routing: Seller reserves the right, at its option, to change and [fol. 1807] direct the route via which shipments hereunder shall be forwarded, and to make shipments prepaid or collect.

Loss or Damage: In making a delivered price at destination, Seller only guarantees cost to Buyer at destination and will not be responsible for shortage of, or damage to, either cement or packages occurring in transit.

Seller's invoiced quantities supported by railroad company's bill of lading shall be the basis for settlement by Buyer and conclusive as to the quantity and good condition of cement and package when loaded on cars at Seller's plant.

All railroad demurrage, car service and other terminal charges imposed at destination shall be borne and paid for by Buyers.

While assuming no responsibility for loss or damage after delivery of cement to carrier f. o. b. cars Seller's plant, Seller agrees to assist Buyer, so far as is reasonable, in securing payment from the

transportation companies of all proper claims for such loss or damage.

Claims: All claims of either of the parties hereto against the other in any manner growing out of his contract shall be made in writing and filed by the party aggrieved with the other party hereto within ten (10) days after acquiring the knowledge upon which the claim is based, and, in any event, within thirty (30) days after [fol. 1807½] the final date fixed for delivery of cement hereunder, and failure to so file said claim within said time limits shall be regarded as a complete waiver and release thereof.

Package: If the cement is shipped in cloth sacks, the cloth sacks are not sold to Buyer, but remain the property of Seller and must not be sold or used other than as containers of cement manufactured by Seller. Buyer agrees to return said sacks to Seller within ninety (90) days from date of shipment of the cement by Seller. An allowance to Buyer only of twenty-five (25) cents for each good sack will be made by Seller when returned in good condition, freight prepaid, to the mill of Seller, at Security, Md., subject to Seller's count and inspection. No allowance will be made for useless sacks or sacks which have been wet. Should any sacks bearing other than Security brand be received by Seller from Buyer, same will be held by Seller, at Buyer's risk and subject to his order, for thirty (30) days only after notice to Buyer from Seller of receipt of the same, after which time they may be destroyed or otherwise disposed of by Seller without liability.

The price herein named for cement in cloth sacks is based on a cloth sack basis of twenty-five (25) cents. Should Sellers find it necessary in its general business to change its cloth sack basis, the right is reserved to adjust the delivered price of the cement accord- [fol. 1808] ingly, and the allowance for each of these sacks returned, as aforesaid, will be increased or decreased in accordance with said change in cloth sack basis.

The price herein named for cement in paper bags is based on a paper bag basis of thirty (30) cents per barrel. Should Seller during the life of this contract find it necessary in its general business to change the paper bag basis, the right is reserved to adjust the delivered price of the cement accordingly.

Paper bags are not returnable, and shipments therein are made at Buyer's risk of breakage and resultant loss of cement.

Specifications: The cement as shipped hereunder is to conform in all respects to the "Standard Specifications and Tests for Portland Cement" as adopted by the American Society for Testing Materials, September 1, 1916.

Seller is not responsible for the use of cement, nor workmanship therewith, and does not guarantee the resultant work.

Financial Credit: If at any time Buyer's financial responsibility be, or become, in opinion of Seller, impaired or unsatisfactory, Seller reserves the right to require payment in advance, or satisfactory assurance that bills will be promptly paid when due. If such assurance is not forthcoming within a reasonable time, Seller reserves the right to cancel this contract.

[fol. 1808½] GOVT. Ex. No. 627

Vulcanite Portland Cement Company

Philadelphia

Periodical Quotation

Nov. 5, 1920.

Messrs. E. M. Rodrock Co., Paterson, N. J.:

We quote, for shipment within fifteen (15) days from date of order, in carloads, f. o. b. station named, subject to change without notice, and to terms, conditions and limitations on reverse side hereof; Vulcanite Portland Cement in 4 cloth sacks at $4.03 per standard bbl.; Vulcanite Portland Cement in 4 paper bags at $3.33 per standard bbl.; White Portland Cement in 4 cloth sacks at $— per standard bbl., loaded in cars with Vulcanite so as to make full carload.

This quotation is our present price and applies to immediate orders only.

Prices for specific work requiring deliveries beyond the period [fol. 1809] covered by this quotation will be quoted you on application, which should state the name of the job, owner, location and maximun quantity required to complete work.

Yours respectfully, Vulcanite Portland Cement Company.
Albert Moyer, Manager of Sales.

Terms, Conditions, and Limitations

Payment: Thirty days net; 10 cents per barrel discount for Payment in full within 10 days from date of invoice. Payments to be made in cash or equivalent at our office, Philadelphia, U. S. A. Original paid freight bills to be sent us promptly for comparison.

If purchaser fails to comply with terms of payment or with any of the other terms of sale, we reserve the right to cancel unfilled portion of any contract or order, purchaser remaining liable for all unpaid accounts.

Orders are subject to approved credit, and if at any time purchaser's financial responsibility be or becomes, in our opinion, impaired or unsatisfactory, we reserve the right to require payment in advance or satisfactory assurance that bills will be promptly paid when due.

[fol. 1809½] Loss or Damage: In making delivered prices we only guarantee cost at destination, and we will not be responsible for shortage or damage occurring in transit. Railroad company's bill of lading shall be conclusive as to quantity and good condition of both Cement and packages when loaded on cars.

Sacks: Sacks bearing our brand, or trade-mark, properly bundled, and so marked as to insure complete identification, received by us in serviceable condition at our Mill will be purchased from the original purchaser at 25 cents each, if purchased of us containing

"Vulcanite" Portland Cement, shipped under price, terms and conditions of this quotation, provided these sacks are shipped within ten days after being emptied, freight prepaid, subject to our inspection and count. We do not purchase sacks bearing brands other than our own or sacks that have been wet or are otherwise useless. Rejected sacks, or sacks bearing other brands, may be destroyed or otherwise disposed of by this company without liability, unless they are removed by original purchaser within ten days after notice of rejection. Paper bags and wooden barrels are not returnable. Shipments in paper bags are made at purchaser's risk or breakage and a resultant loss of Cement.

[fol. 1810] Quantity: Unless otherwise agreed, the quotation on reverse side is limited to One Carload of Cement and applies only on shipments billed to and unloaded at point of delivery specified.

Shipments: Orders entered for shipment on a specific date will, at our option, be shipped on that date unless sooner ordered out by purchaser.

We reserve the right to prescribe the route by which shipments shall be forwarded. All railroad demurrage, car service and terminal charges at destination shall be settled for and borne by purchaser.

In the event of prepayment of freight or other railroad or terminal charges, the buyer shall settle these in cash, on presentation of invoice by seller.

Strikes, etc: The purchaser shall give us shipping instructions in writing a reasonable time before shipments are to be made. All orders and contracts are accepted subject to contingencies of manufacturing and shipping, and other causes beyond our control, and we will not be responsible for delays in transit. Should any contingency at any time arise, whereby production or shipments are curtailed or delayed, we reserve the right to prorate our shipments of Cement to all purchasers of record at such time.

Specifications: "Vulcanite" Portland Cement to be furnished [fol. 1810½] hereunder is, when shipped, to conform in every respect to specifications of the United States Government, or Standard Specifications for Portland Cement as adopted by the American Society for Testing Materials, but we cannot be responsible for improper use of Cement, therefore we will not guarantee finished work.

Water Deliveries: Purchaser is responsibly for demurrage at prevailing rates.

Vulcanite Portland Cement Company. Albert Moyer, Manager of Sales.

(Here follows Government's Exhibit No. 628, marked side folio pages 1811 and 1812.)

[fol. 1812½] GOVT. EX. No. 629

Alpha Portland Cement Co.

Easton, Pa.

We take pleasure in quoting you on Alpha Portland Cement delivered in carload lots F. O. B. cars station named above as follows:

In cloth sacks, $— per standard barrel (376 lbs. net); in paper bags, seventy (70) cents per barrel less than cloth price; in bulk—$1.05 per barrel less than cloth.

*Price for immediate acceptance.

This price is on a quantity to be ordered by you for shipment within fifteen days from date of your order.

Terms of Payment: On approved credit, 10 cents per barrel off for cash in ten days from date of invoice, or 30 days net from date of invoice.

This quotation is subject to terms, conditions and limitations on both sides hereof.

Yours very truly, Alpha Portland Cement Company.

[fol. 1813] If purchaser fails to comply with terms of payment or with any of the other terms of sale, we reserve the right to cancel unfilled portion of any contract or order purchaser remaining liable for all unpaid accounts.

Orders are approvable as to credit, and if at any time the purchaser's financial responsibility shall be deemed unsatisfactory to the Cement Company, it may require approved security or demand cash payment, and pending same may withhold shipment, and if within a reasonable time, in the judgment of the Cement Company, such cash or approved security has not been furnished, the Cement Company may declare the order or contract cancelled.

In making delivered prices we only guarantee cost at destination and we will not be responsible for shortage or damage occurring in transit; our responsibility ceases when shipments are delivered to Railroad Company on cars at our mill. Railroad Company's bills of lading shall be conclusive as to quantity and good condition of both cement and package when loaded in cars.

The prices herein quoted are the prices on cement. If shipped in cloth sacks, the cloth sacks containing the cement are not sold, but remain the property of the Cement Company and must not be sold or used other than as containers of cement manufactured by the Alpha Portland Cement Company. The purchaser agrees to return said sacks to the Cement Company within ninety (90) days of date of shipment of cement by the Cement Company. A rebate of twenty-five cents (25c) for each sack returned will be allowed by the [fol. 1813½] Cement Company from the invoice price of the cement when the sacks are returned to the Cement Company in good

* Price named is good only for one carload and is subject to change without notice.

[fol. 1829] Govt. Ex. No. 680

April 21, 1919.

J. J. Collister, T. M. Atlas Portland Cement Co., 30 Broad St., New York, N. Y.

Dear Sir:

We have your letter of April 18th, file X-60-14, regarding correction on our Maine Correction Notice of April 12th.

You have shown Fisher's, Penobscot County, on the Maine Central Railroad with a rate of $5.00 from Lehigh Valley. As a matter of fact the correct rate is $4.00, this point being intermediate to Bangor and Ellsworth. Further than this, you show a higher rate from Alsen and Hudson to this point than is in effect to points on either side. This, of course, is correct under the present tariffs issued by the New York Central Railroad but we are asking them to check in rates to this point the same as are now in effect to points on either side. When this is done, it will necessitate another correction notice.

What I want to particularly call your attention to is the fact that no changes should be made by you in these Correction Notices with-
[fol. 1829½] out first taking the matter up with the Lehigh People and ourselves. Had you done so in this case, we could have arranged for checking in the proper rates from Lehigh Valley or it might have been decided that it would be better at this time not to add the point. Won't you kindly in the future handle this matter in accordance with agreement entered into sometime ago, instead of making correction on notices and sending them direct to Mr. Gaines and then notifying us afterwards? The agreement entered into in Mr. Gaines' office sometime ago was that all parties should agree and if matters of this kind are taken up before notices are finally sent to Mr. Gaines, it will, undoubtedly, cut down the number of correction notices which it will be necessary to issue.

Yours truly, C. N. Apgar, Traffic Manager. CA/R.

CC Mr. H. S. Gaines, V. P. Cement Mfgrs. Protective Assn., 19 West 44th St., N. Y.

[fol. 1830] Govt. Ex. No. 681

April Twenty-fifth, Nineteen Nineteen.

Mr. W. E. St. Clair, Sales Manager Castalia Portland Cement Company, Castalia, Ohio.

Dear Sir: In answering your letter of April 23d, we desire first to advise you that the rates published in our rate books are prepared by three of the cement companies who must concur absolutely before the rates are given out for publication.

The rate, therefore, of 33¢ for Lorain, Ohio from Universal, Pa., as shown in our book, is correct, and for your information we quote tariff for this, which is found in Pa. R. R., J. J., I. C. C. 680, for

L.A. and Southern delivery, giving a rate of 8.5¢ per 100 lbs. or $1.70 per ton, which is equivalent to 33¢ per barrel.

This office acts only as a medium in the matter of this information, and if there is still any doubt we shall be glad to have you write us, giving tariff which you have reference to for basing the rate of 37¢ and we will promptly take it up with the three companies.

Yours very truly, —— ——, Secretary. MBP-G.

[fol. 1830½] Govt. Ex. No. 682

September Fourth, Nineteen Eighteen.

Mr. F. M. Coogan, 2nd Vice President Alpha Portland Cement Company, Easton, Pa.

Dear Sir: Beg to herewith hand you a copy of a letter to Mr. Swett, relative to the Atlas Company sending a representative of their Traffic Department to Allentown to check freight rates.

The difficulty of securing a concurrence of the Traffic Departments of the three companies by mail has caused a big delay in getting out the New York book, and I am convinced that it is not practicable to handle the issuing of new freight rate books by mail, and that the best results can only be secured through getting the representatives of the different Traffic Departments together so that they can prove up their differences without any great delay.

I am under the impression that Mr. Apgar has reconciled his rates with the Lehigh Company rates on the books which are now ready, but if it would be convenient, suggest that he attend this meeting at Allentown so that we can all be sure that the rates we print will be concurred in by the Traffic Departments of all three Companies.

Assuring you that your cooperation is highly appreciated, I am,

Yours very truly, —— ——, Vice President. HSG-G.

[fol. 1831] Govt. Ex. No. 683

Alpha Portland Cement Company

Easton, Pa.

September 5, 1918.

H. S. Gaines, Vice President Cement Manufacturers Protective Association, 19 West 44th Street, New York City.

My Dear Mr. Gaines: I have your letter of the 4th also note copy of your letter to Mr. Swett. Mr. Apgar has been co-operating with the Lehigh Co. and will be very glad to continue this co-operation. He is in close touch with the Lehigh Traffic Department and if they will notify him when the Atlas representative gets there

he will go to Allentown and endeavor to finish up the checking of these rates.

If there is anything Mr. Apgar or myself can do in this matter, do not hesitate to call upon us.

Yours very truly, F. M. Coogan, 2nd Vice President.

[fol. 1831½] Govt. Ex. No. 684

Lehigh Portland Cement Co.

Allentown, Pa.

Sept. 5, 1918.

Mr. H. S. Gaines, Vice-President Cement Manufacturers Protective Association, 19 West 44th St., New York City.

Dear Sir: Your letter of the 4th to Mr. Swett has been referred to me for attention and in this connection would advise that we will prepare ourselves to entertain representatives of the Atlas and Alpha Companies in our offices, Monday, September 9, for the purpose of checking New York, Pennsylvania, New Jersey and various other rate books. I have communicated with Mr. Apgar in line with your suggestion to Mr. Swett and he is agreeable.

Personally, I feel that this is the best way to go about this matter, as the way we have been endeavoring to iron out these discrepancies has caused us a lot of work without getting any place.

Unless we hear to the contrary we shall expect these gentlemen to be present here commencing on Monday, and I would be very glad to have you inform the Atlas representatives to come prepared to stay all week if necessary to get this matter out of the way.

Yours very truly, W. F. Clark, Traffic Manager.

[fol. 1832] Govt. Ex. No. 685

June 1, 1915.

The Lehigh Portland Cement Co., Allentown, Penna.

Attn. Mr. W. F. Clark, T. M.

Gentlemen: We notice that your West Virginia traffic sheet number six shows up Charleston, W. Va. for B. & O. and N. & W. delivery as $2.10 per net ton from the Lehigh Valley Mills, whereas it should read—Charles Town, W. Va. with a $2.74 rate for N. & W. delivery and $1.90 for B. & O. delivery.

Trust you will not object to our mentioning these variations as we come to them from time to time as it is simply done in line with co-operation.

Very truly, Security Cement & Lime Co. —— ——,
Traffic Manager.

[fol. 1832½] Govt. Ex. No. 686

Lehigh Portland Cement Co.

Traffic Department

In reply please refer to file B-48-W. Va.

Allentown, Pa., June 2, 1915.

Mr. P. C. Somervell, T. M. Security Cement & Lime Co., Hagerstown, Md.

Dear Sir: I have your letter of June 1st in regard to rate to Charles Town, W. Va.

We have issued correction sheet covering this point and you will find copy of same attached.

We certainly do not object to your calling these discrepancies to our attention, but rather appreciate any co-operation which you may give us in this respect.

Yours very truly, Lehigh Portland Cement Company. W. F. Clark, Traffic Manager.

[fol. 1833] Govt. Ex. No. 687

March 1, 1916.

W. E. Miner:

On Friday, February 25th we received freight rate books for all of the Eastern territory, including Ohio. These books, as I understand, are to be used in making prices, whether the rates are correct or not. The books are corrected up to a recent date, but there have been a number of corrections issued since the first of the year, i. e., Notices 53 to 66 inclusive. Just how many of these correction notices have been applied cannot be developed without checking.

I am returning herewith four (4) sets of the books, together with all correction notices from January 3rd to February 28th inclusive.

The number of these rate books needed by this office, branch offices and salesmen are as follows:

New England	*15
New York State	*13
Pennsylvania	*12
New Jersey	*12
Maryland, Delaware and District of Columbia	†10
Virginia	6
West Virginia	9
Ohio	7

*Letter to Sec. 3/27/16, asks for additional books.
†See memo., 3/21/16, to Mr. McFarland.

[fol. 1833½] I understand from Mr. Coogan that additional sets can be secured from the Association. If you will secure the number of sets above enumerated and have them corrected to date, we will undertake to make the additional corrections — notices are issued. We would like to have these books ready for distribution by the end of this week, so that all of our quotations beginning with Monday next, can be made to conform with the rates shown in the Association books.

Yours very truly, —— ——

NOTE.—In answer to this memo. we received additional books from the assn. but in sending them to us they sent 8 Ohio books short. As the books are to be used in Ohio we did not (rest mutilated.)

[fol. 1834] GOVT. EX. No. 688

The Atlas Portland Cement Co.

New York

March 16, 1916.

Kimball:

Kindly refer to your memorandum of March 1st, addressed to Mr. Miner reading as follows:

"On Friday Feb. 25th we received Freight Rate Books for all of the Eastern territory including Ohio. These books, as I understand it, are to be used in making prices whether the rates are correct or not. The books are corrected up to a recent date, but there have been a number of corrections issued since the first of the year, i. e., 53 to 66 inclusive. Just how many of these correction notices have been applied cannot be developed without checking.

I am returning herewith four sets of the books together with correction notices from Jan. 3rd to Feb. 28th, inclusive.

The number of these Rate Books needed by this office, branch offices and salesmen are as follows:

[fol. 1834½] New England..... 12
New York State..... 12
Pennsylvania 12
New Jersey..... 12
Maryland, Delaware, Dist. of Columbia..... 7
Virginia 6
West Virginia..... 9
Ohio 10

I understand from Mr. Coogan that additional sets can be secured from the Association. If you will secure the number of sets above enumerated and have them corrected to date we will undertake to make the additional corrections as correction notices are issued.

We would like to have these books ready for distribution by the end of this week so that all of our quotations beginning with Monday next can be made to conform with the rates shown in the Association books."

For your information, would advise that we have checked over the book covering Freight Rates to points in West Virginia, and find 618 errors divided as follows:

From Universal	205	errors.
" Fordwick	213	"
" Union Bridge	104	"
" Lehigh District	96	"
Total	618	

(Signed) W. Young.

[fol. 1835] GOVT. EX. NO. 689

Alpha Portland Cement Co.

Easton, Pa.

May 18, 1917.

Mr. C. W. Bacon, Secretary Cement Manufacturers Protective Association, Commercial Trust Building, Philadelphia, Pa.

DEAR SIR: We have your favor of May 17.

We are working up a table which will be in the nature of a supplement to the present freight rate schedules, increasing the rates by 15%. While, as stated in Mr. Moyer's letter, this would not be quite perfect, but at the same time there would certainly be no loss to any of the cement manufacturers and there would in no way be any hardships put on our customers. I will explain in detail at the Meeting on Monday how this supplement will be worked out.

It was my intention to use this supplement and then to start in working on the new freight rate schedules, getting them prepared and printed as soon as possible, at which time they could be distributed and replace the old freight rate schedules. It would be a [fol. 1835½] physical impossibility to get up the new rates and have them tabulated and printed in time for distribution by July 1. This is a job that will take at least two or three months.

The method as suggested above has been talked over with two or three people and I believe you will find it entirely satisfactory.

Yours very truly, F. M. Coogan, 2nd Vice President.

[fol. 1836] Govt. Ex. No. 690

Cement Manufacturing Protective Association

Philadelphia, Penna.

Charles W. Bacon, Secretary

The Interstate Commerce Commission have authorized an advance in all freight rates, including portland cement. These advances become effective just as soon as the tariffs can be printed. Some of the tariffs have been printed and went into effect on April 1st. The others will be effective just as soon as they are printed. Pending reprinting of freight schedules, you may arrive at the freight rates now effective under this advance (including war tax on freight) by making the following changes in your freight rate schedules:

All rates up to 19¢ per barrel, incl., advance						4¢	per barrel.
" "	from 20 to 52¢, inclusive,			"	5¢	"	"
" "	" 53 " 86¢		"	"	6¢	"	"
" "	" 87 " $1.19		"	"	7¢	"	"
" "	" $1.20 " 1.52		"	"	8¢	"	"
" "	" 1.53 " 1.86		"	"	9¢	"	"
" "	" 1.87 " 2.19		"	"	10¢	"	"
" "	" 2.20 " 2.52		"	"	11¢	"	"

[fol. 1836½] This schedule will not be entirely correct in all cases, as where the rates are made up on a combination of locals, there would be an advance equal to approximately double the above figures. But the above figures will serve generally until such time as we are able to have new books printed and distributed.

April 5, 1918.

[fol. 1837] Govt. Ex. No. 691

Alpha Portland Cement Company

Easton, Pa.

Aug. 23, 1920.

J. J. Collister, Traffic Mgr. Atlas Portland Cement Co., 30 Broad St., New York, N. Y.

Deir Sir: Last week at a meeting of the Committee of the Cement Mfrs. Protective Association it was suggested that we work out a key to be put out by the Association for use until such time as we could get out the new Freight Rate Books. I understand the matter has been submitted to Mr. Cox and he has approved of the plan to do this even though it might not, in all cases, represent the exact freight rate.

I am attaching a schedule which was prepared by the Lehigh

Company which we have checked over and which has our approval. This is slightly different in some cases from the schedule put out by the Mid-West but, under present circumstances, it could be used all right. For the convenience of Mr. Hulsart, I would suggest this schedule be placed in the Association Office and be sent out with a [fol. 1837½] note somewhat in the form of the Mid-West which reads as follows:

"To Subscribers:

Advance freight rates become effective August 26, 1920; attached is a table which may be found convenient in figuring the advance freight rates recently authorized by the Interstate Commerce Commission."

If you approve, will you please pass this on to the Association?
Yours truly, F. M. Coogan, Second Vice-President. FMC/R.

Approved: J. J. Collister.

[fol. 1838] Govt. Ex. No. 692

Cement Manufacturers' Protective Association

New York

August 25th, 1920.

To Member Companies:

Enclosed herewith are copies of a table which may be found convenient in computing the advance freight rates recently authorized by the Interstate Commerce Commission to become effective August 26th, 1920.

The use of this table and its form has been approved by the Association Attorney.

Very truly yours, Cement Manufacturers Protective Association. C. Raymond Hulsart, Vice-President.

[fol. 1839] GOVT. EX. No. 693

August 27, 1920.

Mr. Stinson,
" O'Brien,
" Feeks,
" Abbott,
" Swallow,
" White.

GENTLEMEN: Enclosed herewith is a correction notice #138 from the Cement Manufacturers Protective Association to be used in conjunction with the freight rate books now in your possession.

Do not change the figures in the rate books for the present, as figures shown on the enclosed list will not absolutely conform to

the new rates as they will appear in Railroad Tariffs when issued. They are as close as can be figured for the time being, but inasmuch as they are not absolutely correct, there will be another correction sheet sent you later.

However, these figures are to be used when quoting for new market business.

Kindly acknowledge receipt of same and oblige,

Very truly yours, Sales Department. WMF/SP.

[fol. 1839½] Govt. Ex. No. 694

August 27, 1920.

Dear Mr. Stinson: Referring to yours of the 26th instant on freight rates. I enclose you herewith three copies of a key furnished by the Cement Protective Association on the freight rate books.

Do not correct your books according to this sheet, as I was informed yesterday, while at Easton, that the figures shown on this sheet do not correspond to the exact freight rate, having only been made up for temporary use.

The Traffic Managers of the Lehigh Valley District are now working on the corrections, which will be issued in accordance with the tariff.

On our contract shipments the price will be increased in exact accordance with the present effective railroad rate. On business shipped at the prevailing market prices, we will use the figures shown on the Association's sheet, so as to still bear in mind the Lehigh Valley competition. In other words, our prices will be made up based on a mill price of $2.50 Lehigh Valley and $2.60 Hudson plus $1.00 for bags, plus the freight as shown on the Association's sheet, using the price that figures the lower. We will pay no attention to other basing prices.

Very truly yours, Sales Department.

[fol. 1840] Govt. Ex. No. 695

Knickerbocker Portland Cement Company

New York City

August 26, 1920.

Mr. W. M. Floring, Sales Department, Knickerbocker Portland Cement Company Inc., New York City, N. Y.

Dear Sir: This will acknowledge your instructions of the 24th inst., pertaining to advance in freight rates, copy of which we have forwarded to Messrs. Steer and Lovejoy.

As soon as the method of figuring this advance is definitely settled we will appreciate this information.

Very truly yours, Knickerbocker Portland Cement Company, Inc. J. W. Stinson, Local Manager.

[fol. 1840½] Govt. Ex. No. 696

March 18, 1921.

E. C. Shaffer, P. O. Box 1014, Schenectady, N. Y.

Dear Sir: We are sending you under separate cover a freight rate book giving rates to different points in New York state; also a key to be used in working out the present rates. The rates as shown in the freight rate book are the old rates in effect prior to the advance on August 26th last, at which time a 40% increase become effective. Therefore, in checking up the present rates look up the freight rate in the book and refer to the key to get the new rate. Our freight rates are all worked out on the barrel basis and include the war tax; therefore, the customer when settling invoices is allowed to deduct the freight rate and war tax from the price at which the cement is invoiced at destination.

At the present time base your prices at $2.00 Lehigh Valley, which is our district, and when figuring prices in competition with other districts use a mill basis of $2.10 Hudson or Alsen and $1.80 Universal. Our charge for cloth sacks in still 25¢ each, or $1.00 per barrel; the price in paper sacks being 75¢ per barrel less than [fol. 1841] the price in cloth, or in other words, when figuring the price in paper add 25¢ to the net price of the cement.

When quoting the cost of package and freight are to be added to the net mill prices given above in all cases, and quote only delivered prices.

The net prices given you herewith are prices which we use when quoting dealers. At the present time our differential when quoting consumers is 10¢ per barrel, although when in any locality the dealers are getting a larger differential it is our policy to co-operate with them, and when we do quote a consumer in such locality to quote retail prices on the same basis as being used by the dealers.

We are attaching herewith a copy of one of our contract forms, also one of our acknowledgments, and you will note on the back of this letter the terms and conditions under which our sales are made. We would suggest that you read these over carefully.

If there is anything that is not absolutely clear to you, kindly advise us.

Very truly yours, Bath Portland Cement Co. —— ——, Second Vice President.

[fol. 1841½] Govt. Ex. No. 697

Alpha Portland Cement Co.

General Offices: Easton, Pa.

February 25, 1916.

Security Cement & Lime Co., Hagerstown, Md.

Attention of Mr. P. C. Somervill, T. M.

GENTLEMEN: Replying to your favor of February 24th, would advise that it is the general understanding that the Cement Companies will use the books published by us. This is the book which we are using and which we will continue to use.

For your information, I might state that the Lehigh Company and ourselves watch the changes and exchange correction notices.

With kindest personal regards, I remain,

Yours very truly, C. N. Apgar, Traffic Manager.

[fol. 1842] Govt. Ex. No. 698

Alpha Portland Cement Company

Easton, Pa.

Dec. 20, 1920.

Cement Manufacturers Protective Assn., 19 West 44th St., New York, N. Y.

GENTLEMEN: Yours of Dec. 17th. We know that there will be some difference between 40% of the actual rate per ton reduced to barrels as against 40% of barrel rate in our Freight Rate Book, but it was decided that regardless of the fact that the per ton rate increased 40% and reduced to barrels would be different than 40% of the book rate; the book rate increased 40% was to be used in all cases until such time as new freight rate books were compiled at the actual tariff rate per ton reduced to the equivalent in cents per bbl. Therefore, the book rate should be increased in accordance with the supplement issued and such rates used for figuring purposes.

We figure that on freight rates of 75¢ per bbl., the increase of 40% would be 30¢ per bbl., which would make the rate to be used at present $1.05 per bbl.

Yours truly, C. N. Apgar, Traffic Manager.

[fol. 1842½] Govt. Ex. No. 699

Knickerbocker Portland Cement Company, Inc.

New York City

December 10, 19t0.

Knickerbocker Portland Cement Company, Inc., New York City, N. Y.

Gentlemen: Having reference to the present Universal basing price, I have been asked to quote this morning to Willimantic, Connecticut, and I note that the old Universal rate to this point is 75 cents. The Freight Correction Notice No. 138, which covers a 40 per cent increase, does not show a rate of 75 cents, therefore am I to understand that we will take the difference between the old rates of 74 and 76 cents, which are now respectively $1.04 and $1.08? Computing on this basis the price at Willimantic should be $4.21 per barrel to the consumer. Kindly advise if this is correct.

I also wanted to arrive at a price to Houlton, Maine this morning and find that the Freight Correction Notice does not show the present [fol. 1843] rate of freight above $1.25. We are, therefore, somewhat in the dark as to how to compute the freight rates to points in Northern Maine which took a higher rate of freight than $1.25 per barrel including war tax.

Very truly yours, Knickerbocker Portland Cement Company, Inc. J. W. Stinson, Local Manager.

[fol. 1843½] Govt. Ex. No. 700

December 13, 1920.

Dear Mr. Stinson: Referring to yours of the 10th beg to advise that the old Universal rate of 75¢ is increased under the new 40 per cent increase to $1.06 per barrel, which includes the War Tax.

Regarding the other rates above $1.25 per barrel, multiply the old rate by 40 per cent, then take 3 per cent of this 40 per cent for the additional War Tax, adding to the old rate the 40 per cent increase and the additional 3 per cent War Tax. This gives you the new rate as close as we can figure it at this time without the published tariffs.

As a matter of fact, I have learned since returning from Boston that there are about four kinds of prices out. This difficulty will be overcome shortly, I hope, by the issuance of new freight rate books.

Very truly yours, Sales Department.

[fol. 1844] Govt. Ex. No. 701

Alpha Portland Cement Co.

Easton, Pa.

June 16, 1917.

Mr. C. W. Bacon, Secretary Cement M. Protective Association, Commercial Trust Building, Philadelphia, Pa.

Dear Sir: We have your favor of the 12th inst. relative to the matter of loading cars. Inasmuch as we will not have a representative from this Company present at the meeting on the 18th, we will, of course, not have our figures at this time.

My opinion is that so far as the Cement Protective Association is concerned, it would be a duplication of effort if you were to take any steps looking toward gathering statistics on this question. The General Association have asked for these statistics and they will, no doubt, publish and send them to all the members. Therefore, I do [fol. 1844½] not think it necessary for your Association to take any action and to open up discussion on this question.

Yours very truly, F. M. Coogan, 2nd Vice President.

[fol. 1845] Govt. Ex. No. 702

August 25, 1917.

Mr. J. P. Beck, Secretary Portland Cement Association, Chicago, Ill.

Dear Sir: We would thank you very much if you would let us have 12 copies of booklet on Trade Practice.

This Association is about to extend its service and your booklet on the subject of Trade Practice will be of great assistance in organizing our new department.

Thanking you, we beg to remain

Yours truly, Cement Mfrs. Protective Assn, —— ——, Secretary.

Philadelphia, Penna.

Charles W. Bacon, Secretary

Dec. 5, 1916.

Dear Sir: In the near future, we will exchange all information with the Mid-West Bureau. This will include contract and credit reports as of Dec. 1st; also their daily report of contracts.

For the purpose of cutting down the work and expense of mailing as much as possible, we would like to know which companies desire the daily contract report of the Mid-West Bureau.

Will you kindly advise if you wish this information mailed to you.

Yours truly, Cement Mfrs. Protective Ass'n., by Charles W. Bacon, Secretary. CWB/W.

Endorsed: If you please, one copy Allentown Port. C. Co.

[fol. 1847] Govt. Ex. No. 706

Philadelphia, January 22, 1916.

Dear Sir: You are no doubt aware of the formation of the Protective Association by the eastern cement mills for the purpose of handling information as to contracts, credits, etc.

This new Association will take over the credit interchange, which has been handled by the writer personally for the past two months, on February 1st, and all future reports of unpaid accounts, notes receivable and accounts placed in attorneys' hands will be asked for by, and sent to, the Secretary of the Association at his office, #220 Commercial Trust Building, Philadelphia

The President of the Association, Mr. R. E. Griffith, of the Giant, has directed the Secretary to call a special meeting for Monday, January 31st at eleven o'clock A. M., of which meeting you will receive notice from the Secretary.

This meeting is to enable the Secretary to become acquainted with the credit men and to discuss with them matters pertaining to exchange of credit information, &c.

The writer trusts that you will be able to attend the meeting, which will be held in the Association's office at the above address. You should receive notice from the Secretary at about the same time this letter reached you.

Yours very truly, W. D. Lober.

[fol. 1847½] Govt. Ex. No. 707

Knickerbocker Portland Cement Company, Inc.

General Offices: 30 East 42nd Street, New York City

January 27, 1919.

Mr. H. S. Gaines, Vice-President Cement Manufacturers Prot. Assn., 19 West 44th Street, New York City.

My Dear Mr. Gaines: In the monthly report of "Unpaid Accounts and Bills Receivable." I notice that no Government accounts are ever listed. Will you please explain the reason.

Very truly yours, A. D. Naylor, Treasurer.

[fol. 1848] Govt. Ex. No. 708

January Twenty-eighth, Nineteen Nineteen.

Mr. A. D. Naylor, Treasurer Knickerbocker Portland Cement Co., 30 East 42nd Street, New York.

Dear Mr. Naylor: Responding to your letter of January 27th, in regard to our monthly report of Unpaid Accounts and Bills Receivable—not listing any Government accounts:

We do not list these accounts because, as I understand it, there is no question of the credit of the Government, and it was not considered that because the Government owed any one concern any large sum of money, that fact would have any influence upon other companies accepting orders from the Government.

At the time this action was taken we were actively engaged in the war and patriotism may have had something to do with the question, but I think the whole thing was based upon the fact that no matter how much the Government owed the different cement companies, the fact of their account being delinquent would not have any effect upon others accepting orders.

Yours very truly, —— ——, Vice President.

[fol. 1848½] Govt. Ex. No. 709

Knickerbocker Portland Cement Company, Inc.

New York City

January 31, 1919.

Mr. H. S. Gaines, Vice-President Cement Manufacturers Prot. Assn.,
19 West 44th Street, New York City.

Dear Mr. Gaines: Referring to your letter of January 28th with regard to the monthly report of Unpaid Accounts and Bills Receivable. I do not know that there should be any question about the responsibility of the Government, and that was not the point I had in mind in asking the question.

While the question of the responsibility of the Government is not to be considered, nevertheless, it would be quite interesting to me, as the credit representative of this company, to know how promptly the Government settles their account with the various cement companies, or if there is anything of ancient date outstanding.

[fol. 1849] It may be possible that I do not quite get the idea of the purpose of the Association and the different reports, and you may eventually place me in the class of "foolish questions." I, however, have some ideas as to the full advantages to be derived from Association work and I am going to impose upon you before long by asking you to take lunch with me in order that we can discuss some of these questions.

With kindest regards, I remain,

Very truly yours, A. D. Naylor, Treasurer.

Nazareth, Pa.

3-17-19.

Cement Mfrs. Prot. Assn., 19 West 44th Street, New York, N. Y.

Gentlemen: This is to advise that the account of Theodore Kramer, Williamstown, Pa., which has appeared on our books for some time, in the amount of 2.97, has been charged off by us.

Very truly yours, R. W. Hilles, Manager of Sales & Credits.

[fol. 1850½] Govt. Ex. No. 712

Cement Manufacturers Protective Association

Philadelphia, Penna.

March 30, 1916.

Mr. Loring A. Cover, President Security Cement & Lime Co., Equitable Building, Baltimore, Md.

Dear Sir: At the meeting of the Cement Manufacturers Protective Association, held March 20th, in Philadelphia, it was decided that when a bin testing charge is made it should be designated by some form. Therefore, in the future when contract has a bin testing charge we would suggest that after the price you put the word "plus" and add the number of cents to be charged for the aforesaid test.

In other words, if a contract price is 1.75 and there is a bin test of 3¢ to be charged, put the price down $1.75 plus 3¢ and that will be understood to be a bin test charge.

Very truly yours, Cement Mfgrs. Protective Assn., by Chas. W. Bacon, Secretary.

[fol. 1851] Govt. Ex. No. 713

April 20, 1916.

Mr. W. L. Sperry, President Cumberland Hydraulic Cement & Mfg. Company, Cumberland, Md.

Dear Mr. Sperry: Have you any objection to telling me whether or not you are at this time adding three cents (3¢) per barrel to the price of cement to cover bin storage should the material be specified as having to be bin tested and stored, subject to the contractor's shipping instructions?

I will very much appreciate your advice.

Very truly yours, —— ——, General Sales Manager.

[fol. 1851½] Govt. Ex. No. 714

Cumberland Hydraulic Cement and Mnfg. Co.

Cumberland, Md.

April 21, 1916.

J. K. Barbour, Gen'l Sales Mgr. Security Cement & Lime Co., Hagerstown, Md.

Dear Sir: Your favor of the 20th received and in reply would state it is our understanding now that all bin test cement requires the adding of 3¢ per barrel to cover storage, should the material be [fol. 1852] specified as having to have bin test and stored subject to the contractor's shipping instructions. We expect to adhere to the above unless we find that the other fellow is not adding it to his price and in that event, we will be very much inclined to put it up to the other fellow as why the 3¢ is not added.

Yours truly, W. L. Sperry, President.

[fol. 1852½] Govt. Ex. No. 715

April 22nd, 1916.

Mr. W. L. Sperry, President Cumberland Hydraulic Cement & Mnfg. Co., Cumberland, Md.

[fol. 1859] Govt. Ex. No. 727

May 10, 1916.

Mr. R. E. Griffith, Vice-President Giant Portland Cement Company, Penna. Bldg., Philadelphia, Pa.

Dear Sir: We have your favor of the 9th inst., asking us if we have received a reply from Lehigh as to how they arrived at the price reported on contract they closed with Samuel Larrivee, Williamsport, Pa.

In reply would say, we wrote Lehigh on April 24th and on the 27th we received their reply stating that they had reported to us a price of $1.81. We returned to them their card showing the price reported to us, which was not $1.81 but $1.64. We have just received another reply, in which they enclose a new card covering this contract, with the corrected price, which is $1.81.

Yours very truly, Cement Mfrs. Protective Ass'n, by —— ——,
Secretary. CWB/W.

[fol. 1859½] Govt. Ex. No. 728

Lehigh Portland Cement Co.

Allentown, Pa.

May 24, 1916.

Mr. E. P. Alker, Secy. Pennsylvania Cement Company, 42d Street Building, New York, N. Y.

Dear Sir: Mr. S. G. Taylor, now with your company, formerly with the Lehigh Company, has been making intimations to the Trade in New York State that we have been cutting prices in some sections of the country, mentioning towns in New York State where there has been a recent reduction in freight rates.

You know, and Taylor should know, that the policy of the Lehigh Company is not to cut the price, and it is not fair to make a statement of this kind when there is no truth to it. The fact of the matter is I would not allow any Lehigh salesman to slander a competitor in any way, even if the competitor's trade ethics were not clean.

Taylor received fair treatment from this company when he was [fol. 1860] in our employ, and you will remember I gave him a very good send off when you asked me regarding his ability, etc. Taylor is energetic but I am inclined to believe he is a bit over-zealous.

The deal that he made in Syracuse does not sit right with the rest of us, and I believe, Ted, after further investigation you will agree with us that further sales to the party in question should be made on the consumer's basis.

Yours truly, B. L. Swett, Eastern Sales Manager.

[fol. 1860½] GOVT. EX. No. 729

May 26, 1916.

Mr. Bert L. Swett, Eastern Sales Mgr. Lehigh Portland Cement Company, Allentown, Pa.

DEAR SIR: I have your favor of May 24th, and note that you have had reports on Mr. S. G. Taylor. I do not believe that Taylor has circulated reports that the Lehigh Company has been cutting prices. I will however, take the matter up with him at once. Regarding the deal in Syracuse, I do not see why, if the Wilson & Greene Lumber Company stock cement and retail it to the trade, they should not be entitled to the dealer's price. They have already stocked Pennsylvania, are advertising it in street-cars, and newspapers at their own expense, which I do not think they would do if they were not after the retail trade.

Furthermore, they are negotiating with the D. L. & W. R. R. for additional property on which to erect warehouses. When these are completed they intend stocking a full line of building materials in connection with their lumber trade. Under these circumstances, I would very much like to have someone point out to me a reason why they should not be entitled to the dealer's price.

Yours truly, Pennsylvania Cement Company. —— ——,
Sales Mgr. EPA:Y.

[fol. 1861] GOVT. EX. No. 730

Nazareth Cement Company

Nazareth, Pa.

July 12, 1916.

Charles W. Bacon, Sec'y Cement Mfgrs. Protective Asso., Philadelphia, Pa.

DEAR SIR: We have learned that the Lawrence Cement Company are shipping cement to Edward Atkins, Wayne Jct., Penn'a., on Crease Mill Operation, William Steel & Son, Gen'l. Contractors, Edward Adkins, Sub. Contractor, at less than market price. Can you advise us the amount of the contract and the price covering this operation.

Thanking you for your kind attention, we remain,
Very truly yours, Nazareth Cement Company, by S. J. Fehnel.

[fol. 1861½] GOVT. EX. No. 731

July 19, 1916.

Mr. S. J. Fehnel, Nazareth Cement Company, Nazareth, Penna.

DEAR SIR: In answer to your favor of the 12th inst., with regard to the Lawrence Cement Co's., contract with Edward Atkins, Wayne

Junction, Pa., for the Crease Mill operation, beg to advise that we have received communication from Lawrence stating that this job should be included in their Contract #121—Edward Atkins, Phila., —in other words, the contract should read:

Contract # 121.
Edward Atkins, Philadelphia, Pa.
Armory, 32d St. & Lancaster Ave.
Felin Bldg., Germantown & Hunting Park Ave.
City Club, Broad & Spruce Sts.
Crease Mill Operation.
Factory Bldgs., 19th & Glenwood Ave.
Barn House, Westermoreland Park and Girard College.
Total Quantity, 10,000 bbls.; balance due, 4,919 bbls.
Price 1.54. Expn. Completion of job.

[fol. 1862] This is all the information we have. As you see, the total quantity is to cover five different jobs. We are unable to tell the amount of cement apportioned to each job.

Yours very truly, Cement Mfrs. Protective Assn., by ——
——, Secretary. CWB/W.

[fol. 1862½] GOVT. EX. No. 732

Vulcanite Portland Cement Co.

Philadelphia, May 7th, 1917.

Mr. D. H. McFarland, Assistant to President Atlas Portland Cement Co., #30 Broad Street, New York, N. Y.

DEAR MAC: It has been reported to us by an engineer in charge of the work that the American Metal Works, who we understand are taking bids on a new factory building at Stenton Avenue & Rockland Street, Germantown, Philadelphia, have an option on all of the "Atlas" Portland Cement required for the above work at $2.09 per barrel in cotton f. o. b. Philadelphia, the contractors having been advised by this engineer that they can use this price in figuring, and that the option can be assigned over to the successful bidder.

[fol. 1863] I am rather at a loss to understand this as this is based on the old $1.35 mill basis to dealers which expired some time ago, and there does not appear to be any contract of this kind filed by your company as of April 1st, and I have not been able to locate it since. Possibly I have missed a filing which occurred during the early part of April, and you have a contract with these people as an industrial for their requirements.

Your advice in regard to this matter would be appreciated, and we would naturally drop the matter entirely had you closed an industrial contract on this job.

Yours very truly, W. D. Lober, Vice President.

[fol. 1863½] Govt. Ex. No. 733

Memorandum

D. H. McF.:

Bids are now being asked for and are due May 11th, by the American Metal Works through Kern Dodge, engineer, Morris Building, Philadelphia, for construction of main factory building.

In this connection, attached find copy of letter which Engineer Kern Dodge is sending out to the various bidders.

We are unable to find any record pertaining to this matter, but please note the transaction on sheet 278, contract 329.

J. F. T.

[fol. 1864] Govt. Ex. No. 734

Kern Dodge, Engineer, Morris Building

May 3, 1917.

Gentlemen: Please Note: Owners have option on all the Atlas Cement required in the construction of the above-named building at $2.09 per barrel in cloth bags. This price can be used in figuring and the option can be assigned to the successful bidder.

P. & R. R.R. siding on the ground alongside proposed building can be used for delivery of material. It is suggested that bidders examine the site of the proposed building at Stenton Avenue and Brookland St., Germantown.

Engineer will be pleased at any time to answer any questions relative to this work. Telephone numbers, Spruce 3161 and 3162.

Yours very truly, Kern Dodge.

[fol. 1864½] Govt. Ex. No. 735

May 10, 1917.

Mr. J. F. Twamley, Vice-President Bath Portland Cement Co., New York, N. Y.

Dear Sir: Your memorandum to Mr. D. H. MacFarland, with copy of letter from Kern Dodge, engineer, in regard to factory building for the American Metal Works, Philadelphia, has been forwarded to us by the Atlas Co., asking that the matter be handled through the Association.

In reference to this matter would say that on April 4th the Atlas Co., filed with this office their contract P-10329 with the American Metal Works for factory, Louden and Stenton Ave., Phila.—American Metal Works owners and builders. This appeared on daily sheet #278. On April 19th the Atlas Co., transferred this sale from the American Metal Works to W. C. Shipley of St. Martin's Coal Co. This transfer appeared on sheet #307.

Referring to the last paragraph of your memorandum in regard to transaction on sheet #278, contract #329. This contract—[fol. 1865] #329—was with the Pennsylvania Co., for the same work, but was canceled on May 8th.

Hoping the above will answer your request satisfactorily, we remain

Yours truly, Cement Mfrs. Protective Assn., by —— ——,
Secretary. CWB/W.

[fol. 1865½] GOVT. EX. No. 736

May 10, 1917.

Mr. D. H. MacFarland, Asst. to President Atlas Portland Cement Co., New York, N. Y.

DEAR SIR: We have your favor of May 9th, enclosing communications from Mr. Lober, Vice-President of the Vulcanite Portland Cement Co., and Mr. Twamley, Vice-President of the Bath Portland Cement Co.

In reply would say we have notified both Mr. Lober and Mr. Twamley that you filed with us on April 4th contract P-10329 with the American Metal Works for factory building and that on April 19th sale was transferred to the St. Martin's Coal Co. We have advised them on what sheets these transactions appear.

The contract Mr. Twamley refers to on sheet #278—contract #329—with the Pennsylvania Co., has been canceled and we have advised him of this fact.

Yours truly, Cement Mfrs. Protective Assn., by —— ——,
Secretary. CWB/W.

[fol. 1866] GOVT. EX. No. 737

Lehigh Portland Cement Co.

Allentown, Pa.

November 16th, 1917.

Mr. H. S. Gaines, V.-Pres. Cement Mfgrs. Protective Asso., Philadelphia, Pa.

DEAR SIR: For your information, one of the dealers whose contracts have been apparently largely fictitious or over-estimated, is the Massachusetts Lime & Cement Company, East Cambridge, Mass. This concern is constantly retailing cement at a price lower than the prevailing Boston team-load price, drawing the cement from contracts which specify operations very different from those on which the cement is being delivered.

You will find in the neighborhood of twelve or fifteen of their contracts listed under East Cambridge, Mass., and if they can be checked up the information will, no doubt, prove useful.

Yours truly, Lehigh Portland Cement Company. B. L. Swett, Eastern Sales Manager.

[fols. 1866½-1869] Govt. Ex. No. 738

Tidewater Portland Cement Company

Baltimore, Maryland

February 4, 1919.

Mr Robert Griffith, Vice-President Giant Portland Cement Company, Philadelphia, Pa.

My Dear Bob: Today I ran across your proposition, not given to me by word of mouth, but by facts, that your Company quoted a certain contractor the present market price on cement, and agreed that should the general market price decline during the life of the contract, you would make a corresponding reduction in his price.

Is this to be the policy of your Company? I, of course, recognize the fact that you have the right to do this or anything else; but just want to get a line on what you are doing.

With kind personal regards, I am,

Yours very truly, E. R. Stapleton, General Sales Agent.

[fol. 1870] Govt. Ex. No. 739

February 5, 1919.

Mr. E. R. Stapleton, General Sales Agent Tidewater Portland Cement Company, Baltimore, Maryland.

My Dear Stap: I am just down to the office for a few hours today—the first time for some little time and find your little note of the 4th inst., frankly I never was so surprised to hear a statement of this kind in my life, as that this Company quoted a price and agreed to meet any decline on the market. I can say to you first that this is absolutely not true as the writer or anyone connected with this Company would not make such a proposition or has a proposition of this kind been made since I have been in charge of the Sales—and as a sporting proposition I am willing to put up any part of one hundred dollars for there is no truth whatsoever in it, and as I expect to be in Baltimore on Monday next, can you drop me a line to the Albion Hotel and I would be very glad indeed to meet the person that made this statement and collect my hundred dollars at the same time—. Frankly we have never

considered for one moment such a proposition, as it would not be a contract if worded that way. I am coming down to Baltimore to [fol. 1870½] go to the Hospital again, but would like very much indeed to straighten this out before I go therefore, if I can meet you at your office with the party who makes this statement, I will be very glad indeed to do so, before going, if you will drop me a line before I leave Philadelphia, and I will at that time close this matter out.

Yours very truly, —— ——, Vice-President. REG:D.

[fol. 1871] Govt. Ex. No. 740

Dexter Portland Cement Company

Nazareth, Pa.

5-20-19.

Mr. R. E. Griffith, Vice-President Giant Portland Cement Co., Phila., Pa.

Dear Bob: Referring to your question about Dexter quotation at $2.80 f. o. b. South Fork for Croyle Township road job, would advise sale was made at this figure by the Conemaugh Lumber Co. I happen to know that the error was not intentional. Our salesman wrote the correct price of $2.84 on a card. The dealer mislaid the card but did not think anything of it, as it never occurred to him that the price at South Fork could be higher than the Johnstown price, so he quoted the Johnstown price.

We have the contract, but if we had bid the correct price it would have gone to the Penn-Allen dealer, who bid $2.81. Needless to state our contract with the Conemaugh Lumber Co., is at $2.76 per bbl., f. o. b. South Fork.

Very truly yours, Raymond. RWH/M.

[fol. 1871½] Govt. Ex. No. 741

June 11th, 1919.

Mr. F. M. Coogan, Alpha Portland Cement Co., Easton, Penna.

My Dear Mert: I understand that you are making a price of $2.47 in paper and $2.84 in cloth on Alpha at Buckhannon, W. Va. Kindly let me know how you make up these figures.

With kind regards, I remain,

Yours very truly, —— ——, Vice-President. REG/F.

[fol. 1872] GOVT. EX. NO. 742

Vulcanite Portland Cement Co.

Philadelphia

January 19, 1921.

Mr. G. S. Brown, Alpha Portland Cement Company, Easton, Pa.

MY DEAR MR. BROWN: I received your letter of January 17 answering mine of the 11th, and desire to thank you for your full and frank reply to my inquiry.

I have read your letter with much interest and find that our views in regard to the business for the year are very similar.

Recently we have noted an increase in inquiries for quotations and it looks as if prospective buyers were beginning to realize that it would be wise to get any work they may have in sight provided for.

What I think is required is stability of prices rather than lower prices. What I most fear is a congestion of business in the last [fol. 1872½] six or eight months of the year, which will place our industry in a somewhat similar position to that experienced in 1920, especially in respect to deliveries.

With best wishes, I am,

Yours sincerely, Jno. B. Lober, President.

Mr. F. M. Coogan, Secretary Alpha Portland Cement Co., Easton, Penna.

My Dear Mr. Coogan: Mr. Rayner has forwarded your letter of the 17th referring to rate books which you are getting out in different territories. While I, of course, have not seen this particular book, I am willing to say right now that I would like to have one and would sincerely appreciate your sending me such book, or books, as would cover the States of Maryland, Delaware, Virginia, West Virginia, Pennsylvania and New York, and the District of Columbia.

Such expense as is entailed will be cheerfully borne if you will let me know the amount.

With appreciation for your kindness in forwarding one of these books to Mr. Raynor, and, also, your willingness to let us have additional copies, I am,

Very truly yours, —— ——, General Sales Manager. JKB: MS.

[fol. 1874] Govt. Ex. No. 745

June 16, 1915.

Mr. F. M. Coogan, c/o Alpha Portland Cement Co., Easton, Penna.

Personal

My Dear Mr. Coogan: Would it be possible for us to secure two additional copies of your freight rate books covering State of Pennsylvania, and would it be agreeable to you to furnish us these books for the use of the two representatives of our concern, who sell in this particular State? Believe it would be helpful to put these two men in possession of this information as an additional safeguard against error.

Will be glad to have your thought on this, and if you feel disposed to furnish us with the extra copies, your bill for same will be cheerfully paid.

Very truly yours, —— ——, General Sales Manager. JKB: MS.

[fol. 1874½] GOVT. EX No. 746

Lehigh Portland Cement Co.

Young Building, Allentown, Pa.

July 1st, 1918.

Mr. H. S. Gaines, V.-Pres. Cement Mfgrs. Protective Asso., 19 W. 44th St., New York, N. Y.

DEAR SIR: Have you an extra West Virginia price book? If so, I will greatly appreciate if you can let me have it.

Yours truly, B. L. Swett, Eastern Sales Manager.

[fol. 1875] GOVT. EX. No. 747

July 2, 1918.

Mr. B. L. Swett, Eastern Sales Manager Lehigh Portland Cement Company, Young Building, Allentown, Pa.

DEAR SIR: Responding to your letter of July 1st, File 65414-C, we are sending you under separate cover a copy of West Virginia Rate Book, which I take it is what you want.

In your letter you request a price book, which is no doubt a typographical error, inasmuch as you are aware of the fact that this Association does not issue any books in any way connected with price matters.

Yours very truly, —— ——, Vice-President. HSG-G.

[fol. 1875½] GOVT. EX. No. 748

July 12, 1915.

DEAR MR. GOWEN: On my return this morning I find your telegram of the 9th, and have just wired you that if convenient to you I should prefer Thursday, July 22nd, to see the gentlemen whom you mention, as I expected to spend the week end with my family in New Hampshire.

I would like very much to have all of you lunch with me at one o'clock, if you will, on the day that you are here.

I have no doubt at all that the topic which you want to discuss is one that we have a perfect right to discuss, and I know you feel as I do, that if five or six important cement companies get together for a meeting, that it is very often misconstrued. I know this to be so because of the fact that when the United States was looking into the cement situation as applied to previous years, that one of the questions asked me over and over again was, had I been in conference with my competitors. I told them I had if there had been any conference, and then always told them exactly what was dis-

cussed, so that we must be sure with such a meeting as you suggest, that we only discuss the things that can be reported. Please pardon my making this suggestion, as I feel that it already echoes your [fol. 1876] own ideas, but there are so many people eager to misrepresent conditions that I wanted to go on record as to just how we felt.

I hope you will be able to accept my luncheon invitation, which will be a pleasure for me, and if so will you also extend the invitation to the other gentlemen.

Yours very truly, John R. Morron.

[fol. 1878½] Govt. Ex. No. 752

Dec. 6/16.

Ten Cent Differential

Effective on this date, all quotations for Lehigh Cement to consumers will be made at ten cents per barrel higher than to dealers. This in recognition of the small compensation for the service rendered, which is represented by a differential of five cents per barrel between the prices to dealers and consumrs.

Lehigh Portland Cement Company.

Allentown, Penna., December 6, 1916.

[fol. 1879] Govt. Ex. No. 753

Alpha Portland Cement Co.

Easton, Pa.

Announcement to Dealers of 10c. Differential

Effective this date, the Alpha Portland Cement Company has adopetd a differential in favor of the dealer of not less than ten cents

(10c.) per barrel when quoting direct to contractors or consumers for shipment in carload lots.

Since February 23, 1915, we have been using a differential of 5¢. per barrel. We have realized for some time that the 5¢. differential did not represent a fair return to the dealer on capital invested and expense involved in carrying on his business in Portland Cement.

We have not, up to this time, changed this differential for the very good reason that we have found a great many dealers in different parts of the East who have not taken full advantage of even this 5¢. differential.

Recently there has been a campaign of education carried on by the different Dealers' Associations and dealers generally throughout the country relative to the actual cost of doing business. There has also been a very instructive booklet issued by the Federal Trade Commission on this same subject.

[fol. 1879½] In view of these developments, we believe that the dealers will appreciate this change in the method of marketing Portland Cement, and we hope that they will take full advantage of it so that they will be able to carry on the Portland Cement end of their building material business at a profit.

Yours very truly, Alpha Portland Cement Co. G. S. Brown, President.

Dec. 7, 1916.

Messrs. J. P. Hall, Inc., Jersey City, N. J.

Gentlemen: Beginning at once any quotations that we may make to consumers in carload lots will be at a price not less than 10¢ per barrel higher than the price on Atlas Portland Cement to dealers for the same delivery.

Yours very truly, The Atlas Portland Cement Company.

[fol. 1880½] Govt. Ex. No. 755

Edison Portland Cement Company

Office of the President: St. James Building. Broadway and 26th Street, New York City

February Sixth, 1917.

Mr. Charles W. Bacon, Secretary Cement Protective Association, Philadelphia, Pa.

Dear Sir: I am glad to know that you have decided to send out the percentage sheet, showing the percentage relation of the contracts booked by the various member companies as compaired with the total shipments to the first of each month, as, in my judgment, this information is very necessary so that each company may understand just how it stands as compared with the other companies.

I am also glad to be relieved of this work, and I think it is an added advantage that you will be able to get the information to the member companies earlier than I have been, due to my absence from the office at times.

[fol. 1881] I am enclosing herewith a copy of the sheet which I issued last year, and which you will note covers all the months; also a copy of the sheet which I issued as of January 1st.

In my judgment, these figures are much more interesting and instructive if the member companies can see the figures each month as compared with those of the previous months of the same year, and I think it would be well, therefore, if you would take this matter up with the proper parties and secure their judgment as to whether or not it would be wise to follow the form which I have been using.

While it makes no difference to us, as we always know just where we stand so far as the Edison figures are concerned, I think it would be much better in figuring our percentage if you were to use our 1914 shipments instead of 1916, as during 1916 we only operated part of the year, and, consequently, the percentage figured on this basis would be misleading to all the other companies.

If you do not have our 1914 shipments by months, I will be glad to send them to you.

Yours very truly, W. S. Mallory, President.

[fol. 1881½] Govt. Ex. No. 756

Feb. 7, 1917.

Mr. W. S. Mallory, President Edison Portland Cement Co., New York, N. Y.

Dear Sir: I have your favor of February 5th, attaching sheets showing percentage, relative to contracts booked, with the actual shipments for the previous twelve months.

In regard to the Association sending out these percentage sheets, would say that it was not passed on as a regular monthly report, and the reason it was compiled the first of January was that I received a special request from one of the companies for such a report, and as I had to make it up for one, thought it would be well to have a sufficient number of copies made that each member company could have the figures. However, I will read your letter at our meeting on February 19th and also submit copies of your reports for 1915 and 1916, and I believe the Association, as a whole, will think well of it and make it a permanent report to be issued monthly.

I think that your suggestion to make a comparative statement of Edison's figures on their 1914 shipments instead of 1916 is a very good idea, and, inasmuch as I do not have a record of your 1914 shipments by months, I think it would be well for you to mail them to me.

Will advise you of what further action is taken.

Yours very truly, —— ——, Secretary. CWB/W.

July 16, 1919.

Cement Mfgrs. Protective Association, 19 West 44th St., New York City.

Gentlemen: Enclosed herewith find report of total shipments from July 1st to July 15th, 1918, and July 1st to July 15th, 1919.

Yours truly, Glens Falls Portland Cement Co. Geo. F. Bayle, Jr., 2nd Vice-President.

[fol. 1883½] Govt. Ex. No. 760

Glens Falls Portland Cement Co.

Glens Falls, N. Y.

Oct. 14, 1919.

Cement Mfgrs. Protective Association, 19 West 44th St., New York.

Gentlemen: We are enclosing herewith report of our bag returns for the first nine months of 1919.

Your truly, Glens Falls Portland Cement Co. Geo. F. Bayle, Jr., 2nd Vice-President.

[fol. 1884] Govt. Ex. No. 761

Dexter Portland Cement Co.

Nazareth, Pa.

9-8-19.

Miss M. B. Phalen, Secretary Cement Manufacturers Protective Ass., 19 West 44th Street, New York, N. Y.

My Dear Miss Phalen: I acknowledge receipt of yours of the 6th instant. The figures given you on our August report were absolutely correct and should have been reported exactly as we gave them without any alterations in order to give the other Companies the information that they are entitled to. I found that the report was not in the

shape it should have been when sending it in at the end of July and, therefore, went over the August figures and saw that they were absolutely right before mailing them to you. You have given the figures of shipments for the first eight months of 1918 and 1919 and for August of 1918 and 1919 correctly but the notations are not correct. The notation that should have been given with the shipments for the first eight months of 1918, instead of being 105,493 barrels, should [fol. 1884½] have been the amount we showed, namely, 68,646 barrels. The figures for August 1918 given after the three stars should have been 9,190 instead of 28,997 bbls. The way I sent you the report shows exactly what was shipped from our mill. Those are the figures which appear in the body of the report. The notations that I gave you would show the other member Companies exactly what proportion of the actual shipments was Dexter Business and what had been shipped for other Companies; that is, for August 1918 you show 76,000 bbls. shipped from our mill and, according to the notation, the other Companies will deduct 29,000 from 76,000, which would indicate the actual Dexter shipments for August 1918 of only 47,000 bbls. which is incorrect.

The actual Dexter business for August 1918 was 66,563 barrels. As you know, we have shipped for some Companies and other Companies have shipped for us. If we should attempt to put down the various details of these shipments, the other member Companies would never know what our actual shipments were. If you will put them as I send them to you, the other member Companies will know exactly the shipments from our mill and the exact amount of business that is Dexter business.

In order to give that information, however, you will have to disregard the prior reports as on looking them over, I find that they were not made out so that this could be accurately shown.

Very truly yours, Joseph Brobston, Vice-Pres.

[fol. 1885] Govt. Ex. No. 762

New York, December 30, 1919.

Dear Bert: Judging by Contract No. 6178-Lehigh through Bell & Killcullen, we are getting down to the retail business. I don't believe you read the list of jobs and noted how many of them were for less than a carload. If my memory serves me correctly, one of our legitimate trade practices is limiting contracts to a minimum of one carload of cement.

I happened to see an Atlas and a Dragon contract on the same basis and am much interested to know your ideas on this subject.

Sincerely yours, Raymond W. Hilles.

Mr. B. L. Swett, c/o Lehigh Portland Cement Co., Allentown, Pa.

[fol. 1885½] GOVT. EX. No. 763

29th May, 1920.

Mr. Morris Kind, President Hercules Portland Cement Corp., Finance Building, Philadelphia, Pa.

DEAR MR. KIND: Confirming my brief but pleasant chat with you at the Biltmore on Thursday morning last, I will indeed appreciate prompt advice from you as to the exact details of the Washington situation.

I had the pleasure of also saying a word on this subject to Mr. Goode later on Thursday and he too advises that specific data will promptly be sent me.

Aside from my personal desire to cooperate with you, it is a matter of dollars and cents saving to us; consequently, the sooner I receive this data from you the quicker I can adjust it for our individual benefit.

Cordially yours, —— ——, General Sales Manager.
HBW/MSH.

Hercules Cement Corporation

Philadelphia

June 5, 1920.

Security Cement & Lime Co., Hagerstown, Md.

Attn. Mr. H. B. Warner, Gen. Sales Mgr.

DEAR SIR: I have delayed replying to your favor of the 29th waiting for specific information which has just been received.

I am advised that Carson & Gruman of Washington obtained and the District of Columbia bought from S. M. Frazier 805 barrels of Security Cement at $3.20 per barrel net. I regret when the information was sent me they did not give me the date of this purchase, and I am writing to secure this additional data, and as soon as I receive this information I will forward it to you.

Yours very truly, Morris Kind, President.

[fol. 1886½] GOVT. EX. No. 765

7th June, 1920.

Mr. Morris Kind, President Hercules Cement Corporation, Philadelphia, Pa.

DEAR MR. KIND: The information contained in yours of June 5th will permit me to start investigations and the specific data which you promise to forward later will also be helpful.

Permit me to assure you that your advice in matters of this kind is desired and is viewed by us as most co-operative.

Believe me to be,

Cordially, —— ——, General Sales Manager. HBW/MSH.

17th June, 1920.

Mr. Morris Kind, President Hercules Cement Corporation, Finance Building, Philadelphia, Pa.

DEAR SIR: Yours of the 16th is received in the absence of Mr. Warner.

The letter will be placed before him for his attention, upon his return.

Very truly, —— ——, for H. B. Warner, General Sales Manager. MSH.

[fol. 1888] GOVT. EX. No. 768

23rd June, 1920.

Mr. Morris Kind, President Hercules Cement Corporation, Finance Building, Philadelphia, Pa.

DEAR MR. KIND: Thank you sincerely for the specific data covered in your letter of June 16th.

As stated to you in our personal chat your advice in this transaction is viewed absolutely as constructive criticism in that it enables me to protect ourselves during these strenuous times.

With kind wishes, believe me to be,

Very truly, —— ——, General Sales Manager. HBW/MSH.

[fol. 1888½] GOVT. EX. NO. 769

Archibald Cox, Counselor at Law, 233 Broadway

New York, Oct. 27, 1917.

Mr. W. D. Lober, President, &c.

DEAR MR. LOBER: Largely upon the suggestion of Mr. Holman, I am sending you herewith enclosed a letter relating to the misuse of the statistical figures collected and furnished by the Association. It seems obviously desirable to try to stop this. We have thought that you could perhaps address a letter to the proper person in each company stating, in substance, that you enclose a copy of a letter from counsel for the Association which explains itself and send your letter with a copy of my enclosed letter which I am enclosing herewith.

Perhaps you can think of some better way of dealing with the matter, with which you are, I think, familiar. This, of course, represents simply the best suggestion that has occurred to us.

Yours very truly, Archibald Cox

[fol. 1889] GOVT. EX. NO. 770

Cement Manufacturers Protective Association

Philadelphia, Penna.

October 31, 1917.

Charles W. Bacon, Secretary.

DEAR SIR: I am enclosing for your information a copy of a letter which I have just received from Mr. Cox, counsel of the Association. This letter is self explanatory, and I ask that you read it carefully and be guided by Mr. Cox' advice.

I particularly direct your attention to the last paragraph of Mr. Cox' letter and ask that you comply with his suggestion in regard to acknowledgment of this letter and enclosure, and advise to the effect that you will see that this confidential information is not disclosed by anyone in your organization.

Yours very truly, W. D. Lober, President.

[fol. 1889½] GOVT. EX. NO. 771

Archibald Cox, Counselor-at-law, 233 Broadway

New York, Oct. 27, 1917.

Mr. W. D. Lober, President, &c.

DEAR MR. LOBER: My attention has been directed to several instances where contractors and dealers have received the substance of

statistical figures sent out by the Association's office and used them to the disadvantage of members of the Association. Since such disclosures can be accounted for only on the ground of misunderstanding on the part of some of the members, I venture to suggest that it might be desirable for you to send a letter to each member of the Association pointing out, in substance, the following:

The statistical information furnished by each member to the Association amounts, in substance, to a courtesy extended to the other members, giving them information which enables them to conduct their businesses more intelligently. Such information is always given upon the understanding that the confidence it implies will not [fol. 1890] be abused and that the information will not be passed on to others to use to the detriment of the company giving it. It has been intimated that unless such information is treated as confidential, companies will feel constrained to decline to give it, with the result that accurate and up-to-date statistics will not be available to the manufacturers. Moreover, the disclosure of such information to dealers and contractors, and thereafter by them, inevitably results in inaccuracy and distortion, which is calculated to give an erroneous impression concerning the activities of the Association and might thus lead to serious legal difficulties.

Since the matter is in many aspects of much importance, I suggest that you might perhaps ask each person to whom you address such a letter to acknowledge it and advise you that he will see to it that, so far as his company is concerned, none of the information in such reports will be disclosed to others.

Yours very truly, Archibald Cox.

Dear Sir: Replying to your October 31st letter we will be guided by Mr. Cox's suggestion and advice. This letter contains the best news that we have received for a long while as the abuse of the confidence which we were placing in each other was becoming notorious.

Very truly yours, R. W. Hilles, Manager of Sales.

[fol. 1900½] Govt. Ex. No. 787

Lehigh Portland Cement Co.

Allentown, Pa.

November 5th, 1917.

Mr. W. D. Lober, Pres. Cement Mfgrs. Protective Asso., Philadelphia, Pa.

Dear Sir: In reply to your letter of October 31st, enclosing copy of letter from Mr. Cox concerning statistical information furnished

by the Association, would say that none of this information has been, nor will any of it be disclosed by us to any outside person or permitted in any way to come to the knowledge of any dealer, contractor or other customer.

Yours truly, Lehigh Portland Cement Company. B. C. Swett, Eastern Sales Manager.

[fol. 1901] Govt. Ex. No. 788

October 18, 1917.

Dear Mr. Oberman: I will be in New York Tuesday, October 23rd, and will appreciate it if you will meet me at the Seville Hotel at 10 o'clock in the morning.

I am sending you, under separate cover, copy of the By-Laws of the Association and copy of book on Trade Practices, as advocated in this industry, which you should study carefully. I wish to call your attention particularly to the contract forms in the back of this pamphlet which should have your careful consideration. Always consider this information as absolutely confidential to you and be sure not to discuss with any one the details of your work. We are particularly desirous that you should not show these instructions to any one but hold them entirely confidential.

Your employment will date from Monday of next week and I shall look forward with pleasure to meeting you again on Tuesday.

Yours very truly, —— ——, Vice-President. HSG/W.

Mr. Irving Oberman, 427 St. John Place, Brooklyn, N. Y.

[fol. 1901½] Govt. Ex. No. 789

November 5, 1917.

Mr. Harry I. Norton, 166 Devonshire Street, Boston, Mass.

Dear Mr. Norton: I am sending you under separate cover a copy of the pamphlet entitled, "Trade Practices in the Cement Industry," which will give you an idea of the methods employed by most of the manufacturers who work in cement, in handling their contractual relations with their customers.

This pamphlet should have your careful attention, as a complete knowledge of its contents will be invaluable, to you.

Also we are sending you a copy of the outline of plan on which our own Association operates. All of this information being confidential, and only for your own personal information.

Instructions for guidance of Auditors in checking contracts applies particularly to the smaller towns. The principal thing for you to bear in mind being that the dealers and contractors are the customers of your employers, and that we do not consider them crooked

and unfair, but we simply desire to have first hand information of the status of all contracts.

[fol. 1902] Enclosed herewith also is a draft for fifty dollars expense money advanced. Also receipt for same, which kindly sign and return to me. Expense books will be sent to you within the next few days and these should be sent in at the end of each week, when the total amount of your traveling expenses will be reimbursed to you; keeping your fund of fifty dollars intact. Suggest that you make out route list at the end of each week, showing about where we can locate you from time to time during the week. I realize that this will be hard to do accurately, but you can figure ahead and give us the names of the hotels at which you are going to stop, that we can reach you by wire if necessary.

I will try to arrange to see you in Boston the latter part of next week, probably Friday, the 16th, and we can then discuss your problems and arrange a programme that will be effective. It is my understanding that you are going to work on Wednesday, the 7th, and I think that you have enough work on hand there with what we will give you to keep you fully occupied until I see you.

Yours very truly, —— ——, Vice-President. HSG/E.

[fol. 1902½] GOVT. EX. No. 790

Coplay Cement Manufacturing Company

Philadelphia

November 27, 1917.

Mr. W. D. Lober, President Cement Mfrs. Protective Assoc., Phila., Pa.

DEAR SIR: Some time ago I received a letter from you enclosing letter from Mr. Cox under date of October 27th, to the effect that information filed on our contract reports had been used by some manufacturers to the detriment of the company giving the information.

In this connection, would say that our company filed a contract some time ago for requirements of certain work, and it seems as though the information regarding this contract was passed along to representatives of different manufacturers with the result that within a few days after the contract was filed eight or ten different sales-[fols. 1903 & 1903½] men representing other companies called to see the purchasing agent with whom we had closed the contract, advising him that they understood he had bought Saylor's cement on this work. A retail dealer representing another brand immediately started to use as much influence as he could bring to bear to upset the contract which we have.

We realize that there may be times when all manufacturers have been to some extent careless in permitting their salesmen to handle information which they receive from contract reports in a way

detrimental to the company filing the contracts, but our company feels it to be of utmost importance that this cease at once, and we will welcome any information where our own representatives have handled information wrongly. We will insist from now on that no such misuse of information relative to our contracts, as we are referring to in this case, occurs again.

Very truly yours, Coplay Cement Mfg. Company. W. G. Dutton, General Sales Manager.

[fol. 1904] Govt. Ex. No. 791

December 3, 1917.

Mr. W. G. Dutton, Sales Manager Coplay Cement Manufacturing Co., Widener Building, Philadelphia.

Dear Sir: Referring to your letter of November 27th in regard to misuse of contract information; the Vulcanite Company has the same complaint to make as that mentioned in your letter.

I have communicated with Mr. Cox with reference to sending out a copy of your letter to all sales managers, and he states there is no objection to doing so, and I am, therefore, having Mr. Bacon issue it in a letter from me to the members.

I have simply quoted the body of your letter without stating who has made the complaint, which I believe you would prefer to have me do. I also expect to have the matter brought up for discussion at the next meeting of the Association.

I feel very strongly that this abuse of information furnished by member companies is wrong and must be stopped.

You will receive copy of the circular the same as everyone else, and I hope that when it reaches you it will meet with your entire approval.

Yours very truly, —— ——, President.

[fol. 1904½] Govt. Ex. No. 792

Cement Manufacturers Protective Association

Philadelphia, Penna.

Charles W. Bacon, Secretary

December 3rd, 1917.

Mr. Charles W. Bacon, Secretary Cement Manufacturers Protective Assn., Widener Building, Philadelphia.

Dear Sir: I am enclosing herewith draft of a letter which I wish to have sent out to the sales managers at once. I also want you to put a copy with the papers for the next meeting, and call my attention to it at that time so that I may bring it up for discussion.

I want to see that the attention of all members is emphatically called to this abuse of contract information, and to urge upon them the necessity for considering the information confidential, &c.

Yours very truly, W. D. Lober, President.

[fol. 1905] Govt. Ex. No. 793

February 14, 1918.

Mr. John R. Morron, Atlas Portland Cement Company, 30 Broad Street, New York City.

Dear Sir: On October 31st, 1917, Mr. W. D. Lober, then President of the Association, sent out a circular letter with an enclosure from our attorney, Mr. Archibald Cox, in which the attention of your Company was called to the misuse of information disseminated by the Association.

We regret that occasion has arisen again to bring this matter to your attention. Complaints are still received concerning unfair uses of the information provided by the Association. As illustrating these improper uses, we mention the fact that some salesmen have made use of knowledge of the closing of particular contracts to approach parties to such contracts and induce them to transfer the business covered by the contracts to the salesman's company. We think you will agree with us that such misuses of the information furnished by the Association is highly detrimental to the interests of the members and menaces the continuance of the co-operation that we believe vital to the well-being of the industry.

[fol. 1905½] The Committee does not propose to attempt to make any rules governing the use of information given out by the Association, but desires to convey to you its judgment that this information should be used by executives to check up their operations and not given out to employees for such uses as they may choose to make of it.

For the protection of all concerned, it seems vital that the manner in which the information furnished is handled in your organization should be carefully reviewed, and this letter is being sent to the executives of all the member companies for their information with the hope that every possible means will be taken by them to prevent the diversion of the information to purposes for which it is not intended.

By the Committee:

—— ——, President. —— ——, Chairman.

[fol. 1906] The above letter sent to the following: E. M. Young (Lehigh), G. S. Brown (Alpha), F. L. Loeb (Coplay), J. B. Lober (Vulcanite), Conn (Giant), Morris Kind (Hercules), L. C. Morton (Phœnix), Daniels (Knickerbocker), Sen. E. R. Acker-

man (Lawrence), W. S. Mallory (Edison), J. F. Twamley (Bath), W. N. Beach (Pennsylvania), J. A. Horner (Nazareth), Jos. Brobston (Dexter), R. S. Weaver (Allentown), W. E. Erdell (Penn-Allen).

[fol. 1906½] GOVT. EX. No. 794

Sales Office Pennsylvania Cement Company

42nd St. Building, New York Feb. 19, 1918.

Mr. W. G. Dutton, Pres. Cement Mfgrs. Protective Assn., 916 Widener Bldg., Philadelphia, Pa.

DEAR SIR: I am in receipt this day of your letter of the 14th inst., in reference to furnishing information on contracts closed.

If this letter is intended particularly for us, we would like to have more detail information on the subject as we are very particular as to the information that we give out to our salesmen. In fact, many of our salesmen are complaining that they do not receive the information that salesmen from other companies are accustomed [fol. 1907] to receiving from their home offices.

Trusting to receive further details from your if this letter is intended particularly for us, I am

Yours very truly, Pennsylvania Cement Company. W. N. Beach, President.

[fol. 1907½] GOVT. EX. No. 795

February 23, 1918.

Mr. W. N. Beach, President Pennsylvania Cement Company, 42nd Street Building, New York City.

DEAR SIR: I have your favor of the 19th inst. in reference to the circular letter of the 14th inst. sent out by the committee of the Protective Association.

In this connection, would say that there have been no specific complaints filed with the Association in reference to the misuse of any information on the part of any of your representatives. The Association has, however, received reports which led us to believe that there had been some carelessness on the part of some of the cement manufacturers' representatives in misusing the information contained in the Association reports. The committee, therefore, thought it best that this matter be brought to the attention of all the cement manufacturers at once so that same could be watched more carefully.

I have asked Mr. Gaines to get in touch with you at his first opportunity so that if there are any matters not clear to you, he can explain same to you at that time.

Very truly yours, Cement Mfrs. Protective Association. ——, President. WGD/H.

[fol. 1908] GOVT. EX. No. 796

Knickerbocker Portland Cement Company

New York City

February 20, 1918.

Mr. W. G. Dutton, President Cement Mfrs. Protective Assn., Widener Building, Philadelphia, Pennsylvania.

MY DEAR MR. DUTTON: I am in receipt of your circular letter of the 14th inst., note carefully its contents and beg to ask if this company has in any way violated its obligation or in any way made improper use of the Association information. If so, I would greatly appreciate it if you would give me in confidence, full information concerning it.

I am a thorough believer in association work and have for a number of years been the President of other associations connected with the paper manufacturing business, so fully realize the harm which might possibly be done through the improper use of infor-

[fol. 1908½] mation obtained from this source. I assure you that if we have in any way violated our rights in this matter, it is my desire to take immediate steps to remedy and correct such a fault.

Hoping that I may have a frank and detailed reply, I remain,

Yours very truly, A. B. Daniels, President.

[fol. 1909] GOVT. EX. No. 797

February 23, 1918.

Mr. A. B. Daniels, President Knickerbocker Portland Cement Company, 30 East 42nd Street, New York City.

MY DEAR MR. DANIELS: I am in receipt of your letter of the 20th inst. in reference to the circular letter of the 14th inst. sent out by the committee of the Protective Association.

The letter in question was sent out as a result of the general situation. The Association has no records of any actions on the part of your representatives. Some members of our Association, however, have complained of several actions in reference to reports which they have received, and from which it would appear that the representatives of some manufacturers were not as careful as they should be in handling information given them by the Association, and on that account it was thought best by the committee in charge of this matter to send out the circular letter of the 15th inst., which you referred to.

[fol. 1909½] Our Mr. H. S. Gaines, Vice President of the Association, who has charge of auditing contracts on which information is requested, will at his first opportunity get in touch with you and go over these matters with you in detail. I also hope that I may have the pleasure of meeting you in the near future.

Very truly yours, Cement Mfrs. Protective Association. ——

——, President.

[fol. 1910] GOVT. EX. No. 798

Phoenix Portland Cement Co.

Philadelphia

February 25, 1918.

Mr. Walter G. Dutton, President Cement Mfrs. Protective Assoc., Philadelphia, Penna.

MY DEAR MR. DUTTON: I am in receipt of your letter of February 14th with reference to the mis-use of information provided by the Association, and would have answered before, but I have been laid up at home with the Measles for the past two weeks.

I fully agree with you, and think that this is a very detestable trade practice, and also there should be some way to stop it. It is my suggestion that you advise the members of the Association just who is mis-using this information and give the matter some publicity among the members. This, I think, will bring about the desired effect.

Yours very truly, Lindley C. Morton, General Manager.

[fol. 1910½] GOVT. EX. No. 799

February 26, 1918.

Mr. L. C. Morton, General Manager Phoenix Portland Cement Company, Real Estate Trust Bldg., Philadelphia, Pa.

MY DEAR MR. MORTON: I have your favor of the 25th inst. in reference to the letter sent out by the committee under date of February 14th.

I might say in this connection that there has been no complaint made as to the actions on the part of any one connected with your Company; however, there have been some complaints made against other manufacturers, and it is due to these complaints that the letter in question was sent out.

I like the suggestion contained in your letter above mentioned, and if you think it advisable, it might be well for you to bring this matter up before the members at our next meeting.

Very truly yours, Cement Mfrs. Protective Association. ——

——, President.

[fols. 1911 & 1912] GOVT. EX. No. 800

March Twenty-first, Nineteen Nineteen.

Mr. Thomas E. Wright, New York State Builders' Supply Association, 806 Insurance Building, Rochester, New York.

MY DEAR TOM: Regret that I am not in a position to give you a definite answer to your letter of March 5th, as the records in this

fol. 1913] Govt. Ex. No. 802

Knickerbocker Portland Cement Company, Inc.

New York City

April 1, 1919.

Manchester & Hudson Co., Providence, R. I.

GENTLEMEN: Effective tomorow we quote you Knickerbocker Portland Cement in cloth sacks, carload lots, f. o. b. cars Providence, R. I., at $2.94 per barrel. The price in paper sacks is 35¢ per barrel less.

This quotation is for acceptance and shipment within sixteen days from date hereof and is subject to terms and other conditions noted on the reverse of this sheet with the exception that cloth sacks will be repurchased at 15¢ each instead of 10¢ as mentioned in the sack paragraph.

Orders for specific work placed within the aforementioned time will be accepted for shipment to and including December 31st, 1919.

fols. 1914 & 1915] We recommend that any orders or contracts you may have in abeyance be placed on the above basis.

Very truly yours, Knickerbocker Portland Cement Company, Inc. W. M. Floring, Sales Department.

---

fol. 1915½] Govt. Ex. No. 803

Knickerbocker Portland Cement Company, Inc.

New York City

April 1st, 1919.

Windsor Cement Company, Hartford, Conn.

GENTLEMEN: Effective tomorrow we quote you Knickerbocker Portland Cement in cloth sacks, carload lots, f. o. b. cars Hartford, Conn. at $2.94 per barrel. The price in paper sacks is 35¢ per barrel less.

This quotation is for acceptance and shipment within sixteen days from date hereof and is subject to terms and other conditions noted on the reverse of this sheet with the exception that cloth sacks will be repurchased at 15¢ each instead of 10¢ as mentioned in the sack paragraph.

Orders for specific work placed within the aforementioned time will be accepted for shipment to and including December 31st, 1919.

[fols. 1916–1918] We recommend that any orders or contracts you may have in abeyance be placed on the above basis.

Very truly yours, Knickerbocker Portland Cement Company, Inc. Sales Department. WMF/CM.

(Here follow Government's Exhibits Nos. 804, 805, 806, 807, marked side folio pages 1918½–1922, inclusive.)

[fol. 1922½] Govt. Ex. No. 808

January 26, 1920.

Mr. F. A. Boeye, Mr. F. G. Conkling, Mr. F. B. McKenna:

Please give instructions to the effect that in all of our contracts and in all of our quotations, a guarantee against decline be hereafter discontinued. Also insert in our quotations a paragraph specifying the approximate rate at which the cement is to be shipped and limiting the amount to be taken in any thirty consecutive days; in other words, secure a schedule of shipments.

Letters of quotations are now going out specifying shipments according to contract requirements. We desire to discontinue this and replace it with the instructions given above.

tell him what his new price is, advising that this is in accordance with our acknowledgment of his order at the time it was placed.

I do not believe it would be best to write a letter on orders which will not go out for some time, but be sure that a letter is written when each order is shipped.

The first of the week we will probably send out a general notice to the trade which will advise them just what our present price is, and will also advise them that this price is effective on orders taken subject to an increase in price, but regardless of this, we will want to send out a special letter on each order at the time it is shipped.

IMPORTANT

CHANGE IN THE FINENESS REQUIREMENT OF THE
UNITED STATES GOVERNMENT SPECIFICATIONS FOR PORTLAND CEMENT

The Departmental Conference on United States Government Specifications for Portland Cement has recommended a change in the fineness requirements of the United States Government Specifications for Portland Cement, recommendation being

"That the residue on the Standard No. 200 sieve shall not exceed 22% by weight and that the tolerance clause allowing 1% permissible variation in the fineness determination shall be dropped from the specification, these changes to take effect January 1, 1921".

This recommendation has been approved by the heads of the several Government Departments and therefore the change becomes automatically effective January 1, 1921.

UNITED STATES GOVERNMENT SPECIFICATION FOR PORTLAND CEMENT

(This specification is the result of several years work of a joint conference representing the United States Government, the American Society of Civil Engineers, and the American Society for Testing Materials. It was adopted by the United States Government and by the American Society for Testing Materials, to become effective January 1, 1917.)

I. OFFICIAL ADOPTION OF THE UNITED STATES GOVERNMENT SPECIFICATION FOR PORTLAND CEMENT

DEVELOPMENT OF THE UNITED STATES GOVERNMENT SPECIFICATION FOR PORTLAND CEMENT BY GOVERNMENT DEPARTMENTAL CONFERENCE

In June, 1911, the Secretary of the Department of Commerce and Labor arranged, through the Secretaries of the various departments, for a conference of Government engineers for the purpose of unifying the specifications for Portland cement used by the United States Government. At this conference a committee was appointed to consider existing specifications and to recommend a single specification for Portland cement to be used by all departments of the Government. After an extended series of meetings of this committee, at which careful consideration was given to representative specifications for Portland cement as well as to all available data on methods of tests, a specification was adopted by the Departmental Conference February 13, 1912, and made effective, upon the approval of the Secretaries of the several departments by the Executive order of April 30, 1912.

On July 30, 1912, the Departmental Conference was reconvened. Many meetings have been held by the departmental committee and conferences secured with committees of engineering societies resulting after four years of work in agreement on a single standard specification which has been adopted for use by the recognized engineering societies as well as by the Government. It was agreed that the new specification, although an improvement over the old, can not be considered as final, but is subject to revision from time

to time as occasion requires and as improvement is made in the product, in the methods of testing, and in technical knowledge of the material.

EXECUTIVE ORDER

It is hereby ordered that all Portland cement that may hereafter be purchased by any department, bureau, office, or independent establishment of the Government, or that may be used in construction work connected with any of the aforesaid branches of the Government service, shall conform in every respect to the specification for Portland cement adopted by the Departmental Conference at the meeting held at the Bureau of Standards on February 13, 1912, and approved by the heads of the several departments (to be known as the United States Government Specification for Portland Cement): *Provided, however,* That such specification may be modified from time to time by any similar departmental conference, with the approval of the heads of the several departments.

WM. H. TAFT.

THE WHITE HOUSE,
April 30, 1912.

DEPARTMENTAL APPROVALS

The revised specification as contained herein has received the approval of the following departments and independent establishments to become effective January 1, 1917, and to be known as the United States Government Specification for Portland Cement:

Department of State,
Department of the Treasury,
Department of War,
Department of Justice,
Post Office Department,
Department of the Navy,
Department of the Interior,
Department of Agriculture,
Department of Commerce,
Department of Labor,
District of Columbia, and
Capitol Building and Grounds.

[2] **A. T. Goldbeck** ..... Testing Engineer.	Office of Public Roads and Rural Engineering, Department of Agriculture.

[1] Former members of the Departmental Conference. [2] Members appointed since July 1, 1911.

PERSONNEL OF THE DEPARTMENTAL CONFERENCE—Continued.

NAME.	REPRESENTING.
[1] **W. H. Rose, Captain, U. S. Army** Formerly Director of Mechanical Engineering, Engineers School, Washington Barracks.	Alternate in absence of Col. Spencer Cosby.
[1] **S. S. Hunt, Captain, U. S. Army** Constructor, Office of Superintendent of United States Capitol Building and Grounds.	Office of Superintendent of United States Capitol Building and Grounds.
P. H. Bates Chemist, Bureau of Standards.	Bureau of Standards, Department of Commerce.
S. S. Voorhees Engineer Chemist, Bureau of Standards.	Bureau of Standards, Department of Commerce,

The following departmental committee was appointed by the conference to draft the specification and revision: A. P. Davis, *Chairman;* **Rudolph J. Wig,** *Secretary;* **H. C. Newcomer, J. W. Ginder, C. D. Thurber, Asa E. Phillips, S. S. Voorhees, W. A. E. Doying.**

[1] Former members of the Departmental Conference.

II. UNITED STATES GOVERNMENT SPECIFICATION FOR PORTLAND CEMENT

DEFINITION

1. Portland cement is the product obtained by finely pulverizing clinker produced by calcining to incipient fusion, an intimate and properly proportioned mixture of argillaceous and calcareous materials, with no additions subsequent to calcination excepting water and calcined or uncalcined gypsum.

CHEMICAL PROPERTIES

CHEMICAL LIMITS

2. The following limits shall not be exceeded:

	Per cent
Loss on ignition	4.00
Insoluble residue	0.85
Sulphuric anhydride (SO_3)	2.00
Magnesia (MgO)	5.00

PHYSICAL PROPERTIES

SPECIFIC GRAVITY

3. The specific gravity of cement shall be not less than 3.10 (3.07 for white Portland cement). Should the test of cement as received fall below this requirement a second test may be made upon an ignited sample. The specific-gravity test will not be made unless specifically ordered.

FINENESS

4. The residue on a standard No. 200 sieve shall not exceed 22 per cent by weight.[1]

SOUNDNESS

5. A pat of neat cement shall remain firm and hard, and show no signs of distortion, cracking, checking, or disintegration in the steam test for soundness.

TIME OF SETTING

6. The cement shall not develop initial set in less than 45 minutes when the Vicat needle is used or 60 minutes when the Gillmore needle is used. Final set shall be attained within 10 hours.

[1] The United States Government specification requires that on and after July 1, 1918, the residue on the standard No. 200 sieve shall not exceed 22 per cent by weight.

TENSILE STRENGTH

7. The average tensile strength in pounds per square inch of not less than three standard mortar briquettes (see sec. 51) composed of one part cement and three parts standard sand, by weight, shall be equal to or higher than the following:

Age at test	Storage of briquettes	Tensile strength, pounds per square inch
Days		
7	1 day in moist air, 6 days in water	200
28	1 day in moist air, 27 days in water	300

8. The average tensile strength of standard mortar at 28 days shall be higher than the strength at 7 days.

PACKAGES, MARKING, AND STORAGE

PACKAGES AND MARKING

9. The cement shall be delivered in suitable bags or barrels with the brand and name of the manufacturer plainly marked thereon, unless shipped in bulk. A bag shall contain 94 pounds net. A barrel shall contain 376 pounds net.

STORAGE

10. The cement shall be stored in such a manner as to permit easy access for proper inspection and identification of each shipment, and in a suitable weather-tight building which will protect the cement from dampness.

INSPECTION

11. Every facility shall be provided the purchaser for careful sampling and inspection at either the mill or at the site of the work, as may be specified by the purchaser. At least 10 days from the time of sampling shall be allowed for the completion of the 7-day test, and at least 31 days shall be allowed for the completion of the 28-day test. The cement shall be tested in accordance with the methods hereinafter prescribed. The 28-day test shall be waived only when specifically so ordered.

REJECTION

12. The cement may be rejected if it fails to meet any of the requirements of these specifications.

13. Cement shall not be rejected on account of failure to meet the fineness requirement if upon retest after drying at 100° C for

14. Cement failing to meet the test for soundness in steam may be accepted if it passes a retest using a new sample at any time within 28 days thereafter.

15. Packages varying more than 5 per cent from the specified weight may be rejected; and if the average weight of packages in any shipment, as shown by weighing 50 packages taken at random is less than that specified, the entire shipment may be rejected.

TESTS

SAMPLING

NUMBER OF SAMPLES

16. Tests may be made on individual or composite samples as may be ordered. Each test sample should weigh at least 8 pounds.

17. (*a*) *Individual Sample.*—If sampled in cars one test sample shall be taken from each 50 barrels or fraction thereof. If sampled in bins one sample shall be taken from each 100 barrels.

(*b*) *Composite Sample.*—If sampled in cars one sample shall be taken from 1 sack in each 40 sacks (or 1 barrel in each 10 barrels) and combined to form one test sample. If sampled in bins or warehouses, one test sample shall represent not more than 200 barrels.

METHOD OF SAMPLING

18. Cement may be sampled at the mill by any of the following methods that may be practicable, as ordered:

(*a*) *From the Conveyor Delivering to the Bin.*—At least 8 pounds of cement shall be taken from approximately each 100 barrels passing over the conveyor.

(*b*) *From Filled Bins by Means of Proper Sampling Tubes.*—Tubes inserted vertically may be used for sampling cement to a maximum depth of 10 feet. Tubes inserted horizontally may be used where the construction of the bin permits. Samples shall be taken from points well distributed over the face of the bin.

(*c*) *From Filled Bins at Points of Discharge.*—Sufficient cement shall be drawn from the discharge openings to obtain samples representative of the cement contained in the bin, as determined by the appearance at the discharge openings of indicators placed on the surface of the cement directly above these openings before drawing of the cement is started.

TREATMENT OF SAMPLES

19. Samples preferably shall be shipped and stored in air-tight containers. Samples shall be passed through a sieve having 20 meshes per linear inch in order to thoroughly mix the sample, break up lumps, and remove foreign materials.

CHEMICAL ANALYSIS

LOSS ON IGNITION

20. METHOD.—One gram of cement shall be heated in a weighed covered platinum crucible of 20 to 25 cc capacity, as follows, using either method (*a*) or (*b*) as ordered:

(*a*) The crucible shall be placed in a hole in an asbestos board, clamped horizontally so that about three-fifths of the crucible projects below and blasted at a full red heat for 15 minutes with an inclined flame; the loss in weight shall be checked by a second blasting for 5 minutes. Care shall be taken to wipe off particles of asbestos that may adhere to the crucible when withdrawn from the hole in the board. Greater neatness and shortening of the time of heating are secured by making a hole to fit the crucible in a circular disk of sheet platinum and placing this disk over a somewhat larger hole in an asbestos board.

(*b*) The crucible shall be placed in a muffle at any temperature between 900 and 1000° C for 15 minutes and the loss in weight shall be checked by a second heating for 5 minutes.

21. PERMISSIBLE VARIATION.—A permissible variation of 0.25 will be allowed, and all results in excess of the specified limit but within this permissible variation shall be reported as 4 per cent.

INSOLUBLE RESIDUE

22. METHOD.—To a 1 g sample of cement shall be added 10 cc of water and 5 cc of concentrated hydrochloric acid; the liquid shall be warmed until effervescence ceases. The solution shall be diluted to 50 cc and digested on a steam bath or hot plate until it is evident that decomposition of the cement is complete. The residue shall be filtered, washed with cold water, and the filter paper and contents digested in about 30 cc of a 5 per cent solution of sodium carbonate, the liquid being held at a temperature just short of boiling for 15 minutes. The remaining residue shall be filtered, washed with cold water, then with a few drops of hot hydrochloric acid, 1:9, and finally with hot water, and then ignited at a red heat and weighed as the insoluble residue.

23. PERMISSIBLE VARIATION.—A permissible variation of 0.15 will be allowed, and all results in excess of the specified limit but within this permissible variation shall be reported as 0.85 per cent.

SULPHURIC ANHYDRIDE

24. METHOD.—One gram of the cement shall be dissolved in 5 cc of concentrated hydrochloric acid diluted with 5 cc of water, with gentle warming; when solution is complete 40 cc of water shall be added, the solution filtered, and the residue washed thoroughly with water. The solution shall be diluted to 250 cc, heated to boiling, and 10 cc of a hot 10 per cent solution of barium chloride shall be added slowly, drop by drop, from a pipette and the boiling continued until the precipitate is well formed. The solution shall be digested on the steam bath until the precipitate has settled. The precipitate shall be filtered, washed, and the paper and contents placed in a weighed platinum crucible and the paper slowly charred and consumed without flaming. The barium sulfate shall then be ignited and weighed. The weight obtained multiplied by 34.3 gives the percentage of sulfuric anhydride. The acid filtrate obtained in the determination of the insoluble residue may be used for the estimation of sulfuric anhydride instead of using a separate sample.

25. PERMISSIBLE VARIATION.—A permissible variation of 0.10 will be allowed, and all results in excess of the specified limit but within this permissible variation shall be reported as 2 per cent.

MAGNESIA

26. METHOD.—To 0.5 g of the cement in an evaporating dish shall be added 10 cc of water to prevent lumping and then 10 cc of concentrated hydrochloric acid. The liquid shall be gently heated and agitated until attack is complete. The solution shall then be evaporated to complete dryness on a steam or water bath. To hasten dehydration the residue may be heated to 150 or even 200° C for one-half to one hour. The residue shall be treated with 10 cc of concentrated hydrochloric acid diluted with an equal amount of water. The dish shall be covered and the solution digested for 10 minutes on a steam bath or water bath. The diluted solution shall be filtered and the separated silica washed thoroughly with water.[2] Five cubic centimeters of concentrated hydrochloric acid and sufficient bromine water to precipitate any

[2] Since this procedure does not involve the determination of silica, a second evaporation is unnecessary.

manganese which may be present, shall be added to the filtrate (about 250 cc). This shall be made alkaline with ammonium hydroxide, boiled until there is but a faint odor of ammonia, and the precipitated iron and aluminum hydroxides, after settling, shall be washed with hot water, once by decantation and slightly on the filter. Setting aside the filtrate, the precipitate shall be transferred by a jet of hot water to the precipitating vessel and dissolved in 10 cc of hot hydrochloric acid. The paper shall be extracted with acid, the solution and washings being added to the main solution. The aluminum and iron shall then be reprecipitated at boiling heat by ammonium hydroxide and bromine water in a volume of about 100 cc, and the second precipitate shall be collected and washed on the filter used in the first instance if this is still intact. To the combined filtrates from the hydroxides of iron and aluminum, reduced in volume if need be, 1 cc of ammonium hydroxide shall be added, the solution brought to boiling, 25 cc of a saturated solution of boiling ammonium oxalate added, and the boiling continued until the precipitated calcium oxalate has assumed a well-defined granular form. The precipitate after one hour shall be filtered and washed; then with the filter shall be placed wet in a platinum crucible, and the paper burned off over a small flame of a Bunsen burner; after ignition it shall be redissolved in hydrochloric acid and the solution diluted to 100 cc. Ammonia shall be added in slight excess and the liquid boiled. The lime shall then be reprecipitated by ammonium oxalate, allowed to stand until settled, filtered, and washed. The combined filtrates from the calcium precipitates shall be acidified with hydrochloric acid, concentrated on the steam bath to about 150 cc, and made slightly alkaline with ammonium hydroxide, boiled and filtered (to remove a little aluminum and iron and perhaps calcium). When cool, 10 cc of saturated solution of sodium-ammonium-hydrogen phosphate shall be added with constant stirring. When the crystalline ammonium-magnesium orthophosphate has formed, ammonia shall be added in moderate excess. The solution shall be set aside for several hours in a cool place, filtered and washed with water containing 2.5 per cent NH_3. The precipitate shall be dissolved in a small quantity of hot hydrochloric acid, the solution diluted to about 100 cc, 1 cc of a saturated solution of sodium-ammonium hydrogen phosphate added, and ammonia drop by drop, with constant stirring, until the precipitate is again formed as described and the ammonia is in moderate excess. The precipitate shall then be allowed to stand about two

hours, filtered and washed as before. The paper and contents shall be placed in a weighed platinum crucible, the paper slowly charred, and the resulting carbon carefully burned off. The precipitate shall then be ignited to constant weight over a Meker burner, or a blast not strong enough to soften or melt the pyrophosphate. The weight of magnesium pyrophosphate obtained multiplied by 72.5 gives the percentage of magnesia. The precipitate so obtained always contains some calcium and usually small quantities of iron, aluminum, and manganese as phosphates.

27. PERMISSIBLE VARIATION.—A permissible variation of 0.4 will be allowed, and all results in excess of the specified limit but within this permissible variation shall be reported as 5.00 per cent.

PHYSICAL TESTS

DETERMINATION OF SPECIFIC GRAVITY

28. APPARATUS.—The determination of specific gravity shall be made with a standardized Le Chatelier apparatus which conforms to the requirements illustrated in Fig. 1. This apparatus is standardized by the United States Bureau of Standards. Kerosene free from water, or benzine not lighter than 62° Baumé, shall be used in making this determination.

29–31. METHOD.—The flask shall be filled with either of these liquids to a point on the stem between zero and 1 cc and 64 g of cement, of the same temperature as the liquid, shall be slowly introduced, taking care that the cement does not adhere to the inside of the flask above the liquid and to free the cement from air by rolling the flask in an inclined position. After all the cement is introduced, the level of the liquid will rise to some division of the graduated neck; the difference between readings is the volume displaced by 64 g of the cement.

The specific gravity shall then be obtained from the formula

$$\text{Specific gravity} = \frac{\text{Weight of cement (g)}}{\text{Displaced volume (cc)}}$$

30. The flask, during the operation, shall be kept immersed in water, in order to avoid variations in the temperature of the liquid in the flask, which shall not exceed 0°.5 C. The results of repeated tests should agree within 0.01.

31. The determination of specific gravity shall be made on the cement as received; if it falls below 3.10, a second determination shall be made after igniting the sample as described in section 20.

DETERMINATION OF FINENESS

32–33. APPARATUS.—Wire cloth for standard sieves for cement shall be woven (not twilled) from brass, bronze, or other suitable wire, and mounted without distortion on frames not less than 1½

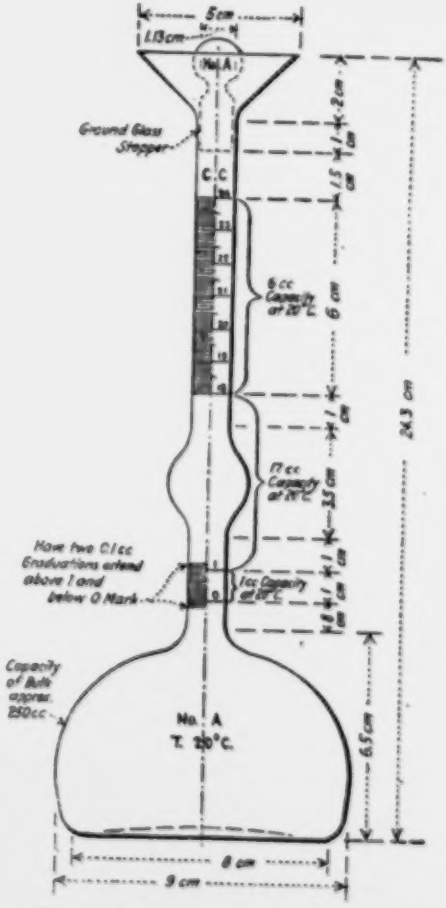

FIG. 1.—*Le Chatelier apparatus for specific gravity determinations*

inches below the top of the frame. The sieve frames shall be circular, approximately 8 inches in diameter, and may be provided with a pan and cover.

33. A standard No. 200 sieve is one having nominally an 0.0029-inch opening and 200 wires per inch standardized by the

United States Bureau of Standards, and conforming to the following requirements:

The No. 200 sieve should have 200 wires per inch, and the number of wires in any whole inch shall not be outside the limits of 192 to 208. No opening between adjacent parallel wires shall be more than 0.0050 inch in width. The diameter of the wire should be 0.0021 inch and the average diameter shall not be outside the limits 0.0019 to 0.0023 inch. The value of the sieve as determined by sieving tests made in conformity with the standard specification for these tests on a standardized cement which gives a residue of 25 to 20 per cent on the No. 200 sieve, or on other similarly graded material, shall not show a variation of more than 1.5 per cent above or below the standards maintained at the Bureau of Standards.

34–35. METHOD.—The test shall be made with 50 g of cement. The sieve shall be thoroughly clean and dry. The cement shall be placed on the No. 200 sieve, with pan and cover attached, if desired, and shall be held in one hand in a slightly inclined position so that the sample will be well distributed over the sieve, at the same time gently striking the side about 150 times per minute against the palm of the other hand on the up stroke. The sieve shall be turned every 25 strokes about one-sixth of a revolution in the same direction. The operation shall continue until not more than 0.05 g passes through in one minute of continuous sieving. The fineness shall be determined from the weight of the residue on the sieve expressed as a percentage of the weight of the original sample.

35. Mechanical sieving devices may be used, but the cement shall not be rejected if it meets the fineness requirement when tested by the hand method described in section 34.

36. PERMISSIBLE VARIATION.—A permissible variation of 1 will be allowed, and all results in excess of the specified limit but within this permissible variation shall be reported as 22 per cent.[3]

MIXING CEMENT PASTES AND MORTARS

37–38. METHOD.—The quantity of dry material to be mixed at one time shall not exceed 1000 g nor be less than 500 g. The proportions of cement or cement and sand shall be stated by weight in grams of the dry materials; the quantity of water shall be expressed in cubic centimeters (1 cc of water = 1 g). The dry materials shall be weighed, placed upon a nonabsorbent surface,

[3] See note 1 on p. 9.

thoroughly mixed dry if sand is used, and a crater formed in the center, into which the proper percentage of clean water shall be poured; the material on the outer edge shall be turned into the crater by the aid of a trowel. After an interval of one-half minute for the absorption of the water the operation shall be completed by continuous, vigorous mixing, squeezing and kneading with the hands for at least one minute.[4] During the operation of mixing, the hands should be protected by rubber gloves.

38. The temperature of the room and the mixing water shall be maintained as nearly as practicable at 21° C (70° F).

NORMAL CONSISTENCY

39. APPARATUS.—The Vicat apparatus consists of a frame *A* (Fig. 2) bearing a movable rod *B*, weighing 300 g, one end *C* being 1 cm in diameter for a distance of 6 cm, the other having a removable needle *D*, 1 mm in diameter, 6 cm long. The rod is reversible, and can be held in any desired position by a screw *E*, and has midway between the ends a mark *F* which moves under a scale (graduated to millimeters) attached to the frame *A*. The paste is held in a conical, hard-rubber ring *G*, 7 cm in diameter at the base, 4 cm high, resting on a glass plate *H* about 10 cm square.

40–41. METHOD.—In making the determination, 500 g of cement, with a measured quantity of water, shall be kneaded into a paste, as described in section 37, and quickly formed into a ball with the hands, completing the operation by tossing it six times from one hand to the other, maintained about 6 inches apart; the ball resting in the palm of one hand shall be pressed into the larger end of the rubber ring held in the other hand, completely filling the ring with paste; the excess at the larger end shall then be removed by a single movement of the palm of the hand; the ring shall then be placed on its larger end on a glass plate and the excess paste at the smaller end sliced off at the top of the ring by a single oblique stroke of a trowel held at a slight angle with the top of the ring. During these operations care shall be taken not to compress the paste. The paste confined in the ring, resting on the plate, shall be placed under the rod, the larger end of which shall be brought in contact with the surface of the paste; the scale shall

[4] In order to secure uniformity in the results of tests for the time of setting and tensile strength the manner of mixing above described should be carefully followed. At least one minute is necessary to obtain the desired plasticity which is not appreciably affected by continuing the mixing for several minutes. The exact time necessary is dependent upon the personal equation of the operator. The error in mixing should be on the side of overmixing.

be then read, and the rod quickly released. The paste shall be of normal consistency when the rod settles to a point 10 mm below the original surface in one-half minute after being released. The apparatus shall be free from all vibrations during the test. Trial pastes shall be made with varying percentages of water until the

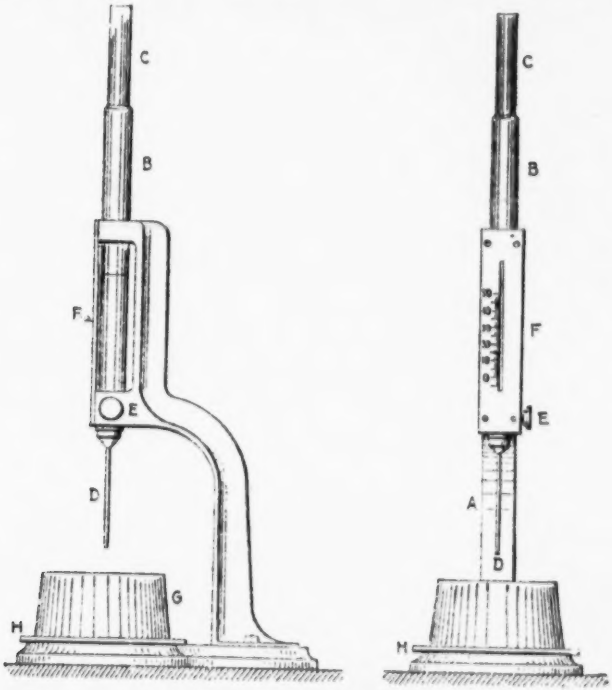

FIG. 2.—*Vicat apparatus*

normal consistency is obtained. The amount of water required shall be expressed in percentage by weight of the dry cement.

41. The consistency of standard mortar shall depend on the amount of water required to produce a paste of normal consistency from the same sample of cement. Having determined the normal consistency of the sample, the consistency of standard mortar made from the same sample shall be as indicated in Table 1, the values being in percentage of the combined dry weights of the cement and standard sand.

TABLE 1

Percentage of Water for Standard Mortars

Percentage of water for neat cement paste of normal consistency	Percentage of water for one cement, three standard Ottawa sand	Percentage of water for neat cement paste of normal consistency	Percentage of water for one cement, three standard Ottawa sand
15	9.0	23	10.3
16	9.2	24	10.5
17	9.3	25	10.7
18	9.5	26	10.8
19	9.7	27	11.0
20	9.8	28	11.2
21	10.0	29	11.3
22	10.2	30	11.5

DETERMINATION OF SOUNDNESS[5]

42. APPARATUS.—A steam apparatus which can be maintained at a temperature between 98 and 100° C, or one similar to that shown in Fig. 3, is recommended. The capacity of this apparatus may be increased by using a rack for holding the pats in a vertical or inclined position.

43–45. METHOD.—A pat from cement paste of normal consistency about 3 inches in diameter, one-half inch thick at the center, and tapering to a thin edge, shall be made on clean glass plates about 4 inches square, and stored in moist air for 24 hours. In molding the pat the cement paste shall first be flattened on the glass and the pat then formed by drawing the trowel from the outer edge toward the center.

44. The pat shall then be placed in an atmosphere of steam at a temperature between 98 and 100° C upon a suitable support 1 inch above boiling water for five hours.

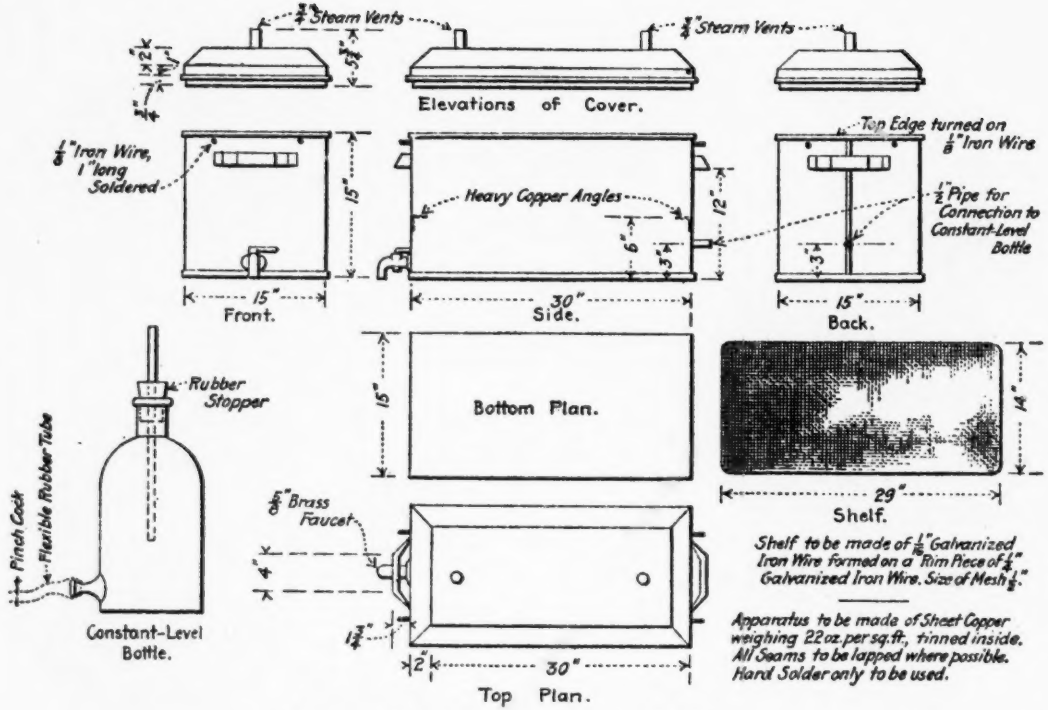
45. Should the pat leave the plate, distortion may be detected best with a straight edge applied to the surface which was in contact with the plate.

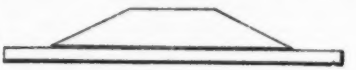
DETERMINATION OF TIME OF SETTING

46. The following are alternate methods, either of which may be used as ordered:

47. VICAT APPARATUS.—The time of setting shall be determined with the Vicat apparatus described in section 39. (See Fig. 2.)

[5] Unsoundness is usually manifested by change in volume which causes distortion, cracking, checking, or disintegration. Pats improperly made or exposed to drying may develop what are known as shrinkage cracks within the first 24 hours and are not an indication of unsoundness. These conditions are illustrated in F.g. 4. The failure of the pats to remain on the glass or the cracking of the glass to which the pats are attached does not necessarily indicate unsoundness.





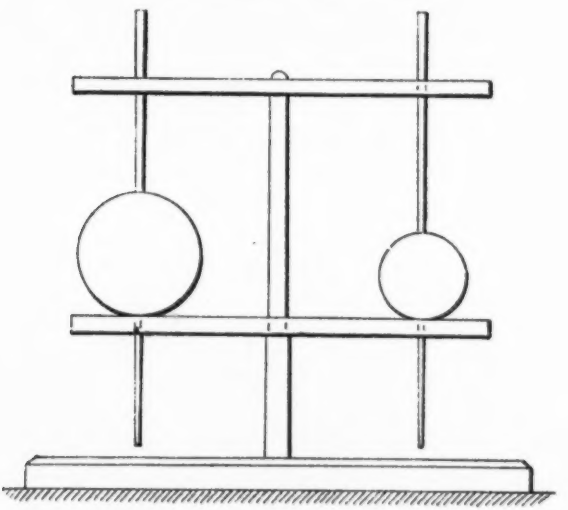


FIG. 3.—*Apparatus for making soundness test of cement*

FIG. 4.—*Typical failures in soundness test*

48. VICAT METHOD.—A paste of normal consistency shall be molded in the hard-rubber ring *G*, as described in section 40, and placed under the rod *B*, the smaller end of which shall then be carefully brought in contact with the surface of the paste, and the rod quickly released. The initial set shall be said to have occurred when the needle ceases to pass a point 5 mm above the glass plate in one-half minute after being released, and the final set when the needle does not sink visibly into the paste. The test pieces shall

(*a*) Pat with Top Surface Flattened for Determining Time of Setting by Gillmore Method.

(*b*) Gillmore Needles.

FIG. 5

be kept in moist air during the test. This may be accomplished by placing them on a rack over water contained in a pan and covered by a damp cloth, kept from contact with them by means of a wire screen; or they may be stored in a moist closet. Care shall be taken to keep the needle clean, as the collection of cement on the sides of the needle retards the penetration, while cement on the point may increase the penetration. The time of setting is affected not only by the percentage and temperature of the water used and the amount of kneading the paste receives, but by the

temperature and humidity of the air, and its determination is therefore only approximate.

49. GILLMORE NEEDLES.—The time of setting shall be determined by the Gillmore needles. The Gillmore needles should preferably be mounted as shown in Fig. 5 (*b*).

50. GILLMORE METHOD.—The time of setting shall be determined as follows: A pat of neat cement paste about 3 inches in diame-

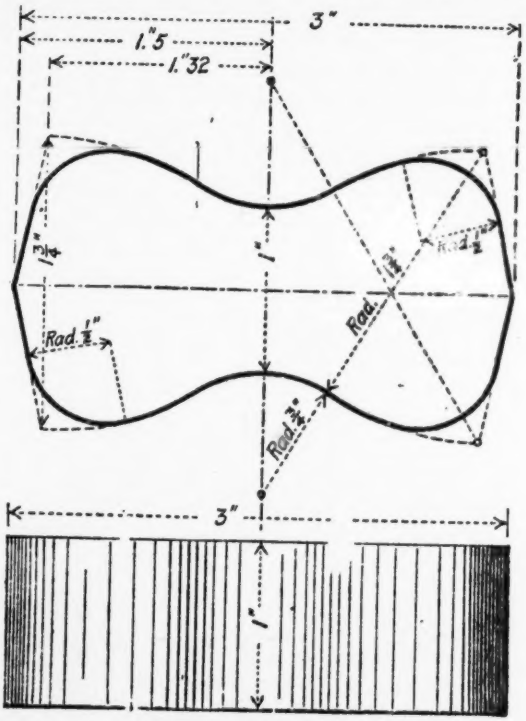

FIG. 6.—*Details for briquette*

ter and one-half inch in thickness with a flat top (Fig. 5 (*a*)), mixed to a normal consistency, shall be kept in moist air at a temperature maintained as nearly as practicable at 21° C (70° F). The cement shall be considered to have acquired its initial set when the pat will bear, without appreciable indentation, the Gillmore needle one-twelfth inch in diameter, loaded to weigh one-fourth pound. The final set has been acquired when the pat will bear without appreciable indentation, the Gillmore needle one-twenty-fourth inch in diameter, loaded to weigh 1 pound. In

making the test the needles shall be held in a vertical position and applied lightly to the surface of the pat.

TENSION TESTS

51. FORM OF TEST PIECE.—The form of test piece shown in Fig. 6 shall be used. The molds shall be made of noncorroding metal and have sufficient material in the sides to prevent spreading during molding. Gang molds when used shall be of the type shown in Fig. 7. Molds shall be wiped with an oily cloth before using.

52–54. STANDARD SAND.—The sand to be used shall be natural sand from Ottawa, Ill., screened to pass a No. 20 sieve and retained on a No. 30 sieve. This sand may be obtained from the Ottawa Silica Co., at a cost of 2 cents per pound, f. o. b. cars, Ottawa, Ill.

53. This sand, having passed the No. 20 sieve, shall be considered standard when not more than 5 g pass the No. 30 sieve after one minute continuous sieving of a 500 g sample.

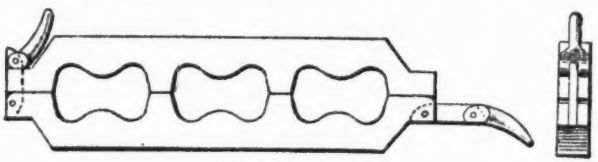

FIG. 7.—*Gang mold*

54. The sieves shall conform to the following specifications:

The No. 20 sieve shall have between 19.5 and 20.5 wires per whole inch of the warp wires and between 19 and 21 wires per whole inch of the shoot wires. The diameter of the wire should be 0.0165 inch and the average diameter shall not be outside the limits of 0.0160 and 0.0170 inch.

The No. 30 sieve shall have between 29.5 and 30.5 wires per whole inch of the warp wires and between 28.5 and 31.5 wires per whole inch of the shoot wires. The diameter of the wire should be 0.0110 inch and the average diameter shall not be outside the limits 0.0105 to 0.0115 inch.

55. MOLDING.—Immediately after mixing, the standard mortar shall be placed in the molds, pressed in firmly with the thumbs and smoothed off with a trowel without ramming. Additional mortar shall be heaped above the mold and smoothed off with a trowel; the trowel shall be drawn over the mold in such a manner as to exert a moderate pressure on the material. The

mold shall then be turned over and the operation of heaping, thumbing, and smoothing off repeated.

56–57. TESTING.—Tests shall be made with any standard machine. The briquettes shall be tested as soon as they are removed from the water. The bearing surfaces of the clips and briquettes shall be free from grains of sand or dirt. The briquettes shall be carefully centered and the load applied continuously at the rate of 600 pounds per minute.

57. Testing machines should be frequently calibrated in order to determine their accuracy.

58. FAULTY BRIQUETTES.—Briquettes that are manifestly faulty, or which give strengths differing more than 15 per cent from the average value of all test pieces made from the same sample and broken at the same period, shall not be considered in determining the tensile strength.

STORAGE OF TEST PIECES

59. APPARATUS.—The moist closet may consist of a soapstone, slate, or concrete box, or a wooden box lined with metal. If a wooden box is used, the interior should be covered with felt or broad wicking kept wet. The bottom of the moist closet should be covered with water. The interior of the closet should be provided with nonabsorbent shelves on which to place the test pieces, the shelves being so arranged that they may be withdrawn readily.

60–62. METHODS.—Unless otherwise specified, all test pieces, immediately after molding, shall be placed in the moist closet for from 20 to 24 hours.

61. The briquettes shall be kept in molds on glass plates in the moist closet for at least 20 hours. After 24 hours in moist air the briquettes shall be immersed in clean water in storage tanks of noncorroding material.

62. The air and water shall be maintained as nearly as practicable at a temperature of 21° C (70° F).

III. INTERPRETATION OF RESULTS

CHEMICAL

The composition of normal Portland cement has been the subject of a great deal of investigation, and it can be said that the quantities of silica, alumina, oxide of iron, lime, magnesia, and sulphuric anhydride can vary within fairly wide limits without materially affecting the quality of the material.

A normal American Portland cement which meets the standard specifications for soundness, setting time, and tensile strength has an approximate composition within the following limits:

	Per cent
Silica	19–25
Alumina	5–9
Iron oxide	2–4
Lime	60–64
Magnesia	1–5
Sulphur trioxide	1–2.00
Loss on ignition	0.5–3.00
Insoluble residue	0.1–0.85

It is also true that a number of cements have been made both here and abroad which have passed all standard physical tests in which these limits have been exceeded in one or more particulars, and it is equally true that a sound and satisfactory cement does not necessarily result from the above composition.

It is probable that further investigation will give a clearer understanding of the constitution of Portland cement, but at present chemical analysis furnishes but little indication of the quality of the material.

Defective cement usually results from imperfect manufacture, not from faulty composition. Cement made from very finely ground material, thoroughly mixed and properly burned, may be perfectly sound when containing more than the usual quantity of lime, while a cement low in lime may be entirely unsound due to careless manufacture.

The analysis of a cement will show the uniformity in composition of the product from individual mills, but will furnish little or no indication of the quality of the material. Occasional analysis

should, however, be made for record and to determine the loss on ignition and the quantity of sulphuric anhydride, magnesia, and insoluble residue present.

The ground clinker as it comes from the mill is usually quick setting, which requires correction. This is usually accomplished by the addition of a small quantity of more or less hydrated calcium sulphate, either gypsum or plaster of Paris. The maximum limit for sulphuric anhydride (SO_3) is 2 per cent, which is considered the maximum quantity necessary to control setting properties.

The specification prohibits the addition of any material subsequent to calcination except water and calcined or uncalcined gypsum, which latter is permitted to regulate the time of set. Other additions may be difficult or impossible to detect even by a careful mill inspection during the process of manufacture, but as the normal adulterant would be ground raw material, an excess of "insoluble residue" would reveal the addition of siliceous material, and an excess in "loss on ignition" would point to the addition of calcareous material when either is added in sufficient quantity to make the adulteration profitable.

The effect of relatively small quantities of magnesia (MgO) in normal Portland cement, while still under investigation, can be considered harmless. Earlier investigators believed that as magnesia had a slower rate of hydration than lime the hydration of any free magnesia (MgO) present would occur after the cement had set and cause disintegration.

The effect of magnesia was considered especially injurious when the cement was exposed to the action of sea water. More recent investigation has shown that cement can be made which is perfectly sound under all conditions when containing 5 per cent of magnesia, and it has also been found that the lime in Portland cement exposed to sea water is replaced by magnesia.

The maximum limit for magnesia has been set at 5 per cent, as it has been established that this quantity is not injurious and it is high enough to permit the use of the large quantities of raw material available in most sections of the country.

PHYSICAL

SPECIFIC GRAVITY

The specific gravity of a Portland cement is not an indication of its cementing value. It will vary with the constituents of the cement, especially with the content of iron oxide. Thus the

white or very light Portland cements, containing only a fraction of a per cent of iron oxide, usually have a comparatively low specific gravity ranging from 3.05 to 3.15, while a cement containing 3 to 4 per cent or more of iron oxide may have a specific gravity of 3.20 or even higher. It is materially affected by the temperature and duration of burning the cement, the hard-burned cement having the higher specific gravity. A comparatively low specific gravity does not necessarily indicate that a cement is underburned or adulterated, as large percentages of raw materials could be added to a cement with a normally high specific gravity before the gravity would be reduced below 3.10.

If a Portland cement fresh from the mill normally has a comparatively low specific gravity, upon aging it may absorb sufficient moisture and carbon dioxide to reduce the gravity below 3.10. It has been found that this does not appreciably affect the cementing value of the material; in fact, many cements are unsound until they have been aged.

The value of the specific gravity determination lies in the fact that it is easily made in the field or laboratory, and when the normal specific gravity of the cement is known, any considerable variation in quality due to underburning or the addition of foreign materials may be detected.

FINENESS

Only the extremely fine powder of cement called flour possesses appreciable cementing qualities, the coarser particles adding little or nothing to the cementing value. No sieve is fine enough to determine the flour in a cement, nor is there any other generally applied means of accurately and practically measuring the flour. Some cements grind easier than others, thus, although a larger percentage of one cement may pass the 200-mesh sieve than another, the former may have a smaller percentage of actual flour due to the difference in the hardness and the character of the clinker, and the method used in grinding. Thus the cementing value of different cements can not be compared directly upon their apparent fineness through a 200-mesh sieve. With cement from the same mill, with similar clinker and grinding machinery, however, it is probable that the greater the percentage which passes the 200-mesh sieve the greater the percentage of flour in that particular cement. Data at present available indicate that all Portland cements have greater cementing value as the fineness is increased.

MIXING

The homogeneity of the cement paste or mortar is dependent upon the thoroughness of the mixing, and this may have considerable influence upon the time of setting and the strength of the briquettes. Concordant results can be obtained only by using extreme care in mixing the paste or mortar.

NORMAL CONSISTENCY

The quantity of water used in making the paste or mortar from which the pats for soundness, tests of setting, and the briquettes are made is very important and may vitally affect the results obtained. The determination consists in measuring the quantity of water required to bring a cement to a certain state of plasticity.

SOUNDNESS

The purpose of this test is to detect those qualities in a cement which tend to destroy the strength and durability. Unsoundness is usually manifested by a change in volume which causes cracking, swelling, or disintegration. If the pat is not properly made, or if it is placed where it will be subject to any drying during the first 24 hours, it may develop what are known as shrinkage cracks, which are not an indication of unsoundness and should not be confused with disintegration cracks, as shown in Fig. 4, p. 22. No shrinkage cracks should develop after the first 24 or 48 hours. The failure of the pats to remain on the glass or the cracking of the glass to which the pat is attached does not necessarily indicate unsoundness. In molding the pats, the cement paste should first be flattened on the glass and the pat formed by drawing the trowel from the outer edge toward the center, as shown in Fig. 8.

TIME OF SETTING

The purpose of this test is to determine the time which elapses from the moment water is added until the paste ceases to be plastic and the time required for it to obtain a certain degree of hardness. The determination of the "initial set" or when plasticity ceases is the more important, as a disturbance of the material after this time may cause a loss of strength, and thus it is important that the mixing and molding or the incorporating of the material into the work be accomplished within this time. The time of setting by the Gillmore needles is usually determined upon the pat which is to be used for the soundness test,

the top surface being flattened somewhat, as shown in Fig. 5a, page 23. In using the Gillmore needles care should be taken to apply the needles in a vertical position and perpendicular to the surface of the pat. The rate of setting and hardening may be materially affected by slight changes in temperature. The percentage of water used in gauging and the humidity of the moist closet in which the test pieces are stored may also affect the setting some-what.

TENSILE TESTS

Consistent results can only be obtained by exercising great care in molding and testing the briquettes. The correct method

FIG. 8.—*Correct method of molding cement pat*

of filling the mold is shown in Figs. 9 and 10. In testing the sides of the briquette and the clips should be thoroughly cleaned and free from grains of sand or dirt which would prevent a good bearing and the briquette should be carefully centered in the clips so as to avoid cross strains. It may be considered good laboratory practice if the individual briquettes of any set do not show a greater variation from the mean value than 10 per cent for sand mixtures. The 28-day mortar tests should not be omitted except in cases of emergency.

FIG. 9.—*Correct method of filling briquette mold*

IV. EXPLANATION OF CHANGES MADE IN REVISING THE ORIGINAL UNITED STATES GOVERNMENT SPECIFICATION FOR PORTLAND CEMENT [6]

INTRODUCTION AND RECOMMENDATIONS

At a meeting of the Departmental Conference held July 30, 1912, consideration was given to the following communication, dated March 7, 1912, which was received from the committee on standard specifications for cement of the American Society for Testing Materials:

In order to secure uniformity in specifications for cement, it is recommended that the board of direction of the American Society of Civil Engineers, the committee on standard specifications for cement of the American Society for Testing Materials, and the Government departmental committee on specifications for cement be each requested to appoint a committee of three to confer for the purpose of reconciling differences.

The Departmental Conference referred this matter to the departmental committee which had drawn up the present Government specification for Portland cement, with instructions to appoint a subcommittee to confer with committees of the American Society of Civil Engineers and American Society for Testing Materials.

The joint conference on "Uniform methods of tests and standard specifications for cement," as organized in conformity with the above resolution, was composed of the following:

Representing the American Society of Civil Engineers: Alfred Noble, George S. Webster, and R. L. Humphrey.

Representing the American Society for Testing Materials: George F. Swain, Olaf Hoff, and Clifford Richardson.

Representing the United States Government departmental committee: A. P. Davis, A. E. Phillips, and R. J. Wig.

This joint conference held nine meetings and the executive committee of the conference held 35 sessions of one or more days' duration.

Consideration was given to every detail of the specifications. Elaborate tests and investigations were made. Inquiries were

[6] Printed here in accordance with the action of the Government conference from the report of the departmental committee to the conference, submitted Sept. 7, 1916.

submitted to many engineers, laboratories, and manufacturers for information which would be of assistance to the committee. Agreement of the conference was reached in April, 1915. A report of 145 printed pages containing the findings of the joint conference was submitted to the respective parent committees for consideration. Further investigations were made by these committees and their recommendations were given final consideration by the joint conference June 1, 1916.

The cement committee of the American Society for Testing Materials adopted these specifications with some few changes June 28, 1916, since which time they have been adopted by that society.

While certain modifications desired by the Government departmental committee were not accepted by the cement committee of the American Society for Testing Materials, the latter committee did accept many of the changes recommended by the Government committee, and therefore it is recommended that the Government Departmental Conference adopt these specifications, copy of which is appended, to be issued as the United States Government specification for Portland cement with a note under the title reading:

This specification is the result of several years' work of a Joint Conference representing the United States Government, the American Society of Civil Engineers, and the American Society for Testing Materials. This was adopted by the United States Government and by the American Society for Testing Materials to become effective January 1, 1917.

It is also recommended that a footnote reference be placed upon the fineness requirement of the specification, as follows:

The United States Government specification requires that on and after July 1, 1918, the residue on the standard No. 200 sieve shall not exceed 20 per cent by weight.

It is further recommended that in case the American Society for Testing Materials does not signify its intention of approving this latter requirement another Government conference should be called and other changes made in the specification as desired by the Government committee, but which are waived at this time in order to obtain uniformity.

Following is a discussion and explanation of the changes made in the specifications in making the revision of 1916. For convenience of reference the old version and the new version of each requirement are given preceding the comments.

DEFINITION

Old Version.—The cement shall be the product obtained by finely pulverizing clinker produced by calcining to incipient fusion an intimate mixture of properly proportioned argillaceous and calcareous substances, with only such additions subsequent to calcining as may be necessary to control certain properties. Such additions shall not exceed 3 per cent, by weight, of the calcined product.

New Version.—Portland cement is the product obtained by finely pulverizing clinker produced by calcining to incipient fusion an intimate and properly proportioned mixture of argillaceous and calcareous materials, with no additions subsequent to calcination excepting water and calcined or uncalcined gypsum.

The old definition was considered to partake of the nature of a specification and to be improper in including quantitative chemical restrictions which were specifically provided for elsewhere. Furthermore, no test is available whereby one may determine whether the 3 per cent limitation is exceeded. The limitations under "Chemical properties" prevent adulteration and the use of gypsum in quantities considered to be harmful.

CHEMICAL PROPERTIES

Old Version.—In the finished cement the following limits shall not be exceeded:

	Per cent
Loss on ignition for 15 minutes	4
Insoluble residue	1
Sulphuric anhydride (SO_3)	1.75
Magnesia (MgO)	4

New Version.—The following limits shall not be exceeded:

	Per cent
Loss on ignition	4
Insoluble residue	0.85
Sulphuric anhydride (SO_3)	2
Magnesia (MgO)	5

The phrase "Loss on ignition for 15 minutes" was modified by omitting the words "for 15 minutes" as the time and other provisions of the method of making the determination are given in the methods of tests.

The insoluble residue limitation was reduced from 1 to 0.85. This was done as all unadulterated cements were found to be well within this limitation.

The maximum limit for sulphuric anhydride (SO_3) was increased from 1.75 to 2 per cent because there was no evidence that the quality of the material would be impaired by such a change, and because the increase in the fineness requirement and further restriction in the time of setting made such a change desirable and logical. This permissible increase will probably be taken advantage of only by a limited number of mills, for gypsum is more expensive than cement and it is the desire of the manu-

tent of sulphuric anhydride fixed by European practice is as follows:

	Per cent.
France	[7] 3.00
England	2.75
Germany	2.50
Austria	2.50
Holland	2.50

The magnesia limitation was raised from 4 per cent to 5 per cent. All data available demonstrated that cements containing magnesia even in excess of 5 per cent were equal in quality to those containing less than 4 per cent. The change in this requirement reduces the cost of manufacture in some cases, and should increase competition.

SPECIFIC GRAVITY

Old Version.—The specific gravity of the cement shall be not less than 3.10. Should the cement as received fall below this requirement, a second test may be made upon a sample heated for 30 minutes at a very dull red heat.

New Version.—The specific gravity of cement shall be not less than 3.10 (3.07 for white Portland cement). Should the test of cement as received fall below this requirement, a second test may be made upon an ignited sample. The specific-gravity test will not be made unless specifically so ordered.

While the specific-gravity requirement is still included in the specification, it was the general opinion that it furnished little or no information of value relative to the quality of the cement. A cement meeting all other requirements was considered to be satisfactory irrespective of its specific gravity. Sufficient data were not available to warrant the complete elimination of this requirement, but the following clause was added:

The specific-gravity test will not be made unless specifically so ordered.

This makes the requirement still obligatory although the test may not be made by the purchaser. A clause is also inserted making white Portland cements acceptable if the specific gravity is 3.07 or higher. This was thought desirable as white Portland cements have a very low iron content which gives them a correspondingly lower specific gravity.

FINENESS

Old Version.—Ninety-two (92) per cent of the cement, by weight, shall pass through the No. 100 sieve, and 75 per cent shall pass through the No. 200 sieve.

New Version.—The residue on a standard No. 200 sieve shall not exceed 22 per cent by weight.

NOTE.—The United States Government specification requires that on and after July 1, 1918, the residue on the standard No. 200 sieve shall not exceed 20 per cent by weight.

[7] Excepting in sea water, when it is 1.30.

The fineness requirement was changed by eliminating the requirement on the No. 100 sieve and requiring a residue of not more than 22 per cent in place of 25 per cent on the No. 200 sieve.

The Government committee desired to have the requirement raised to not more than 20 per cent residue on the No. 200 sieve. The cement committee of the American Society for Testing Materials, however, would not agree to this increased requirement, primarily on the basis that it would be a hardship upon certain manufacturers to meet such a requirement without ample time for changing plant equipment. All data available to the committees indicated that the finer the commercial cements are ground the more cementing value they possess, although the fineness of two cements of different manufacture may not furnish any indication of their relative cementing values in concrete.

The results of a rather comprehensive series of tests made in a number of laboratories with several brands of cement showed an average increase of 2 per cent in compressive strength at the age of one month for each 1 per cent increase in fineness between the limits considered, which vary from 77 to 83 per cent.

The information obtained indicates that the majority of cement mills are now meeting the 22 per cent residue requirement and a number are meeting the 20 per cent requirement. The departmental committee is of the opinion that fine grinding is a step in the right direction. For the sake of uniformity it has recommended that the 22 per cent residue requirement be temporarily adopted, the 20 per cent residue requirement to be made effective in 1918, which will give all manufacturers sufficient time to readjust their mills.

The study of available data showed that the relative fineness of that portion of cement which is retained on the No. 200 sieve is unimportant, as it has little or no cementing value. With present methods of grinding the great majority of cements meeting the present requirements of the No. 200 sieve will of necessity meet the requirements of the No. 100 sieve. Therefore the No. 100 sieve requirement has been omitted.

SOUNDNESS

Old Version.—Pats of neat cement prepared and treated as hereinafter prescribed shall remain firm and hard and show no sign of distortion, checking, cracking, or disintegrating. If the cement fails to meet the prescribed steaming test, the cement may be rejected or the steaming test repeated after seven or more days, at the option of the engineer.

New Version.—A pat of neat cement shall remain firm and hard and show no signs of distortion, cracking, checking, or disintegration in the steam test for soundness.

The soundness requirement was changed by omitting the test of neat cement pats exposed to air and water for 28 days and retaining only the test of a neat cement pat exposed in an atmosphere of steam for five hours.

Members of all committees expressed it as their experience that cements meeting the other requirements of the specification and the steam test for soundness never failed to meet the air and water soundness tests, therefore the latter were considered superfluous and were omitted.

The clause relative to retest before rejection has been inserted elsewhere in the specification under the heading "Rejection."

TIME OF SETTING

Old Version.—The cement shall not acquire its initial set in less than 45 minutes and must have acquired its final set within 10 hours.

New Version.—The cement shall not develop initial set in less than 45 minutes when the Vicat needle is used or 60 minutes when the Gillmore needle is used. Final set shall be attained within 10 hours.

The new specifications provide for the use of either the Vicat or the Gillmore needles, while the old specifications required the use of the Gillmore method only. There was a difference of opinion regarding the relative merits of these methods. After careful investigation it was decided to include both methods, as there was no material difference in their accuracy. Either one may be used as ordered by the engineer.

Tests have shown that the Gillmore needle requires on the average about 15 minutes more than the Vicat needle to indicate initial set, therefore the specific requirement is different for each needle.

The time of initial setting was increased from 45 minutes to 60 minutes by the Gillmore needle. This was deemed desirable, as it is not uncommon to find that cements which meet the old specification requirements in the laboratory become quick setting on the work where the temperature is 10° or more above that of the laboratory. This change was particularly desired by all members of the joint conference.

TENSILE STRENGTH

Old Version.—Briquettes made of neat cement, after being kept in moist air for 24 hours and the rest of the time in water, shall develop tensile strength per square inch as follows:

	Pounds
After 7 days	500
After 28 days	600

Briquettes made up of 1 part cement and 3 parts standard Ottawa sand, by weight, shall develop tensile strength per square inch as follows:

	Pounds
After 7 days	200
After 28 days	275

The average of the tensile strengths developed at each age by the briquettes in any set made from one sample is to be considered the strength of the sample at that age, excluding any results that are manifestly faulty.

The average strength of the sand-mortar briquettes at 28 days shall show an increase over the average strength at 7 days.

New Version.—The average tensile strength in pounds per square inch of not less than three standard mortar briquettes (see sec. 51) composed of one part cement and three parts standard sand, by weight, shall be equal to or higher than the following:

Age at test, days	Storage of briquettes	Tensile strength, pounds per square inch
7	1 day in moist air, 6 days in water	200
28	1 day in moist air, 27 days in water	300

The average tensile strength of standard mortar at 28 days shall be higher than the strength at 7 days.

The neat tests were eliminated from the specification, it being the general opinion that they were unreliable and misleading. For example, the results of tests of cements ground to increased fineness showed decreased strength in the neat tests, although there were substantial increases in the mortar and concrete tests. It was not uncommon to find retrogession with age in neat tests between 7 and 28 days, although substantial increases were obtained in mortar tests. This fact was recognized in the old Government specification by permitting such retrogression in neat tests.

The mortar strength requirement at 28 days was increased from 275 to 300 pounds. Tests substantiated by general experience showed that most cements gave strengths appreciably higher than the old requirement. It was also recognized that the increase in the fineness requirement would result in higher mortar strengths.

PACKAGES AND MARKING

Old Version.—Bids for furnishing cement or for doing work in which cement is to be used shall state the brand of cement proposed to be furnished and the mill at which made. The right is reserved to reject any cement which has not established itself as a high-grade Portland cement, and has not been made by the same mill for two years and given satisfaction in use for at least one year under climatic and other conditions at least equal in severity to those of the work proposed.

The cement shall be delivered in sacks, barrels, or other suitable packages (to be specified by the engineer), and shall be dry and free from lumps. Each package shall be plainly labeled with the name of the brand and of the manufacturer.

A sack of cement shall contain 94 pounds net. A barrel shall contain 376 pounds net. Any package that is short weight or broken or that contains damaged cement may be rejected, or accepted as a fractional package, at the option of the engineer.

New Version.—The cement shall be delivered in suitable bags or barrels with the brand and name of the manufacturer plainly marked thereon, unless shipped in bulk. A bag shall contain 94 pounds net. A barrel shall contain 376 pounds net.

The cement shall be stored in such a manner as to permit easy access for proper inspection and identification of each shipment, and in a suitable weather-tight building which will protect the cement from dampness.

The clause in the old specification relative to the rejection of cement not established as a high-grade Portland cement has been omitted from the new specification. The Government committee desired to have the following modified form of this clause inserted under the head of "Rejection":

The right is reserved to reject any mill product which is not established as a high-grade Portland cement.

The other committees, however, would not agree to the insertion of this clause and the Government committee waived its desires in the matter for the sake of uniformity.

The clause relative to rejection of packages short in weight is inserted in a modified form elsewhere in the specification under the heading "Rejection."

INSPECTION

Old version.—The cement shall be tested in accordance with the standard methods hereinafter described. In general, the cement will be inspected and tested after delivery, but partial or complete inspection at the mill may be called for in the specifications or contract. Tests may be made to determine the chemical composition, specific gravity, fineness, soundness, time of setting, and tensile strength, and a cement may be rejected in case it fails to meet any of the specified requirements. An agent of the contractor may be present at the making of the tests or they may be repeated in his presence.

In case of the failure of any of the tests, and if the contractor so desires, the engineer may, if he deem it to the interest of the United States, have any or all of the tests made or repeated by the Bureau of Standards, United States Department of Commerce, in the manner hereinafter specified, all expenses of such tests to be paid by the contractor. All such tests shall be made on samples furnished by the engineer.

New version.—Every facility shall be provided the purchaser for careful sampling and inspection at either the mill or at the site of the work, as may be specified by the purchaser. At least 10 days from the time of sampling shall be allowed for the completion of the 7-day test, and at least 31 days shall be allowed for the completion of the 28-day test. The cement shall be tested in accordance with the methods hereinafter prescribed. The 28-day test shall be waived only when specifically ordered.

The inspection clause has been entirely rewritten. That part referring to rejection has been placed elsewhere in the specification under the heading "Rejection." The paragraph referring to retest by the Bureau of Standards in cases of dispute has been omitted. In the new specification a minimum time is specified for the completion of tests. Specific provision is also made for

the omission of the 28-day tests only when specially so ordered by the engineer.

REJECTION

New Version.—The cement may be rejected if it fails to meet any of the requirements of these specifications.

Cement shall not be rejected on account of failure to meet the fineness requirement if upon retest after drying at 100° C. for one hour it meets this requirement.

Cement failing to meet the test for soundness in steam may be accepted if it passes a retest using a new sample at any time within 28 days thereafter.

Packages varying more than 5 per cent from the specified weight may be rejected; and if the average weight of packages in any shipment, as shown by weighing 50 packages taken at random, is less than that specified, the entire shipment may be rejected.

This is a new section of the specification embracing all references to the rejection of cement as taken from other portions of the old specification. The only new matter is a clause relative to the permissible variation in the weight of packages.

METHODS OF TESTS

The description of the methods of tests are of too great length to be repeated here. However, following are comments relative to the changes made.

SAMPLING

The description of the method of sampling has been entirely rewritten making the method specific for individual and composite and for car and bin sampling.

The departmental committee is not in favor of an invariable rule concerning the number of samples that may be required but waived its objection to this feature of the new specification for the sake of uniformity.

CHEMICAL ANALYSIS

Much attention was given to the method of chemical analysis. With the cooperation of Dr. W. F. Hillebrand and Clifford Richardson numerous tests were made by many laboratories and the old methods modified in the light of the results obtained.

A tolerance or permissible variation is also allowed on each determination. The purpose of this tolerance is to prevent the rejection of cement where the analysis shows that the restricted element exceeds the limitations of the specifications by no more than the probable error due to lack of reproducibility of chemical determinations. The majority of the Government committee is opposed to the inclusion of any tolerance allowance in the specification, believing that sufficient margin should be provided by the manufacturer to cover the probable error of test.

DETERMINATION OF SPECIFIC GRAVITY

The method of determining specific gravity was not changed from the old specification, although the description was somewhat modified; the method of igniting sample for retest was changed and the required temperature raised. The temperature allowed will drive off carbon dioxide (CO_2) and some other gases if present and would be objectionable if the specific gravity test were important.

DETERMINATION OF FINENESS

The description of the method has been expanded and slightly changed to make it more definite.

The most essential difference from the old specification is the insertion of a "tolerance" or "permissible variation" clause which provides for the acceptance of the cement unless the results show that the cement is actually coarser than the requirement, after allowing 1 per cent for the lack of reproducibility of the determination. The majority of the Government committee is opposed to the inclusion of a tolerance clause for the reason previously stated under chemical analysis.

MIXING CEMENT PASTES AND MORTARS

The only change made is in the verbiage to make the statement more clear and specific.

NORMAL CONSISTENCY

The Vicat method is substituted for the Ball method for the determination of normal consistency. A comprehensive series of tests was made which showed that the Vicat method gave slightly more concordant results.

DETERMINATION OF SOUNDNESS

No change was made in the method other than omitting the description of the air and water pat. The verbiage is modified slightly and illustrations are shown of a steam apparatus and typical failures of pats in the steam soundness test.

DETERMINATION OF TIME OF SETTING

The old specification provided only for the use of the Gillmore method. In the new specification both the Gillmore and Vicat methods are described and the specification permits the use of either.

TENSION TESTS

No essential change has been made in the method although the verbiage has been changed somewhat to make it more specific.

STORAGE OF TEST PIECES

No essential change has been made other than the insertion of the description of a moist closet for the storage of test pieces and placing a minimum limitation on the time which briquettes should be retained in the molds.

GENERAL REMARKS

The Government committee is of the opinion that the new specification is an improvement over the old. Certain essential requirements such as strength, fineness, and setting properties, have been increased, certain unessential requirements, such as tests of neat cement, 100-mesh sieve requirement, air and water soundness pats, etc., have been omitted. Other limitations which did not improve the quality of cement but were a handicap to certain manufacturers such as the low sulfuric anhydride and magnesia limitations have been made more liberal.

While the Government committee desired certain changes in the substance and form of these specifications it is of the opinion that the securing of generally recognized uniform specification for Portland cement in the United States is of greater importance and it must be recognized that such uniformity is made possible only by compromise.

The new specification, although an improvement over the old, can not be considered as entirely satisfactory, as there is no test which furnishes specific information as to the relative value in concrete of the products of different mills. Under the specification for fineness the cement may contain a large percentage of worthless material which could be made valuable by finer grinding, and improvement in this direction should be steady and persistent. Furthermore, the methods of tests so far devised are not as accurate as they should be. With the continuation of investigations and research further improvement should be possible in the near future.

Respectfully submitted.

Departmental Committee:
ARTHUR P. DAVIS, *Chairman,*
RUDOLPH J. WIG, *Secretary,*
HENRY C. NEWCOMER,
JOHN W. GINDER,
ASA E. PHILLIPS,
C. D. THURBER,
W. A. E. DOYING,
S. S. VOORHEES,

..... 7. We are informed subscriber has reason to believe that cement under this contract is being diverted to other work.

..... 8. Subscriber would like to know how much cement has been shipped on this contract.

Yours truly, Mid-West Cement Credit & Statistical Bureau.
C. R. Kayser, Manager. WDA.

This form to be used by Bureau in directing attention of other Associations to Specific Contracts in their reports.

Paving, Curbs, and Sidewalks

Jan. 26, 1920.

No. C-495. Brand: Alpha. Delivery Point: Cleveland, Ohio.

Name of Streets: Paving 13 streets in East View Village—So. Moreland Blvd.; E. 137th St.; E. 132d St.; Southington Rd.; Risley Rd.; No. Moreland Blvd.; Livingston Rd.; Keswick Rd.; Hampton Rd.; Corby Rd.; Ashwood Rd.; Albion Rd.; Becket Rd.

City or Town: Cleveland, Ohio. Total Am't of Contract: 25,000 bbls. Nothing shipped.

Purchaser: Akron Sewer Pipe Co. of Cleveland, O. Contractor: Cleveland Trinidad Paving Co.

Date of Contract: Dec. 8, 1919.

Has above contractor been awarded these streets? Yes.

Has work started? No. If so, when? ——.

How much cement does contractor say he has used? None on this contract.

How much cement does contractor say he will use? About 10,500 bbls. Universal.

[fol. 1960½] Does contract cover full requirements? √ If not, what part? ——.

What other brands used? Universal only thru Clev. Bldrs. Sup. Co.

Condition of work? Not started.

If work has not started state date it will go ahead? As soon as weather Permits.

Estimate date of completion? This year.

Kind of Paving? ——. Sq. yds? ——. Cement required — bbl.

Kind of Sidewalks? ——. Sq. yds.? ——. Cement required — bbl.

Lin. ft. Curb and Gutter ——. Cement required — bbl.

Total ——.

Source of information? 2/10/20. Mr. Cramer of Akron Sewer Pipe Co. said no cement has been delivered to date on this contract.

Remarks: 2/10/20. Mr. Robinson of Cleveland Trinidad Co. said they had not contracted for above cement but had placed their contract with the Clev. Bldrs. Sup. Co. for Universal cement to complete the above work estimating about 10,500 bbls. will be required

as there is about 50,000 sq. yds. paving with 6" concrete base and curbs and gutters all of which is to be done for Van Swengen Co.

Date: 2/10/20. Signed Frank Broomall.

This form to be used by auditor on the work.

I estimate this work will require about 10,000 bbls. cement.

Endorsed: Received Feb. 13, 1920. Cem't Mfg. Pro't. Ass'n.

File Alpha *C-495 2722

Date: March 5th, 1920.

Dear Sir: The work covered by the following contract has been investigated and the facts as reported by the auditor are given below for your information:

Alpha *C-495.

Purchaser—Akron Sewer Pipe Co., Cleveland, Ohio. Paving 13 streets in East View Village. So. Moreland Blvd., Keswick Rd, E. 137th St., Hampton Rd., E. 132nd St., Corby Road, Southington Rd., Ashwood Rd., Risley Rd., Albion Rd., No. Moreland Blvd., Becket Road, Livingston Road, Cleveland, Ohio. Contractor—Cleveland Trinidad Paving Co. 25,000 barrels, nothing shipped. Date of Contract—12/8/19.

Above mentioned contractor has been awarded this contract. Work has not started. Contractor says he has used no cement on this contract, but will use about 10,500 bbls. Universal. Universal Brand only used—through Cleveland Bldrs. Supply Co., Work not started, but will go ahead as soon as weather permits. Date of completion estimated for this year.

Auditor visited Mr. Cramer of Akron Sewer Pipe Co. Mr. Cramer said no cement has been delivered to date on this contract. Mr. [fol. 1961½] Robinson of Cleveland Trinidad Co. said they had not contracted for above cement but had placed their contract with the Cleveland Bldrs. Sup. Co. for Universal cement to complete the above work estimating about 10,500 bbls. will be required as there is about 50,000 sq. yds. paving with 6" concrete base and curbs and gutters all of which is to be done for Van Swengen Co. Auditor estimates this work will require about 10,000 bbls. cement.

Date of Audit—February 10th, 1920.

Copy sent to Mid-West March 25th, 1920.

..... 7. We have reason to believe that cement under this contract is being diverted to other work.

We are informed that the work awarded the Company shown as contractors consists of Grading only and does not require any cement.

Yours truly, Lehigh Portland Cement Company. B. L. Swett, Eastern Sales Manager.

(This form to be used by members in calling the attention of the Association to "Specific Contracts" upon which they desire further information.)

[fol. 1963] Form 2

Cement Manufacturers' Protective Association

19 West 44th Street, New York

Buildings

Dec. 30, 1919.

No. Va-123. Brand: Alpha. Delivery Point: Blaine & Elk Garden, W. Va.

Description of Work: For use in building 7.66 miles Elk District Road, Mineral County.

Location: West Virginia. (St. and No.:) ——.

Contractor: H. W. Kaylor Co. Architect: —— ——.

Purchaser: Woolf Milling Co., Keyser, W. Va. Total Am't of Contract: 15,000 bbls. Nothing shipped.

Date of contract: Oct. 3d, 1919.

Has above contractor been awarded this work? Yes, but work requires only small amt. of concrete.

Has work started? ——. If so, when? ——.

Is foundation in? ——. Is superstructure started? ——.

How many floors are completed? ——.

How many floors to be finished? ——.

How much cement did each floor take? ——.

Give dimensions of building ——.

What kind of construction—steel, reinforced concrete, etc. ——.

How much cement does contractor say he has used? ——.

How much more cement does contractor say he will use? ——

[fol. 1963½] What other brands are being furnished for this work? ——.

If work has not started state date it will go ahead —— —, ——.

Estimate date of completion: —— —, ——.

Is any of the cement under this contract to be furnished to sub-contractors? ——.

How much cement dealer's books show has been used? None.

Source of information: Visited dealer and county officials.

Remarks: Dealer says he has this contract but has delivered no cement as yet. Contractor started work last fall and worked until bad weather, he thinks the road is 7½ miles and 12′ wide.

At County clerk office contract filed Sept. 9/19, for Elk District Road, with H. W. Kaylor.

Specifications show only 3 item using concrete i. e. 50 cu. yd. Class A concrete 60 cu. yds. Class B concrete and 250 cu. yds. of concrete rubble masonry which will not exceed 400 bbls. of cement.

County Engineer says no cement road will be built under present contract of H. W. Kaylor. When bids were called for, it was hoped that a concrete road could be built but at present they haven't enough money. He says under present contract with Kaylor the grading is being done and if a concrete road is to be

built new figures will be asked. Kaylor's contract is only about $60,000.

Date Jan. 14/20. Signed Harry I. Norton.

This Form to be used by the Auditor on the Work.

Endorsed: Received Jan. 15, 1920. Cem't Mfg. Pro't Ass'n.

{fol. 1964} Form 4

Cement Manufacturers' Protective Association

19 West 44th Street, New York

File Alpha Va-123. #2645

Date: January 16th, 1920.

DEAR SIR: The work covered by the following contract has been investigated and the facts as reported by the auditor are given below for your information:

Alpha Va-123.

Purchaser: Woolf Milling Co., Keyser, W. Va. For use in building 7.66 miles Elk District Road in Mineral County, Blaine & Elk Garden, W. Va. Contractor—H. W. Kaylor Co. 15,000 b'ls., nothing shipped. Date of contract—October 3d, 1919.

Above-mentioned contractor has been awarded this contract. Dealer's book show no cement delivered.

Auditor visited dealer and County officials.

Interview with dealer, who said he has this contract but has delivered no cement as yet. Contractor started work last Fall and worked until bad weather. He stated that he thought the road is 7½ miles and 12' wide.

Auditor visited County Clerk's office—contract filed Sept. 9, 1919 for Elk District Road with H. W. Kaylor. Specifications show only three items using concrete: 50 cu. yds. Class A concrete; 60 [fol. 1964½] cu. yds. Class B concrete and 250 cu. yds. of concrete rubble masonry, which will not exceed 400 bbls. cement.

Interview with County Engineer, who said no cement road will be built under present contract of H. W. Kaylor. When bids were called for it was hoped that a concrete road could be built but at present funds are lacking. He further stated that grading is being done under present contract with Kaylor and if a concrete road is to be built, new figures will be asked.

Date of audit—January 14th, 1920.

Copy to Lehigh—1/29/20.

Cement Manufacturers' Protective Association, per —— ——.

(This form will be used by the Association when sending information on audited contracts to the manufacturers.)

[fol. 1965] DEF'TS' EX. NO. D 4

Cement Manufacturers' Protective Association

The contents of this booklet refer to normal commercial business and are subject to such temporary modifications as may be made by Government orders and regulations for war purposes.

Instructions to Auditors

The Portland Cement industry in America has had a phenomenal growth, and during past years those engaged in its manufacture have struggled against conditions that were most unsatisfactory, arising from the many peculiar requirements in marketing this product, until it has become necessary to effect an organization to economically secure sound basic facts concerning the details of the industry which can be used individually and separately by the members.

In order to accomplish these aims—

The Cement Manufacturers Protective Association was organized in 1915 for the purpose of collecting and disseminating such accurate information as may serve to protect the manufacturers of Portland Cement against misrepresentations, deception and imposition, thereby enabling them each to conduct their business exactly as they please in [fol. 1965½] every respect and particular, free from misdirection by false or insufficient information concerning the following matters, to wit:

(a) Information concerning credits.

(b) Information concerning contracts which have been made for the delivery of cement, sufficiently complete to enable the manufacturer to protect himself against spurious contracts and like transactions induced by misrepresentation.

(c) Information concerning freight rates on cement.

(d) Statistical information as to production, stocks of cement and clinker on hand, and shipments.

To accomplish these purposes, the Association maintains an office and a force of traveling auditors who have the following instructions relative to auditing of contracts:

In going into a town to audit contracts, go first to the dealer and make clear to him the following:

1. That we are going to be frank with him and expect frankness in return.

2. That our object in auditing contracts is to secure information for the manufacturers as to their obligations as to the actual requirements of jobs according to all the terms and conditions of the contracts.

3. That manufacturing and shipping conditions are abnormal in every respect, and that we are making every effort to find out just exactly where the manufacturers stand with respect to their obligations so that they can protect both themselves and their customers.

[fol. 1966] 4. That we are auditing contracts, regardless of how old or how new they are.

5. That by ascertaining and determining their actual obligations the manufacturers will be in much stronger position to protect all of their customers.

6. That the manufacturers expect to live up to their obligations in every respect.

7. That we expect his full co-operation.

8. That it is his—the dealer's—advantage to cut his outstanding obligations down to a minimum.

Bear in mind for your personal information—

1. That the manufacturers are not trying to dodge or side-step any legitimate obligations.

2. That the manufacturers do not want to cancel bona fide contracts.

3. That the manufacturers do want to get the actual commitments on their books in line with the actual requirements of jobs that are bona fide.

4. That the manufacturers do want to cancel every job that is not bona fide and legitimate.

5. That by doing so the manufacturers can insure protection to all dealers who are obligated to deliver cement on legitimate contracts.

6. That the dealers as a rule will want to co-operate with us, when our position and reasons are explained to them.

7. That your information must not be based on hearsay.

[fol. 1966½] 8. That you must get information from every possible source. Put it all down, and then arrive at as accurate a conclusion as possible.

Buildings

No. 1538-758. Brand: Phœnix. Delivery Point: Philadelphia, Pa.

Description of Work: Cheltenham High School. Owner: Cheltenham Township.

Location: Ogontz, Pa. (St. and No.): ——.

Contractor: Felix Cantano. Architect: —— ——.

Purchaser: P. H. Fairlamb Co. Total Am't of Contract: 10,000 bbls.

Date of Contract: February 19th, 1920.

Has above contractor been awarded this work? No.

Has work started? No.

If so, when? ——.

Is foundation in? ——.

Is superstructure started? ——.

How many floors are completed? ——.

How many floors to be finished? ——.

How much cement did each floor take? ——.

Give dimensions of building. ——.

What kind of construction—steel, reinforced concrete, etc.? ——.

How much cement does contractor say he has used? ——.

How much more cement does contractor say he will use? ——.

[fol. 1969½] What other brands are being furnished for this work? ——.

If work has not started state date it will go ahead? ——.

Estimate date of completion. ——.

Is any of the cement under this contract to be furnished to subcontractors? ——.

How much cement dealer's books show has been used? ——.

Source of Information: Mr. W. Gilson, Consulting Engineer for H. C. Wise, Architect.

Remarks: Mr. Gilson said that this contract has not been awarded, and that in a few weeks, it will be advertised for bids. There will be some time before work is actually started.

This building is 96′ x 264′ and including retaining walls 30′ high. Mr. Gilson said that it would require about 10,000 bbls.

Date: April 7, 1920. Signed: Albert G. Ward.

[fol. 1979] Cement Manufacturers Protective Association 19 West 44th St., New York City

January 20, 1921.

To Member Companies:

In submitting the attached report of the work of the Cement Manufacturers Protective Association for the year 1920, the writer wishes to express his appreciation of the indulgence and assistance of the representatives of the member companies in his task of becoming acquainted with the objects, methods and business of the Association. What might have been a rather difficult task has not only been facilitated but has been made an extremely pleasant one.

Following a brief outline of the work of the past year are attached summary tables and graphical presentations of the statistics compiled by the Association since its organization. These have been prepared in order to facilitate reference to them and to enable a more ready comparison of current statistics to be made with old.

Respectfully submitted, (Signed) C. Raymond Hulsart, Vice-President.

[fol. 1979½] Cement Manufacturers Protective Association 19 West 44th Street, New York City

Report of the Work of the Association for the Year 1920

General

The work of the Association continued during 1920 along the previously well established lines and within the scope defined by the Constitution and By-laws. As provided therein, this covers: (1) Credit Reports; (2) Contract Reports; (3) Contract Investigation; (4) Statistical Reports of Production Stocks and Shipments; (5) Freight Rates.

The routine work of the Association office and field force is divided into two general classes: (1) The receipt and issuing of reports and statistical information and (2) the investigation of cement contracts for specific work. The first consists of receiving, indexing and filing the reports from the member companies under the above

headings (except #3) and the compiling of this data for the preparation of the following fourteen Association Reports which have been issued regularly during the year:

Contract Reports

Form 7—Daily Report of Contract Filed.
" 8—Daily Summary of Contracts Filed.
" 9—Monthly Summary of Contracts Filed.
" 10—Printed report of Contracts on File (Quarterly.)
[fol. 1980] Form 11—Unshipped Balances of Contracts on File by States (Quarterly.)

Production and Shipments

Form 12—Monthly Statistical Report of Production, Stocks and Shipments.
" 13—Percentage of Commitments as compared with Shipments. (Quarterly)
" 14—Report of Shipments for First Fifteen Days of each Month.
" 28—Commitments and Shipments on Various Classes of Construction by States. (Quarterly.)

Credit Reports

Form 15—Monthly Credit Report of Overdue Accounts.
" 16—Summary of Monthly Credit Report.
" 17—Comparative Summaries of Monthly Credit Reports for past 12 months.
" 18—Summary of Accounts placed with Attorneys.

Miscellaneous

Form 19—Bag Returns and Rejections. (Quarterly.)

The second class of Association work consists of the investigation of cement contracts, when requested, to determine their true status and the cement requirements of the specific work named; and the preparation of reports of the facts disclosed by these investigations for the information of the companies interested.
[fol. 1980½] The office work involved in the first class above is about proportional to the number of contracts filed, cancellations and changes. During 1920 the number of these have been about 25% greater than during the two previous years. The greater increase in the work of the Association has been in contract investigation. During the past year 2433 contracts were investigated as against 716 in 1919 and 483 in the last six months of 1918. No data is available for previous periods.

The office force has consisted of six to seven young women under the direction of the Secretary. The field force has varied from three to seven engineers.

(1) Credit Reports

Besides the Monthly Credit Report of Unpaid Accounts (Form 15) and the report of accounts placed in hands of Attorney, there is maintained in the Association office a card index of all over-due accounts for the past five years. This data is available to the credit managers and will be furnished upon request.

Table 9 gives the summaries of over-due accounts for each month from 1917 to 1920 inclusive. Chart IV shows the fluctuations in the amount of these accounts, illustrating seasonal and other changes.

(2) Contract Reports

The reports and summaries, listed on pages 1 and 2, of contracts filed, cancellations and changes were issued regularly during the [fol. 1981] year. The Printed Contract Report, which was formerly issued monthly, was issued Quarterly during 1920 as of March 1st, June 1st, September 1st and December 1st, comprising respectively 183, 189, 130 and 78 pages. This report was formerly arranged by States in order of the amount of contracts filed in the respective states. It is now arranged geographically by states from Maine southward. Heretofore, separate communities within greater New York but outside of Brooklyn, Manhattan and the Bronx have been listed alphabetically as separate cities under New York State. In accordance with the action of the Association on December 14th, all contracts in greater New York will hereafter be listed together, but divided into the five boroughs.

Table 5 gives the amount of New Contracts Filed plus Increases and Reinstatements, i. e. new business, or each month from 1917 to 1920 inclusive. Table 6 gives Cancellations plus Decreases for the same period. Table 8 gives the Total Commitments or Unshipped Balances at monthly or quarterly points from 1916 to 1920 inclusive. Chart III is a graphical presentation of the data in Tables 5, 6 and 8 illustrating seasonal and other changes.

Table 7 shows the practically uniform increase in the average size of cement contracts filed, from 2,206 barrels in 1917 to 3,260 barrels in 1920.

(3) Contract Investigation

During 1920, a much greater number of requests for investigation were received than during previous years. The total contract [fol. 1981½] amount of the contracts investigated was 9,233,160 barrels. The total actual cement requirements as estimated by our engineers was 5,703,130 barrels. A total difference of 3,530,030 barrels or an average difference of 1,539 barrels per contract.

The number of contracts investigated was equal to forty-six per cent of the number of contracts filed in 1920. The amount in barrels of the contracts investigated was equal to 54% of the total amount filed during the year.

It is not expected that so many investigations will be required in 1921. Provision has been made in the estimate of 1921 expenses for 1,500 to 2,000 investigations, depending upon the regularity that requests are received. (See table on page 5.)

The field force has averaged 5¾ engineers who have had a technical training and considerable experience in engineering or building construction. One especially qualified engineer spent a part of his time in the office to assist in the checking of estimates and technical features of the reports. The 2,433 investigations involved about 7,300 interviews by our engineers, beside surveys of construction, study of plans and preparation of estimates.

Except in comparatively few instances, our engineers met little opposition from dealers or contractors. Every effort was made to impress those interviewed with the reasonableness of our objects and to enlist their co-operation. It is fair to state that this co-operation has been extended and will continue to increase.

[fol. 1982] Beside establishing all of the facts relative to the status of contracts, the principal object in the field and office has been to secure and report accurate detailed estimates of the actual cement requirements, to enable the cement companies to know with certainty the amount they are obligated to deliver under the contracts investigated.

It has not been found practicable to assign engineers to fixed territories on account of the large area covered; from Maine to Georgia and west to Ohio and Kentucky. The Association office will continue to notify the member companies when it is planned to send an engineer to any certain territory. It is hoped however, that requests for investigation will not be held for such notice, as itineraries of engineers are determined by the number and location of requests on file.

Number and Cost of Contract Investigation by Years

Year	No. of contracts investigated	Investigations per auditor per month	Auditor's salaries and expenses	
			Total	Per inv'n
Last 6 months	483	27	$4,876	$10.10
1919	716	20	10,077	14.07
1920	2,433	42	20,964	8.62
1921	...	..	.....	....
Estimated	1,500 to 2,000	30 to 40	$16,000	$8 to $10

[fol. 1982½] (4) Production and Shipments

The monthly Statistical Report of Production, Stocks and Shipments was issued regularly during the year. A stock of old forms not of standard size was used. Beginning with the report for January, 1921, a standard 11″ x 17″ form will be used with a center binding space for filing in a standard 8½″ x 11″ ring binder.

Tables 1, 2 and 3 give the statistics of Cement Ground, Stock on Hand and Shipments for each month from 1915 to 1920 inclusive. Chart 1 shows the same data graphically, illustrating seasonal fluctuations and other changes.

Table 4 gives the yearly shipments of each member company from 1915 to 1920 inclusive. Chart II shows the same data graphically, grouped both by years and by companies.

[fol. 1983] (5) Freight Rates and Changes

Twenty-nine notices of freight rate changes affecting 1,130 delivery points in 10 States were issued during the year. Also a table of corrections to apply to the rates given in the Freight Rate Books in order to apply the 40% increase in rates effective August 26th, 1920.

Data is now being compiled for the issue of a complete new set of Rate Books.

Changes in Reports and Forms

All reports have been reduced to a standard 8½" x 11" or 11" x 17", except the Monthly Statistical Report as noted above.

The printed Contract Report has been arranged geographically, and contracts in greater New York will hereafter be listed by Boroughs as noted above.

The forms for reporting contract investigations have been slightly changed to add to clearness and to provide a second or more pages which are necessary with the detailed estimates that are now made a part of most of the reports.

Form 28, Commitments and Shipments on Various Classes of Construction by States was first issued as of Sept. 1st, 1920, on three 11" x 17" mimeographed sheets. Action by the Association is now pending as to whether this report shall be printed in 1921 on one sheet. It has been prepared from only the active contracts listed in the Printed Contract Report and has not included shipments on cancelled or completed contracts. Our records will be so arranged in [fol. 1983½] 1921 as to include in Form 28, shipments for the year on all contracts whether active, cancelled or completed.

Financial

Column #1 of the table on page 9 gives the Budget for 1920 as estimated in January 1920; Column #2 shows the actual cost during 1920 of doing all of the work contemplated in the budget; and Column #3 the cost of additional auditors and office force ordered by the Association to cover the extraordinary amount of contract investigation. Column 4 gives the total disbursements for the year for all work whether contemplated in the budget or ordered during the year. The work contemplated in the budget actually cost about $5,000 less than originally estimated. The cost of additional audi-

tors and office force to cover the extra contract investigations amounted to $11,445.50. To cover this, an extra assessment of one-half mill amounting to $13,456 was ordered by the Association at the meeting of Sept. 23rd, 1920.

A balance of $9,177 will be carried over from 1920. The regular dues of two mills per barrel based on 1920 shipments will yield $58,334 making a total sum of $67,511 available for 1921. This provides $5,311 for contingencies over and above the estimated expense for 1921.

Meetings

Nine regular meetings of the Association were held during 1920, meetings having been omitted in June, July and August. The pro- [fol. 1984] ceedings at all meetings were reported stenographically and the minutes printed and distributed to the member companies. The average number of companies represented at meetings was 13.7. The average number of representatives attending was 17.

In addition to the regular monthly meetings of the Association, one meeting of credit managers was held on December 14th, 1920. The discussion at this meeting was reported stenographically, but not printed.

(Here follow side folio pages 1985-1998, inclusive.)

[fol. 1999] DEF'TS' EX. NO. D 24

The Atlas Portland Cement Co.

New York

For the attention of C. A. Kimball, Sales Manager.

October 20, 1916.

Confirming our conversation in which you indicated that some of our competitors advanced prices 10¢ per barrel. Please arrange to issue your quotations at once, getting them all out by tonight if possible, making our base $1.15 Northampton and $1.25 Hudson to dealers.

Mr. Costello told me on the telephone that he had positive information that the Lehigh Company were quoting in his district on basis of $1.25 Union Bridge, which made the Baltimore price to dealers $1.40, and the price in the balance of the territory based on $1.25, plus the rate from Union Bridge to various destinations. We want to raise our price to this basis. In other words, using $1.25 Union Bridge, or $1.15 Northampton, in that territory, whichever makes the lowest price at final destination.

I have not received any information of competitors changing prices at their basing points and, therefore, we want to continue to meet

the competition from their basing points as it stands at the present time.

Yours very truly, D. H. MacFarland. DHM/MK.

P. S.—Also increase export price to basis of $1.00 Northampton.

[fol. 2000] DEF'TS' EX. NO. D 25

The Atlas Portland Cement Co.

New York

For the Attention of Mr. D. H. MacFarland.

October 20, 1916.

Referring to the talk with you and Mr. Kimball this morning in regard to your having been notified by the New York dealers and a telephone call from Philadelphia regarding some other cement companies advancing their price 10¢ a barrel.

I am leaving early this afternoon, so am writing this letter to you because we do not want to get loaded up with the present price cement. As I told you this morning, coal alone is costing us 10¢ a barrel more at Hudson than it did thirty days ago, and the replacement of bags is another 5¢; and unless I am very much mistaken, it is going to be absolutely impossible for cement manufacturers to manufacture large quantities of cement this winter; they cannot get the labor, and if they do the cost will be tremendous.

You have a certain number of outstanding quotations to our regular customers and others, which you cannot go back on, but if you can substantiate during the day that other important cement brands are quoted at the 10¢ advance, I want you to get your quotations out today at not less than their price. These other companies have evidently acted on what we would, ourselves, have to act on as protection within a very short time, and I am glad of it; but if we do not get busy and the other fellow has gone up, we will be simply loaded up, which we cannot afford. You cannot spend the money on selling cement that we did last year and try to get the dealers back onto Atlas, and then find yourself loaded so that you cannot fill their requirements during 1917; if you do, you will undo everything we have done.

I do not care whether you find cement being sold at less money or not—if the commanding brands are higher, you go up quick, because of present manufacturing conditions.

Yours very truly, J. R. M.

[fol. 2001] DEF'TS' EX. NO. D 26

The Atlas Portland Cement Co.

New York

For the Attention of Mr. D. H. MacFarland.

October 20, 1916—2.40 p. m.

About 11 o'clock today our Philadelphia office called up, and stated that the Newton Supply Co. had told Mr. Brigham they had heard that the Lehigh Company were quoting up-state (Penna.) 10¢ above the current market price.

Shortly before 12 o'clock, John P. Kane of the J. P. Kane Co., called me up, and stated that Lehigh, Alpha, Bath and Nazareth had notified him of a 10¢ barrel advance. Similar information came to Mr. Martin from Mr. Penny of Candee, Smith & Howland, who stated that Lehigh and Bath had advanced their price 10¢ per barrel.

Since that time we have had confirmation from various directions, and at 2:30 P. M. Mr. Stark was advised by Rafael del Castillo that he had asked Lehigh for their price for export, and was quoted over phone $1.70 per barrel alongside; $1.57 at Jersey City.

From the information now at hand, it would appear that the Lehigh Company have advanced their prices 10¢ per barrel in all directions in the Eastern territory, including export.

Yours very truly, C. A. K. CAK-MH.

The Atlas Portland Cement Co.

For the attention of Mr. L. G. McConnell.

New York, January 15, 1917.

Just a line for you to keep until Mr. MacFarland gets back, to draw his attention to the fact that in December the Atlas was away below the average in shipments to Lehigh Valley and New York states, and that this matter wants to have prompt and vigorous attention so that it may not occur in following months.

Yours very truly, J. R. M.

[fol. 2002½] DEF'TS' EX. NO. D 28

The Atlas Portland Cement Co.

For the attention of Mr. Holman.

New York, July 13th, 1918.

I want to draw your attention to the fact that the Lehigh shipped 373,000 out of the east, against our 414,000, which is a very bad

showing for us. Of course I realize what they did last year and all that, but what I mean to say is that they are shipping very nearly as much stuff now out of their Lehigh Valley mills as we do.

They also did a wonderful business in Mitchell, New Castle, Mason City and Oglesby. I do not think we can afford to go to sleep much.

The Universal also put a few circles around us, and about the only thing we can compare favorably with for June, as far as I can see, is the Alpha.

Now I understand that MacFarland will say that if we had had more orders we could not have shipped them. What I am getting at, however, is to get more orders, and I will agree to ship them, and it looks as though we were going to have enough to justify it.

Yours truly, J. R. M.

[fol. 2008½] DEF'TS' EX. NO. D 38

May 11.

A. P. Lockwood.

DEAR SIR: Yours of the 9th inst., written at Elmira, with orders from the Elmira Builders' Supply Co. enclosed was received and noted.

Replying will say that inasmuch as you did not receive my letter telling you not to take any more orders at $1.35, I will accept these, and send them on.

Your wire regarding price at Erie, sent to me at the Philadelphia Office, was received and noted, and I suppose you got my answer last night. The Universal price has been changed from $1.55 to $1.70 and that accounts for the price of $2.30 at Erie, but as I wired you, if you happen to run across quotations still in force at the old price, we will meet such quotations as long as they are still in force, but on all quotations sent out now, the price will be figured on the Universal base at $1.70. So, in most of your territory we will have to use the Lehigh Valley base at $1.50 to dealers, which will make the price cheaper than the Universal base in most cases.

While in Philadelphia yesterday I received a call from Walter Fuchs and had dinner with him last night and he wished to be remembered very kindly to you.

[fol. 2009] Everything seems to be progressing satisfactorily at the mill and we hope before long that everything will be in readiness for shipments.

Remember me to Harry, Charlie Capes, and also Mr. Randall when you see them, and any of the other fellows that I met at Rochester.

Very truly, —— ——, Sales Manager.

DEF'TS' EX. NO. D 39

Hercules Cement Corporation

Buffalo Office

Attention of Mr. E. B. Goode.

Buffalo, N. Y., 3/29-19.

DEAR ED: I was sure glad to hear that you are better and was sorry that you had such a siege of it.

[fol. 2009½] The dealers are all up in the air here in regard to the new price on cement, and are holding off buying until it is settled.

Kindly let me have any change as soon as possible as I would like to be the first to get it.

Lehigh, Atlas and Universal are putting on a lot of new men.

Lehigh have a new man in Utica, one in Syracuse and one out of Buffalo making 6 men in New York from Albany west.

They have taken Utica and Syracuse away from Herb which I don't believe makes a hit with him. I believe he could put on a big tonnage for me down that way as he has a lot of friends among the big contractors, and he no doubt would take delight in taking Lehigh business. Treat this confidential and if interested please advise me.

I received your letter in regard to the bonus and if business opens up I should make some money on same.

Hoping that you are entirely well again, I am,

As ever, Lock.

[fol. 2010] DEF'TS' EX. NO. D 40

Dec. 2nd, '19.

Mr. E. B. Goode, New York City.

DEAR SIR: I neglected to tell you when in New York last week that the Pennsylvania Cement Company had rented a warehouse on the water-front here and were storing cement which they bring in by boat from their Cayuga mill. I understand that they have so far stored one barge which contained about 2,500 barrels, and have been advised that they expect to store a large quantity here and expect to do the same in Rochester.

I do not know who will get the benefit of the saving of freight on this cement, but have been advised that they are now charging $2.78 per barrel for cement loaded on dealers' trucks alongside their warehouse.

Yours very truly, A. P. Lockwood.

Chg. Hercules Cement Corp., 30 East 42nd St.

[fol. 2011] DEF'T'S EX. No. D 42

New York, February 19, 1920.

From: Mr. E. B. Goode, Jr.
To: Mr. A. P. Lockwood.
Subject: Market conditions.

I understand that some of our competitors have changed their base price at Universal as well as at Fordwick. Please let me know by return mail if you have any information on the subject?

I will not change our price just yet, but it has occurred to me that before doing anything it would be wise to get the Buffalo Builders Supply Company's contracts straighten-up somewhat. For instance: On their contract #782 which calls for 250 barrels and on which they require 1,000, as long as we were committed on this, I think it might be wise for us to change our mind and increase this to the thousand barrels as desired.

Also I recall the Father Timmons' Job for 2,000 barrels. Let me know what you think of that?

The rumored change is 10¢ at each of the above points, which would change the price at Buffalo 6¢ per barrel.

I will be up in Boston during the first part of next week, so would like to have your letter Saturday morning of this week, if possible, and I could then decide what to do.

[fol. 2011½] DEF'TS' EX. No. D 43

Hercules Cement Corporation

Buffalo Office

2/28-20.

Mr. E. B. Goode.

DEAR SIR: Replying to your letter of the 27th, in regard to "Universal Mill Base" would say that the Universal Cement Co., have not mailed out a new quotation and I will advise you in case they do.

Yours very truly, A. P. Lockwood.

[fol. 2012] DEF'TS' EX. No. D 44

Buffalo, New York, Feb. 20th, 1920.

Mr. E. B. Goode, New York Office.

DEAR SIR: Replying to your letter of February 19th in regard to market conditions, would say that the Universal mill base has been advanced 10¢. Some of the Lehigh Valley mills have mailed out their new quotations on that basis, that is, on a $2.84 price, f. o. b. Buffalo. The Lehigh have gotten out such a quotation.

In regard to the Buffalo Builders Supply Company's contract, I think it would be wise on contract #782, which calls for 250 barrels for the Ideal Paving Company and which work requires 1,000 barrels, to send them a new contract covering this amount, as we are committed for that amount of cement on same.

In regard to Father Timmons' job, which requires 2,000 barrels would suggest that you mail them a contract covering this work, as you will note in my letter of January 20th that I have committed myslf for this amount of cement as per instructions from you at Binghamton.

In regard to contract #965 for F. L. Hess, Batavia, New York, would ask that you either increase this contract to read, 1,000 barrels or mail them an additional contract for 500 barrels as Mr. Hess has accepted this order from the Massey-Harris Harvester Company, and as I have stated before he is handling our cement exclusively and believe it would be unfair to him to do anything else in the matter. The price at Batavia is not effected by this increase but think it would be well to have him protected upon same.

We had hoped that you would be up this way before this, but we still have hopes of seeing you before the golf season opens.

Yours very truly, A. P. Lockwood.

P. S.—It might be wise to date these contracts the time in January they were received as some of the dealers who we have refused to cover may not like it.

A. P. L.

December 20, 1919.

Re General Instructions.

DEAR SIR: We have decided for the present to accept business at our old prices which were in effect prior to our notice of the 15th inst., provided shipment is taken before January 1, 1920.

Under no conditions, however, accept any business at this price for shipment after January 1st.

Very truly yours, Bath Portland Cement Co. W. G. Dutton,
Second Vice President.

[fol. 2016½] DEF'TS' EX. NO. D 53

Bath Portland Cement Co.

Phila., Pa.

March 2, 1920.

Re General Instructions.

Mr. F. B. Franks.

DEAR SIR: We are sending out periodical quotations to all dealers on our quotation list. We are now basing our prices as follows: $1.75 Lehigh Valley; $1.85 Hudson River, having eliminated for the present using any other mill basis outside of the two above mentioned. We are still quoting cloth sacks at 15¢ each, as heretofore.

These periodical quotations cover only a carload of cement, and cannot be construed by a customer as the price to be used when quoting for contract requirements. Should any of the trade desire a price for contract requirements, same for the present will have to be taken up with this office before quoting. There does not seem to be any immediate improvement in sight as regards manufacturing and shipping, and for that reason we are not in a position to take on any new business.

Our object of sending out these periodical quotations is to notify [fol. 2017] our trade that we are meeting competition for current business.

Should there be anything not absolutely clear to you as regards the above instructions, kindly get in touch with this office at once.

Very truly yours, Bath Portland Cement Co. W. G. Dutton, Second Vice-President.

[fol. 2017½] DEF'TS' EX. NO. D 54

Bath Portland Cement Co.

Phila., Pa.

July 15, 1920.

Re Price Instructions.

Mr. Franks: This letter was sent to all our salesmen.

DEAR SIR: Effective at once the dealer's price on Bath Portland Cement will be $3.50 per barrel f. o. b. our mill. This price includes shipment in 25¢ sacks. The price in paper will be 70¢ per barrel less.

Ten (10) cents per barrel cash discount will be allowed for payment within ten days from date of invoice instead of 5¢ as heretofore.

In figuring prices, therefore, please consider the Lehigh Valley base as $3.50 and add the freight rate to destination to this figure in order to secure the delivered price. Until we learn otherwise, we will

consider the Hudson River base as 10¢ per barrel higher, or $3.60 per barrel.

We will still quote the consumer 20¢ higher; $3.70 on the Lehigh Valley base or $3.80 on the Hudson River base.

Very truly yours, Bath Portland Cement Co. W. G. Dutton, Second Vice President.

[fol. 2018] DEF'TS' EX. NO. D 55

Bath Portland Cement Co.

Philadelphia

April 26, 1920.

Re Miscellaneous.

Mr. F. B. Franks, 1st Vice-Pres. Bath Portland Cement Co., Bath, Pa.

DEAR SIR: For your information would state that starting with our shipments of May 1st, we will endeavor to adjust everything on the basis of 25¢ sacks. We understand that one of the other manufacturers did this a week or so ago, and that some others are now arranging to do so; however, regardless as to what other manufacturers will do, we are going ahead and make this change. The price of cloth sacks on all our contracts and orders already booked, with few exceptions, are on the basis of 15¢ sacks.

Within the next day or so we will send out notices advising all our trade of this change, taking effect May 1st. Most of our contracts have a clause in them giving us the right to change the price of sacks, although there are some, especially those taken last year, that do not have this clause; however, we are going to do all we can to transfer [fol. 2018½] everything possible to a 25¢ sack. In case a few of our customers do not give us this permission we may then have to arrange to continue shipping them in the 15¢ sacks.

Just as soon as we learn about how much tonnage we will have to continue to handle in 15¢ sacks, we will advise you so that you can make your arrangements accordingly.

Very truly yours, Bath Portland Cement Co. W. G. Dutton, Second Vice-President.

[fol. 2019] DEF'TS' EX. NO. D 56

Form No. 33

June 3, 1919.

The John H. Kelter Co., Philadelphia, Penna.

GENTLEMEN: A short time ago we had shipped to you one of the new Edison Warehouse Signs, bearing your name, and we are quite anxious to know if you have received it; also, just how the sign ap-

peals to you. Personally we are quite proud of these signs and comments from our dealers to whom they have been shipped are to the effect that they are real business getters.

One of the Edison signs properly placed on your warehouse or office building, coupled with the enameled wagon signs, and the Edison Transparencies, are a big step in identifying you with the Thomas A. Edison interests. Incidentally, if you have not received a set of the wagon signs or the transparencies drop us a line and we will see that they are shipped to you at once.

Also if you can use any of the attached blotters, folders, etc., we will imprint them with your name and forward them to you post haste. These folders and blotters make mighty good enclosures and dealers will find them an exceptionally good means of keeping their [fol. 2019½] name and the material they handle before their customers, both present and prospective.

If your warehouse stock of cement is becoming low phone us on our special long distance wire, Philadelphia 358, at our expense, and if the order is received prior to twelve o'clock noon it will be shipped the same day.

Yours very truly, — ———, District Sales Manager. WLH/EML.

General Offices: Easton, Pa.

Helping to Get Things Started

The memorandum attached will give you an explanation for the recent reduction in the price of cement.

We desire to emphasize the statement in the memorandum which calls attention to the fact that increased volume means decreased costs. Unless such increased volume shows up promptly this company, and no doubt many others, will not only fail to make money but will lose it instead. No considerable reduction of manufacturing costs otherwise is looked for by us this year.

It has been reported by our travelers that much building is held up because the owners fear that later in the year reductions in the prices of material will be made. As a further step toward confidence, we have decided to guarantee our price for contracts against decline during the balance of the year 1919. This will insure the lower price, if any, being applied to all unshipped portions of any contract at the time the new price takes effect.

It is very much to your advantage as a dealer and ours as a manufacturer that this information be passed on to the owner so that he may arrange his contracts with builders to get advantage of this guarantee. You, we are sure, will see the logic of this suggestion.

Alpha Portland Cement Co.

April 11th, 1919.

[fol. 2023] Memorandum

Representatives of the Cement Industry conferred with the Industrial Board of the Department of Commerce at Washington during the last week in March, at the request of the Board that everything possible be done by the Industry to encourage prompt building. The Industry, through the Committee, expressed its desire to co-operate to the fullest extent possible.

Unfortunately, at the time of the conference there was a change in the policy of the Industrial Board, and therefore no definite, joint conclusion was determined; but the Industry thought it only fair to the trade that the reduction contemplated should be made, irrespective of these conditions.

The Charge for cloth sacks, of which there are four to the barrel, was reduced from 25¢ each to 15¢ each, making a reduction of 40¢ per barrel gross to the purchaser, and the charge for paper sacks was reduced from 30¢ per barrel to 25¢. These reductions were made possible by recent reductions in the cost of such sacks to the manufacturer.

Although the present cost of manufacture does not justify a reduction in the selling price of Cement, the possibility of more favorable manufacturing conditions in the future which might result in a reduction in the cost of production was anticipated and prices were named accordingly. These prices are in accordance with quotations recently sent you.

The action of the Industry was entirely voluntary, with the sole object of assisting in stabilizing building conditions, hoping that it would be appreciated by the purchaser and that increased volume will decrease cost and compensate for the reduction.

[fol. 2023½] Def'ts' Ex. No. D 61

—— —, 1919.

Let's Go!

The Alpha Portland Cement Company recently made a reduction in the price of Alpha Cement with the view of increasing the volume of immediate building.

As a further step toward confidence, we have guaranteed our price for contracts against a decline during the remainder of the year 1919. This will insure the lower price, if any, being applied to all unshipped portions of any contract at the time the new price takes effect.

In order to make this policy fully effective as to the object sought, it will be necessary for dealers to pass on to contractors the benefit of this guarantee and necessary for the contractors, in turn, to pass on this protection to property-owners. Unless this is done, it is obvious that the stimulation for immediate building activity will not be effected.

The following lines from the New York Commercial are very appropriate as applying to the present situation:

"Let's Go"

"The National Prosperity Campaign has adopted the slogan Let's Go! and is spreading its meaning broadcast.

Let's go means just what it says.

Let's go and start prosperity.

[fol. 2024] Let's go and get busy.

Let's go and do business irrespective of what the other fellow is doing.

Let's go while the going is good and not wait until the train of prosperity is under way and we have to run our fool legs off to catch up with the procession.

Let's go and be real, live, enterprising, hustling American men of business.

Let's Go and Let's Keep Going!"

Alpha Portland Cement Company.

Easton, Pa.

[fol. 2024½] DEF'TS' EX. NO. D 62

Alpha Portland Cement Company

General Offices: Easton, Pa.

To our dealer customers:

Herewith you will find Circular No. 8 of the War Industries Board, Priorities Division, to which your attention is directed. We also enclose Circular No. 4 of the War Industries Board, Priorities Division, showing rules and regulations governing Priority in Production. These circulars are self-explanatory, and in accordance with Circular No. 8, we have signed the pledge referred to, and enclose a copy of the pledge required from the dealer who sells our product.

Will you please sign this pledge of cooperation as required and file it with us by return mail in order that we may ship promptly, and without question, orders that you may place with us for cement for re-sale purposes. In due season, the form for report called for in pledge will be sent to you. Please keep such a record of your sales from September 1st as will clearly show the use of such cement in order that you may be able to properly fill out the blanks when received.

We know you will accept the small inconvenience entailed by these regulations in a spirit of loyal cooperation with our Government, which regulations are found to be vitally necessary for the [fol. 2025] conservation of labor, material, transportation and capital in the prosecution of the war.

Alpha Portland Cement Company.

September 3, 1918.

War Industries Board, Priorities Division

Circular No. 8

To all Manufacturers of Cement:

Since the conference between your representatives and the undersigned with other representatives of the War Industries Board, careful consideration has been given to the several problems then considered, and a decision has been reached that yours is in part a war industry, in view of the showing that you have made that your commodity is used in so many of the building operations carried on directly or indirectly by the war agencies of the Government. The board is further of the opinion that your industry is also in part one of national importance, in that a portion of your products is used in filling nondeferable and essential civilian requirements.

The Priorities Board will receive the application of any manufacturer of cement for a place on its Preference List. It will in [fol. 2025½] every case take into consideration the situation of such manufacturer, the amount of its direct and indirect Government business, and the uses to which the remainder of its product is being devoted.

Any plant now or in future exclusively devoted to manufacturing products being or to be absorbed directly or indirectly by the Government, or in other uses of essential importance and whose fuel requirements and output bear proper economical relationship to each other, will be placed upon the Preference List upon condition, however, that the owner of such plant shall observe its pledge of co-operation and the rulings of the Priorities Division.

With its application such manufacturer should include its pledge of co-operation in the form following:

Priorities Division, War Industries Board, Washington, D. C.

The undersigned hereby pledges itself not to use nor, so far as lies within its power, permit the use of any products of its manufacture now in or which may hereafter come into its possession or control, save (a) for essential uses as that term has been or may be defined or applied from time to time by the Priorities Division of the War Industries Board, or (b) under permits in writing signed by or under authority of such Priorities Division; that it will make no sale or delivery of such products to any customer for resale until such customer has filed with it a similar pledge in writing; and that [fol. 2026] it will use its utmost endeavor to insure that its products shall be distributed solely for essential uses.

Any manufacturer who has already made application for place on the Preference List should send in its pledge of co-operation in the foregoing form and mention the fact that application has previously been forwarded.

In addition, such manufacturer must send each month its re-

ports on forms which it will secure from the Buildings Materials Section of the War Industries Board showing the deliveries and uses made of its product during the preceding month.

Regulations Priorities Division

The pledge to be given such manufacturer by its customer who purchases for resale should be addressed to such manufacturer and be in the following form:

To —— ——, City of ——, State of ——:

The undersigned hereby pledges itself not to use, nor so far as lies within its power, permit to be used, any cement of your manufacture now in or which may hereafter come into its possession or control, save (a) for essential uses as that term has been or may be defined or applied from time to time by the Priorities Division of the War Industries Board, or (b) under permits in writing signed [fol. 2026½] by or under authority of such Priorities Division; and further that it will make no sale or delivery of such cement to any customer for resale until such customer has filed with the undersigned a similar pledge in writing, and that it will report to you monthly dispositions made during the previous month of such cement.

Manufacturers should scrutinize with great care orders which are offered them for their products for use in any construction not directly sanctioned by the Government but represented to be an indirect war requirement in caring for soldiers, seamen, and war workers. Many such projects which would normally be quite unobjectionable can and should be deferred under present conditions. Manufacturers and dealers are in a position to contribute and are expected to contribute substantially to such a result.

The United States Fuel Administrator has very recently in unequivocal terms stated that "the country needs now—and for the whole period of the war will need—more coal than it can possibly produce and transport." The necessity for conserving fuel is, therefore, imperative, and to that end it is necessary to substantially curtail the production of nonwar industries and that portion of the production of war industries devoted to nonwar uses. It is also important that no unnecessary burden be laid upon the transportation lines of the country, that they may be free to render direct and indirect war service. Labor must be released from nonwar industries to the extent that it is required for war work. As far back [fol. 2027] as March 21, 1918, the following resolution was unanimously adopted and given wide publicity by the War Industries Board:

Whereas it has come to the notice of this Board that new industrial corporations are being organized in different sections of the United States for the erection of industrial plants which can not be utilized in the prosection of the war; and

Whereas plans are being considered by certain States, counties, cities and towns for the construction of public buildings and other improvements which will not contribute toward winning the war; and

Whereas the carrying forward of these activities will involve the utilization of labor, materials, and capital urgently required for War purposes: Now, therefore, be it

Resolved by the War Industries Board, That in the public interest all new undertakings not essential to and not contributing either directly or indirectly toward winning the war, which involve the utilization of labor, material, and capital required in the production, supply, or distribution of direct or indirect war needs, will be discouraged notwithstanding they may be of local importance and of a character which should in normal times meet with every encouragement; and be it further.

Resolved, That in fairness to those interested therein notice is [fol. 2027½] hereby given that this Board will withhold from such projects priority assistance, without which new construction of the character mentioned will frequently be found impracticable, and that this notice shall be given wide publicity, that all parties interested in such undertakings may be fully apprised of the difficulties and delays to which they will be subjected and embark upon them at their peril.

It is believed that you may confidently be depended on to carry into effect the letter and the spirit of this resolution so far as concerns your industry and see to it that your products are devoted solely to those uses which can not in the public interest be deferred until after the war.

If in any given case the use proposed to be made of the product of any manufacturer shall be one which has not been defined as essential by the Priorities Division, but is one which the proposed user conceives to be in the public interest and of such essentiality that even under existing conditions it should not be deferred, then such proposed user may make a full statement of the facts in writing, under oath, to the regional representative of the Resources and Conversion Section of the War Industries Board in his district, applying to such representative for his approval of the proposed construction. Should such regional representative approve the construction project, he should promptly transmit the application for a permit, with [fol. 2028] his approval and reasons therefor, to the Building Materials Section of the War Industries Board at Washington for submission to the Priorities Division, and if approved by said division a constructon permit will be issued by the Building Materials Section.

The instructions contained in this circular shall not be so construed as to prevent the sale of small quantities of materials for repairs of or extensions to existing structures involving in the aggregate a cost not exceeding twenty-five hundred dollars ($2,500).

Yours, very truly, Edwin B. Parker, Priorities Commissioner.

Washington, D. C., August 1, 1918.

[fol. 2032] DEF'TS' EX. NO. D 65

The Atlas Portland Cement Co.

New York

For the attention of Mr. D. H. MacFarland, Atlantic Beach, Fla.

New York, January 16, 1917.

I thought that you would be interested in knowing that Friday the Lehigh Company made quotations to the trade on basis of $1.35

Lehigh Valley, $1.45 Hudson, $1.45 Union Bridge and $1.45 Fordwick. We picked these quotations up Saturday over the telephone from the various dealers in Pennsylvania, New England and New York States, and Saturday we received word over the telephone from the New York City dealers that the Alpha Company had advanced their price.

I also heard that one or two of the other Companies had advanced their price, and checked this information up through reliable sources, and yesterday we issued quotations on $1.35 Lehigh Valley, $1.45 Hudson, meeting competition based on $1.45 Union Bridge and Fordwick. We have a good many quotations out and should secure some [fol. 2032½] very substantial business. We took on 60,000 bbls. Saturday and yesterday—including quite a little export. Our export is now $1.98 alongside New York in wooden barrels, and $1.93 in cloth. Our dealers' price in New York for domestic consumption is $1.97 in cloth. I thought that you would be interested in the above.

We have been after the situation in the Northwest, and I think Mr. Dowd is up there to-day, as he planned to be there Tuesday, and I presume he went. Mr. Miller is also posted, and we have been doing quite a little work in the last two weeks in the City of Detroit. I was advised last week we would get some substantial tonnage there for future delivery, but have not seen it on the summaries yet. Mr. Trenkman and Mr. Cabanis are working on the Detroit situation. If you have anything else in mind I will be glad to hear from you.

Mr. Kimball came back to the office yesterday, but I have not seen him as yet this morning, and did not see him yesterday as I was in Philadelphia all day but talked with him on the telephone. I think that his eye is practically well.

Yours very truly, L. G. M. LGM/MK.

[fol. 2033] DEF'TS' EX. NO. D 66

The Atlas Portland Cement

New York

For the attention of Mr. C. A. Kimball, Manager Sales Department.

New York, January 23, 1917.

Mr. Dowd called me on the telephone this morning from Columbus, Ohio, and stated that he had seen, had in his possession, and was sending in to me some quotations of the Universal Portland Cement Company which reached the hands of the trade yesterday, which figured back to $1.45 f. o. b. Mill Universal, Pa.

In order to protect ourselves, we had better issue quotations at once to the trade for immediate acceptance, 15 day shipment, on that basis. My understanding is that this will affect Atlas price in Western Pennsylvania, New York and some parts of West Virginia.

Yours very truly, L. G. McConnell. LGM/MK.

New York

For the attention of Mr. Heft.

New York, 3, 21, '18.

Referring to our telephone conversation over the phone regarding W. C. Abbey's salesman telling the trade he received word to advance the price of cement .40 cents per barrel, I was first told this by C. D. Wait, at Montgomery, N. Y. I did not place much stock in Mr. Wait's advise for he often says things that he cannot verify, from Wait's place I called on Harrison & Curtis and they advised also W. C. Abbey man told them that a .40 raise would be effected to day (3 21 18).

I tried to get in touch with this office, but it was nearly six o'clock and I was told the office did not answer, as I left Newburgh, at a very early hour, this morning I could not reach our office, when I got to Albany, I did not get the opportunity to call until you heard from me at three o'clock.

This letter is for your *im*formation as I knew the company wants to know of any such propositions that come to my attention.

Yours very truly, W. G. Thompson

Circular Letter to Member Companies

May 25, 1920.

Many companies are having difficulty in obtaining enough sacks and enough labor for packing and loading cement in sacks. As suggested in our letter of May 11 on this subject, active promotion of bulk cement shipments would be timely.

The Association booklet, Bulk Cement, has been revised and reprinted and is now ready for distribution. Members desiring copies may purchase them at three cents each. A sample copy is enclosed herewith.

Yours truly, H. G. Jacobsen, Secretary Committee on Packages.

[fol. 2049½] DEF'TS' EX. NO. D 130 A

Portland Cement Association

Washington, D. C.

Circular Letter to Member Companies

May 26, 1920.

Mr. Wooley's Talk

At a noon luncheon today of the City Club Mr. Wooley of the Interstate Commerce Commission gave a talk on the traffic situation. The principal points he made were:

1. Very strong emphasis on the extreme seriousness of the situation caused by the general car shortage.

2. That by unification of control in operation of the railroads it would be possible to alleviate the situation.

3. That the present turmoil was the direct outgrowth of lack of understanding evidenced by railroad operators. They thought they could handle the situation by individual control but who within five days after return of the railroads to them called on the Interstate Commerce Commission for help.

[fol. 2050] 4. In answer to direct question stated the Interstate Commerce Commission did not expect to resort to priorities.

Mr. Wooley was evidently laboring under very strong restraint and had more trouble as to what not to say than what he should tell.

Letter from U. S. Bureau of Public Roads

Attached is letter that is being sent to all State Highway Departments by the U. S. Bureau of Public Roads. This letter is significant as evidence of the leadership and a sense of responsibility that Mr. MacDonald, Chief of the Bureau, has taken in the road work of the country.

A. N. Johnson.

[fol. 2050½] DEF'TS' EX. No. D 131

Portland Cement Association

Washington, D. C.

Circular Letter to Member Companies

June 22nd, 1920.

General Situation

There is nothing encouraging to report. Service Orders 6 and 7 clamp the lid tight on open top car shipments of all commodities except coal East of the Mississippi River and except in the direction of empty haul to the mines. Commission on Car Service advised all Railroads that they will be held by the I. C. C. to strict compliance with these orders.

Reports from two of our member Companies indicate that their mills must soon close, due to non-receipt of materials as a result of these Orders (Nos. 6 and 7).

Mr. MacDonald of the U. S. Road Bureau has today raised the question with the Solicitor of the Dept. of Agriculture as to the legality of the delegation by Congress of the powers to the I. C. C. under the Transportation Act of 1920.

[fol. 2051] Members of the National Association of Sand and Gravel Producers are seriously considering taking the matter into Court, which seems to them to be the only solution to bring any immediate relief.

I have heard many express the opinion that the whole situation should have been handled by a Fuel Administrator and believe that one should be appointed rather than to attempt adjustments through restrictions of transportation facilities by the I. C. C.

There still continues lack of complete harmony between the Commission on Car Service of the American Railway Association and the Railway Executives, which is particularly unfortunate in the present crisis.

We are bringing the whole situation to the attention of Mr. Franklin T. Miller, Assistant to the Senate Committee on Reconstruction and Production, in the hope that the Committee may soon arrive at some constructive suggestions and give them wide publicity.

A. N. Johnson.

[fol. 2051½] DEF'TS' EX. No. D 132

A Plea for Abrogation or Modification of Service Order No. 7, Submitted by the Portland Cement Association, Represented by A. N. Johnson

To the Honorable the Interstate Commerce Commission:

The Portland Cement Association representing the cement industry joins with other construction industries in seeking this opportunity to present to the Interstate Commerce Commission certain facts and opinions regarding the traffic situation in the hope that with the new information that may thus be placed at the command of the Commission there may result:

1. Immediate relief to the construction industry through change or abrogation of Service Order No. 7;

2. The establishment of a fixed policy that will prevent in the future, except in time of war or other extreme emergency, any resort to preferential treatment of shippers or the establishment of priorities.

[fol. 2052] We are not unmindful of the complicated and grave character of the situation which confronts the Commission, in that it is called upon to guide the policy of railroads physically unable to take care of the traffic offered.

Nor are we unmindful of the fact that a serious coal situation faces the country. In certain sections the stocks of coal are low and it becomes necessary for the maintenance of industrial and domestic welfare in those sections that stocks be accumulated. But with the quantities of coal already produced this year, several million tons in excess of that produced during a similar period last year, as we are informed, there would seem to be no insurmountable difficulty to build up stocks of coal in those sections of the country reported to be in distress without general derangement of the traffic facilities of the eastern half of the country.

It hardly appears fair or logical to give priority for the transportation of all coal for all uses and to all parts of the country, when an emergency shortage exists in but a few well defined sections of the country, and for certain specific uses only.

The cement industry has a two-fold interest as regards the effect of Order No. 7. Whatever tends to curtail the construction industry has direct influence on the cement business. Also, many cement mills are dependent on open top cars for raw materials.

Since November, 1918, the construction industry, second only to agriculture, has been continuously handicapped. Governmental restrictions, increased cost, labor shortage, production shortage, lack [fol. 2052½] of transportation facilities, have all combined to prevent construction enterprises. The construction industry is basic. Whatever tends to curtail this industry is certain of far-reaching effect and if carried much further must result in great industrial depression.

The situation is rendered all the more serious as in the past

three years there has been a marked deficiency of complete structures. During this time the demand and the need have been increasingly urgent for all classes of buildings, farm structures, roads and railroad construction. There is a deficiency today of not less than one million homes.

At the present time there are actually available for highway construction over seven hundred million dollars, money that cannot be used for other purposes. These roads, if constructed, will be of great help in lessening railroad terminal congestion.

It is recognized that terminal congestion plays a far larger part in the present difficulties of the railroads than the moving of business over the roads out on the lines. Much of the terminal congestion results from the short-haul shipment of necessary food products for the daily subsistence of the people living in our large cities. Therefore not the least among the structures for which need is most pressing are improved roads, in order that motor trucks operating over such roads may in taking over a greater shart of short-haul traffic contibute in still greater degree to the relief of terminal congestion. Not only should new roads be built but those now in use must be maintained.

[fol. 2053] The country over, contractors and contracting organizations find their entire business capital jeoparized and ruin staring them in the face, due to their inability to secure necessary materials, such as sand, gravel, lime, cement and other basic construction materials.

The structures into which these materials enter add to the permanent wealth of the country. Materials and labor which go into construction work are not consumed but are transformed into a house, industrial building, county highway, or waterpower development and in this transformation become additions to the permanent, taxable wealth of the country and also become tools for production of additional wealth.

It was expected and hoped, and there was every prospect the first of the year, that construction operations would be active and real progress made in replenishing the depleted plant of the country. Without this construction increased production, a prime necessity the world over, cannot take place.

It should be borne in mind that the results are more than the immediate suspension of construction projects, disastrous as they are. Contractors with equipment lying idle and deteriorating, organizations scattered, and expenses continuing, will of necessity have to recoup and it will be the cause of a continued increase in prices. For every hazard which a contractor must should the public must pay an increased price. This is the insurance the contractors will demand. Therefore, there is seen the importance not only of some immediate relief but of the establishment of a policy that will re-

[fol. 2053½] move as far as possible such transportation hazards as have been experienced this season.

In this general disturbance to construction activity the cement industry is seriously interested. It is also directly concerned with the movement of raw materials in open top cars. Many mills are today

curtailing production because of non-receipt of raw materials, and in a few instances mills are compelled to close and remain idle, their workmen without pay.

We, therefore, take this opportunity respectfully to point out to the Commission:

1. That the arbitrary derangement of traffic facilities first, under order of the Commission on Car Service of the American Railway Association through Circular CCS-33, and later under order of the Interstate Commerce Commission known as Service Order No. 7, has not accomplished what we believe was the intent of the Commission, namely to have coal distributed where needed and to keep down prices; but has caused a most serious condition to be faced by all interested in the construction industry.

2. That the principle of giving to a single industry arbitrarily an undue proportion of the transportation facilities of the country is wrong and in practice is found to accentuate many-fold the difficulties which it was the intent to correct.

We all recognize there is a shortage of transportation facilities just as there is a shortage of many other essential factors in the industrial progress of the country. But arbitrarily to assign to any given [fol. 2054] group of shippers an undue share of the restricted facilities creates an unbalanced situation which threatens the whole industrial structure.

We strongly believe and urge that the Interstate Commerce Commission should use its great power to see that transportation facilities are furnished to all shippers, who should share and share alike. That if there is a shortage at any particular point or section of the country of a given commodity, as for example coal, that the remedy does not lie in a general derangement of transportation facilities and the curtailment of such facilities to essential industries.

In closing, we submit that to throw the entire burden and responsibility for carrying this burden, due to the shortage of transportation facilities, upon the construction industry is an unsound business policy, is unfair to the public and unjust to the contractors and material producers who now face financial ruin. And we ask that Order No. 7 be modified to correct these conditions and that a fixed policy be established that will prevent in the future priorities and discriminations against or in favor of any industry.

[fol. 2054½] DEF'TS' EX. NO. D 133

Portland Cement Association

Washington, D. C.

August 21, 1920.

Circular Letter to Member Companies

The supply of open top cars for shipment of building material should be improved by the drastic national measure taken this week

to relieve the congestion of coal which has been particularly severe at the Ports of Baltimore and Norfolk. This embargo is clamped down on the movement of all coal to tidewater except upon a definite showing that the coal, upon arrival at piers, will be unloaded into vessels with reasonable promptness.

This action, concurred in by the Railroads and the National Coal Association, followed immediately upon the revelations before the Calder Committee at its hearing in Baltimore on Wednesday, when witnesses testified that 5,000 cars were held at that port. Resulting agreement and orders were given to the press Friday by the American Railway Association. While the new regulations are directed at the conditions existing in Baltimore, where the greatest conges-
[fol. 2055] tion on the Atlantic seaboard is said to exist, the effect of the action taken will be countrywide.

"Primarily," said Mr. W. L. Andrews, Vice Pres. of the Consolidated Coal Co., "the embargo is a transportation matter and is directed against every port on the Atlantic tidewater. It is putting into effect an intelligent system of permits intended, first of all, to clear up congestion at the various terminals, and secondly, to bring quickly back into use thousands of cars now being held at terminals. After this congestion is cleared up, the permit system will be used to keep cars in motion."

George A. Ricker, District Engineer.

[fol. 2057½] DEF'TS' EX. NO. D 137

Edison Portland Cement Co.

N. Y. City

Announcement

Effective June 1, 1920, the Edison Portland Cement Company will adopt the practice of quoting a uniform delivered price on Edison Cement, applicable to dealers and consumers alike.

Recognized dealers will be allowed a 10% trade discount from the delivered price, exclusive of the value of the package.

This action has been deemd advisable in fairness to dealers, who are today receiving no more remuneration for their services than formerly when prices and costs of doing business were approximately half of what they are today—and to give contractors more stable prices by the elimination of the present uncertainty prevailing on the border line between territories having various differentials.

The above in no way affects the present cash discount of 5c. per barrel for payment of invoices within ten (10) days from date of shipment.

Edison Portland Cement Company. Stephen B. Mambert, President.

[fol. 2058] DEF'TS' EX. NO. D 147

Cement Prices F. O. B. Mill

March 20, 1919.

Vulcanite Portland Cement Co., #8 West Fortieth Street, New York City.

GENTLEMEN: Your letter of March 18 in reply to ours of March 12 regarding cement prices advises that it is against the policy of your Company to name prices f. o. b. your plant, and that you have consistently declined to do so for the United States Government or anyone else.

I consider our request a perfectly reasonable one. Since we received satisfactory replies to the same letter written to a number of other companies, we shall be able to secure quite satisfactory competition with the companies that were willing to give us a positive reply to our request.

Very truly yours, —— ——, State Highway Engineer.
WGT/O'B.

[fol. 2058½] DEF'TS' EX. NO. D 148

Vulcanite Portland Cement Co.

New York

Prices of Cement f. o. b. Plant

March 11th, 1919.

Mr. Harry D. Robbins, Div. Engr. State Highway Dept., Broad St. Bank Bldg., Trenton, New Jersey.

DEAR SIR: As an assistance and guide in making up estimate as to the cost of Concrete Roads, which roads run between towns and are not City Pavements, I wish to advise you the cost of "Vulcanite" Portland Cement delivered to Contractors in your district.

The prices named are the net prices, without the bags. The bags are 25 cents each, four bags to the barrel; we pay the contractor 25 cents apiece for all bags returned to our Plant at Vulcanite, New Jersey, in good condition, freight prepaid.

[fol. 2059] Therefore, for all practical purposes, the net prices named are the prices which would be paid by the contractor if no bags were lost or damaged, of course less the amount of freight.

We would contract at these prices at the present time but do not guarantee them unless quotation for a specified piece of work is asked for. The quotation would then become a protection for such period of time as may be shown on the quotation.

From every indication I would say there would be no change in these prices during the year 1919.

Delivered,	Trenton,	New Jersey,	price	is	$2.37	per	bbl.
"	Burlington	"	"	"	2.39	"	"
"	Heightstown	"	"	"	2.39	"	"

"	New Brunswick	"	"	"	2.39	"	"

Very truly yours, Vulcanite Portland Cement Co. Albert Moyer, Manager of Sales. H. S.

[fol. 2059½] Vulcanite Portland Cement Co.

New York, March 11th, 1919.

Mr. J. A. Williams, Asst. Div. Engr., 503 Market St., Camden, New Jersey.

DEAR SIR: As an assistance and guide in making up estimate as to the cost of Concrete Roads, which roads run between towns, and are not City Pavements, I wish to advise you the cost of "Vulcanite" Portland Cement, delivered to Contractors in your district.

Delivered Camden, New Jersey, price is $2.39 per bbl.

The price named is net price, without the bags. The bags are 25 cents each, four bags to the barrel; we pay the contractor 25

cents apiece for all bags returned to our Plant, at Vulcanite, New Jersey, in good condition, freight prepaid.

Therefore, for all practical purposes, the net price named is the price which would be paid by the contractor if no bags are lost or [fol. 2060] damaged, of course, less the amount of freight.

We would contract at this price at the present time but do not guarantee it unless quotation for a specified price of work is asked for. The quotation would then become a protection for such period of time as may be shown on the quotation.

From every indication I would say there would be no change in this price during the year 1919.

Very truly yours, Vulcanite Portland Cement Co. Albert Moyer, Manager of Sales.

Materials Delivery Corporation

New York, Jan. 20th, 1920.

Atlas Portland Cement Company, #30 Broad Street, New York City.

GENTLEMEN: We wish to advise you that we have decided to expand our business. In addition to handling sand, gravel and broken stone, we are going to handle a full line of mason and builders' supplies, and it is our intention to carry a full line of these materials in our storehouse.

We shall, therefore, appreciate very much your quotation on the dealers' basis, at the earliest possible moment, for delivery, in the Borough of Manhattan and the Borough of Queens, of Portland Cement in carload and boatload quantities, as we feel we meet every requirement as a dealer as defined by the various dealers' associations.

Thanking you for an early reply, we remain,

Very truly yours, Materials Delivery Corporation. J. A. Norton, Secretary.

[fol. 2068] DEF'TS' EX. NO. D 151

January 21, 1920.

Materials Delivery Corporation, 53rd St. & East River, New York.

GENTLEMEN: We have your letter of the 20th by Mr. Norton. Our understanding is, from this letter, that you are going to be permanent dealers in building material—sand, gravel and cement—both in carload and less than carload lots; and this being so, the Atlas company will greatly appreciate an opportunity to quote whenever you are in the market.

Yours very truly, The Atlas Portland Cement Company. —— ——, Eastern Sales Manager.

[fol. 2068½] DEF'TS' EX. NO. D 152

April 5th, 1921.

Messrs. George A. Fuller Co., New York, N. Y.

GENTLEMEN:

Attention Purchasing Department

We understand that you are estimating on the proposed addition to the Bamberger Department Store building in Newark and take

the liberty of enclosing quotation on Saylor's Portland Cement for the requirements of the work.

You may recall that we furnished approximately 30,000 barrels which were used in the construction of the present building.

Mr. Louis Bamberger is one of our stockholders, and if you receive the contract for the construction of the new building, we hope to have the pleasure of supplying you with Saylor's.

If you should prefer to have the business handled by one of the local dealers in Newark, we are in a position to make favorable arrangements for so doing.

Very truly yours, Coplay Cement Mfg. Co. —— ——,
General Sales Manager.

[fol. 2069] April 5, 1921.

Messrs. George A. Fuller Co., 949 Broadway, New York, N. Y.

GENTLEMEN: Newark, N. J. 2.93. Twenty-five. * * * See below.

Requirements of addition to the Bamberger Department Store, Newark, N. J.

[fol. 2069½] DEF'TS' EX. No. D 153

The Foundation Company

120 Liberty Street, New York

November 1, 1920.

Lawrence Cement Company, 302 Broadway, New York City.

GENTLEMEN:

Attention of Mr. D. W. Demler

We are in receipt of your letter of the 30th stating that you have made shipment of 809 barrels of cement to apply on our approximate requirements of 800 barrels, as per our letter of the 27th.

We wish to express our thanks for the prompt manner in which you have made shipment of the balance of this cement. It will not be practicable at this time for us to cancel our order with you for the reason that all of the cement now in transit has not passed the test, and again we might have some cement damaged in our warehouse between now and the closing of the season, and it is barely possible we might be obliged to call upon you for cement to take care of such contingency.

[fol. 2070] We will advise you at the earliest possible moment whether we will require any additional cement. It now seems probable that none will be required.

Yours very truly, A. I. Campbell, Ass't District Manager.

November 3, 1920.

Foundation Company, 120 Liberty St., New York N. Y.

GENTLEMEN: We have your letter of the first, and want to express our appreciation for the kind sentiment which is declared therein. We have, during the entire year, faced an appalling situation so far as the manufacturing and shipping of cement is concerned. We have attempted to take care of our contract obligations, and by doing so have turned down thousands of barrels of business, all of which could have been shipped at a substantial profit above the prevailing market price. Notwithstanding these opportunities, we have steadily maintained our position of attempting to keep our contracts in operation. We have not been able, very much to our regret, to give 100% service, but we have done everything that was humanly possible, to keep our plant in operation as near capacity as possible.

Yours very truly, Smith, Sales Manager.

[fol. 2070½] DEF'TS' EX. NO. D 154

Copy to Mr. Larned.

December 3rd, 1920.

Messrs. Thompson-Starrett Co., 49 Wall Street, New York, N. Y.

GENTLEMEN:

Attention Mr. Meyer

We beg to confirm quotation given you by telephone today on Saylor's Portland Cement for the requirements of the new hotel at Providence, R. I.

In event of your placing this order with us, we shall give you the benefit of the market price of Saylor's Portland Cement in effect on the day shipment moves, in case the market price at time of shipment should be lower than the price stated in the contract.

In case you prefer to have the business handled through a local dealer, we can make arrangements with the J. C. Goff Co. of Providence to that end.

Hoping our proposition may receive your favorable consideration, we are,

Very truly yours, Coplay Cement Mfg. Co. —— ——,
General Sales Manager. JFT-AG.

[fol. 2071] DEF'TS' EX. NO. D 155

April 5th, 1921.

Messrs. Thompson-Starrett Co., 49 Wall Street, New York, N. Y.

GENTLEMEN:

Attention Purchasing Department

We understand that you are figuring on the addition to the Bamberger Department Store building in Newark, and take the liberty of enclosing quotation on Saylor's Portland Cement for the requirements of the job.

We furnished approximately 30,000 barrels of Saylor's for the construction of the present building. Mr. Louis Bamberger is one of our stockholders and we hope, in case you should be successful in securing the contract for the proposed addition, we may have the pleasure of supplying you with Saylor's Portland Cement.

If you should prefer to have the business handled by one of the local dealers in Newark, we are in a position to make favorable arrangements for so doing.

Very truly yours, Coplay Cement Mfg. Co. —— ——, General Sales Manager. JFT-AG.

[fol. 2071½] DEF'TS' EX. NO. D 156

Western Union

New York, N. Y., Feb. 28, 19-.

W. E. Erdell, Prest. Penn-Allen Portland Cement, Allentown, Pa.:

Members of the War Service Committee as existing prior January first have been requested to confer with the New Industrial Board of the Department of Commerce of which George N. Peek formerly vice chairman of the War Industries Board is chairman the statement is made that the object of this conference is to stabilize market conditions and stimulate spring business you are undoubtedly familiar with the general idea as recently expressed in newspaper reports. Stop. I have stated that Mr. Morron is away and that it would be difficult to get the committee together on short notice but it is desired that as large representation as possible attends. Stop. Not for [fol. 2072] the purpose of committing the industry to any action having no authority to do so or present standing as committee but to extend to the board the courtesy of an appearance in order that we may learn from them their ideas and be in position to then confer with our industry regarding them should they desire us to do so the meeting is called for two p. m. in the Council of National Defense Building Washington Tuesday, March fourth. I think it would be desirable for the committee to meet at the Shoreham Hotel,

Tuesday morning and I hope to have your advice that you will be there.

Willard A. Holman, for the Committee.

Chamber of Commerce of the United States of America

War Service Bulletin No. 49

March 10, 1919

Riggs Buildings, Washington, D. C.

Industrial Board of the Department of Commerce

The new Industrial Board of the Department of Commerce, which has been appointed with the approval of the President of the United States, has just issued to the press the following statement of its organization and purpose, together with a review of the conditions which have led up to its appointment at the present time. The intention of the Board to work in close co-operation with industries, and with organizations properly authorized to speak on behalf of their respective industries, is made clear by this general statement.

Preliminary conferences with certain lines of industry have already begun and in the case of two important industries this office was requested to invite the War Service Committees to attend conferences [fol. 2073] with the Board on Tuesday last. It is too early yet to forecast the extent to which these conferences will be carried and use made of War Service Committees, as the immediate plans call only for conferences with basic industries, but in view of the importance and the scope of the work of this new Board, all War Service Committees are urged to keep their organizations intact and be in readiness to answer a call promptly should one be issued.

The personnel of the new Industrial Board is as follows:

George N. Peek, Chairman; formerly Vice-president, Deere and Company, Moline, Illinois; formerly Commissioner of Finished products and Acting Vice-chairman, War Industries Board;

Samuel P. Bush, President, Buckeye Steel Casting Company, Columbus, Ohio; formerly Director of Facilities Division and Chief of Forgings, Guns, Small Arms and Ammunition Section, War Industries Board.

Anthony Caminetti, Commissioner General of Immigration, Department of Labor, Washington, D. C.;

Thomas K. Glenn, President, Atlantic Steel Company, Atlanta, Georgia;

George R. James, President, Wm. R. Moore Dry Goods Company, Memphis, Tennessee; formerly Chief of Cotton and Cotton Linters Section, War Industries Board;

[fol. 2073½] T. C. Powell, Director, Capital Expenditures, United States Railroad Administration; formerly representative of Railroad Administration on War Industries Board, and formerly Vice-President, Southern Railway Company, Cincinnati, Ohio;

William M. Ritter of West Virginia, President, W. M. Ritter Lumber Company; formerly division chief and assistant to the Commissioner of Finished Products, War Industries Board.

Joseph H. Defrees, Chairman War Service Executive Committee.

Statement of the Industrial Board

The President has authorized the appointment of a board to address post-war stagnation in commerce and industry. The condition, its cause, its remedy, the results to be expected and the objections to the course purposed are briefly analyzed below:

I. The Condition

(a) Although—

1. Commercial stocks are depleted,
2. There is plenty of money.
3. Building and construction are several years in arrears of necessity.
4. A long period of enforced economy is greatly relieved.

[fol. 2074] 5. Markets are in prospect in all parts of the world.

(b) Still—

1. Buying is timid and has been decreasing in volume.
2. Money is also timid and remains in bank.
3. Some mills and factories are idle—few are running full.
4. Construction of public and private works has not begun.
5. Non-employment is spreading.

II. The Cause

(a) War required production abnormally increased generally and abortively increased respecting certain commodities specially needed for war. This irregular increase was secured by enormously increased prices. Consequently the sudden termination of war left a highly inflated and very irregular market which is generally far above what the peace demand will support and which is not homogeneous, many prices being abortively above their place in the normal pattern.

(b) This situation was originally created by the abnormal operation of the law of supply and demand, stimulated by the great need of the European countries for war materials before this country entered the war, but after we entered the war the law of supply and demand was adjourned and was replaced by such new and powerful [fol. 2074½] forces as priority certificates, compulsory and commandeering orders, export and import restrictions, and price-fixing.

These forces worked through comprehensive agreements and co-operation between the Government and industry. Therefore, it may fairly be stated that the existing condition was not brought about by the normal operation of the law of supply and demand.

(c) The normal operation of the law of supply and demand can not cure what it did not cause, first, because it cannot operate until buying begins and, second, because buying cannot begin until we have a more normal stable and homogeneous market.

(d) Everybody knows that some prices must fall. No one dares buy until they do fall and even then everybody will wait to see how far they fall. Individual action in lowering selling prices is therefore timid unscientific, and long drawn out. It can not render the market uniform or stable, but on the contrary renders it unstable, dangerous and panicky. The law of supply and demand would cure the situation eventually, but can we afford to wait, first, through a period of suspicion and uncertainty, then through a panicky crash in all markets, and then through chaotic readjustment? By sane and temperate action all this can be avoided and the law of supply and demand helped over the gap between hold-over war prices and a stable level.

(e) Some uncertainty results from governmental accumulation [fol. 2075] of facilities and raw, finished and partly finished materials, which must be fed very carefully into the market. This situation requires the co-operation and advice of industry.

III The Remedy

(a) The condition must be cured as it was caused. It was not caused by the normal operation of the law of supply and demand but by general, comprehensive cooperation and agreement between industry and government. It must be cured by the same kind of co-operation and agreement—a consummation possible only at the instance and with the approval of government.

(b) Wholesome cooperation in American business at governmental instance was proved in the War Industries Board (W. I. B.). Governmental control as practiced by the W. I. B. is no longer necessary, but cooperation and agreement in industry at governmental instance and with governmental approval is necessary to bring the law of supply and demand back into normal operation and to let loose prosperity.

(c) To this end the President has authorized a board, largely of W. I. B. men, operating on W. I. B. ideals, minus W. I. B. control, to call industry together, group by group, and let them decide on prices to be offered to the nation as the governmentally approved judgment of assembled industry on a price scale low enough to be stable, homogeneous throughout the whole fabric, and founded so solidly on a comprehensive review of conditions as to encourage gen- [fol. 2075½] eral buying, including that of the railroads and other governmental agencies, and the resumption of normal activities.

IV. Results to be Achieved

(a) Basic commodities such as steel, building materials, textiles, and food will be considered first and brought to a stable basis. The governmental policy, as expressed by the bill to authorize purchase by the government of wheat at the guaranteed price and resale of it at the world price, is to assist in bringing prices of basic commodities to normality by bringing down the cost of living. It is hoped that these steps alone will automatically operate to reduce the price of fabricated articles. If they do not do so in any particular case, the industry affected will be invited into conference.

(b) As soon as a stable and wholesome scale of prices is achieved, the cost of living will have so far been reduced as to create automatically reductions in the price of labor without interfering with American standards and ideals for the treatment and living conditions of labor, and thus the last inflating element will have been withdrawn from prices. It is believed that industry will agree that the cost of living must be substantially reduced before labor should be asked to accept lower wages and thus industry should stand the first shock of readjustment.

(c) The assurance to the country of a market stabilized at the lowest reasonably expected level will loosen such a flood of buying for the recreation of stocks, the making up of arrears in the building [fol. 2076] program, the feeding of needs long starved by economy and the invasion of world markets, as may stand unprecedented in this country. From the stable level thus reached by cooperation, we may expect a healthy and normal condition created by the complete and unhampered operation of the law of supply and demand.

V. Objections to Governmental Purpose Shortly Answered

Objection (a) Business resents governmental interference and control which is to be avoided rather than encouraged. Let conditions alone and the law of supply and demand will cure all evils.

Answer. The war developed a new thing in government,—cooperation and mutual help between government and industry in which government appeared not as a policeman, and not as a jealous guardian of a suspicious character, but as a friend and helper. This idea proved itself. What is proposed is not governmental control. The board has no power of control. It is proposed to provide a forum in which industry can meet and agree on a policy for itself at the instance and with the approval of government, which will help the law of supply and demand over the gap between hold-over war prices and a stable level.

Objection (b). Business and industry will not come into a governmental conference unless there is a power of compulsion.

Answer. The experience of the W. I. B. utterly disproves this [fol. 2076½] criticism. It has been argued that patriotism impelled

business and industry to the W. I. B. Patriotism is not adjourned with the closing of the war.

Objection (c). War prices were fixed at such a level as to insure the production of many high-cost and inefficient producers. What is proposed would shut off this production.

Answer. This production is not needed in peace. The American people cannot be expected to support inefficiency in the enterprises that serve them with the necessaries of life or to maintain production not normally needed. Inflated production above that which would be supported by the law of supply and demand must cease, and will do so eventually, whether or not the proposed plan is adopted.

Objection (d). Such readjustment must necessarily require redistribution and readjustment of labor.

Answer. This is quite true. It is necessary. The distribution and allocation of labor to war industries has upset the normal pattern in this country for four years. What is proposed is a stimulated peace industry which will employ as much or more labor as did war industries, especially considering the loss of man-power, due to decreased immigration, loss by influenza, war and probably increased army and navy. That it will employ them in different places and at different tasks is inevitable, whether the proposed step is taken or not.

Objection (e). A general reduction in selling prices now will force industry and commerce to take a loss on products purchased at war prices.

[fol. 2077 & 2078] Answer. This is true and inevitable, whether the proposed plan is attempted or not, but under the proposed plan better adjustments are possible; buying will begin immediately, the overhead of continuing high cost operations through a period of stagnation is eliminated, and finally much of the loss will be recouped by buying at fair prices and selling in the inevitably increasing market that will result from the normal operation of the law of supply and demand under prosperous conditions.

VI. In Conclusion

It is expected that the activities of the board will be temporary and are intended only to give governmental assistance to aid the law of supply and demand in resuming its normal functions.

The splendid cooperation of American industry during the war leads to the belief that it may continue and carry us safely through the trying period of readjustment. Surely, with our fundamental conditions so sound, there is every reason to believe that we may bridge the gap between war and peace with the same courage and fortitude that always mark the American business man in his dealings with large affairs, and thus escape the unfortunate depressions which the country has suffered following previous wars.

The Industrial Board. George N. Peek, Chairman.

[Fol. 2078½] DEF'TS' EX. No. D 166

The Atlas Portland Cement Co.

New York

For the attention of Mr. Holman.

New York, June 21st, 1913.

I am off for Chicago this afternoon, and I hope you will keep right after things vigorously while I am away. I want your opinion on the Metropolitan Division when I get back, or at least within two weeks. I am not satisfied with it. I think I know myself some of the things that are wrong, but I want you to make your own deductions without me, so that I may see whether we agree. I want you to come in contact with the men in the Metropolitan Division. I want you to see that none of them are wasting time following up rainbows. I don't want too many people doing general things. I want the whole force put on to productive work intelligently distributed without playing any favorites.

[fol. 2079] I hope you had a comfortable cool time over Sunday, and I am sorry that you have not been able to get away more. When Kimball comes back you will have to get away for a week at least, as it is almost necessary for any one to have a little change. In the meantime do not fail to put snap into this thing. I am convinced that we are running down and I want to find out how and where, and when it is going to stop, although I can answer the last question pretty nearly myself.

Yours very truly, J. R. M.

(The A. P. C. Co., N. Y.)

Holman, N. Y.

Chicago, Aug. 7th, 1913.

I have your telegram showing the light business yesterday, especially in futures. Looks as though things were dropping off a little more. We want to get busy, I don't want that to be cut down any.

Don't know whether I told you or not, but the Universal shipped 1,230,000 for July, being approximately 400,000 more than ours, and 930,000 was shipped from Chicago. I think they have drawn circles around us this year on their distribution.

Yours truly, ——. ——.

[fol. 2080] DEF'TS' EX. NO. D 168

The Atlas Portland Cement Co.

New York

For the attention of Mr. Holman.

New York, March 19, 1914.

Just for your information so that we may get busy, you will notice that the commitments as of March 15th were practically one million barrels less than commitments a year ago for the east, and commitments for Hannibal were about 70,000 more this year than last only. We must not get left on these sales now, and we want to watch them very close east and west, we are running behind decidedly, and business is such generally speaking that I don't want to wait too long to get business as I am a little bit afraid there may not be enough of it to go around later on. I want you to particularly watch the west. If anybody is getting in under us because of our advance at Hannibal, I want to have enough flexibility there to book future orders. When this spurt of shipments is over I don't want to run down, and we ought to have some future contract business to keep going on.

Yours truly, J. R. M.

[fol. 2080½] DEF'TS' EX. NO. D 169

Chicago, April 3nd, 1914.

W. A. Holman, Atlas Portland Cement Co., 30 Broad Street, New York, N. Y.:

I would like to put a little new life into our eastern men all the way through, the Metropolitan division as well as outside, so that we can get a larger percentage of the going business. I have been thinking this over and it needs more ginger and a different kind of approach. I think they are going around like mail carriers now, and I would like to have a change.

John R. Morron.

[fol. 2081] DEF'TS' EX. NO. D 170

The Atlas Portland Cement Co.

New York

For the attention of Mr. Holman.

New York, Oct. 24th, 1914.

I notice we are falling down a little on shipments from Hudson. Please bear this in mind and keep them up.

Yours truly, J. R. M.

[fol. 2081½] DEF'TS' EX. No. D 171

(The A. P. C. Co., N. Y.)

September 1, 1915.

D. H. MacFarland:

I know that you have taken up with each of our salesmen the absolute importance of our securing new dealers, and I would like very much to have you report to me on the first of each month the new dealers secured by each salesman and the amount of business done with that dealer during each succeeding month, for the period of a year. In this way it will help us to gauge the value of a salesman.

I consider that there is a big difference between a collector of orders and an ingenious salesman. The latter is what we must have. We have a good many of them, and I want to find out which they are, and I know you too. Please attend to this promptly.

Let each of the salesmen know also that the Division Chief of his particular territory is going to make a trip into that territory whenever it is necessary, and that each salesman can call upon us right along now for any specific assistance we can give—not to supply the salesman with what he ought to have himself but to revitalize any situation that requires it; and we will expect the salesman to let us know when, from his point of view, this is necessary.

Yours very truly, —— ——.

[fol. 2082] DEF'TS' EX. No. D 172

November 30, 1915.

Mr. J. C. Larimer, Bath Portland Cement Company, 1109 Finance Building, Philadelphia, Pa.

DEAR SIR: I find through the press of other matters I have delayed acknowledging receipt of your letter of the 13th.

I am at a loss to understand why this information is conveyed to me as there might be construed the thought that there is some understanding between us, and perhaps you are under a misapprehension as to the exact position of this Company with reference to its Sales Policy, and that there may be no misunderstanding we want to state that we are not interested in the details of your Company's sales any more or differently than we are interested in the sales of all or any one of our competitors.

We are, of course, always glad to know, as nearly as possible, the trade practices pursued by our competitors and their volume of sales and other statistics of past performances, but we will not under any circumstances countenance or approve of any method that in the remotest degree savors of any understanding or agreement, such as your letter may be construed to assume.

Yours very truly, —— ——, Assistant to President.
DHM/MSM.

[fol. 2082½] DEF'TS' EX. No. D 173

The Atlas Portland Cement Co.

New York

For the attention of Mr. D. H. MacFarland.

New York, January 17, 1916.

Mr. Harding is going to show you a sheet which is part of a general audit we have of this year's business, showing the falling-off or increase in shipments, by states, which I thought it would be a good thing for you to have; and, except when there are other reasons for it than ordinary trade conditions, I think it would be well for you to get more force into those states where we seem to have lost. It seems to me also that a schedule of this kind, given to the active man in charge of the district in which these states belong, would be a great stimulus to him; that is, to show him that the business has fallen off in a state or a group of states under his charge in 1915, as compared to 1914, and then watch it carefully to see how it gained.

[fol. 2083] In other words, instead of telling the man in a general way that the business is not so good in his territory, let some fellow who has charge of a state—and see that he has charge of it—know that he has fallen behind or that he is going ahead, definitely by figures. Then he will have something to work up to. McConnell, for instance; he could be given those states, and then he in turn could tell the salesman who has charge of any particular state that he fell behind in 1914 and tell him how much, so that you can watch the orders climb up this year and beat that figure.

All that intelligent information, segregated and not given in entirety to any one man, will get results.

Yours very truly, J. R. M.

[fol. 2083½] DEF'TS' EX. No. D 174

The Atlas Portland Cement Company

New York

January 24, 1916.

DEAR MR. MCFARLAND: I am very sorry that I am not going to be here to attend this year's annual Eastern Salesmen's meeting. The one which I attended in Chicago last Friday evening greatly impressed me. There you have about forty men banded into a vigorous unit, and you are going to get results, beyond question of a doubt.

I want you to keep track during this coming year, of the comparative progress between men in the east and men in the west, and I feel sure that you will be able to get the same enthusiasm and the same results out of the men whom you are going to see and talk to at the eastern meeting, as you did in the west.

We have a chance for a good year now, but every minute has to be applied; we cannot lie back on our oars a second; each day's work has to be handled as though there were no optimism in regard to the [fol. 2084] next day. If we don't we are not going to get the gain we should. Explain this to the men so that they may understand it.

It is unnecessary for me to state that the last year was not a good one for the Atlas company, but we were glad, in spite of that, to be able to recognise merit. This coming year we will watch men and conditions very closely, and what a man makes for us, net, will be the standard. Costs of selling are very important items.

Yours very truly, John R. Morron, President.

Mr. D. H. MacFarland, Office.

[fol. 2084½] DEF'TS' EX. No. D-175

The Atlas Portland Cement Co.

For the atttention of Mr. MacFarland.

New York, Nov. 15th, 1916.

I would like this letter to be shown to Mr. Kimball and Mr. McKenna, and a copy sent to each of your department heads and salesmen.

Owing to great difficulties in manufacturing which exists today, and which are likely to continue and even become worse, there will probably be a considerable scarcity of cement in the industry as a whole. The Atlas Company feels that its organization will be able to more successfully cope with these conditions than some other companies, but it is likely to result in a condition where the demand will be greater than the supply for Atlas product, and there is one thing that I want to impress upon every man who comes in contact with our customers, either dealer, contractor or user, that is of the [fol. 2085] greatest importance, and which must never be forgotten, especially under such conditions as those outlined above:

We must never show any independence or any curtness with our trade, or with those with whom we hope at some future time to do business. If it becomes necessary to advance the price, and no quotations are out, we must give particular attention to explaining to the customer who thinks he should have the cement at the price of the expired quotation that we are sorry, that we would like to give it to him, but that these conditions absolutely prevent it. Do not tell him that we cannot give it to him; that the time is up and that he will have to get it elsewhere or else pay our price.

In times of old the Atlas Company has had the reputation of being too abrupt. We have tried now for a number of years to show to the contrary. It now comes to a time when perhaps the cement manufacturers can be a little more independent, if they choose, than ever

before, because of the relationship of supply to demand, but the Atlas Company wants to do exactly the opposite thing. They want to show their dependence upon the good will of the customer. We want to take more pains in giving a man service and extending courtesy than we would if the conditions were the other way. We can build up an asset here that will be greatly in contrast to the method that some of our competitors may adopt, and I want to be sure that this policy extends clear down into every corner, and I shall watch with great care and thoroughness for any report to the contrary.

[2085½] I also want this letter shown to every one who talks over the telephone, in all the offices, to any of our customers. I want to have it made known to the men at the door; I want it to penetrate every crevice of our business, so that people may say that the Atlas Company appreciates what good it means, and consequently is going to have more of it.

Yours truly, J. R. M.

[fol. 2086] DEF'TS' EX. NO. D 176

Messrs. Clark & Conkling:

Boston, July 23, 1918.

I am very greatly worried about our selling organization here in the East.

Since the 1st of July the Lehigh Co. have sold 91,000 bbls. on contracts. We have sold 58,000. The Coplay Co. have sold 54,000—almost as much as we have with a far superior organization, as we think. The Edison Co. have sold 66,000 and our sales force is better than theirs. The Lawrence have sold 44,000 bbls.—almost as much as we have and the Pennsylvania Co. have sold 35,000.

Now it is very easy to begin to pick holes in the way some of our competitors do business, but we are just going to omit everything of that sort and get right down to brass tacks and admit that we are being licked, and the way to stop being licked is to get the business before the other fellow does. When you come to think of it it's absolutely ridiculous for us to maintain the kind of organization we are maintaining if our performance continues to be in proportion to that of our competitors as indicated by the figures I have just given you. We cannot justify any such organization as we are carrying on the basis of those results.

[fol. 2086½] I have written all of you, or talked with you in some detail regarding your organizations, but this is to again call attention to the way we are being beaten out on high-priced, desirable business by competitors to whom we think we are superior in organization and methods, but who seem to be taking business away from us without any apparent opposition on our part.

Incidentally, during the time that we have been selling 58,000 bbls. we have cancelled 101,000 bbls., so that our net commitments are less than they were when we started. This is a fine showing for a

month's work, and it's cost us a lot of money to make that kind of a showing. I understand of course all about the reasons for all of our cancellations and they are good ones, or else the cancellations would not have been made, but I am a little bit unreasonable on this business-getting proposition because I insist that if our organization is better than the other fellows' we ought to get more business than he does. Don't you think I am right?

LGM-MH.

Shipping instructions Saturday were:

New York State	200
Metropolitan	7,800
Lehigh Valley	500
Export	2,300
Boston	700
Phila.	300
Savannah	1,300

You certainly can do better than a carload a day. You can't tell me that there isn't more business than that in the entire state of New York for the Atlas Company.

LGM—MH.

[fol. 2087½] DEF'TS' EX. NO. D 178

Copy to Mr. Conkling.

Boston, Nov. 19, 1919.

Hicks:

Our shipments for the first 15 days this month, while they look good in comparison with last year, aren't at all satisfactory as compared with the report which we have just gotten from the Association.

We show an increase of 46%. The combined figures show an increase of 56%. The Alpha Company are up 54%; the Lehigh are up 88%. The only companies which show a less increase in per cent than we do are—Dexter; Edison; Glens Falls; Knickerbocker and Nazareth.

This is a very bad situation and we must make every possible — to correct it the last 15 days this month. We must not be left so far behind.

Jan. 21, 1920.

D. R. Long:

For the first 15 days of January the Lehigh Co. showed an increase of 202% in shipments; our increase was 191%.

We mustn't start off the year with anybody running ahead of us. I know that you are soliciting business vigorously but let's take some very strenuous measures.

Be sure and get right after your salesmen on this.

Can you stand some cars to 60th St. to ship over to Long Island and how much harbor lighterage stock can you order down from Northampton?

LGM-MH.

[fol. 2089] DEF'TS' EX. No. D 181

New York Office, Oct. 22, 1919.

McKenna:

I want to call your attention to a very serious situation which exists in Mr. Umstead's territory. I know that you have this situation in mind and are already working on it, but it's still serious.

We are selling 12 less dealers in Mr. Test's territory than we sold a year ago; in other words, we have lost 12 dealers' accounts in the highest priced territory where we are.

LGM-MH.

[fol. 2089½] DEF'TS' EX. No. D 182

October 3, 1919.

Jeynes, cc. for Mr. McKenna:

Your strongest competition in the Northern Jersey territory for the month of September seems to have been the Giant who secured 13% of the business placed there as against 37%. I am depending on you and your organization to get us 30% of the business in your territory during the month of October. The 37% for September is fine but October is a new month and your September business won't count in October.

LGM:CW.

[fol. 2090] DEF'TS' EX. No. D 183

October 3, 1919.

Long, cc. Mr. Boeye:

I have just been going over an analysis of business secured by our competitors and by ourselves in your territory for the month of September. My figures show that we took 26% of the business. Our nearest competitor seems to be Lehigh and Pennsylvania with 13% each. 26% is good. Can we make it 30 or a little better for the month of October? I want to try and get 30% in every district in the East and the way you fellows are going in your territory I expect you to beat it a little bit.

LGM:CW.

[fol. 2090½] DEF'TS' EX. No. D 184

October 3, 1919.

Mr. Spencer, cc. for Mr. Boeye; cc. Mr. Fairbairn:

I have just been checking over the various contracts reported by ourselves and by our competitors in New York State territory for the month of September.

We secured 22% of the business reported. The Phœnix Co. beat us with 34%. Our next nearest competitor was Lehigh was 11%.

I have not looked at the detail of the Phœnix orders but I presume that they consist principally of Buffalo business. I notice one 45,000 barrel order and two for 20,000 barrels each which are practically all the business the Phœnix Co. secured.

22% for Atlas as against 11% for Lehigh is about the right proportion as far as Lehigh goes but 34% for Phœnix is bad.

We want 30% of the business out of New York State for the month of October. Can we get it?

LGM:CW.

[fol. 2091] DEF'TS EX. NO. D 185

October 3, 1919.

Conkling, Boston:

I have just been looking over a pretty comprehensive analysis of business placed in Boston office territory during the month of September.

According to my figures we secured 22% of the total business. Our chief competitor was the Lehigh which secured 28% and Allentown which secured 21%. The balance of the business is pretty well distributed between Alpha, Bath, Dexter, Edison and Giant. The other Companies did not seem to do much.

I have not looked at the detail of the other fellows' orders. I presume a large percentage of their business was secured from J. P. O'Connell.

I want to talk with you Monday about this situation to see if we can't figure out something this Fall that will correct it in a large measure by early Spring. It is going to be a hard thing to figure out but I believe we can do it.

LGM:CW.

[fol. 2091½] DEF'TS' EX. NO. D 186

October 22, 1919.

John R. Morron, President:

I thought you would be interested in knowing that our various districts show a net gain in the number of dealers with whom we did business for 9 months this year as compared with 12 months last year, as follows:

Boston	18
New York State	93
Northern New Jersey	10
Metropolitan	25
Philadelphia Dist.	34
Central Dist. (Phila.)	40
Savannah	17
Total	237

Yours very truly, LGM-MH.

(The text of this Exhibit contains 102 pages; is not printed in full by consent.)

[fol. 2095] DEF'TS' EX. No. D-191

December 14, 1920.

Mr. W. M. Floring, Sales Department Knickerbocker Portland Cement Company, Inc., New York City.

DEAR SIR: Referring to our Order No. 1551 of December 11th from the Seth Paull Company, you will note the price on this order had a question mark against it, as we wished to have you check the

freight rate from Universal to Bristol, Rhode Island. As per your letter to us of the 13th inst., I assume that the present rate is $1.06 per barrel, we are, however, in receipt of a letter from the Seth Paull Company under even date which advises us that they are quoted by other companies a price of $3.40 per barrel, which is evidently worked up by using a freight rate of $1.05 from Universal.

In conversation with salesmen from other companies I learn there is some confusion as to how they are figuring these Universal rates. I do not question but what the Seth Paull Co. are right in [fol. 2095½] the statement they make as to the price they have been quoted. I think if other companies are in error when they quote $3.40 we can in this case well afford to make the same error.

Yours truly, Knickerbocker Portland Cement Company, Inc
J. W. Stinson, Local Manager. JWS:G.

[fol. 2096] DEF'TS' EX. NO. D-192

December 15, 1920.

DEAR MR. STINSON: We have yours of the 14th regarding your order #1551 for the Seth Paull Company, Briston, Rhode Island.

We find that a number of different quotations are being made over New England on the Universal Rate and, therefore, wish you would figure same at $1.05 per barrel. As soon as we can obtain the proper tariffs this rate will be adjusted. We will invoice the Seth Paull Company at $3.40 per barrel.

Very truly yours, —— ——, Sales Department. WMF:HD

New York City

Jan. 28, 1919.

Mr. A. D. Naylor, Treas. Knick. Port. Cement Co., New York.

DEAR MR. NAYLOR: Your letter of January 27 relative to the monthly summary of past due accounts showing $27,378 four months old, has been received, and upon re-checking the figures we find that there was a mistake made and that the correct amount is $22,930.

We are issuing corrected summary and summary of summaries which will set this matter straight, and thank you very much indeed for calling it to our attention.

Also, we are mighty sorry that the error was made, but it seems such things will happen.

Yours very truly, H. S. Gaines, Vice-Pres.

[fol. 2097] DEF'TS' EX. NO. D-194

September 22, 1919.

Mr. M. J. Frostholm, c/o Syracuse Wall Plaster Co, Syracuse, N. Y.

DEAR FROSTHOLM: I am not just sure when I expect to get you all together in Philadelphia, but probably the early part of next month. Do not change your plans any for this, for I will let you know in plenty of time.

Conditions are getting better in the cement business, and there is much less cutting than there was. If we find it is necessary for us to employ such tactics which some of our competitors are using in order to get some of these big jobs, we will consider it at that time. I have always been very proud of the clean manner in which your business has come in. Unless we are driven to it, we do not want to have any monkey business up in New York State.

Best regards for yourself.

Very truly yours, Charles H. Cox.

[fol. 1297½] DEF'TS' EX. NO. D-195

November 23rd, 1920.

Mr. M. J. Frostholm, Syracuse, N. Y.

DEAR FROSTHOLM: I am planning to leave here Sunday, arriving in Buffalo on Monday morning, the 29th. I wish to see Hutchison about some matters, and while there will plan to go over to Niagara Falls. It might be advisable for you to meet me in Buffalo some time Monday, and we could then go to the Falls together, and also stop at Rochester on our way thru to Syracuse.

I am sorry that Universal is selling at such a low price level. I have not determined yet how to meet this competition, but will advise you later. In the meantime, you may reduce the price of Phœnix on the Oberdorfer job, future shipments, also current price at Syracuse, to $4.13 per barrel.

Looking forward to seeing you on Monday, I am,

Yours very truly, Charles H. Cox.

[fol. 2098] DEF'TS' EX. NO. D-196

Western Union Telegram

Philadelphia, Penna., October 22, 1920.

Preston E. Bradlee, #3 Strathmore Road, Brookline, Mass.:

Absorb five cents to meet Lehigh competition.

Phœnix Portland Cement Company.

[fol. 2098½] DEF'TS' EX. NO. D-197

October 22, 1920.

Mr. Preston E. Bradlee, #3 Strathmore Road, Brookline, Mass.:

DEAR BRADLEE: I wired you today to absorb five cents to meet Lehigh competition. This five cents' cheaper price of others, is undoubtedly brought about by the Hudson River base on the new freight rate. You will remember in some instances we were formerly obliged to absorb two cents per barrel and with the increase in rate, there are some points where this will be brought up to five cents.

If you reach points in New England where it will be necessary to absorb more than five cents per barrel, please take it up with this office at once, and you will be advised what to do.

Yours very truly, Charles H. Cox, General Sales Manager.

[fol. 2099] DEF'TS' EX. NO. D-198

May 27, 1921.

Mr. Preston E. Bradlee, Brookline, Mass.

DEAR BRADLEE: I received your recent reports and letter. Conditions seem to be bad in New England, but I trust they will soon be better.

I will keep after your friend, C. Bianchi & Company on that road job at Worcester. I wired you to-day to tell Harry Snider that we would sell him on our present basis on the road job about which you wrote, but that he should not sell for less than the dealer's price. I hope you can land it.

Conditions are bad to-day and competition is very keen. If it is a matter of meeting any kind of price on any job you think you have a chance to get, be sure and take it up with me. Our competitors are very aggressive, and we must ship more cement into Massachusetts. Beginning the first of the month, we will have to move about 85,000 barrels per month, so you can have some idea of what this means.

Yours very truly, Charles H. Cox.

Pennsylvania Cement Company

Sales Office

Boston, Mass., Dec. 27, 1917.

Pennsylvania Cement Co., 30 East 42d St., New York, N. Y.

Attention of Mr. Beach

DEAR SIR: Beg to acknowledge yours of the 26th inst. and have carefully noted contents.

I talked with Mr. Winchell again about the matter of freight rates and he showed me a letter accompanying quotations at the present market price which stated "it is understood that you are protected against any increase in freight rates during the year 1918."
[fol. 2100] Mr. Winchell said to me "of course, you will not mention the company that wrote this" and I told him that I did not think it was necessary as they have only bought from one other company except us the last two or three years.

Very truly yours, Geo. M. Clukas.

[fol. 2100½] DEF'TS' EX. NO. D-200

December 28, 1917.

Mr. G. M. Clukas, 161 Devonshire St., Boston, Mass.

DEAR SIR: I am in receipt of your letters of the 27th and note what you say. If the Vulcanite have protected Mr. Winchell on their freight advance for their sales next year, we will do likewise.

Have a talk with Mr. Clark of the Portland Stone Ware Co. and see how he stands, as I think I would be inclined to protect him also.

Anything you say to him, do not come out specifically with it until you have taken it up further with me.

Yours very truly, —— ——, President. WNB:C.

[fol. 2101] DEF'TS' EX. NO. D-201

Syracuse, N. Y., 7/11/18.

Mr. Albert Moyer:

I have your letter re amount of open market business in this territory.

I will keep going as hard as I can and if steady and consistent plugging is going to count for anything in these abnormal times I will get our share of the business.

Pennsylvania with their Cayuga Mill are raising the devil in this territory. They have a cut price of from 5 to 10 cents and are finding lots of dealers who take them up. You are of course aware of their sign board advertisement. The trade likes this. Mr. Farwell of Oswego has two cars of Cayuga on the road and he told me frankly he did less than 2.77 and not on a contract either.

I am not however, writing this for an excuse as I know you want every pound of open business that is available and I will keep going to that end.

Respectfully, Bickel.

[fol. 2101½] DEF'TS' EX. NO. D-202

October 6th, 1919.

Mr. Frank L. Leach, c/o Hotel Bond, Hartford, Conn.

DEAR LEACH: I congratulate you on landing the job from the City Coal & Wood Co., New Britain, Conn. This is a very nice order, and I believe the beginning of a large and satisfactory business in New Britain. I have often tried to sell Mr. Johnson in the past, but have never succeeded, and I am glad that you have been able to turn the trick.

I was very much interested in what you had to say about the price for the Connecticut State Highway. Of course, if they are generally being quoted at $2.92, we will have to get in line. As soon as another large job comes up, let me hear from you and we will decide what price to quote.

Yours very truly, Charles H. Cox.

Albert Y. Gowen

Chicago, July 13, 1915.

DEAR Mr. MORRON: I have before me your letter of July 12th, and will be more than delighted to take lunch with you at 1:00 Thursday, July 22nd. The matter we are particularly anxious to talk over is one which is close to your heart, I know, viz., pertaining to the furtherance of the Association, and the people I was anxious to have there are Mr. Young, Mr. Brown, Mr. Affleck, you and myself. I talked to Mr. Affleck over the telephone this morning, when he stated that 1:30 would be agreeable to him, and if you will let us know the place where we are to meet for lunch, I will arrange to be there at the time you mention.

With kindest regards, I remain

Very truly yours, A. Y. Gowen.

Mr. John R. Morron, President Atlas Portland Cement Co., 30 Broad Street, New York City.

[fol. 2102½] DEF'TS' EX. NO. D-204

July 15, 1915.

DEAR Mr. GOWEN: I have yours of the 13th, and if you will be at the Mid-Day Club, 25 Broad Street, at one o'clock on Thursday, July 22nd, I will order a little room where we may talk over the Association matters which you refer to, and it will give me great pleasure to have you all lunch with me.

As I understand it, you will notify all the others of the time and place.

Yours very truly, —— ——.

Mr. Albert Y. Gowen, Lehigh Portland Cement Co., 220 So. State St., Chicago.

[fol. 2103] DEF'TS' EX. NO. D-205

Albert Y. Gowen

Chicago, July 16, 1915.

DEAR MR. MORRON: I am in receipt of your letter of the 15th inst., and will be delighted to meet you at the Mid-Day Club at 1:00 o'clock on Thursday. I have also told Mr. Affleck, and he will arrange to be there, and in talking with Mr. Young over the telephone this morning he said that he would also be there and he will have Mr. Brown with him.

Thanking you for your courtesy, I remain

Very truly yours, A. Y. Gowen.

Mr. John R. Morron, President Atlas Portland Cement Co., New York City.

[fol. 2103½] DEF'TS' EX. NO. D-206

Albert Y. Gowen

Consumers Building, Chicago

July 29, 1915.

DEAR MR. MORRON: I thought I would drop you a line to say that I had a very nice interview with Mr. Hagar last week, and he told me that he had no objections whatsoever to my talking to Mr. Beck relative to the Association and submitting to him the proposition which we agreed upon. I was in communication with Mr. Beck the following afternnon and closed with him on the basis authorized at the meeting. Mr. Beck has already handed in his resignation to Mr. Hagar, effective, I understand, August first, and is simply waiting to hear from you and Mr. Young, who were to get in touch with Mr. Lober. Owing to the fact that I am leaving for Maine today, on my vacation, would advise that either you or Mr. Young write Mr. Affleck direct relative to your interview with Mr. Lober, so that he can inform Mr. Beck as to when he would want him to report in Philadelphia. I would suggest his staying here in Chicago and working this proposition up in his own way until such time as his services are required in the East.

[fol. 2104] I was sorry not to see you on Monday, but when I called up your office I heard you had left. Otherwise I would have talked this all over with you personally.

Mr. Beck was employed on a basis of $5,000 a year, with the understanding that he would secure $10,000 from January 1st on.

With kindest regards, I remain

Very truly yours, A. Y. Gowen.

Mr. John R. Morron, Pres. Atlas Portland Cement Co., 30 Broad Street, New York City.

[fol. 2104½] DEF'TS' EX. No. D-207

Write Mr. E. M. Young, Allentown.

Enclosed find copy of letter received from Mr. Gowen. I am in the country and will be back Tuesday, the 10th, and am going away early the 15th to be gone for ten days. I should be glad to arrange to see Mr. Lober with you any time between the 10th and 15th. Although Mr. Gowen's letter does not say so, I presume he follows our suggestion that we could not contract that the Association would employ Mr. Beck, but that we hoped it would, and that if it did we would think the salary of $10,000 which he mentions as satisfactory. In other words, it is just as you stated, we have no right to contract for the Association, and perhaps they would suggest to Mr. Lober that Mr. Beck be put in now to work with Mr. Wilson at a lower rate salary until January 1st.

[fol. 2105] DEF'TS' EX. No. D-208

The A. P. C. Co., N. Y.

August 11, 1915.

DEAR MR. YOUNG: Mr. Lober had luncheon with me yesterday and I spent a couple of hours with him, and will relate to you, as nearly as I can recall, our conversation regarding the Association matter which we discussed some time ago..

I said to Mr. Lober that a week or two ago Mr. Gowen had wired, asking if I would meet you and Mr. Affleck and Mr. Brown, with him, to discuss as large contributors the results which were or were not being obtained by the Association of Portland Cement Manufacturers, and to see if there was any suggestion which could be made which, when in concrete form, could be submitted to him as President, as a suggestion; and that I wired Mr. Gowen that I would be glad to discuss the matter; that we had met, and that it had been decided to ask Mr. Hagar if he had any objection to our talking with Mr. Beck on the possibility of coming with the Association in case the suggestion met with the Association's approval.

I told Mr. Lober that Mr. Gowen had reported back that he had seen Mr. Beck and that Mr. Beck was agreeable, and that the pro-

[fol. 2105½] cedure now, as I understand it, would be that after

we had seen Mr. Gowen again and were sure that Mr. Beck would come if the Association wanted him, then someone—probably you—would see him and put the suggestion to him as President, as to whether it would not be a good idea to put Mr. Beck in at once, while Mr. Wilson is there, and run along with Mr. Wilson up to the time of any change, in case the Association wanted it, in January.

Mr. Lober said that he was aware that Mr. Wilson was not 100 per cent. good and that he had often criticised him, but that from his point of view, after giving all things consideration, he thought Mr. Wilson was as good a man as he knew of, but that he has always thought well of Mr. Beck.

Mr. Lober, however, did feel somewhat annoyed and thought it somewhat strange that we should have had a meeting without bringing him into it. I told him that the meeting was simply an informal talk of large contributors, which of course is the fact, and that we did not want to bother him until we could offer some positive suggestion and knew that we could get Mr. Beck in case the Association wanted him; and that of course every one of us was in thorough accord with doing nothing except through the organization and consequently through him.

I am writing this letter so that when you see Mr. Lober you may perhaps carry out my line of argument, because I think it represents our real thought and I am inclined to think is the best way to handle Mr. Lober. The next move, therefore, will be for you [fol. 2106] to see him and refer to the fact that I have told you of my talk with him, and that you are now in a position to say that we can get Mr. Beck if we want him, and that you suggest, and most of the rest of us feel, that it ought to be done at once if it meets with his approval.

Please pardon this long letter, but I thought I had better explain the situation in detail. I might also say that I have plenty of time these days to write letters, as there seem to be no orders in sight.

With kind regards believe me to be

Yours very truly, —— ——.

Mr. E. M. Young, Vice-President Lehigh Portland Cement Co., Allentown, Pa.

P. S.—Might it not be advisable for you to send a copy of this letter to Mr. Brown and Mr. Gowen? I am sending one to Mr. Affleck.

[fol. 2106½] DEF'TS' EX. NO. D-209

August 12th, 1915.

Mr. John R. Morron, President Atlas Portland Cement Co., New York City.

DEAR MR. MORRON: I beg to acknowledge receipt of your favor of August 11th, and note carefully all you say in reference to your talk with Mr. Lober in connection with the employment of Mr. Beck

in the office of the Association at Philadelphia. Mr. Gowen will be in Allentown on Monday, August 16th, and I will then finally talk over with him the details of his conversation with Mr. Beck.

During next week I will try to meet Mr. Lober and continue with him the line of talk to which you refer in your letter. Mr. Lober will probably not wish to make any move or do anything before the meeting of the Executive Committee in Atlantic City early in September. My suggestion to Mr. Lober will be that the employment of Mr. Beck should be presented to the Executive Committee at Atlantic City for its action.

[fol. 2107] Unfortunately, I will not be able to be present, as I leave for San Francisco August 23rd and will not return until September 16th. I recall your saying that possibly you would not be able to attend. It certainly would be a great help if you could be present, if only at the meeting of the Executive Committee, otherwise the advocating of Mr. Beck's employment would be left to Mr. Brown, Affleck and Gowen, who will represent me. If at all possible, I think you should try to be there.

Orders and shipments both East and West are very light with the Lehigh this month. The total movement from the East up to and including August 11th, is 81,000 barrels or an average of only 9,000 barrels for each shipping day. I understand from Mr. Brown that Alpha shipments are also very light.

If I happen to be in New York during the coming week, I will drop in for a few minutes chat with you.

Your letter will be shown to Mr. Gowen on Monday and a copy is being mailed to Mr. Brown this afternoon.

With best wishes, I am

Yours respectfully, E. M. Young.

[fol. 2107½] DEF'TS' EX. NO. D-210

August 13, 1915.

DEAR MR. YOUNG: I am very glad to have yours of the 12th, and I hope your trip west will be interesting and pleasant. If your party is going to stop in Chicago and would like to meet some of the representative people there, I should be very glad to give you a letter and put you up at the clubs.

I shall probably be unable to attend the meeting of the Executive Committee in Atlantic City, but am quite satisfied to leave the matter in the hands of Mr. Brown, Mr. Affleck and Mr. Gowen.

With kind regards,

Yours very truly, —— ——.

Mr. E. M. Young, Vice-President Lehigh Portland Cement Co., Allentown, Pa.

[fol. 2108] DEF'TS' EX. No. D-211

At a meeting of the Executive Committee, Association of American Portland Cement Manufacturers, held at Atlantic City, September 14th, 1915, the following action was taken:

"Upon motion of Mr. Brown, duly seconded, the following resolution was adopted:

'Whereas: It appears to the members of the Association that the already excellent work being accomplished may be greatly broadened;

And Whereas: It is possible at this time to secure the services of a man of executive ability and one who has had a large experience in educational, promotion and publicity work;

Therefore, Be It Resolved: That Mr. J. F. Beck be employed by the Association as an expert with full access to all the Association records, and that he be instructed to study the general conditions and to report at the December Meeting a plan to enlarge the work of the Association; and further that a committee be now appointed by the chair to secure the services of Mr. Beck.'

The Committee appointed as per the above resolution were: G. S. Brown, Chairman (Alpha); L. T. Sunderland (Ash Grove), B. F. Affleck (Universal)."

[fol. 2108½] DEF'TS' EX. No. D-212

At the Organization Meeting of the Executive Committee, Association of American Portland Cement Manufacturers, held at New York City, December 16th, 1915, the following action was taken:

"A motion was made by Mr. Brown, seconded by Mr. Block that the Executive Committee employ a General Manager to have executive charge of all the work of the Association, subject to the supervision of the President and the Executive Committee or Advisory Committee. Motion carried.

"It was moved by Mr. Brown, seconded by Mr. Dickinson, and carried that the Executive Committee employ Mr. J. P. Beck as General Manager at a monthly salary equivalent to ten thousand ($10,000.00) dollars per year, effective December 15th, 1915.

"The resignation of Mr. Percy H. Wilson as Secretary of the Association was presented.

"Upon motion of Mr. Hardy, seconded by Mr. Kelley, the resignation presented by Mr. Wilson as Secretary be accepted and that he be paid the sum of Seven Thousand ($7,000.00) dollars in recognition of his services and that the President appoint a committee to draw up appropriate resolutions expressing the regret of the committee at the severance of his connection with the Association. Motion carried.

"The President appointed Messrs. Hardy and Kelley as the Committee."

[fol. 2109] DEF'TS' EX. NO. D-213

New York, October 19, 1917.

DEAR MR. COX: It has come to my attention that statistical figures sent out from time to time by the Association office are not being considered confidential, and we have known of several instances where contractors and dealers were well posted as to figures affecting various Companies, of course having received the information from someone connected with a member Company.

I think it would be advisable if you would advise the Association office in such a manner that it could be sent to the members for their information, that such public use of figures was not to be desired from the standpoint of legal propriety. In other words, I thing that it could be stopped if it was presented to the members in a manner which would have this effect.

Yours very truly, W. A. Holman.

Mr. Archibald Cox, Woolworth Building, New York City.

[fol. 2109½] DEF'TS' EX. NO. D-214

Oct. 24, 1917.

Mr. W. A. Holman:

DEAR MR. HOLMAN: I have had difficulty in finding a way to deal with the matter of the misuse of the statistical figures of the Association, referred to in your favor of the 19th instant. I do not like to advise the members of the Association that for legal reasons the figures must be kept confidential, partly because that is not true and partly because instructions suggesting secrecy are likely to be misconstrued by the type of mind which conceives that anything kept secret must be unfit for publication. The real objection to the misuse of the figures is that it represents disloyalty to the Association, calculated to impair its usefulness by making it undesirable for it to collect the figures. The disclosure of figures might be made an offense against a regulation of the Association, but it is not illegal.

Accordingly, I think that strictly the matter is one with which the Association should deal by emphasizing the impropriety of such a practice rather than a matter to be dealt with by counsel. But, if you think it would be helpful, I might write a letter to Mr. Lober, asking him to send copies to the members, which would read somewhat as follows:

[fol. 2110] My attention has been directed to several instances where contractors and dealers have received the substance of statistical figures sent out by the Association's office and used them to the disadvantage of members of the Association. Since such disclosures can be accounted for only on the ground of misunderstanding on the part of some of the members, I venture to suggest that it might be desirable for you to send a letter to each member of the Association pointing out, in substance, the following:

The statistical information furnished by each member to the Association amounts, in substance, to a courtesy extended to the other members, giving them information which enables them to conduct their businesses more intelligently. Such information is always given upon the understanding that the confidence it implies will not be abused and that the information will not be passed on to others to use to the detriment of the company giving it. It has been intimated that unless such information is treated as confidential, companies will feel constrained to decline to give it, with the result that accurate and up-to-date statistics will not be available to the manufacturers. Moreover, the disclosure of such information to dealers and contractors and thereafter by them inevitably results in inaccuracy and contortion, which is calculated to give an erroneous impression concerning the activities of the Association and might thus lead to serious legal difficulties.

[fol. 2110½] Since the matter is in many aspects of much importance, I suggest that you might perhaps ask each person to whom you address such a letter to acknowledge it and advise you that he will see to it that, so far as his company is concerned, none of the information in such reports will be disclosed to others.

My thought is that Mr. Lober might perhaps send this out as a copy of a letter received from me. I shall be glad to have you suggest improvements in it, but it represents about as far as one can decently go towards saying that such a disclosure is illegal.

Yours very truly, —— ——.

[fol. 2111] DEF'TS' EX. NO. D-215

Copy of Report from Mr. C. S. Swallow, Dated January 5, 1916

Called on F. E. Wise & Son (Dealers) N. Y. City; J. A. Philbrick & Bro. (Dealers), N. Y. City; Murtha & Schmohl Co. (Dealers), N. Y. City.

Wise claims to have cheap cement yet to come. Will ask for prices as required for future work.

Philbrick engaged—Will call later.

Murtha & Schmohl are shopping for prices for 1916. Still have cement to come at $1.32, $1.42 and $1.52. Mr. Murtha says he expects to make arrangement for cement at from 10¢ to 15¢ per bbl. below market price.

[fol. 2111½] DEF'TS' EX. NO. D-216

February 14, 1921.

DEAR MR. STINSON: You will recall while at the office in January you asked for the percentage sheet on our shipments for 1920. We enclose copy herewith and you will note our percentage for 1920 was 6.9 per cent of all shipments made into our territory.

As explained to you at that time, the increase in our shipments was not more than the increase in the total amount shipped by all mills, and it is up to us to cut into the other fellow's shipments by at least 4 per cent this coming year. This increase depends entirely upon the quantity shipped into the territory. In order to reach our 1,250,000 barrels it may be necessary for us to secure a larger percentage of the other fellow's business.

Very truly yours, —— ——, Sales Department. WMF:HD.

[fol. 2112] DEF'TS' EX. NO. D-217

New York City, March 3, 1921.

DEAR MR. STINSON: We have very few orders for immediate shipment, and we must do something to increase our shipments this month. There are quite a number of customers in your territory who have contracts that we carried over, with the understanding that shipments would be called for during the first three months of this year. Can you not get some of this business started at once? Also try and secure orders for shipments at this time for stock. Other Cement Companies are prevailing upon their customers to take contract business at this time, and we should be able to do the same. At least, we must make a vigorous effort.

Yours very truly, —— ——, President. ADN:J.

Copy for Mr. Floring.

[fol. 2112½] DEF'TS' EX. NO. D-218

April 25, 1921.

DEAR MR. WHITE: I sent out a general letter today, addressed to all Salesmen, with regard to our dealer situation and the number of new dealers secured this year.

While I don't want to criticize unnecessarily, I find upon examining the list that you have added only two new dealers in your territory this year. I therefore hope that you will be able to considerably increase your efforts along these lines so as to establish as many new dealers as possible in your territory before the end of May. I am very anxious that we reach the three hundred mark by May 31st, and know that I will have your full cooperation in securing the results desired.

Yours very truly, —— ——, President. ADN:J.

Copy to Mr. Floring.

[fol. 2113] DEF'TS' EX. NO. D-219

April 25, 1921.

DEAR MR. ARBOTT: I sent out a general letter today, addressed to all Salesmen, with regard to our dealer situation and the number of new dealers secured this year.

While I don't want to criticize unnecessarily, I find upon examining the list that you have added only one new dealer in your territory this year. I therefore hope that you will be able to considerably increase your efforts along these lines so as to establish as many new dealers as possible in your territory before the end of May. I am very anxious that we reach the 300 mark by May 31st, and know that I will have your full cooperation in securing the results desired.

[fol. 2113½] DEF'TS' EX. No. D-220

June 8, 1921.

DEAR MR. WHITE: The shipments into your territory show a decrease for the first five months of this year of 8,737 barrels as compared with the same period in 1920.

I wish to urge you to make every effort to make up this loss at the earliest possible date.

Very truly yours, —— ——, President. ADN:W.

Copy to Mr. Floring.

[fol. 2114] DEF'TS' EX. No. D-221

The Lawrence Cement Company

New York City, May 16, 1916.

To Salesmen:

I find that we are the only company quoting for delivery in paper bags twenty (20) cents per barrel less than the price in cotton, and if it is necessary for you to quote a ten (10) cent lower price to meet competition you are authorized to do so until further notice.

Yours very truly, Frank H. Smith, Sales Manger.

[fol. 2114½] DEF'TS' EX. No. D-222

May 17, 1916.

Lawrence Portland Cement Co., Mr. Frank H. Smith, Sales Mgr., New York City.

GENTLEMEN: We have yours of the 16th relative to the price in paper and will be governed accordingly. We thank you for your attention as this was quite an important matter. It placed us at a disadvantage endeavoring to get 10¢ above our competitors.

We might add that we do not sell an awful lot of paper and do not think it will make very much difference, except with a few customers whom we do not care to lose.

Yours truly, Lawrence Portland Cement Company. O. G. J. Phila. Sales Agent.

[fol. 2115] DEF'TS' EX. No. D-223

June 23, 1916.

Mr. J. P. Maloney, 46 Cornhill, Boston, Mass.

DEAR SIR: We acknowledge receipt of your various favors of the 21st and 22nd.

We are interested in your remarks relative to the possibility of a settlement of labor troubles within the next ten days. We also note that you are calling daily on all contractors with work pending. We think this is an excellent idea in view of the unusual competition to business which now exists.

In regard to the job at New Milford, Conn., wish to state that our dealer confirmed his price with Bishop, and also telephoned him for his acceptance of the offer, but to date has not heard definitely from the Bishop Co.

We note your remarks relative to business conditions with some of the other Cement Companies, and you may be interested in knowing that the average shipments for the first twenty days of June this year as compared with last year is 25% lower. Our own shipments show a falling off of 32%, so you can readily understand the necessity for securing some business for immediate shipment.

Yours very truly, R. A. P., Eastern Sales Agent.

[fol. 2115½] DEF'TS' EX. No. D-224

October 16, 1916.

Mr. J. P. Maloney, 46 Cornhill, Boston, Mass.

DEAR SIR: We are very much interested in the information you have given us in regard to the advertising campaign of the Lehigh Portland Cement Company.

For our own information, we would be interested in knowing the name of the dealer who purchased the carload of Lehigh Cement on account of our inability to ship Dragon promptly.

We also note the settlement which you have arranged with Westinghouse, Kerr & Company, and this is very satisfactory to us.

We [would]* figure a price to quote Converse at Norfolk, Va. will

Yours very truly, R. A. P., Eastern Sales Agent.

[fol. 2116] DEFT'S EX. No. D-225

February 1, 1917.

Mr. J. P. Maloney, Boston, Mass.

DEAR SIR: I note the Association reports under date of January 31st that Prentiss, Brooks & Co. made two contracts with Alpha, 1,000 bbls. each, both for garages, contractor P. J. Kennedy Co.

[*Word enclosed in brackets erased in copy.]

Is there not some way in which you can force Prentiss, Brooks & Co. to stock our cement?

Yours truly, Smith, Sales Manager.

[fol. 2116½] DEF'TS' EX. No. D-226

April 19, 1919.

Construction Supply Co., Hancock & Marshall Sts., Richmond, Va.

GENTLEMEN: We received your wire asking for quotation on Seven Thousand (7,000) barrels of cement at South Boston.

As per our telegram, we very much regret to state that owing to lower freight rates, the Fordwick Mills can quote a price at South Boston which would reduce our mill price 30¢ per barrel if we should meet it. You can undoubtedly appreciate our position that we would not care to go so far below our cost of manufacture and entertain this loss. The situation in the vicinity of Richmond is different and we can handle business in your section to good advantage.

We trust that you will understand our reasons for being unable to quote you and that you will give us opportunities of quoting where we can at least secure our costs for the cement.

Thanking you for the opportunitly and hoping to hear from you again, we remain,

Yours very truly, R. A. P., Sales Manager.

Mr. Paul L. Hayden:

Price

DEAR MR. HAYDEN: Replying to your letter of June the fourth, we not only guarantee our price against decline, but also give dealers the benefit of the decline on any unsold stock which they may have in their warehouses. This will be your authority to so tell the trade.

[fol. 2124½] DEF'TS' EX. NO. D-240

April 7, 1919.

Personal

W. A. H.:

Your memorandum of the 5th has been noted. I surely hope that the scrap that is on in the President's Cabinet will be settled shortly so that all of the unrest regarding building conditions will be stopped. We certainly can't assure our customers that there will be no further reduction. At the same time, if we could work out something to be put out to the trade that would be more or less reassuring without being absolutely committal it would start a buying movement. I have been thinking for some time that our basis of taking contracts, while sound theoretically, works in a very unsound way practically. By this I mean taking contracts on a firm basis. I am almost of the conclusion that it would be a good commercial practice, particularly during the present uncertain times, to make our contracts subject to invoicing the cement at the current market price if it is lower than the contract price during such period as the current market may be lower than the contract. In my experience in the cement business we have been able to hold, during a time of decline, a certain number of our contracts on the [fol. 2125] basis at which they were taken. This, however, has been principally contracts taken direct with industrial companies or direct with contractors, but very seldom have we been able to hold our contracts with dealers when the market price was below the contract price. In theory we have held our contracts with dealers, but as you know a very large number of them have ordered out other brands of cement, and even our own brand, on basis of the current market price, without applying it against the contract, and we have found later on that our contracts were not lived up to. We have never taken the position that we wanted to try out one of these contracts in court, and, therefore, to all intents and purposes our contracts with the dealers have not been firm contracts. At the present time we are selling a greater proportion of our cement through the dealers than we ever sold before. I think this question is worth considering just now as a matter of Atlas policy,

particularly during the present time, and perhaps for the future. I am sure that if we could go to the contractors and dealers with the idea in mind of making a contract on basis of present prices, with a clause in that lower prices would apply during any period that the Atlas Company made lower prices while the contract was in force, we would be able to close up a good many contracts that are now in the market and are only being supplied from time to time as the cement is required. I am, of course, mindful of the fact that all of our competitors would have to do likewise as a matter of protection, but I am not sure but that it would be better for us to look the thing squarely in the face and work out our policy along [fol. 2125½] practical lines rather than theoretical lines. What we lose in the way of invoicing at prices lower than the contract I am sure would be more than offset by what we would gain by supplying contracts through the dealers who ordinarily would buy their cement on the current prices.

It is really unfortunate but when the market price declines and we hold dealers to our contract prices for the contracts we have with them they generally order other brands of cement on basis of the current market prices, and we not only lose out on our contemplated price for these contracts, but we also lose the amount of cement that goes on them. I feel sure that this more than offsets the gain that we make by securing a price above the current market for such contracts as are taken out in accordance with the terms of purchase. Of course, on basis of the decline in price that just occurred we are handling the contracts as you and I both agreed to, and that is putting them down to the present market basis, but this doesn't put us in position to go before the contractors and dealers now on contracts to be placed and give them the assurances they require in order to close up the business. I know that this is a matter of great importance from standpoint of general policy and that you will want to discuss it pretty thoroughly. If, however you decide that this is the thing to do the sooner we settle it the better off we will be.

D. H. M. BC.

[fol. 2126] DEF'TS' EX. NO. D-241

Guarantee Against Decline

New York, April 10, 1919.

Mr. MacFarland, Chicago:

On the guarantee against decline which you know about, you must be very careful that the customer understands that it is a guarantee against Atlas decline, not the decline of any other company, otherwise some small concern might establish a price for our entire output.

Please be very careful that every salesman understands this thoroughly.

Yours truly, J. R. M.

[fol. 2129½] DEF'TS' EX. NO. D-248

Nazareth Cement Company
Boston Office

Subject: ——.

10/21/20. N-CP-25.

To Mr. J. A. Horner, Nazareth, Penna.:

Received your telegram advising that you were not coming up this week, and when you do know your plans, let me know and I will arrange to meet you on arrival.

The cement market is very peculiar up here, some people who feel we have used them well, make no objection to paying on the $3.00 bulk basis at the mill for market cement, but others are giving us no orders because they are buying cheaper from other companies. Understand most of the mills are selling dealers on the basis of $2.50 in bulk, and we are advised that the Pennsylvania is quoting on a price of $2.25 bulk, which is the highest they ever quoted up here even during the recent trouble. They are also absorbing the difference in rates between Lehigh Valley and Hudson River mills which makes the net to them about $2.20 on sales to dealers.

I feel that as long as we can get some of the higher price business we will hang on, and ship as little of the low price cement as we can.

Very truly yours, John W. Ramsay.

[fol. 2130] DEF'TS' EX. NO. D-249

May 31, 1921.

Mr. Preston E. Bradlee, Brookline, Mass.

DEAR BRADLEE: I know business is very bad in Boston, owing to the strikes, but this same condition obtains in most all our large cities. We are being obliged to get our business from the small centers and on road jobs. Watch the competition carefully and let

me know what you are up against. If price cutting becomes general, then the lower price level will become the prevailing one, and we cannot be left at the post. Keep in close touch with the situation and with me.

I have written Frank Leach asking him to go over to Westerly as soon as he can, and if he wants any additional information, to call you on the 'phone.

It seems as tho these strikes have been running so long now that they must soon be settled, and I am hoping that conditions will be much changed in the near future. It is becoming a matter of some anxiety to us because we have on hand a very large stock of clinker, altho our cement stock is low, but with our new grinding capacity, we will be able to grind the clinker much faster than we can burn, and so the stock of clinker on hand practically amounts to finished [fol. 2130½] cement, when we speak of material to be sold. It means that we must ship 85,000 barrels of cement every month the balance of this year, and this is a great deal more than we have ever done before. We will have to get the business, and if our competitors are underselling us, we must know about it, and if necessary, meet the competition as it comes. Watch your territory like a hawk and good luck to you.

Yours very truly, Charles H. Cox.

[fol. 2131] DEF'TS' EX. NO. D-250

The Atlas Portland Cement Co.

New York

For the attention of Mr. MacFarland; Mr. Lewis, Chicago.

New York, June 19, 1920.

Mr. Morron has asked me to write you about a situation here in the east that has developed this morning.

We have received word that Alpha and some of the smaller companies have increased their price 30 cents a barrel. One or two of the smaller companies first issued quotations and it is apparently growing general. We have not found any quotations yet from any of the trade of the Lehigh company.

We are not yet quite ready to make a change ourselves, but probably will have to decide it Monday or Tuesday. If we increase our price, it is our thought that we would like to go up 35 cents instead of 30, and allow 10 cents a barrel discount for cash—that is, make [fols. 2132-2137] the cash discount 10 cents instead of 5. Assuming that information we are able to develop Monday or Tuesday confirms the information that we have today of a 30 cent advance, we would then increase to 35 cents, but because if we do go up to 35 cents we will allow a 10 cent discount, our net price on discounted invoices will be the same.

While, as I have stated above, we have not yet determined on this, Mr. Morron wanted me to write you about it, so that you could consider the best way to handle the situation in the west and south, as of course if we allow a 10 cent cash discount here, we would want to do the same elsewhere.

It is Mr. Morron's thought that we would increase our Western & Southern prices 5 cents, although it need not necessarily be done by a general notice. This latter point is one on which he would like to hear from you. In fact he would like to have you write him as promptly as possible, giving your ideas of just how you would handle your end, in the event of our deciding to go to the 10 cent discount.

Yours truly, L. R. B.

Federal Trade Commission

Fundamentals of a Cost System for Manufacturers

July 1, 1916

[fol. 2415] Federal Trade Commission

Washington

Edward N. Hurley, Chairman; William J. Harris, Vice Chairman; Joseph E. Davies, Will H. Parry, George Rublee; Leonidas L. Bracken, Secretary.

July 1, 1916.

To the American Manufacturer:

The Federal Trade Commission has found that an amazing number of manufacturers, particularly the smaller ones, have no adequate system for determining their costs and price their goods arbitrarily. It is evident that there must be improvement in this direction before competition can be placed upon a sound economic basis.

With the object of aiding in the improvement of business generally we have endeavored in this pamphlet to show briefly the importance of accurate manufacturing costs and the fundamental principles underlying them. I commend it to your attention and feel satisfied that if you will read it carefully you will find many helpful suggestions.

The pamphlet has been prepared under my direction by Mr. Robert E. Belt, Chief Accountant, and Mr. R. W. Gardiner, Assistant.

Trusting we may have your hearty co-operation, I am,

Very respectfully yours, Edward N. Hurley, Chairman.

[fol. 2417] Fundamentals of a Cost System for Manufacturers

[fol. 2418] [Several pages not printed by consent.]

Exchange of Statistical Information Beneficial

In the past many manufacturers disliked to give out information concerning their business. To-day the reverse is the case. Trade

associations are compiling statistics as to production, shipments, and costs for the benefit of their members, and the manufacturer instead of trying to keep this information to himself welcomes the opportunity to supply the data, knowing that his competitors are doing the same thing and that these statistics will be of benefit to himself and to his industry. The Federal Trade Commission is keenly alive to the value of this information.

The Commission is urging manufacturers to determine their costs accurately in the interest of better trade conditions. It believes that anything that is of benefit to an industry is of benefit to the public, and it is also of the opinion that the nearer cost systems approach uniformity the more valuable will be the results.

[Remaining pages not printed by consent.]

[fol. 2419] DEF'TS' EX. NO. D-372

Federal Trade Commission

Washington

August 2, 1916.

Mr. Charles F. Conn, Chairman Cost Accounting Committee, Portland Cement Association, Pennsylvania Bldg., Phila., Pa.

DEAR SIR: Relative to your request that the Federal Trade Commission review the Commercial Cost Summary and Cost Accounting system of the Portland Cement Association, I am glad to report that the Commission heartily commends the efforts of your Association to aid the cement manufacturers of the country in improving their accounting methods and business practices, and considers the accounting plan excellently designed along simple and practical lines and to be in accordance with the best accounting practice. Your work, therefore, has our unqualified endorsement.

We feel sure if manufacturers were in possession of adequate information about their business and knew definitely their true costs [fol. 2419½] of manufacture and distribution, unintelligent competition would be reduced to the minimum.

With best wishes for the success of your good work, and the welfare of your industry, I am

Very truly yours, Edward N. Hurley, Chairman.

[fol. 2420] DEF'TS' EX. NO. D-375

An Address by Edward N. Hurley, Vice Chairman Federal Trade Commission, Before the Portland Cement Association, at Chicago, Ill., May 10, 1916.

I am very glad to be with you tonight and to meet the members of the Portland Cement Association. When my personal friend,

Mr. John R. Morron, wrote me asking if it would be possible for me to talk to you, I replied by return mail that it would be a great pleasure to do so, first, because I wanted to grant Mr. Morron's request, and, second, because the opportunity of meeting a group of business men who are doing big things always appeals to me.

It has been my good fortune the past year to have met almost all of the business men appearing before the Federal Trade Commission. They have presented many of their problems and as a business man it has been particularly gratifying to me not to have had a question presented by them that did not show in every way honesty of purpose and straight-forwardness.

Many of the economic questions before the American manufacturer to-day are not so serious or so complicated that they cannot be worked out on a sound, practical basis. Within a reasonable length of time Government and business will undoubtedly reach a better [fol. 2420½] understanding and both recognize that in order to do big things they must have the same object in view and have confidence in each other. I believe these conditions are being realized to-day, and if co-operation continues the problems will be easy to solve and will make the effort worth while.

The Chamber of Commerce of the United States has a Federal Trade committee of which Mr. Harry A. Wheeler of Chicago is chairman. Last autumn this committee sought a conference with the Department of Justice with a view to ascertaining the probable attitude of the Department of Justice with respect to future prosecutions under the antitrust laws. It was explained to the Attorney General by representatives of the committee that if he would express himself, it might be regarded as reassuring to the public mind and at the same time dispel some uncertainty which heretofore has been said to exist. A number of conferences were held and the result was that the Attorney General made a statement in which among other things he outlined the policy of the department as regards the method of enforcing the law in those cases which are admittedly doubtful. He stated that where men have entered into a transaction, believing in good faith that the transaction is a lawful one, and subsequently upon complaint made the department reaches the conclusion that the transaction was not in accordance with the statute but is yet satisfied of the good faith and innocent purpose of the parties and can see that there was ground for the view upon which they acted, it has not been and will not be the policy of [fol. 2421] the department to invoke extreme penalties against them. In such a case the department would consider that the just and appropriate and quickest way of enforcing the law would be by a civil proceeding in which the question involved could be contested or a consent decree entered, according as the defendants desired, or by a notice to the parties of the Department's conclusion with opportunity to abandon or modify the transaction. It was further stated by the Attorney General that no proceeding is ever instituted until after the most painstaking and exhaustive investigation, in the course of which the person or corporation against whom com-

plaint is made is given full opportunity to submit its defense before any action is taken.

Groups of business men are constantly coming before the Federal Trade Commission, asking for information as to how they can improve conditions. Manufacturers come to us protesting against overproduction or complaining against their competitors, claiming unfair methods of competition and asking us for relief. They assert their competitors are selling goods below cost and ruining the industry in which they are engaged. For these evils, often of many years' standing, they request relief.

Lack of Adequate Information

The Federal Trade Commission, no matter how anxious it is to be helpful to those laboring under these industrial disadvantages, is confronted at the outset with a lack of adequate information regarding industry.

[fol. 2421½] With all the attention that has been given to business the past 15 years it is a remarkable fact that to-day there is no comprehensive data available, no constructive material at hand to furnish to a manufacturer, merchant or trade association desiring to improve the unsatisfactory conditions in their industry. Without such data it is impossible to make recommendations to Congress for helpful constructive legislation.

From the Government the railroads receive statistics giving them a broad view of the transportation situation of the country. The farmer is told frequently the conditions of the crops so that he may know how and when to dispose of his surplus products. The health of his stock is under the jurisdiction of the Government. The banker is furnished details as to the financial condition in the country by the Treasury Department. These are helpful fields of Government activity and the people of the country are heartily in accord with this work.

Manufacturers and merchants who are merchandising the farmers' product, shipping their goods over the railroads, depositing their money in the banks, and meeting the payroll of thousands of employees—these, too, should be furnished with data and information regarding their respective industries.

In order to cooperate intelligently with the manufacturers and merchants of the country, the Federal Trade Commission must have the facts about industry. With this thought in mind we recently submitted to the manufacturers of the country a form asking them to answer a few questions in regard to their business. Take the [fol. 2422] cement business for example. We hope to show for this industry the aggregate capital stock of all the cement manufacturers in the United States, the bonded and other indebtedness, the accumulated surplus or the earnings invested in the business, the net sales and the net profits. We will also show in the aggregate the depreciation charged off and the losses from bad debts. The amount of depreciation charged off will indicate in a measure whether this important item is being treated in a practical way.

These figures, when compiled, will show whether or not the industry is in a good condition. If the money invested in the business is not yielding a fair return, the industry is not very healthy. It may be caused by overproduction and unremunerative prices, or it may be that the business is not being as efficiently conducted as it should be.

If, after having these facts before us we find that the cement industry requires further attention and should desire our cooperation, we will be able to discuss intelligently with cement manufacturers or the Portland Cement Association remedies that may be helpful.

The subject of more uniformity in cost finding is one that is at present receiving careful attention on the part of many manufacturers and trade associations. A number of trade associations are in this way achieving marked success in strengthening their industries. It has been demonstrated that a knowledge of cost determined by uniform practice will improve trade conditions to a remarkable degree. By a uniform practice I mean a common classification of [fol. 2422½] costs, both manufacturing and selling, a uniform method of distributing overhead expense, and a uniform method of providing for depreciation with rates more or less standardized. If this condition existed, your association could then gather production statistics which would be comparable and which would be valuable to you for your information and guidance. You manufacturers could then talk the same language. You would be in a position to profit from each other's experience, to conduct your plants more efficiently, and, to price your product intelligently.

If this great cement industry is successful, your employees, your stockholders, your customers and our country generally would be materially benefited. It is time for the Government and business to realize that they have here as well as in other industries important tasks before them that can be successfully worked out by friendly cooperation.

Standard Accounting Methods

When business was done on a large percentage of profit, questions of accurate cost and of operating efficiency were not so important, but in most lines of industry to-day the large percentage of profit has passed. Manufacturers are working on smaller margins and must absolutely know what their goods cost. With margins of profit so close, any unreliable method of arriving at cost of production must be eliminated.

It is a fact well understood among business men that the general demoralization in a large number of industries has been caused by [fol. 2423] firms who cut prices not knowing what their goods actually cost to manufacture; the cost of selling also, which is equally important, is almost wholly lost sight of. Are the officers of the companies who are cutting prices right and left, irrespective of their costs, fair to their customers, stockholders, or competitors?

Quality and service are becoming greater factors in the field of

merchandise. Long after the price of a product is forgotten the quality of that product is remembered.

A manufacturer who does not know with a close degree of accuracy what it costs him to produce the different articles he manufactures, and what it costs him to sell them, is not in a position to meet intelligently competition and invites business disaster.

Many of the larger manufacturers have thorough cost accounting systems, which they recognize as necessary in order to give them the information essential to successful management. On the other hand, the number of small manufacturers who have no adequate cost accounting system and who price their goods arbitrarily is amazing.

Proper accounting for the smaller manufacturer is most essential. It is necessary for his success that he know on what particular article he is making a fair profit and on what he is making only a narrow margin of profit or losing money. If he has this information he can concentrate on the manufacture and sale of the product on which the profits are satisfactory.

[fol. 2423½] Whole industries, in many instances, are suffering from a general lack of intelligent knowledge of cost.

How the Commission Can Help

How can the Federal Trade Commission help to improve this situation?

The Commission has no intention and no desire to use compulsory methods. But it does hope to reach the desired end by encouraging improvements in accounting practice, by indorsing standard systems of bookkeeping and cost accounting, and by assisting in devising standard systems, either at the request of individual merchants and manufacturers, or through the association that represents the industry.

It is recognized that no one standard system of accounting is applicable to all classes of business, but that special systems are required for each group or class of commerce and industry.

The Commission, furthermore, while recognizing the commercial advantages to be derived from uniformity of systems, does not advise making a change where systems already installed give adequate information and are economically operated.

All of us are talking a great deal these days about mobilizing American resources. Mobilizing means simply organizing to achieve a common purpose. Many manufacturers seem prone to associate mobilization with expansion. I venture to suggest that you gentlemen may profitably devote some attention to the psychology [fol. 2424] of this error, with a view to getting the true situation indelibly impressed on the minds of the men of the business world.

I hope, now that our business has become normal and our factories are running on full time, that our manufacturers will place capacity ahead of expansion. I hope that, instead of rushing to build additions to their plants, they will ascertain whether or not their present equipment has reached the maximum of a day's work, and then develop the night shift so that every piece of machinery will be work-

ing to its limit. We have an example of what American manufacturers can do along this line in the automobile industry.

We should get away from that old-fashioned notion that the night crew is lacking in efficiency, and that its workmanship is not up to the standard.

There has been over-anxiety to enlarge our industrial plants before we have worked our present equipment to its capacity. Consequently, when there is depression in business in this country, we have an overproduction for our home requirements, and, with no large foreign markets for our surplus of manufactured goods, we immediately start to cut prices, on the plea that such action is necessary in order to keep the plants running to their large potential capacity. This always results in a general demoralization of our industries.

If we can stop this overproduction we will have a surplus of money to invest in foreign countries, instead of having millions tied up in plants that are running three days a week to supply our market, [fol. 2424½] with no returns on the investment.

With present business and profits holding through this year our industrial concerns will reach that commanding position which comes with great and ready cash resources. Among some of our larger concerns this position already has been attained. The United States Steel Corporation began the present year with $105,000,000 in cash. This largest of our industrial companies never before reported cash holdings in excess of $68,000,000. Other concerns, especially those engaged directly in war business, have immense cash holdings.

Our industrial concerns, in short, are fast getting into condition to finance greater business than ever before, not only at home but abroad. They are getting to a place where they will be able to make contracts, say with South American countries, on a basis never before possible to Americans, and to do it without special arrangements with bankers.

One of the commanding holds upon foreign trade which the German dyestuffs manufacturers had, before the war set a barrier against them, was their immense power in working capital, which enabled them to extend credits and to conduct all sorts of aggressive campaigns to get world business. We are getting into a position where we can profit by this example. This will aid us in getting the greatest benefit out of the situation.

Trade associations that are putting forth a special effort to improve their systems of cost accounting, bettering their processes of [fol. 2425] manufacture, obtaining credit information, and endeavoring to improve the welfare of their employees will be important factors in our country's development in the next few years.

Special commendation should be given to associations that are endeavoring to build up industry in these constructive ways. Successful production and successful merchandizing require many steps in the process of changing the form of the raw materials, and putting the product on the market at a figure adequate to cover the cost of production and the cost of selling and net some profit to the

producer, without charging the consumer an excessive price; and neither the individual manufacturer nor the Government alone can work out the many serious economic and business problems involved with the same success as can a group of associated producers, laboring and cooperating together. These associations, when conducted intelligently and rationally, with the thought of bringing about improved business conditions, will make it possible for our industries to compete in price and quality in the markets of the world.

Trade associations should not only be encouraged to increase their membership, but should be furnished by the Government with complete statistics in their particular line and be assisted in every way to develop and stabilize the industry which they represent.

There should be a greater degree of organization and of mutual helpfulness in all lines of trade and industry, so that American business may be welded into a commercial and industrial whole; the part of the Government is to cooperate with business men, on re-
[fol. 2425½] quest, and to bring about the results that will benefit business and hence promote our national welfare.

In European countries the cement industry is organized and centralized to a considerable extent. Wherever cement is manufactured, associations and combinations have been formed among manufacturers and dealers. We find such combines among the cement producers of England, France, Belgium, Russia, Sweden, Norway, Denmark, Austria, Switzerland, Italy, and even Roumania. England once virtually monopolized the world's markets in the cement industry, and by means of preferential tariff agreements with its colonies, which place other countries at a disadvantage, English cement is still exported in considerable quantities to Australia, Canada, Egypt, and other British possessions.

In recent years the German cement industry has made such remarkable progress that its products have superseded very largely those of English manufacture in several countries. The secret of success achieved by the German cement industry is to be found in the co-operation of manufacturers and dealers with a common aim to promote and improve their mutual business interests; and the employment of the most up-to-date results of chemical research and the application of efficient technical methods and standards.

Virtually the whole cement industry of Germany is organized into and controlled by five large cartels which combine about 90 stock companies. These different cartels are again interrelated with one another and have agreements and understandings among themselves as well as with cement syndicates in other countries.

[fol. 2426] All German cement interests are united in the Association of German Cement Manufacturers. In many respects this body is a model trade organization. It offers a typical example of how co-operation among manufacturers of a certain line of business can promote and further the industry in which they are engaged to the mutual advantage of all. Under the auspices of this association chemical research work on a large scale has been conducted for a number of years. It has proved highly successful from the technical

as well as from the financial point of view. As a result of the joint working together of the members of this association a standardized product has been established, and this has contributed materially towards the development of the German export trade in cement. The association requires its members to put a product on the market which comes up to certain specified minimum requirements. One of the main efforts of the association in fact consists in constantly impressing upon its members the fact that it is their duty to produce a uniform and high-grade product only.

Belgium is an important factor in the cement business of the world. The seventeen leading Belgian cement producers are combined in a syndicate whose central selling agency is located in Brussels. They act as a unit, and export cement to many countries. Their chief markets are Holland and Argentina.

The estimated production of Portland cement in the United States for 1915 was 85,732,000 barrels. This production is about 70 per cent of the capacity. If a foreign business could be developed that [fol. 2426½] would take up this surplus capacity and allow the mills to run at a maximum it would prove a great benefit to the country and to the cement industry.

The reason for the advantage enjoyed by European countries in exporting cement is due partly to their better transportation and credit facilities, but to a far greater extent to the co-operation or combination within the industry itself. Not only have combinations existed among cement producers of each European country but agreements or combinations have existed between different countries.

An international cartel has been formed by English, German, Belgian, Danish, Swedish, and Norwegian cement manufacturers for the purpose of regulating prices for oversea export.

The German cement syndicates also have separate agreements with Belgian, Swiss, Danish, and Austrian cartels. A few years ago the South German, Belgian, English, and Norwegian syndicates made a joint agreement with regard to supplying Holland, which produces little or no cement.

Conservation is the handmaiden of prosperity so far as our foreign trade is concerned. Right here I want to emphasize the fact that the owners of our vast natural resources are the trustees of the American people. When they sell their product at ridiculously low prices—the lumber, the copper and the coal that come from nature's storehouses—they are violating their trust, for ruinous trade spells a waste that brings nothing in exchange. Let me call your atten- [fol. 2427] tion to a few facts pertaining to our foreign trade in its relation to natural resources, and to facts concerning the methods to prevent waste that are employed by some of our competitors in the commerce of the world. With these facts the members of your association are well acquainted, but this is a propitious time to give special thought to them.

Frankfort-on-the-Main is the home of a combination of German metal buyers who control the world market for copper, lead, zinc, and various other metals. It is a family affair, and has subsidiary companies in England, France, Belgium, Switzerland, Australia,

Africa, Mexico, and the United States. It owns zinc mines in Oklahoma, smelters in Colorado, and controls one of the greatest metal trading companies in New York City. This giant organization with its affiliations dominates the metal markets of the world. Time and again it has depressed the price of our copper. It is a notorious fact that it has compelled our producers to sell copper to foreign buyers at lower prices than to our home users. In spite of the fact that this country supplies two-thirds of the world's copper, and ought to set the prices, the combination has been able to do this, because it deals with our producers as individuals and plays one against the other.

We don't export much coal, but we sell a great deal to foreign shipowners to bunker their vessels which call at our ports. At Newport News the Pocahontas and New River operators of West Virginia are dumping some of the finest coal in the world into foreign bunkers. The price is set for a year by a combination of English [fol. 2427½] brokers. Last year it was $3.30 per ton, but this year in the face of rising labor costs the combination was able to cut that price to $3.10 because it could get certain mine operators to make low bids. When freight and other charges are deducted this nets $1.38 to $1.43 per ton at the mine, an average of 6 to 7 cents per ton under that charged our own manufacturers. That advantage will be given to foreign shipowners on nearly 2,000,000 tons of West Virginia coal this year.

When conditions arise to threaten waste of the natural resources of our commercial rivals, prompt measures to stop it are taken. Several years ago the German potash miners were competing between themselves and selling potash to foreign countries at a ridiculously low price. Finally they formed a cartel to regulate prices, and were encouraged by the German Government. After this cartel had been in existence for several years a difference of opinion developed and several members withdrew and started negotiations with American buyers for the sale of their potash. One of the largest opened up negotiations with Armour & Company of Chicago, and a contract was made with this firm below the cartel prices. After the contract was sealed, signed and delivered, the German Government notified the independent potash producers that they would have to break the contract; that the prices quoted to Armour & Company were too low; that while the individuals were the owners of the mine they were in reality the trustees for the German people; that the selling of potash to American packers at the price quoted affected every man, woman [fol. 2428] and child in Germany, and that when the potash was gone one of the most valuable resources for Germany's future was destroyed.

That is what Germany does with one of her natural resources. We have a precisely similar opportunity and duty. Down in Tennessee and Florida, and out in the Rockies are the greatest known deposits of phosphate rock, a fertilizer material even more essential to general agriculture than is potash. We produce nearly half the world's output of phosphate rock, and 40 per cent of our production, made up of high grade, goes abroad, chiefly to Europe. Under normal conditions we send 1,000 tons to Germany every day of the

year. Do we follow the wisdom of Germany by combining our producers, charging the prices we ought, and conserving our limited supply of this vital natural resource, so necessary to the future of our agriculture and the low cost of living here? You know the answer. We are selling the best we have as fast as we can at Europe's price.

There are many instances where foreign nations have taken governmental action to prevent waste of natural resources. Italy thus saved its sulphur industry in Sicily from ruin threatened by overproduction and unbridled competition. Roumania has safeguarded its rich oil fields in the same way.

The outstanding fact that confronts us is this: When we buy abroad we are at the mercy of the foreign seller, and when we sell abroad we are at the mercy of the foreign buyer. In the language of the street, they "get us a-comin' and a-goin'." And the reason is [fol. 2428½] that the European industries are organized scientifically to capture foreign trade and to get all there is out of it, while we in America have suffered the consequences of this one-sided organization. There is no agency more able to put American trade on the footing it ought to occupy at the end of the war than the Association of American Portland Cement Manufacturers.

Our method of disposing of our natural products, containing our valuable raw materials, and constituting the chief wealth of our country, should be stopped by the adoption of some practical, reasonable business method. For every dollar's worth of additional wealth that we receive for these products the people of the United States profit, and when we do not receive a fair price for the products that we ship abroad we are impoverishing our people, and our country is that much poorer.

Competition is the same the world over, and it will be particularly keen when the business of peace is resumed among the nations. America's chance at the trade of the world will be helped beyond what it was before by reason of a new, even start with the others in the race, but we must be prepared to match systematized industry against the effective systematized industries of our competitors. We must meet conditions as they exist.

If our business men are to be factors in the world's markets they must receive encouragement to do as our foreign rivals are doing, and the Federal Trade Commission has recommended to Congress that a bill be passed giving the American manufacturer the legal right to form co-operating selling agency in export trade.

The Federal Trade Commission does not believe that Congress in- [fol. 2429] tended by the antitrust laws to prevent Americans from co-operating in export trade for the purpose of competing effectively with foreigners where such co-operation does not restrain trade within the United States and where no attempt is made to hinder American competitors from securing their due share of the trade. It is not reasonable to suppose that Congress meant to obstruct the development of our foreign commerce by forbidding the use, in export trade, of methods of organization which do not operate to the prejudice of the American public, are lawful in the countries where the trade is to be

carried on, and are necessary if Americans are to meet competitors there on equal terms.

By its investigation the Commission, however, has established the fact that doubt as to the application of the antitrust laws to export trade now prevents concerted action by American business men in export trade, even among producers of noncompeting goods. In view of this fact and of the conviction that co-operation should be encouraged in export trade among competitors as well as noncompetitors, the Commission recommended the enactment of declaratory and permissive legislation to remove this doubt.

We feel that we would fail of our duty if we did not urge the pressing need of such action immediately. If American business men are to make the most of the great opportunities now before them, are to build securely in foreign trade, and are to avoid disaster in the shock of the stern and determined competition that will doubtless follow the war, they must at once perfect the organization demanded by the conditions of international trade.

Mr. H. B. Shelly:

J. P. Williams, who has a general store and coal business at Arcola, Montgomery Co., Pa., advised that he handles Allentown Cement at present.

We would like to interest Mr. Williams in Lehigh, and hope that you will find it convenient to call on him towards that end in the near future.

Yours very truly, Allentown Office, Penna. Desk.

[fol. 2452½] DEF'TS' EX. NO. D-380

May 16th, 1916.

Mr. H. A. Swett, Plainfield, N. J.

DEAR SIR: I do not like your report on J. S. & S. Thompson, Elizabeth. You state that Mr. Thompson was not in. Had Penn Allen in stock and a good chance of getting Lehigh in later. Am afraid that you secure more promises than orders. There is no reason in the world why we should not secure a good share of Thompson's business at equal price, and if you put up a proper fight, you should come away with the business.

I have written you under another cover regarding Elizabeth and hope to secure much better results.

In reference to the South River Brick Company, South River, pay close attention to this business. There is no reason why they should not handle Lehigh exclusively, if handled properly and pushed hard enough. I guess you agree with me.

Yours very truly, —— ——, Eastern Sales Manager. BLS/N.

[fol. 2453] DEF'TS' EX. NO. D-381

May 17th, 1916.

Mr. A. M. Houser, Lock Haven, Pa.

DEAR SIR: I am very much disappointed in your report on Baird Rickenbaugh & Co., Osceola Mills, Pa. In 1913 we shipped them 1482 barrels, in 1914-396 barrels and in 1915, not a barrel. It is very evident they are favoring Atlas brand. You are just as good a man as the Atlas man—why don't you make yourself a better?

My idea is that you should get back to Osceola Mills as soon as possible and fight with Mr. Cobenslaw until you can be sure of at least fifty per cent of their business. You have a better brand of cement and with the proper sales talk, you should increase the tonnage in this market.

Your records show that in June 1913, this concern purchased 300 barrels; July-300; August-300 September-300 and October 150 barrels. Why has this business gone to the Atlas Co.? Keep your

records before you at all times and make up your mind that you will not only equal the best year's record in each town, in your territory, but you will beat it.

Yours truly, —— ——, Eastern Sales Manager. BLS/N.

[fol. 2453½] DEF'TS' EX. NO. D-382

May 16th, 1916.

Mr. A. M. Houser, Lock Haven, Pa.

DEAR SIR: I have before me your report on Beyer Trading Company, Ramey, Pa. You state that this concern gives preference to Universal because Lehigh hardened on them and that the Junior member of the concern was the man to see regarding this matter.

Houser, I am beginning to feel that you do not look upon your job seriously enough, and do not realize how necessary it is to fight when you run up against a proposition of this kind. Of course, this party does not use large quantities of cement, but I cannot understand how a Lehigh salesman would allow a statement of this kind to pass on without putting up a good argument. I never before have had knowledge that Universal Cement was better quality and would stock better than Lehigh, and if I had been in your position, I would have waited over in Ramey, seen the son and put up a stiff fight.

This concern handled 672 barrels in 1914 and 405 in 1915 and now you allow the Universal Company to walk in and take this account away from you at an even price. How can you expect to keep your territory in good shape if you work along these lines?

[fol. 2454] Your report on the Pennsylvania Lumber & Construction Co., South Fork, Pa., reads as follows:

"Will probably need a car before long but will not order now. Says we will get the order anyhow when cement is needed." This might be true, but I cannot understand why you could not have secured a 15 day order, if you had gone about it the right way. Our records show that this concern used last year, 350 barrels in March; 150 barrels in April; 200 bar-els in May. Up to date we have only shipped 135 barrels, consequently if they are handling Lehigh exclusively—and I imagine they are as you have not advised otherwise—why should they not be in a position to place an order for delivery within the next fifteen days. If you had used your record book properly, you would have had this information in mind and could have worked along the lines suggested in this letter.

In reference to A. Hostetter, Scalp Level, you state that he has part of a car on hand. Will not order now but when in the market will send us an order. Here is a case where the dealer handles two brands of cement and you should have made a special effort to secure a 15 day order for Lehigh, as it is a very easy matter for him to forget his promise and send his order to Atlas Company when in the market. This party only purchased a small car of cement this year,

which was shipped on March 10th, and it seems to me that with the proper amount of persuasion, he would have placed an order for a 15 days delivery, and you would be assured of the business that might now possibly go to a competitor.

[fol. 2454½] In your report on C. S. Schoff & Bro., Madera, you claim they have a few barrels on hand. According to our records—records which you should have—the last shipment to this concern was made during September of last year and even though Madera might be an extraordinarily small market for cement, it seems to me that inasmuch as this concern only had a few barrels of Lehigh in stock, that with proper salesmanship, you could have secured an order for 15 day delivery. It is dangerous for a dealer at this time of the year with the season opening up, to be short of cement. You could have called their attention to the fact that some one was liable to call on them for a much larger quantity of cement than they had in stock and if immediate delivery could not be made, the order would go to a competitive dealer, and if there was not a competitive dealer in their town, to some dealer in another town.

Buying cement at this time is not the same as buying cement at the end of the season. If there is not an immediate call for it, there certainly will be a call later on. You should have pointed out the fact to them that they used a carload of cement in April last year and a large car in May and that there would no doubt that the demand would be as heavy early this season as it was early last season. You must use more pressure in soliciting business.

Yours truly, —— ——, Eastern Sales Manager. BLS/N.

[fol. 2455] DEF'TS' EX. NO. D-383

Copy for Mr. Horner. N-CP-7.

July 26, 1916.

Mr. F. M. Hoover, Philadelphia Office:

Referring again to the Dayton, Ohio work, this was given to Schaeffer & Gengnagle last night for the Lehigh brand, at a price of $2.02 per barrel in cloth, on the cars, with a cash discount of 12¢ per barrel instead of 5¢, for payment ten days from date of shipment. I do not want you to give this information to anybody, as it is only for your own use. You can readily realize that if it does get out, it will cause me a lot of trouble with contractors in this City who are doing the work.

Very truly yours, John W. Ramsay.

Coplay Cement Manufacturing Co.

Philadelphia

September 29, 1916.

Coplay Cement Mfg. Company, New York City.

GENTLEMEN:

Re Little Bros.

I note Mr. Bale's report of the 27th inst. regarding the above dealers of Englewood, N. J., advising us that they state they will not handle any more Saylor's Cement on account of our selling Humphrey direct on the Pallisade Ave. work.

Our records show that we have shipped Little Bros. nothing this year, and I imagine it will take a good many years for us to supply them anything like the amount of cement we are shipping to Humphrey. It is rather amusing for a dealer to make a report to [fol. 2456] a salesman which is as weak as the above report referred to; however, I think it might be well for Mr. F. A. Bale to have another talk with Little Bros. and explain to them the entire transaction, for if we had not sold Mr. Humphrey direct there were plenty of other manufacturers who would have stepped in and sold him, and our records do not show that Little Bros. ever gave us enough business to take a chance of losing an account similar to the above.

Very truly yours, Coplay Cement Mfg. Company. W. G. Dutton, General Sales Manager.

[fol. 2458] DEF'TS' EX. NO. D-388

Branch Office Pennsylvania Cement Company

Buffalo, N. Y., September 11, 1916.

The Pennsylvania Cement Company, New York City,

DEAR SIRS:

Attention of Mr. E. P. Alker

I wish again to bring to your attention the matter of the John
[fol. 2458½] W. Cowper Construction Company, Buffalo, N. Y., I was in conversation with Mr. Cowper today, he having called me to his office, and he informed me that the Edison Company was still shipping him cement at the old price of $1.66 and within a day or two this would be advanced 15 cents per barrel. This still makes their price five cents per barrel lower than the price in our contract with him and he wishes to take the balance on our contract but does not want to lose the five cents per barrel which the Edison Company have allowed him. He asked me to keep this information from you but I thought best to write you.

If you have anything further to say I would be very glad to hear from you

Yours very truly, Wm. Kraetz.

[fol. 2459] DEF'TS' EX. No. D-389

Sept. 12, 1916.

Mr. William Kraetz, Ellicott Equare, Buffalo, N. Y.

DEAR SIR: We have your favor of Sept. 11th, and note your interview with Mr. Cowper. If the Edison Company agrees to sell him at 5¢ per barrel lower than our price, we do not see what we can do, as we will not cut our price to meet theirs.

Also note your letter to the Kelley Island Lime & Transport Co., for the requirements of a new plant they propose to erect at Buffalo, New York. This undoubtedly will be Lehigh as the Kelley Island Lime & Transport Co. is controlled by the same people who control Lehigh.

I wish you would make it a point to see Mr. Brennan or Mr. Bitterman relative to what the Cheektowaga Constr. Co., propose doing as unless the matter is decided definitely this week, we will have to take steps to finish the job ourselves. Will you let me hear at once regarding this.

Very truly yours, Pennsylvania Cement Company. ——
——, Sales Mgr. EPA:Y.

[fol. 2459½] DEF'TS' EX. No. D-390

Railroad Quotations

New York, June 12th, 1916.

Mr. Edw. Nennig.

DEAR SIR: Referring to conversation on Saturday regarding price named on contract for P. & R. R. R. work of $1.50 delivered f. o. b. cars South Bethlehem Pa., beg to advise that this price is necessary in order to compete with the cement companies who might have a plant located on the P. & R. R. R. This would also apply to price named to any Railroad (other than the C. R. R. of N. J.) where that railroad had a cement plant located. Our price would then be f. o. b. cars the nearest Junction point to this certain railroad. For instance if the P. R. R. asked us for price, we would quote $1.50 f. o. b. cars Phillipsburg to meet the competition of cement plants located on the P. R. R.

Yours very truly, Vulcanite Portland Cement Co. Albert Moyer, Manager of Sales.

[fol. 2460] DEF'TS' EX. No. D-391

New York City, November 14, 1916.

Mr. B. F. Stradley, President, Essex Building, Newark, N. J.

DEAR SIR: The John P. Kane called up today and wanted to know if we would not change our contracts to read: "For the life of the job" or "Until completion of the work". We have been making them out with a date for completion, such as September 1, 1917 and Kane says that in some cases in their experience work has been held up and owing to the late start the job has run beyond the date specified in contracts and they have had to pay more for their material. They say that they sell the cement to their customers for the life of the job without restriction as to time and want to protect themselves; they want to buy their materials in the same manner. As you know, this course is being followed by some of our competitors and I shall be glad if you will let me have your views as to following this plan with Kane in respect to the contracts we have recently booked with them approximately 10,000 bbls. and any other contracts which we may make with them.

Yours very truly, —— ——, Vice-President.

[fol. 2460½] DEF'TS' EX. No. D-392

May 16th, 1916.

Mr. Jos. Fraker, Fairmount, W. Va.

DEAR SIR: I have before your report of the 12th on Grafton Feed & Storage Company, Grafton, W. Va., which reads: "Has car Universal in stock."

I must say Joe, that I am more than surprised to receive a report of this kind from you. It absolutely gives me no information and if I did not know you better, I would imagine that you were not interested in your work whatsoever. Is it fair to the Lehigh Company, when you figure the cost of sales, that you should give us only this limited information?

We are just as much interested in Grafton, W. Va., as we are in New York City or Allentown, Pa., and if we do not sell the cement, we want to know the reason why, as, if it is the fault of our sales organization, we want to remedy it immediately. It is up to you men on the firing line to give us the information in detail, so we can work together. We are just as anxious to sell a carload in a small town as we are to sell a 15,000 barrel contract for a road job.

[fol. 2461] We sold the Grafton Feed & Storage Company in 1913—1142 barrels, in 1914—1625 barrels, in 1915 only 535 barrels, and up to date this year, not a barrel of Lehigh Cement. You have only made two visits in five months time to this town. On your first visit you stated they had 100 barrels in stock and on your second visit you absolutely gave us no information at all.

I realize of course, that you opened up a new account in Grafton last year—the Crystal Ice Company—and we sold them a much larger quantity than we ever sold the Grafton Feed & Storage Co. We have shipped this concern only 300 barrels this year.

I am inclined to believe that Grafton is an important market and should be visited oftener.

In your report on the Crystal Ice Company you stated that Mr. Starcher the buyer was out of town and that you did not see him. You do not give us any information as to the amount of cement they had on hand and as to why we did not receive any business during April or the early part of May.

I believe in this case you should have pushed hard for more information, at least, and I certainly hope that you have in mind to phone Mr. Starcher within a day or so regarding new business. Our records show that this concern also handles Giant cement. In your report you do not give us information as to whether they are continuing to handle this brand.

Yours truly, —— ——, Eastern Sales Manager. BLS/N.

[fol. 2461½] DEF'TS' EX. NO. D-393

Sunbury, Pa., Aug. 15, 1916.

Mr. E. P. Alker, Sales Manager, Penna. Cemt. Co., N. Y. C.

Attention of Mr. Beach

DEAR SIR: Messrs. Eister & Weist state they ordered a small car by mail last evening. Please give same your prompt attention and hurry car through.

Some time ago I received a letter from Mr. Beach stating he understood these people were contractors and not entitled to the dealers price.

In my reply I stated that the Giant and French Co's had each sold them a car this year at the dealers price also that they were advertising our cement for sale and that I did not know whether they used their own teams or not but would find out the next time I called here.

Eister & Weist come under the name of Contractor Dealers and are running and operating a yard here and have their own team with which they make deliveries.

They have sold in small lots all of the cement from the last car we shipped them and have several small contractors who are [fol. 2462] buying our cement of them and who like same.

This is a good connection for us here and as these people are pushing the selling of our cement and I am sure that in another year their business will be worth having. Am enclosing a quotation from the French People at the dealers price and we must give them this price if we want their business.

Please advise.

Yours very truly, A. K. Widenor.

[fol. 2462½] DEF'TS' EX. NO. D-394

August 16, 1916.

Mr. A. K. Widenor, 519 Adams Avenue, Scranton, Pennsylvania.

DEAR SIR: We have yours of August 15th relative to Eister & Weist and believe that you are correct in stating that they should be considered as contractor dealers. We are therefore shipping the car on order at the dealer's price.

Yours very truly, Pennsylvania Cement Company. ——
——, Sales Manager. EPA-H.

[fol. 2463] DEF'TS' EX. NO. D-395

October 27, 1916.

Mr. J. P. Maloney, Boston, Mass.

DEAR SIRS: I note on the Association Report of Contracts under date of Oct. 26, that W. N. Potter & Son at Millers Falls, Mass., have contracted with Vulcanite for five thousand (5000) barrels of cement, evidently, for resale for the Cast Stone Work of the Art Stone Company. Is this our Potter, and do you know of any reason why he should have made a contract with Vulcanite, as it is my understanding that he has not been accustomed to buying that brand.

I also note that Berry & Ferguson made a contract with Atlas for three thousand (3000) barrels for the 1917 requirements of the Cochrane Chemical Company.

Kindly also investigate and report.

Yours very truly, Smith, Sales Manager.

[fol. 2463½] DEF'TS' EX. NO. D-396

Lehigh Portland Cement Co.

Allentown, Pa., July 7th, 1916.

Mr. W. A. Fuchs, Asst. Sales Mgr.

DEAR SIR: We wish to call your attention to conditions in Suffolk County, L. I., Mr. Kunkel's territory. In looking over our records we find the following facts with reference to this county.

#1. Number of Dealers—35.
#2. Number of dealers who bought Lehigh in 1915—20.
#3. Number of dealers who have bough- Lehigh so far this year—11
#4. Of the 19 active dealers records show that 11 stock Atlas in addition to Lehigh, the remainder dividing their business up among several different brands.
#5. Number of inactive dealers—15

#6. Eight of the above inactive dealers handle Atlas only, three handle Atlas with other brands and four have divided their business up among several brands not including Atlas.

[fol. 2464] From the above it will be seen that Atlas have on their active lists approximately 23 dealers against 19 which we had last year and 11 which have bought so far this year.

We also wish to call your attention to the following copies of reports received from Mr. Kunkel this morning with reference to his call on some of the inactive trade in this county handling Atlas.

Northport Lumber & Coal Co., Northport.—"Mr. Coplay says trade has been very good so far this season. Is very pleasant but does not care to add another brand to his cement so long as Atlas is even in price and continues to give satisfaction."

N. B. Rogers & Son, Westhampton, L. I.—"Mr. Rogers friendly as usual. Have some Atlas in stock and nothing moving at present. Shed capacity only one car and he does not care to change so long as trade likes Atlas."

George L. Penny, Mattituck, L. I.—"Mr. Penny says trade is dead here. Just about the time our car was getting low he had an inquiry for some Atlas so he put in a car and has a good part of it in stock. As soon as this moves out will buy some more Lehigh."

John J. Randall Co., Freeport, L. I.—"Mr. Randall not very encouraging. Says they have two brands and will not consider another at present. He prefers Alpha as he has used considerable of that brand in his own work in the past and has added Atlas to meet [fol. 2464½] a local demand. Says two brands are enough and will not consider any more under existing conditions."

From the above it would appear as though the Atlas Company had done considerable missionary work in this county in building up a demand for their brand. According to our records Mr. Kunkel has not covered Suffolk County before this year since April and it would seem to us as though more frequent visits should be made to this particular territory if we intend to increase our tonnage or even hold the accounts which we now have. Possibly we could be of some assistance to Mr. Kunkel by starting a special compaign in this territory and following these dealers closely from this office and the writer will be glad to receive from you any suggestions along this line.

Respectfully submitted, New York Desk, per Hoe. RMH.

[fol. 2465] DEF'TS' EX. NO. D-397

July 10, 1916.

Mr. Fred Kunkel.

DEAR SIR: Referring to Suffolk County, L. I., we find the following facts as obtained from your reports from time to time:

1. Number of dealers, 35.

2. Number of dealers who bought Lehigh in 1915, 20.

3. Number of dealers who have bought Lehigh so far this year, 11.

4. Of the 19 active dealers, records show that 11 stock Atlas in addition to Lehigh, the remainder dividing their business up among several different brands.

5. Number of inactive dealers, 15.

6. Eight of the above inactive dealers handle Atlas only, three handle Atlas with other brands and four have divided their business up among several brands not including Atlas.

From this statement of facts, it appears very much as though Atlas was regaining some of the prestige which they had on Long Island, possibly due to the fact that our canvas- of Suffolk County has not been sufficiently intensive.

Our records show that you have not covered Suffolk County between April and your last very recent visit in this vicinity, and if [fol. 2465½] we intend to increase our tonnage or even hold the accounts which we had last year, it would appear that more intensive work must be done.

mand that more frequent visits must be made, and in this con-

It may be possible that your analysis of the situation does not denection will be glad for your suggestions as to the best method of creating a demand in this territory.

You will possibly recall that we have not been writing special follow-up letters to any of the dealers in your territory owing to the fact that you have previously succeeded in getting around to see your trade sufficiently frequent to preclude the necessity for letter writing.

If there is any way that you feel that we can be of service in helping out this unfortunate condition in Suffolk County, we will be glad to have you advise us. In any event, will you let us hear from you in detail on this proposition.

Very truly yours, —— ——, Asst. Sales Manager. WAF-M.

[fol. 2466] DEF'TS' EX. No. D-398

Lehigh Portland Cement Co.

Elmhurst, L. I., July 15, 1916.

Mr. W. A. Fuchs, Asst. Sales Mgr. Lehigh Portland Cement Co., Allentown, Penna.

DEAR SIR: Your favor of July 10th, showing analysis of Suffolk County, Long Island received.

While the number of dealers who bought Lehigh last year is greater than this year, I would call your atten— to the fact that a number of the yards went into the winter with large stocks of other brands, bought on cheap contracts. I am sure that before the next

six months have passed, we will have back our usual number of Lehigh dealers in this County, as I can think of no one who has dropped Lehigh, to whom we cannot sell cement under present conditions.

Unfortunately, last fall, the Atlas people regained some of their lost ground, when their price did not raise on the same day that ours did, but in several instances we have been able to get back some of our dealers.

[fol. 2466½] Incidently, I am pleased to call your attention to Mr. Swett's letter to me under date of the 11th, on which statement, Suffolk County shows an increase in June's shipments over 1915. However, we cannot expect much increase for the next two months as most of the East end of Long Island is a summer resort section, and the building is generally done in the fall of the year.

At the present minute I cannot think of anything that we can do, outside of our regular campaign, and I will endeavor to cover Suffolk County more often during the next six months of the year.

I would be pleased to go over the situation further with you when you are again in the New York Office, and, in the meantime, will use every effort possible to increase sales and win back any friends which we have lost.

Very respectfully, Fred Kunkel.

[fol. 2467] DEF'TS' EX. No. D-399

February 5th, 1917.

Mr. G. A. Morgan.

DEAR SIR: I note from your week-end letter of the 3rd that Ironclad is very strong with the contractors in Balston and points in that vicinity, although the dealers would prefer to handle Lehigh.

Here's an excellent opportunity for you to put in some good work by calling on the contractors and giving us a list of them so that we may get busy on the advertising campaign. Let us hear from you as to how we can cooperate on this proposition.

Yours truly, —— ——, Eastern Sales Manager. BLS.

[fol. 2467½] DEF'TS' EX. No. D-400

March 1, 1917.

Mr. G. A. Morgan.

DEAR SIR: Wish you would pay special attention to R. P. and L. R. Mead at Ticonderoga and Shook & Putnam at Port Henry, N. Y. Both of these accounts are in the heart of the Ironclad district and we consider ourselves very fortunate in securing the volume of business which we have in times past. You state that Shook &

Putnam have a new manager this year who is favorable to Ironclad. Due to the fact that Feeks is also with this company, we think it behooves you to double your energies to hold this account. In the case of R. P. and L. R. Mead we are positive that the reason for our loss last year was due to salesman's neglect and this is another point for you to follow closely. Kindly govern yourself accordingly.

Yours very truly, Allentown Office, by —— ——. GJB.

[fol. 2468] DEF'TS' EX. No. D-401

Lehigh Portland Cement Co.

Allentown, Pa.

April 16, 1917.

Mr. H. A. Swett.

DEAR SIR: On April 6th you were in Carteret and Roosevelt, Middlesex County, N. J.

The situation at this point certainly does not look as though we are going to line up a new account. As we understand it, Roosevelt is not on a railroad and deliveries must be taken at Carteret. The dealer in Carteret is supplying trade in Roosevelt and vice versa—are we correct?

If, at your request, we remove from our quotation list A. J. Miller Co. who are not handling cement, it leaves but one prospect in a town of 5,000 population, that is Herman Bros. Surely there is more than one building supply dealer in this town and you should have looked up every last one of them, giving us at least two of the most desirable ones to work on.

[fol. 2468½] Understand, we may be wrong and there may not be another dealer in this town but if there is, we will be quick to realize that we have not been fully advised. Your kind attention will be appreciated.

Yours very truly, Allentown Office, by G. J. Bickel.

4/17/17.

Herman Bros. only dealer now at these above two points.

H. A. S.

[fol. 2469] DEF'TS' EX. No. D-402

Lehigh Portland Cement Co.

Allentown, Pa., April 21st, 1917.

Mr. H. A. Swett.

DEAR SIR: With further reference to our letter of April 16th regarding prospective dealers in Somerville on whom you did not send us reports when you were last in that city, we would appreciate your

further word as to whether you called on Sargeant Bros. and if so the chances for our securing their business.

Yours very truly, Allentown Office, by G. J. Bickel.

4/27/17.

Failed to see Mr. Dun on my call to Sargeant Bros. these people tied up with Dragon Co. on acct. of relationship between Dun, Smith & Ackerman of Lawrence Co.

H. A. S.

[fol. 2469½] DEF'TS' EX. No. D-403

March 12, 1917.

Mr. G. A. Morgan.

DEAR SIR: Anibal & Karg, formerly very good dealers of ours at Gloversville, N. Y.

Last year we did not get a very good deal.

You called on them on the 19th and find that prospects for 1917 look good. With the idea of getting a good tonnage out of this town this year we wish you would follow these people very closely as we know they are the only good-sized dealers in the place.

Would suggest you talk advertising strong to these people as it occurs to us that dealers of this size should be interested in this feature.

We await your reports.

Yours very truly, Allentown Office, by —— ——.

[fol. 2470] DEF'TS' EX. No. D-404

March 29, 1917.

Mr. G. A. Morgan.

DEAR SIR: You report your call on the 27th inst. on Anibal & Karg, our dealers at Gloversville, N. Y.

We have impressed upon you many times the importance of our being familiar with the standing of the other dealers in a town. If Anibal & Karg are not going to recognize us and favor us with some business, it is up to you to look around and get a line on the other dealers handling competitive brands. For instance A. E. Brace who we understand handles between five and six thousand barrels of Alpha and Atlas. This is a good account and if you cannot get Anibal & Karg, you should go after these people. Our worst fault in this territory in previous years is that we have been content to follow one account and paid no attention to others, even though we could obtain their business.

We will expect to hear from you as to why you have passed up this town without covering it thoroughly.

Yours very truly, Allentown Office, by —— ——.

[fol. 2470½] DEF'TS' EX. NO. D-405

Copy to G. A. Morgan.
Call these people on the phone and see if you can't pull an order.

April 30th, 1917.

Messrs. Anibal & Karg, Gloversville, N. Y.

GENTLEMEN: On March 26th we quoted you on Lehigh $2.36 per barrel in cotton and $2.11 in paper, f. o. b. cars Gloversville, N. Y. These prices are still effective and are good for your acceptance within five days from date and for shipment within fifteen days from date of your order.

Building statistics show that there is more work contemplated and under way this year than any other previous year. This does not only apply to large undertakings but to small constructions.

The traffic congestion is somewhat relieved but the car shortage is still serious and it has been found necessary to anticipate requirements and give as much time as possible to the railroad companies to supply the shippers with cars.

[fol. 2471] Thinking that you are in the market about this time, we enclose a post card for your use in ordering a car for immediate or fifteen day shipment.

Anticipating the pleasure of supplying you with Lehigh and assuring you of our desire to cooperate with you, we are

Yours very truly, Lehigh Portland Cement Company. ——
——, Eastern Sales Manager.

[fol. 2471½] DEF'TS' EX. NO. D-406

May 11th, 1917.

Mr. G. A. Morgan.

DEAR SIR: We wish you would pay especial attention to the dealer situation at Gloversville, N. Y., which is far from satisfactory.

We are not going to get our share of business out of this town unless we hammer incessantly at Anibal & Karg or else line up a new account.

Wish you would run in here as often as it is possible.

Kindly advise us what, in your opinion, is the best way to go about getting some business out of this place.

Yours very truly, Allentown Office, by —— ——

[fol. 2472] DEF'TS' EX. NO. D-407

August 6th, 1917.

Mr. H. A. Swett.

DEAR SIR:

Re Job NJ-6288, South River, N. J.

You say you reported on this work July 24th. We have no such report, the only one we have received from you being dated July 16th.

July 27th, Brown, Rose & Company, Inc., closed for 4,000 barrels Edison on this work. You cannot expect to get 4,000 barrel contracts unless you stick around and work them.

Yours truly, —— ——, Eastern Sales Manager.

[fol. 2472½] DEF'TS' EX. NO. D-408

Lehigh Portland Cement Co.

Allentown, Pa., October 23rd, 1917.

Mr. F. E. Smith.

DEAR SIR: We note from your report of October 16th that W. C. Nicholson & Co. are going out of the cement business. What prospects can we follow in this town? We certainly should start a campaign so that we can have a live wire in the Spring.

Yours very truly, Allentown Office, by G.

[fol. 2473] DEF'TS' EX. NO. D-409

Use of telephone in conjunction with quotations.

July 28, 1917.

Mr. A. E. Smith.

DEAR SIR: After a thorough analysis of your follow up in conjunction with quotations which have been issued from this office and from Allentown I feel that you can assist your tonnage considerably if you will make use of the telephone when you have received copies of quotations and find that you will not be in the specific town for an extended period.

Of course there is not any doubt in your mind that the best indications we have that a prospect is in the market for cement is receipt of his inquiry as he surely needs cement or is endeavoring to find out the market price, and it is only natural for us to arrive at the conclusion that the former is effective.

I know it is difficult to arrange satisfactory transportation in

South Carolina, and therefore were I you I would make use of the telephone as I know full well that you have plenty of time in every town on account of the limited train schedule.

[fol. 2473½] Take for instance a town like Sumpter you can do all of the work necessary in following all of the dealers both our own and competitors, also following any jobs and then still have several hours on your hands, and I believe that when you have received your morning's mail it will be of considerable advantage to you to sit down and communicate with some of your recent inquirors by telephone.

Of course, we are not anxious for any of our men to resort to the telephone in favor of personal calls, but as stated above I believe that you can keep in touch with the general situation better and receive more favorable consideration in placing orders if you will resort to the immediate touch which is by telephone when you cannot arrange to make the long jump by train.

I will also take this opportunity of requesting you to be pleased in your telephone communications as I believe that the usual three minutes' charge can cover any situation, and if I am sufficiently conversant with the South Carolina territory there is hardly a place where the total charge will be over one dollar for three minutes unless you are located in a far western section and would be calling the eastern section or vice versa.

Kindly accept this letter in the spirit of endeavoring to assist you in additional tonnage and acknowledge receipt, and express your views.

Yours very truly, Virginia Portland Cement Company.
—— ——, District Sales Manager.

[fol. 2474] DEF'TS' EX. NO. D-410

May 17th, 1916.

Mr. A. M. Houser.

DEAR SIR: Keep after the J. T. Foulks Co., Houtzdale, Pa. This looks like an elegant prospect and I certainly would be pleased to see you secure this account.

I am very sorry that you did not call earlier upon Rumberger & Mills at Houtzdale. Try hard to secure this business; after all the time and money spent on this account last year, it would have been good business on your part to have been the early bird. As it is the business has gone to the Universal Company at an even price.

Yours truly, —— ——, Eastern Sales Manager. BLS.

[fol. 2474½] DEF'TS' EX. NO. D-411

July 17th, 1917.
